## FALKLAND ISLANDS.

*Situation and Area.*

The Falkland Islands ("Les Iles Malouines" of the French, "Islas Malvinas" of the Spaniards) are situated in the South Atlantic Ocean, between 51° and 53° S. lat., and between 57° and 62° W. long., about 480 miles N. E. of Cape Horn, and about 1,000 miles due south of Monte Video. They consist of East Falkland Island and West Falkland Island, which, with the adjacent islands, have an estimated area of 2,580 square miles and 2,038 square miles respectively.

There are two groups of dependencies (i) South Georgia with South Orkney and South Sandwich, the boundaries being the 50th parallel of south latitude and the 20th and 50th meridians of west longitude (ii) South Shetland and Graham Land bounded by the parallel of latitude 58° S., and the meridians of longitude 50° and 80° W.

The island of South Georgia lies about 800 miles to the east of the Falkland Islands, South Orkney and South Sandwich being about 450 miles to the south-west and south-east respectively of South Georgia. The northern point of South Shetland is about 500 miles to the south of the Falklands.

*History.*

The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. In 1764 they were taken possession of by France and Bougainville planted a small colony of Acadians at Port Louis in East Falkland. Bougainville was bought out by Spain, ever jealous of interference by other nations in the southern seas, in 1766.

In the following year Captain Byron took possession of West Falkland, and left a small garrison at Port Egmont on Saunders Island, whence it was driven out by the Spaniards in 1770; this action on the part of Spain brought that country and Britain to the verge of war. The Spaniards restored the island in 1771, but it was abandoned in 1774 and no further formal occupation was made until 1820, when the Republic of Buenos Aires established a settlement which was destroyed by the Americans in 1831.

In 1833 occupation of the islands was resumed by the British Government for the protection of the whale fishery. Until 1842, they were under the charge of the Naval officers engaged in making Admiralty surveys. In 1842, a Civil Administration was formed, the headquarters being at Port Louis until the following year when they were removed to Stanley, then known as Port William.

The colony received regular grants in aid from 1841 until 1880 and for a mail service until 1884-5, since which year the colony has been self supporting.

South Georgia and the South Sandwich group were discovered in 1775 by Captain James Cook, who took possession of them for Britain. South Shetland was discovered and taken possession of by Captain William Smith in 1819, and South Orkney by Captain G. Powell in 1821.

The dependencies were visited only by exploring expeditions, sealers, and whalers until the rise of the modern whaling industry in those regions.

*General Description**(a) Falkland Islands.*

The Falkland Islands have a very deeply indented coast line and many good natural harbours. The surface is hilly, attaining its maximum elevation of 2,315 feet in Mount Adam, West Falkland.

The entire country is covered with wild moorland interrupted by outcrops of rock and the peculiar collections of angular boulders named "stone runs."

There is no cultivation except in the immediate vicinity of the settlements and shepherds' houses where vegetables and in a few places hay is grown. The soil is chiefly peat but considerable areas of sand also occur.

Communication is maintained by sea and horses, but there are no roads beyond the immediate vicinity of Stanley, the traveller being guided by natural landmarks. A commencement has been recently made to indicate recognized tracks with direction posts. Trees are completely absent.

The only town is Stanley in East Falkland, with a population of about 1,200. The houses are mostly iron and wood, built as they are required for occupation. It is difficult to rent a house but there are several boarding houses affording fair accommodation. Stanley is a port of register and had, on the 31st December, 1932, 36 vessels aggregating 35,878 tons.

The cost of mutton is 3d. per lb., of beef 5d., fowls' eggs when procurable cost 2½d. to 3d. each, while penguin eggs in spring are sold at a price varying from 4s. to 8s. 6d. per hundred. Milk is priced at 1s. per quart. Most foodstuffs have to be imported.

*Climate and Health.*

In the Falklands the temperature is uniformly low, ranging from 40° to 65° in summer and from 30° to 50° in winter, with an annual mean of 42°.

The annual rainfall seldom exceeds 25 inches, and although snow falls frequently it does not as a rule lie long. In summer the atmosphere is very dry and evaporation rapid.

The climate is rendered trying to people from the United Kingdom on account of the continuous cold and lack of sun and the constant high winds as well as the few opportunities afforded for outdoor exercise. The conditions of living are generally comparable with those obtaining in small towns in the north of Scotland, except that by natural situation the Colony is very isolated and its resources and horizons very limited. A difficulty is experienced in providing any variety of diet and in particular fresh meat other than mutton, and fresh fruit and vegetables are at most times difficult to obtain. The birth rate in 1932 was 21·11 per 1,000 and the death rate 4·55.

*(b) Dependencies.*

The island of South Georgia is a mass of high mountains which are covered with deep snow where they are not too precipitous, while the valleys between are filled with glaciers which in many cases descend to the sea. There is a coastal fringe free from snow in summer and more or less clothed with vegetation, including tussock "grass." Land whaling stations have been established in five of the numerous bays.

The remaining dependencies are even more inhospitable, being nearly completely covered with snow and ice and almost entirely destitute of plant life. All the dependencies have a rigorous climate of Antarctic character.

A land whaling station is operated during the summer months at Deception Island in the South Shetland group.

Another station has been built in the South Orkneys but has not been in actual operation in recent years.

*Industries, Trade and Customs.*

The inhabitants of the Falkland Islands are almost entirely occupied in sheep farming, the whole acreage of the colony being divided into large sheep runs. Wool is the principal product but tallow and hides are also exported. There were in 1932, 615,767 sheep, 9,005 cattle and 3,257 horses in the islands.

Seal oil is also produced for export by a company formed in 1928.

The whaling field of the dependencies, in which whaling by modern methods was first carried on in 1904, has become more productive than all those in the rest of the world combined; a small quantity of seal oil is also produced.

An expedition for research, mainly into whaling, for which the ships "Discovery II." and "William Scoresby" have been acquired, has been operating in the southern seas.

In the case of the Colony proper, the export trade was almost exclusively with the United Kingdom; in the case of the Dependencies no exact figures are available, but the whale and seal oil exported went principally to Scandinavia, Holland and Germany, although the consumption in the United Kingdom was not inconsiderable.

In the case of the Colony proper, 80 % of the imports came from the United Kingdom, 10 % from Uruguay and 7 % from Chile; in the case of the Dependencies no exact figures are available, but the bulk of the coal imported was from the United Kingdom; machinery, equipment and provisions for the whaling expeditions being brought mainly from Norway.

The Customs duties are all specific and are levied on spirits, wines, beer, tobacco and matches (import) and on wool, whale oil, seal oil and guano (export). They are non-preferential except that matches of British manufacture are admitted free, and that the import duty on tobacco and cigarettes produced and manufactured in any part of the British Empire is at nine-tenths of the ordinary rate.

*Education.*

There are two schools in Stanley. A Government school is maintained from public funds, which, whilst being elementary in character, makes provision for attendance at a Continuation Class for a two years' course of further education. There is also a Convent School managed by Roman Catholic Sisters; this school, however, is not subject to Government control, and receives no subsidy.

The Government contributes two-thirds of the cost of the board and lodging of children from the country districts attending school in Stanley.

Four travelling teachers are provided by the Government and three by the Falkland Islands Company. These teachers travel from Settlement to Settlement devoting a certain amount of time to each. The number of children receiving education in the Colony in 1932 was 411.

*Currency and Banking.*

The legal tender currency is British sterling, and local 5s., 1l., and 10s. notes. There are no private banks in the Colony. On 1st April, 1888, a Government Savings Bank was established, in which, on 30th September, 1932, the deposits were 169,199l., belonging to 1,026 depositors.

*The Falkland Islands Company, Limited.*

This company was formed in 1851 to take over from Mr. Lafone, of Monte Video, the district in the East Falkland, now called Lafonia; this district abounded with wild cattle, said to be the descendants of the stock introduced by the Acadian settlers, the capture of which was the company's original object. This, however, was not found profitable, and the company have of late years been engaged in sheep farming on an extensive scale, in shipping, and in the importation of goods.

The company maintains a doctor and a school at Darwin, and contributes to the provision of a salary for a clergyman of the Church of England.

*Means of Communication.*

The vessels of the Pacific Steam Navigation Company call at Stanley on their voyage round South America on an average six times a year in either direction. In order to supplement this service and with a view to ensuring mail communication with the United Kingdom at intervals of not more than a month the Government has recently made arrangements for local vessels to make voyages as required to and from Monte Video, where the mails are transhipped to Europe. Few passenger steamers call at Stanley but passages can, as a rule, be obtained either by cargo vessels direct to England or via Monte Video, whence the voyage can be continued by passenger liner. Inter-insular communication, at approximately monthly intervals, is maintained by the coasting steamer belonging to the Falkland Islands Company, Limited, and by special sailings arranged by the Government. Communication with the Dependencies is maintained by the Tonsberg Whaling Company, under contract with the Government.

The rates of postage are as follows:—

*Letters.*

To the United Kingdom, British Possessions, Egypt, and to places within the Colony: 1d. per oz. or fraction of an oz.

To other countries: 2½d. per oz. and 1½d. for every additional oz. or fraction of an oz.

Two wireless stations for external traffic are maintained by the Government, one at Stanley and one at Cumberland Bay, Grytviken, in the Dependency of South Georgia. A smaller station at Fox Bay on the West Falkland is maintained also by the Government for inter-insular communication. Telegraphic charges are 1s. 4½d. a word to the United Kingdom by direct transmission on short wave. The principal farm stations on East Falkland Island are connected by telephone with the Stanley exchange and those on West Falkland Island with the Government headquarters at Fox Bay.

*Constitution.*

The Government is administered by a Governor, aided by an Executive Council composed of three official members and one unofficial member, and a Legislative Council composed of four official and two unofficial members. The unofficial members of the Legislative Council are appointed by Warrant under the Royal Sign Manual and Signet for a term not exceeding five years.

**FIJI.****Situation and Area.**

The Colony of Fiji comprises all islands, and reefs lying between latitude 15° and 22° between longitude 177° W. and 175° E. It is from Sydney about 1,700 miles, and from Australia 1,100 miles. The Tongan or Friendly Islands 180 miles to the south-east, and Samoa 500 to the north-east. The French colony of Caledonia lies to the westward about 700 miles. The number of islands has been variously at from 200 to 250; but this includes uninhabited rocks and islets.

The dependency of Rotumah consists of islands, rocks, and reefs between 12° and 18° and between 175° and 180° E.

The principal inhabited islands are Viti Levu, 4,053 square miles, Vanua Levu, 2,130 square miles, Taveuni, 217 square miles, Kadavu, 124 square miles, Koro, 58 square miles, Gau, 45 square miles, Ovalau, 43 square miles. The total area of the Colony (including Rotumah, 14 square miles, 7,083 square miles (nearly equal to Wales).

**Physical Features.**

The more important islands are hilly and mountainous, rising more or less abruptly from the shore to a maximum height of 4,300 feet. The hills are generally of a grand and picturesque outline, being composed for the most part of volcanic lavas. Upon the south-eastern or windward sides the islands are covered with dense forests. The lowerlands are more lightly timbered.

and were probably mostly under cultivation at a not distant period when the native population was much larger. On these flats the soil is almost everywhere deep, easily worked, and especially rich in humic acid. The northern and north-western sides of the larger island, or leeward sides, are characterised by a comparative absence of forest lands; and here hills or plains are covered with long reeds or grass, and dotted with clumps of *Casuarina* and *Pandanus*.

Gold (associated with barytes) is being mined close to the head of the Yanawai River, and is also being extracted from an alluvial deposit near Taour. 312 ozs. of gold was exported from the former mine during 1932. Copper ore is found in many places, but does not appear to be of sufficiently high grade to justify working. There are also traces of silver (chloride), tin, antimony, manganese, and other metals.

The country is well watered. Frequent rains keep alive the sources of the thousands of small affluents feeding the main rivers. Of these rivers the Rewa stands first. It is navigable for boats, punts, or flat-bottomed steamers, for 40 or 50 miles from its mouth. Several large streams fall into it, the sources of which lie in the high mountains of the interior 3,000 or 4,000 feet above the level of the sea. Besides these, the Sigatoka, the Nadi, and Ba rivers, with many others, drain the principal watersheds of Viti Levu. In Vanua Levu the rivers are not so large, though they are nearly as numerous. The Dreketi river being first in size is navigable for craft of considerable size for a distance of 15 miles from its mouth. Almost every valley in the group has its stream or brook, from which the native occupants irrigate their plantations of "dalo" (*Calocasia esculenta*).

Fiji is as rich in harbours and roadsteads as it is in rivers. Each island is surrounded by a barrier reef, and, with few exceptions, is accessible through passages usually found opposite to the most considerable valley or river. Between this river and the shore ships lie safely at anchor, protected by an indestructible natural breakwater.

#### Rotumah.

The island of Rotumah, situated in 12° 30' S. lat., 177° 10' E. long., was discovered by the *Pandora*, in 1793, when searching for the mutineers of the *Bounty*. Lying to the north-west from two to four miles from the shore, are three small islets, Hattana, Hofua and Waya. Of these only the last named is inhabited, and it contains but one small village. In 1879 the three principal Rotumah chiefs offered the islands to Great Britain, and they were annexed 13th May, 1881. The population was found at the census of 1921 to number 2,402, of whom two-thirds are Methodists, and the remainder Roman Catholics. The principal island is seven miles long by three miles broad, and contains about 9,000 acres. The staple export is copra.

The natives differ entirely from Fijians in language and in polity. A European Resident Commissioner is the chief executive authority. He also presides over the Rotuma Court of Justice, styled "The Commissioner's Court." The Commissioner's judicial powers are similar to those of a Commissioner of the Supreme Court of Fiji and a District Commissioner of the Colony, but special provision is made for the hearing of indictable cases in Rotuma. There are also two Native Stipendiary Magistrates.

The island is divided into seven districts, over each of which is a chief appointed by the

Governor, and is administered by the Resident Commissioner with the assistance of a Council of Chiefs, held monthly. The Council, an advisory body, consists of the Resident Commissioner (Chairman), the seven District Chiefs, two Native Stipendiary Magistrates, the Native Medical Practitioner, and one representative from each district.

A Rotuma Regulation Board consisting of the Resident Commissioner, and between five and ten native Rotumans, makes regulations relating to the good government and well-being of the natives. All such regulations are subject to approval by the Legislative Council of Fiji.

#### Population.

The aboriginal population of Fiji belongs to the darker of the two great Polynesian families, but, living on the confines of the fairer race, its blood has received considerable admixture. It was estimated in 1859 at 200,000; and in 1871 at 140,000. By the epidemic of measles which occurred in 1875 it was reduced by more than one-fourth. The population of the Colony, as estimated on the 31st December, 1932, was:—

Europeans ...	...	...	4,863
Half-Castes ...	...	...	3,548
Fijians ...	...	...	94,976
Rotumans ...	...	...	2,457
Indians ...	...	...	78,975
Polynesians ...	...	...	1,889
Chinese ...	...	...	1,460
Others ...	...	...	1,230

Total ... 189,398

The births among the native population in 1932 totalled 3,200, and the deaths 1,638. The birth rate was 34·32, and the death rate 17·88 per mil.

The Methodist and Roman Catholic missions gave the following as the number of their adherents at the end of the year 1932:—

Methodist ...	...	...	85,539
Roman Catholic ...	...	...	14,546

Total ... 100,085

#### History.

The islands were discovered by Tasman in 1643, and visited by Captain Cook in 1769. Captain Bligh, on his memorable voyage in the launch of the *Bounty*, sighted part of the group in 1789, and was chased by a canoe from the island of Waya, in the Yasawa group. Missionaries settled in Fiji in 1835, and, after a time, met with great success.

In 1859 Thakombau, the most powerful chief of Fiji, offered the sovereignty of the islands to Great Britain. The offer was declined by the Duke of Newcastle in 1862. About that time the demand for cotton, owing to the American civil war, led to an influx of Europeans into Fiji for the purpose of cotton cultivation. In June, 1871, certain Englishmen set up a Fijian Government, with the principal chief, Thakombau, as king. A constitution was agreed upon, and a Parliament elected. The Parliament and the Government before long drifted into mutual hostility, and the Ministry latterly governed without the aid of the Parliament.

The question of annexing Fiji had been agitated both in Australia and England since 1849 on many grounds, and in 1873, the Earl of Kimberley commissioned Commodore Goolenough.

commanding the squadron on the station, and Mr. E. L. Layard, Her Majesty's Consul in Fiji, to investigate and report on the matter. These Commissioners, in 1874, reported an offer of the cession of the sovereignty of the islands from the chiefs, with the assent of the Europeans, but on certain terms which were not acceptable, and Sir Hercules Robinson, the Governor of New South Wales, was despatched to Fiji in 1874 to negotiate. This mission was completely successful, and the sovereignty of the islands was ceded to Her Majesty by Thakombau, the Chief of Bau, Maafu, who was Chief of the so-called Lau Confederacy, which included not only the Lau Islands, but Taveuni and the greater part of Vanua Levu, and the other principal chiefs, in a deed of cession dated the 10th day of October, 1874. A charter was shortly afterwards issued by Her Majesty, erecting the islands into a separate Colony, and providing for their government.

Levuka, in the island of Ovalau, was at first selected as the European capital, but during the year 1882 the seat of government was transferred to Suva, on the south coast of the island of Viti Levu, with a fine harbour. The white population of Suva is estimated at 1,900.

#### *Climate.*

The climate of Fiji is cool for the tropics, and the country is remarkably free from zymotic and endemic diseases. Malarial fevers have never been met with.

The highest temperature at Suva in 1932 was 92 degrees on Feb. 19th and Oct. 25th, and the lowest 65 degrees on June 19th, July 20th, Aug. 17th and Sept. 9th. The total rainfall was 121.9. The average annual rainfall is 117.62 inches. There is a great variety of temperature and climate to be found in the group. The rainfall extends over the whole year, but May to October is usually the driest period. Between November and April, the wet season, hurricanes and cyclonic storms occasionally occur, December to March being the months of greatest frequency.

#### *Constitution.*

The constitution is regulated by Letters Patent of 9th February, 1929. The Executive Council consists of the Governor, the Colonial Secretary, the Attorney-General, the Colonial Treasurer, the Secretary for Native Affairs, the Secretary for Indian Affairs, and two unofficial members nominated by the Governor.

The Legislative Council consists of the Governor and not more than thirteen nominated members, six European elected members, three native members, and three Indian elected members. The natives retain a large share of self-government. Their system of village and district councils has been recognised and improved, and supplemented by a triennial meeting of the high chiefs and representatives from each province, presided over by the Governor. There is a Native Regulation Board, constituted under "The Native Affairs Ordinance, 1876," which has power to make regulations with regard to the marriage and divorce of natives, succession to property, the jurisdiction and powers of native courts and magistrates in matters of civil and criminal procedure, and also in regard to other matters having reference to the good government and well-being of the native population. All such regulations have to receive the sanction of the Legislative Council.

#### *Shipping.*

Suva and Levuka are ports of Registry under the Merchant Shipping Act. On the 31st December, 1932, there were on the Register 6 steam vessels of a tonnage of 5,730 tons, and 9 motor vessels of a tonnage of 803 tons.

The number of local vessels trading within the Colony and holding Sea-going Certificates from the Marine Board during 1932 was:—

Owned by.	No.	Tons.
Europeans	40	1,620
Natives	24	374
Others	17	209
	<u>81</u>	<u>2,203</u>

The number of merchant vessels entered from overseas at the three ports of entry in the Colony during the year 1932 was 153, the total registered tonnage being 701,196; of these vessels 108 were British, tonnage 440,326; 35 American, 239,199 tons; 1 Norwegian, 2,647 tons; 6 Swedish, 16,939 tons; 2 Panamanian, 2,084 tons; 1 Latvian, 1 ton.

#### *Local Government.*

A municipality was established in 1877 in Levuka, and in 1882 one was established in Suva, on the transfer of the seat of government. These boards are at present regulated by the Municipal Institutions Ordinance, 1909. The governing body in each town is elected by the ratepayers. Rates are collected on land and house property.

The revenue and expenditure in 1932 were:

	Revenue. £	Expenditure. £
Suva municipal council... ..	42,930	35,211
Levuka municipal council... ..	4,321	4,244
Total... ..	<u>£47,251</u>	<u>£39,455</u>

#### *Education.*

The Public Education Ordinance of 1890, was superseded by the Education Ordinance of 1916, which was slightly amended in 1926. The present Education Ordinance of 1929 with its amendments in 1929 and 1930 now annuls the previous Ordinance.

The chief features of the present Ordinance are the transference of the Rating Sections to the draft of a separate proposed rating ordinance; the more complete and effective registration of schools and teachers; the better definition of conditions of grants in aid; the revision of the powers of the Board of Education as newly constituted in 1926, and the general outline of certain desired features of the elementary school curriculum and the management of schools.

Under the Ordinance the only School Districts at present constituted are those of Suva and Levuka for Europeans.

There are two Grammar Schools for Europeans in Suva, one for boys and one for girls, with hostels attached, and a public school in Levuka, all under Government control. The average roll number during 1932 at the Boys Grammar School, Suva, was 150; at the Girls Grammar School, Suva (where boys under 8 are taken), 219. The average roll in 1932 for the Levuka Public School was 95 (boys and girls).

The Queen Victoria Memorial School at Nasinu, near Suva, is intended to provide for the higher education of natives, and is maintained from public revenue. The number of boys on the roll during 1932 was 86.

Schools for the primary education of Fijians may be conducted by the Methodist, Roman Catholic, Anglican, and Seventh Day Adventist Missions, by the Provincial Councils, by any other properly constituted authority or by the Government. Six Provincial schools have been established by the Government at Lau, Taveuni, Lodonu, Kadavu, Nadi, and Sawani, in charge of European Headmasters.

At the end of 1932 there were 176 Government and assisted schools, 106 for Fijians, 48 for Indians, 8 receiving both Fijians and Indians, 12 for Europeans and half-castes, 1 for Chinese and 1 for Melanesians. They had 13,627 pupils, of whom 8,279 were Fijians, 59 Melanesians, 4,150 Indians, 1,143 Europeans and half-castes, and 55 Chinese.

There were in addition 109 recognised schools for Fijians, 21 for Indians and 2 for Europeans. In these schools, 4,910 Fijians, 533 Indians, and 104 Europeans were enrolled.

There were 372 registered and 650 recognised teachers in the Colony at the end of 1932.

The estimated expenditure on Education for 1933 is 45,467*l*.

#### Currency and Banking.

The legal tender currency is Fiji notes and coin. Under Ordinance I., of 1907, a Government Savings Bank was opened in 1908. At the end of 1932, there were 11,898 depositors and 205,586*l*. in deposits. Arrangements were made in 1914 for the issue of Government Currency Notes. At the end of 1932, the circulation of Government Currency Notes was 467,160*l*. Arrangements for the issue of Fiji coin were made in 1933.

The Bank of New South Wales has branches at Suva, Levuka, and Lautoka, and the Bank of New Zealand at the two former places.

#### Industries, Trade, and Customs.

The trade and commerce of the Colony depends for its existence on three staple industries, viz., (1) the cultivation, manufacture, and export of sugar; and (2) of copra (the dried kernel of the coconut); and (3) the growth and export of fruit, principally bananas.

The principal exports at the date of the annexation of the Colony were copra, cotton (Sea Island), and maize, but the export of maize was soon displaced by that of sugar. Cotton continued to be the third export in point of value until the year 1882, after which it gradually subsided until the year 1888, when only 3½ tons were exported. The cotton industry is again receiving attention and 101,997 lbs. of cotton were exported in 1932. As a result of the Ottawa Conference, Australia now admits 40,000 cents of bananas per year, with a preferential duty of 2/6 per cental. Previously, owing to the imposition by the Commonwealth Government in 1921, of a prohibitive duty on imported bananas, the export of this fruit was entirely confined to the New Zealand Market.

The export of fruit consists almost entirely of bananas, pineapples and citrus fruits. Exports, the produce of the Colony, increased in value from 332,026*l*. in 1931 to 1,606,349*l*. in 1932.

In 1932, exports of sugar, copra, and fruit were:—Sugar, 131,302 tons, value 1,289,239*l*.; Copra, 15,076 tons, value 170,240*l*.; Bananas, 346,968 bunches, value 67,237*l*.; Fresh Pines, 1,776 cases, value 668*l*.

The other principal exports in 1932 consisted of:—Beche-de-mer, 2,074 cwt., value 8,801*l*.; Biscuits plain, 133,266 lbs., value 3,135*l*.; Butter, 2,421 cwt., value 11,299*l*.; Coconuts, 330,930 nuts, value 994*l*.; Canned Pines, 621,036 lbs., value 8,095*l*.; Gum, 3,074 cwt., value 3,103*l*.; Hides, 3,473 hides, value 1,724*l*.; Molasses, 9,448 tons, value 9,448*l*.; Shell Trocas, 266 tons, value 12,125*l*.; Soap, plain, 3,141 cwt. value 4,332*l*.; and Vegetables, fresh, 5,892 cwt., value 1,875*l*.

Considerable quantities of rice are grown. A Government rice mill and several small private mills are operated. 648 tons of rice were imported during 1932. This is the lowest figure for some years.

Dairying is an established industry.

Many parts of the Colony seem admirably adapted for cattle and sheep raising.

A biscuit factory and an oil mill have been established in Suva.

The Customs Tariff is, in general, on an *ad valorem* basis, duty being assessed on the value of goods at the Port of Shipment. Practically all products of the British Empire receive preferential treatment, provided that British Empire material and labour represent not less than 25 per cent. of the value of the goods, and that the final processes of manufacture are performed within the Empire.

As a result of the Ottawa conference the special concession given in respect of specified imports from certain scheduled countries, namely the United Kingdom, Canada, New Zealand, and Hongkong, was extended to all parts of the British Empire.

A further amendment was made in the Tariff whereby certain items of British Manufacture received a further preferential treatment. The items affected were, boots and shoes rubber, boots and shoes canvas with rubber soles, motor vehicles including motor cycles, component parts and accessories and tyres and tubes, timber undressed and dressed and other.

The total trade of the Colony in 1932 was 2,556,310*l*.

The total trade was divided as follows:—

	Imports %	Exports %
United Kingdom ..	29.25	49.86
Other British Possessions	57.03	45.74
Foreign Countries ..	11.17	4.27
Parcels Post ..	2.55	—
Ships Stores ..	—	13
	<u>100.00</u>	<u>100.00</u>

The following figures show the trade of the Colony during the last five years:—

Year	Imports.	Exports.	Total Trade.
1928	1,483,169 <i>l</i> .	2,701,251 <i>l</i> .	4,184,420 <i>l</i> .
1929	1,468,609 <i>l</i> .	1,775,998 <i>l</i> .	3,244,607 <i>l</i> .
1930	1,219,184 <i>l</i> .	1,484,526 <i>l</i> .	2,703,710 <i>l</i> .
1931	929,514 <i>l</i> .	1,000,187 <i>l</i> .	1,929,701 <i>l</i> .
1932	857,346 <i>l</i> .	1,698,964 <i>l</i> .	2,556,310 <i>l</i> .

The improvement in trade is due mainly to increased sugar production. The agreements arrived at at Ottawa have placed the sugar industry in a very sound position.

The value of imports from the principal countries during the last five years was as follows:—

Country	1928	1929	1930	1931	1932
United Kingdom	404,718	418,570	373,894	258,171	250,748

United States of America	31,994	121,441	86,224	51,799	25,937

#### Means of Communication.

There is a direct six-weekly cargo service with the United Kingdom.

There is regular steam communication with Australia and New Zealand, a monthly service with Canada, and a monthly service with U.S.A. Inter-island communication is maintained by regular steamer or cutter services.

Postage to the United Kingdom, India, the Australian States, New Zealand, and British Colonies is 2d. for 1 oz., 1d. for every additional oz. To other countries in the Postal Union 3d. for 1 oz., every succeeding oz. 1½d.

Internal postal rates: letters, 2d. for 1 oz., 1d. for every additional oz.; newspapers, for every 4 oz., 3d. A Parcels Post with the United Kingdom was established in June, 1890. The rate of postage is 3 lbs. 3s. 3d., 7 lbs. 5s. 10d., and 11 lbs. 8s. 6d. There is also a parcels post with the Australian States, New Zealand, Canada, India, Ceylon and the United States of America. The rates of postage are as follows:—

*Australia and New Zealand*—

1 lb., 8d.; every additional lb. up to 11 lbs., 6d.

*Canada*—

1 lb., 6d.; " " " " " 6d.

*India and Ceylon*—

3 lbs. 2s. 5d.; 7 lbs. 4s. 7d.; 11 lbs. 7s. 1d.

*United States of America*—

1 lb., 6d.; every additional lb. up to 11 lbs. 6d.

The Colony entered the Postal Union on 1st September, 1891.

The Imperial Postal Order system has been adopted by this Colony.

Letters from England sent *via* San Francisco or Vancouver, reach Fiji in about 28 days.

A wireless telegraphy service is operated in the Colony and directly with Australia, by agreement with the Amalgamated Wireless (Australasia) Ltd. There are stations at Suva and Lautoka in the island of Viti Levu, at Labasa and Savusavu in the island of Vanua Levu and at Waiyero, Taveuni, and Rotuma. Telephone Exchanges have been established at Suva, Levuka, Nausori, Davuilevu, Navua, Taveuni and Savu Savu. Suva is connected by telephone line to Levuka, Navua, Nausori and Vunidawa.

There is no railway in the Colony. The Colonial Sugar Refining Co. owns various tram lines connecting its estates, and these tramlines are in certain cases open to public use. A few good roads have been constructed on the larger islands, and more are in process of construction. An all-weather motor road connecting Savu with Tailevu, Tavua, Ba, Lautoka, Nadi, and Sigatoka is nearing completion. Suva is directly connected by submarine cable with New Zealand, Australia, and Canada.

THE GAMBIA.

*Situation and Area.*

The Gambia is a great river of Western Africa, falling into the Atlantic Ocean by a large estuary measuring in some parts nearly 27 miles across, but narrowing to 10 miles between Bird Island bank and Cape St. Mary, and to little more than two between Barra Point and the town of Bathurst on St. Mary's Island. There are 26 feet of water at the entrance of the river at low tide, and ocean-going steamers drawing not more than 13 feet can at present proceed without trouble to MacCarthy Island. There is no bar to the Gambia River.

The seat of Government is Bathurst, 13° 27' N. lat., 16° 34' W. long., situated on St. Mary's Island, a sandbank about three and a half miles long and a mile and a quarter broad, separated from the mainland by a narrow channel called Oyster Creek. A large portion of the island is a swamp, the level of which is in many parts below that of the river.

The Colony consists of the Island of St. Mary, British Kombo, Albreda, the Ceded Mile, the territories of Brefet and Bajana, and MacCarthy Island, situated between the Falls of Barraonda and Bathurst, and 158 miles distant from the latter. MacCarthy Island forms the line of demarcation between those portions of the river known as the Upper and Lower River. The total area of the Colony is about 69 square miles (equal to Jersey and Guernsey).

The Protectorate extends on both banks of the river for 250 miles from its mouth. By Ordinance No. 7 of 1902 (repealed and replaced by Ordinance No. 30 of 1913) all parts of the Colony, except the Island of St. Mary, were placed under the Protectorate system of administration. The Island of St. Mary has an area of about 2,500 acres, the greater part of which is swampy, and a population of 14,370. The territory administered as Protectorate is 4,069 sq. miles, and has a population of 185,150 (1931 Census). A survey of the boundaries dividing the Gambia from Senegal was completed by the Anglo-French Boundary Commission in 1905.

*History.*

The Gambia was discovered by the early Portuguese navigators, but they made no settle-ment.

In 1588 a patent was granted by Queen Eliza-beth to some merchants in London and Exeter to trade with the Gambia. This Company did not prosper. Its voyages were not slave trading ventures but were made for legitimate commerce. In 1618 King James I. of England granted a charter to Sir Robert Rich and other London merchants. Their enterprise was entitled "The Company of Adventurers of London trading in Africa," and Fort James was built by them on a small island 17 miles above the island of Banjola (now St. Mary's).

About the year 1631 another British chartered company was formed, King Charles I. hav-ing granted a charter to Sir B. Young, Sir R. Digby and others. This venture was re-sponsible for supplying British settlements in the West Indies with slaves for working on the estates.

In 1662 King Charles II. granted a charter to a third company, known as the "Royal Adven-turers of England trading in Africa." A few

years later this company exhausted its capital and surrendered its charter. In 1672 a fourth company was incorporated under the name of the "Royal African Company," and it was not until 1752, after having in its early days reached the highest point of commercial prosperity which had been touched by England in Africa, that it was superseded by the "Company of Merchants." The right of trade was abandoned to England by France under the treaty of Versailles, 1763, which guaranteed to the English their possession of Fort James and of the River Gambia, with the exception of a French factory established at Albreda on the north bank of the river. The same treaty gave the Senegal river to the French, with the exception of an exclusive right to trade with the Arabs at Portendic for gum, which was retained by England. The year 1807 saw the abolition of the slave trade, and though the "Company of Merchants" lingered on with an annual subsidy, the general commerce between Great Britain and Gambia fell off till 1816, in which year a new settlement was formed on the island of Banjola by the English merchants, who resided at Gorée and in Senegal until those places were given up to the French by the Treaty of Paris (1814). The island was re-named "St. Mary's," and the town which was laid out took its name from Lord Bathurst, Secretary of State at that time. The streets to be inhabited first were named after Lord Wellington and his generals at Waterloo.

The settlement was subject to the Government of Sierra Leone, and was annexed to it by Act of Parliament in 1821. From 1816 to 1822 a Military Commandant, aided by a Board of Merchants, called the "Settlement court," administered the government. From 1822 to 1829 the Commandant governed alone.

In December, 1829, the Secretary of State appointed Lieut.-Colonel Alex. Findlay, R.A.C. Corps, as Lieutenant-Governor (the first) "of the settlement of Bathurst and its dependencies in the Gambia." The laws of Sierra Leone remained in force, but the Lieutenant-Governor was not accountable to the officer administering the government there.

The Gambia, in the year 1843, was created an independent Colony, with a Governor and Executive and Legislative Councils for the administration of its affairs. Captain H. P. Seagram, R.N., was the first Governor of the Colony.

By the charter of 19th February, 1866, it became a portion of the Government of the West African Settlements, and continued to be so under the charter of the 19th December, 1874, until it was made a separate Government in 1888.

MacCarthy Island was purchased in 1823, and named after Maj.-General Sir Charles MacCarthy, K.C.B., Governor-in-Chief of the British West African possessions; the ceded mile was granted by the King of Barra in 1826; and British Kombo was granted by the King of Kombo in various cessions in 1840, 1850, and 1855.

In 1897 the countries of Foni and Jarra, on the south bank of the river, came under British protection.

Foreign Kombo was annexed by the British Government and is now divided into North, South and Central Kombo.

The Protectorate system of administration has been established since 1894, and extended from time to time by agreement with the different chiefs concerned, until Ordinance No. 7 of 1902 was

passed, providing fully for the Government of the whole Protectorate, which is divided into four Provinces and again into Districts. There is a Commissioner in charge of each Province, and each District is under a Head Chief, with a native tribunal specially appointed by the Governor.

The Provinces are as follows:—North Bank Province, with the districts of Lower Niumi, Upper Niumi, Jokadu, Lower Baddibu, Central Baddibu and Upper Baddibu. MacCarthy Island Province, with the districts of Sami, Niani, Nianija, Upper Saloum, Lower Saloum, MacCarthy Island, Fulladu West, Eastern Niamina, Western Niamina and Niamina Dankunku. Upper River Province, with the districts of Fulladu East, Kantora Wuli and Sandu. South Bank Province, with the districts of Central Jarra, Eastern Jarra, Western Jarra, Eastern Kiang and Central Kiang, Kombo St. Mary, Kombo North, Kombo South, Kombo Central, Kombo East, Foni Brefet, Bintang-Karenai, Foni Kansala, Foni Bondali, Foni Jarrol and Kiang West.

#### *Inhabitants of the Gambia.*

The inhabitants are mostly of the negro race, the chief tribes being the Jollofs, Mandingoes, Sarahulis, Fullas and Jolas. The country of the Jollofs is on the North Bank or Senegal side of the river, and they form a large portion of the community in the town of Bathurst.

The Mandingoes are the most numerous people on this portion of the African coast, and derive their name from Manding, a town some 700 miles inland and towards the boundary of the Colony of Sierra Leone. They are mostly Mohammedans.

The Jolas come from Foni, between the southern limit of Kombo and on the north bank of the Casamance River. Their country runs in a north easterly direction towards the south bank of the Gambia River as far as the mouth of the Bintang Creek. They are pagans and a wild uncivilised tribe.

The Sarahulis are the most recent arrivals in the Gambia having migrated from the interior of Senegal. They are found chiefly in the eastern portion of the Upper River where they have established fairly large villages. They are all Mohammedans.

The Fullas (not the pure race, the nomads of West Africa) are good farmers and herdsmen. Their features are somewhat of the Asiatic type and their skins of a lighter colour than negroes. The capital of the Fulla country is Timbo in Futta Jallon, and is situated in north latitude 10° 38' and west longitude 11° 10'.

#### *Industry, Trade and Customs.*

There are no mines in the Colony, but in several places in the Protectorate iron ore is to be found in large quantities, although not worth exportation.

A small quantity of cotton is grown, but only for local consumption, and it is made into narrow strips of rough coloured cloth, common to all West Africa. The strips average 27 yards in length and 9 inches in width.

Pottery is made in the Upper River Province. A considerable amount of excellent leather is produced from goat skins. It is not exported but utilised by the people in making bags, slippers, sandals, scabbards, saddles and horse trappings, and the skilful manner in which coloured grasses, silk cotton, etc., are laced through the decorative portion of the leather work is

common to most of Mohammedan West Africa. Each town or village usually has a "Koranki" man, or leather worker.

There is an abundance of fish in the lower reaches of the Gambia River, and large quantities are dried and taken each season into the Protectorate for sale. Quantities of oysters are obtained in the creek, and are cooked by the people for food, the shells being made into native lime.

The ground nut is the staple article of cultivation, and forms the chief export crop of the Gambia. Large quantities of foodstuffs, such as rice, maize, guinea corn, cassava, etc., are raised for local consumption.

A considerable trade is done with the French settlements and the adjoining coast districts in cotton goods, tobacco, rice, and hardware.

The principal imports are cotton goods, rice, kola nuts.

The principal exports in 1932 were:—

	Quantity.	Value.
Ground nuts ...	37,315 tons	£391,659
Hides ...	7,303 No.	816
Palm kernels ...	722 tons	5,550
Wax ...	41,246 lbs.	1,254

The following table shows the percentages of imports and exports by countries:—

A new Customs Tariff Ordinance was passed in 1932, giving preferential treatment to British manufactures and products. The *ad valorem* rates of duties are 10 % on British goods and 12½ % on Foreign goods, except in the case of carriages and parts thereof (inclusive of Motor cars and tyres) where the duties are 5 % *ad valorem* on British goods and 25 % *ad valorem* on Foreign goods. In the case of goods subject to specific duties, a similar preference is given to British goods.

An Export duty of 10s. per ton is levied on ground nuts.

Bathurst is a port of registry, and had, on its Register on 31st December, 1932 (as in 1931), 147 vessels of 3,471 tons gross aggregate tonnage.

#### *Relations with the Interior.*

Since the delimitation of the boundary of the Protectorate by the Anglo-French Commissioner in 1891, steps have been taken to bring the inhabitants of the Protectorate gradually into closer relationship with the Government of the Colony. An Order in Council, issued on the 23rd of November, 1893, provided for the establishment of Her Majesty's jurisdiction within the Protectorate, and since then Ordinances have been passed providing for the establishment of magistrates and also native courts.

Commissioners regularly travel through the Protectorate on both banks of the river for 250 miles. A "yard" or "hut" tax, which averages about 4s. per annum for a family, is imposed in the Protectorate.

#### *Currency and Banking.*

The currency is British West African silver alloy and nickel-bronze coins and British West African currency notes for 20s. and 10s. French 5 franc pieces were demonetised at the beginning of 1922. There is one Bank in Bathurst: the Bank of British West Africa.

A Government savings bank was established in 1886, and had on 31st December, 1932, 1,660*l.* deposited by 739 persons.

#### *Land.*

Land in the Protectorate can be obtained from the Chief of a district for purposes of farming with the sanction of the Governor. Small lots suitable for trading stations may be rented for 3*l.* per annum and upwards. Freehold interests in Crown lands in the Colony are not disposed of except in special circumstances. No leases are issued in the first instance of lands either in the Colony or Protectorate for a longer period than twenty-one years.

#### *Education.*

There is an Education Department under the direction of an Administrative Officer, who is seconded for duty as Superintendent of Education. The Christian schools, which are wholly in the hands of the several denominations, receive grants-in-aid. Of ordinary primary schools in Bathurst, there are one Anglican, two Methodist and two Roman Catholic, with 1,548 scholars in all. Education is not compulsory, and fees are charged. There are two Methodist High schools and two Roman Catholic Secondary Schools, two for boys and two for girls, all under European control. There is also a Mohammedan school with 217 pupils, at which the ordinary rudiments of an English and Arabic education are taught, the upkeep of the premises and the payment of the teachers being borne by the Government, the native Mohammedan community contributing a small fixed annual sum. At MacCarthy Island there is a primary Methodist school with 32 pupils, and a Government Mohammedan school, started in January, 1927, with 43 pupils on the roll.

A total Government grant-in-aid of 2,073*l.* was made to the elementary schools, and of 360*l.* to the secondary schools, during 1932.

#### *Means of Communication.*

Communication between the Colony and Europe is effected by the steamers of Elder Dempster Lines, Ltd., which nominally run monthly between Liverpool and Bathurst. Steamers of the Messageries Maritimes sail to and from Bordeaux and Dakar fortnightly, and by doing an overland journey of about 120 miles from Bathurst to Dakar passengers may get to Europe in eight days.

Internal communication is conducted chiefly by water-borne craft, the Gambia River forming an unrivalled highway for 300 miles. The Government maintains a service of river steamers which run weekly during the trading season and fortnightly at other times of the year.

Telegraph cables place Bathurst in communication with West Africa and cable stations throughout the world.

Bathurst Wireless Station, which has a range of approximately 1,000 miles, communicates with

ships at sea and the important town of Dakar in the French Senegal. Wireless stations are also established at Kuntaur, Georgetown and Basse, and a regular service is maintained between these inland towns and Bathurst.

A central battery telephone system is employed in the town of Bathurst, and in direct connection with Cape St. Mary.

There are no railways. A laterite metalled road connects Bathurst with Cape St. Mary in British Kombo, 7½ miles, crossing Oyster Creek at Denton Bridge. At Mile 6 a similar road leads to Sukuta, one of the principal villages in the Kombo, 5 miles.

Motor cars are used in Bathurst and its vicinity. The rules of the Postal Union have been adopted by the Colony and the Protectorate.

The following are the rates of postage:—

#### Letters.

Internal—1½d. per oz.

Empire and U.S.A.—1½d. for each oz. or fraction thereof.

Other Countries—3d. for the first oz., and 1½d. for each succeeding oz. or fraction thereof.

#### Parcels Post.

If posted locally for delivery within the Colony, 6d. for first 2 lbs., 4d. for each additional lb.

Parcels from abroad redirected to an Inland Office, 6d. for first 2 lbs., 4d. for each additional lb.

If addressed to the United Kingdom or British West African Colonies:—

Not over 3 lbs. to U.K. 2s. 3d.; W.A.C. 2/-.

Over 3 lbs., but not over 7 lbs. to U.K. 3s. 6d.; W.A. Colonies 3/-.

Over 7 lbs., but not over 11 lbs., to U.K. 4s. 9d.; W.A. Colonies 4/-.

Over 11 lbs., but not over 22 lbs., to U.K. 6s. 9d.; W.A. Colonies 7s.

There is no direct parcel post scheme at present with foreign countries. All parcels are forwarded through the medium of the General Post Office, London, a small additional charge being made for onward transmission.

A weekly letter air mail service operates with Europe via London, Paris, Toulouse, Dakar and thence by sea to Bathurst, and *vice versa*, as opportunity occurs.

#### Climate.

The climate of the Gambia during the dry season from the end of November to the middle of May is pleasant and generally healthy. During the wet season—June to October—the conditions are much the same as elsewhere on the West Coast of Africa: the change from excessive dryness to a damp atmosphere is found to be trying. In the interior the temperature is high from March to June. The lowest reading of the thermometer in the shade during 1932 in Bathurst was 60°, the highest recorded temperature being 103° in April.

The rainfall during the year 1932 in Bathurst was 54·08 inches. The rainfall varies considerably; the average is 47 inches.

## GIBRALTAR.

*Situation and Area.*

Gibraltar is a narrow peninsula running southwards from the south-west coast of Spain, in N. lat. 36° 6' 30", and W. long. 5° 21' 13". It consists of a long high mountain called "The Rock," and a very flat sandy plain to the north of it, raised only a few feet above the level of the sea, and called the North Front. Its greatest elevation is 1,396 feet, its length 2½ miles, and its greatest breadth ¾ of a mile. Its area is 1¼ square miles.

*History.*

The rock of Gibraltar, the Mons Calpe of the ancients, remained under the dominion of the Moors until the 15th century, when it was incorporated with the Spanish kingdom of Granada. It was captured by the British forces under Sir George Rooke, 24th July, 1704, and was ceded by the Treaty of Utrecht in 1713. The Treaty of Utrecht was renewed by Article 2 of Treaty of Versailles, 1783. It was successfully defended by Gen. Eliot (afterwards Lord Heathfield) in the great siege of 1779-83.

*General Description.*

The promontory forms one side of a bay, called the Bay of Gibraltar, which is about 4 or 5 miles across, and affords good anchorage for the shipping passing through the Straits. The eastern and northern faces of the Rock are an inaccessible precipice rising abruptly from the sea and the sandy plain known as the North Front, which lies between Gibraltar and the Spanish town of La Línea; from the northern end the Rock runs along southward like a knife edge to the ancient site of O'Hara's Tower, from which it slopes gradually till it terminates in a perpendicular cliff about 100 feet high at the water's edge at Europa; these cliffs are continued along the western face to the New Mole, beyond which the fortress is protected by artificial ramparts. Behind these latter lies the larger portion of the town, covering an area of only ½ by ¼ mile. It is one of the most thickly inhabited places in the world, but it is not unhealthy. Between this part of the town and the southern portion is a picturesque public garden, called the Alameda. The civil population in the southern part of the town is confined to the east and south-east of the South Mole, the remainder of the southern portion of the Rock being entirely taken up with barracks, hospitals, &c., for the Military and the Navy.

Gibraltar is a very popular tourist centre for those wishing to tour Southern Spain, and Morocco. It is extensively used as a port of call and coaling station by shipping, and it is also an *entrepôt* of the trade between England and the Arabian states of Northern Africa, for which it has many advantages, having been ever since its occupation by the British a free port, or practically so.

The naval harbour is on the West side of the Rock. It is formed by three separate Moles known as the "North," "Detached" and "South" Moles. The North Mole runs westward from Devil's Tongue for about 2,900 feet, and then southward, giving a total length of over a mile. The South Mole projects into the sea for a distance of 3,660 feet in a north-westerly direction. The Detached Mole, 2,717 feet long, is so situated between these two Moles as to form a breakwater and leave two means of entrance and exit. The harbour contains a water area of 440 acres. There are three large graving docks for naval purposes, and a small dock which is available for merchant vessels of light draught.

The old wharf at Waterport has been extended and improved by the addition of a new mole, which has been provided with sheds for transit cargo, electrical cranes and other equipment to facilitate the handling of cargo.

About 300 persons are employed in tobacco manufactories, and about 1,200 in the coal depôts. It is a port of registry, having, on 31st December, 1932, 41 vessels, of together 13,158 tons (gross). No statistics of imports or exports are taken.

The revenue is derived from port dues, the rent of the Crown estate in the town, licence duties and fees and import duties.

The present Customs Tariff includes import duties on wines, liquors, spirits, and tobacco with Empire preferential rates, and on motor spirit.

The Government is administered under Letters Patent of the 12th September, 1922, by a Governor, aided by an Executive Council composed of 4 official and 3 unofficial members. The power of legislation is vested in the Governor, who is also the General commanding the garrison. The management of the drainage, water supply, &c., is in the hands of the City Council. Their receipts for 1932 were 118,249*l.* 8*s.* 8*d.*, their expenditure 122,169*l.* 6*s.* 8*d.*, and their debt, on the 31st of December, 1932, 142,260*l.*

There are branches of Barclays Bank (Dominion, Colonial and Overseas), the Credit Foncier d'Algerie et de Tunisie, and several private bankers.

A Government savings bank was founded in 1882, and had on 31st Dec., 1932, 116,715*l.* deposited by 3,230 depositors. Since the 1st Oct., 1898, the legal tender currency has been that of the United Kingdom, and the public accounts are now kept in it, but Spanish money is still freely current. The change from Spanish currency, which had previously been the legal tender, was effected under the provisions of the Orders in Council of the 9th of August, 1898. Under the Currency Note Ordinance, 1927, the currency includes notes issued by the Government of Gibraltar. These notes are of the value of 5*l.*, 1*l.* and 10*s.*

There is daily postal communication with England by way of Spain and France. Rates of postage: Letters, 2*d.* per oz.; newspapers, ½*d.* The internal postage rate is ½*d.* per oz. There is direct telegraphic communication with Spain, and by cables to England, Tangier, Malta, Lisbon, and Cadiz.

Education is compulsory since 1917. There are thirteen elementary schools, subsidised by Government, and several private schools, the number of scholars in average attendance being 2,237 for the school year ending 31st March, 1933. The Government-aided schools are for the most part managed by boards of the different denominations.

## THE GOLD COAST.

### THE GOLD COAST COLONY.

#### *Situation and Native Tribes.*

The Gold Coast Colony, with Ashanti, the Protected Northern Territories, and Togoland under British Mandate, is situated on the Gulf of Guinea, between 3° 7' W. long. and 1° 14' E. long., and is bounded on the west by the French colony of the Ivory Coast, on the east by Togoland under French Mandate, on the north by the French Colony of the Upper Volta, and on the south by the sea.

The area of the Colony is 23,937 square miles, of Ashanti, 24,379, of the Northern Territories, 30,486, and of Togoland under British Mandate, 13,041.

The Colony is inhabited by a large number of tribes, whose customs and forms of government are of a more or less similar character. Each tribe has its own head chief and every town or village of the tribe a chief or headman.

The head chiefs and chiefs form the council of the tribe, and assist in dealing with matters

affecting its general welfare. The suzerainty to the chiefs' stools is for the most part female line, the heir to the stool being chosen from among the sons of the occupant's sister brothers and the male off-spring of his and the mother's side.

The principal sea coast states are the following:—Nzima, Ahanta, Sekondi, Kibi, Edina, Oguaa, Winneba, Assin, Gomoa, Adangme, Awuna and Agbosome.

In the interior of the Colony the states are:—Aowin, upper and lower Sefwi, upper and lower Denkira, Tufel, Esikuma, Ajumako, Birim Akim Abura, Birim Kwahu, Akim Kotoku, Akwapim and western Krobo, Akwamu, Krepi, and Ningo.

A number of different languages are spoken, the principal being, Twi, Fante and Ga; but the use of English is widespread.

For the purposes of administration the Colony is divided into three provinces, each presided over by a Provincial Commissioner. These are further divided into districts, presided over by District Commissioners. Most of these perform judicial duties as magistrates in addition to being in administrative charge of the districts. The districts are as follows:—

1. Western province:—Districts—Axim, Tarkwa, Sekondi-Dixcove, Sefwi and Akim.
2. Central province:—Districts—Cape Coast, Saltpond, Winneba, Western Akim.
3. Eastern province:—Districts—Accra, Juaben, Akwapim, Volta River, Birim Akim-Abuakwa and Birim Kwahu (Togoland).

#### *History.*

Little is known of the history of the Gold Coast prior to the first recorded contact with Europeans, which took place towards the end of the 15th century, but tradition, borne out by the language distribution and by the absence of large earlier settlements, is that the population resulted from a series of immigrations in comparatively recent history.

Of these immigrants the most numerous, the Akans who, displaced by more warlike and organised tribes, came from the north-west of the continent, and sought a place of sanctuary to the forests of the Gold Coast, sections of them eventually reaching the sea, numbers being augmented by a successive waves, the Akans assimilated the aboriginal tribes, gradually occupied the greater part of the coast. Behind the Akans came the Moshi who, by conquest and partly by peaceful penetration, secured supremacy over the inhabitants of the portion of the Gold Coast and established Mamprassi and Dagomba kingdoms under the leadership of sons or other relatives of their leaders. Later date the south-east corner of the Gold Coast, peopled by an infiltration of Ga, Adangme and other tribes from the east and north-east.

The first Europeans to reach the Gold Coast were the Portuguese who, arriving in 1482, built a fort at Elmina eleven years later in order to protect their trading interests. They found a people of hunters and fishermen, primitive in habits and devoid of any understanding of the working of iron and the value of gold. No native state had yet been established but numerous chiefdoms were in existence.

Until the close of the 16th century the Portuguese maintained their trading monopoly. Feeble attempts were made on the part of other European Powers, including the

own of the history of the people prior to the first recorded contact which took place towards the 15th century, but tradition, borne out by the distribution and by the absence of earlier settlements, is that the present population resulted from a series of migrations in comparatively recent times. The immigrants the most numerous, displaced by more warlike tribes, came from the north-west and eventually reaching the coast, being augmented by a successive infiltration of the Akans. The Akans assimilated the aboriginal population, occupied the greater part of the coast. the south-east corner of the Colony by an infiltration of the Akans from the east and north-east. The first Europeans to reach the Gold Coast were the Portuguese who, arriving in 1482, had no permanent interests. They found a people of primitive habits and advanced understanding the working of the slave trade and the value of gold. No native

British, were made to obtain a footing on the Coast, but the Portuguese were never seriously challenged until the advent of the Dutch in 1595.

At first the Portuguese were interested in obtaining gold, ivory and spices, but with the opening up of the New World there came a demand for cheap labour for the plantations. So commenced the transatlantic slave trade which, until its decline and abolition in the 19th century, shaped the history of the Gold Coast.

The main results of the slave trade were two-fold. First, in order to feed the slaves awaiting shipment and their captors, the Portuguese were obliged to introduce food plants and to teach an improved method of agriculture to a people hitherto largely dependent for food on the natural resources of the forest and sea. Secondly, the lucrative nature of the trade attracted the attention of other European nations besides the Portuguese to the possibilities of the Gold Coast.

The Dutch, appearing on the Coast in 1595, rapidly undermined the domination of the Portuguese. In 1637 they captured Elmina and in 1642 the Portuguese abandoned all their possessions in the Gold Coast to the newcomers. Other European Powers, including the British, followed and, fighting amongst themselves, scrambled for a footing on the Coast. By 1750, however, the year in which the African Company of Merchants was formed and subsidised by the British Government to the extent of 13,000*l.* per annum, all had withdrawn except the Dutch with their headquarters at Elmina, the Danes with their headquarters at Christiansborg and the British with their headquarters at Cape Coast Castle.

In 1821 the British Government first assumed the control of the British settlements in the Gold Coast, and the African Company of Merchants was dissolved, its possessions being vested in the Crown and placed under the Government of Sierra Leone. Seven years later, however, the British Government, after considering complete withdrawal from the Coast, entrusted the government of the settlements in the Gold Coast to a Committee of London Merchants. In 1843, however, the 1821 arrangement was restored in consequence of suspected slave trading, which had been abolished by Great Britain in 1833. The year 1850 saw the separation of the British forts and settlements of the Gold Coast from Sierra Leone, the cession of the Danish possessions to Britain and the creation by Letters Patent of Executive and Legislative Councils, but in 1866 government from Sierra Leone was resumed.

In 1872 the Dutch withdrew from the Gold Coast, handing over their possessions to the British. Two years later, after Sir Garnet Wolseley's successful Ashanti campaign, came the final separation from Sierra Leone, measures being taken on the conclusion of peace for placing the government of the Gold Coast on a footing of efficiency and security. A new Charter was issued dated the 24th of July, 1874, separating Her Majesty's Settlements on the Gold Coast and Lagos from the Government of Sierra Leone and constituting them into one Colony under the style of the Gold Coast Colony under a Governor-in-Chief with an Administrator at Lagos.

In 1886 all the settlements and territories belonging to Her Majesty on the Gold Coast were, by Letters Patent dated the 13th January, formed into a distinct Colony, Lagos being separated therefrom. This territory, however, did not include all the areas under British protection and had no specified boundaries. To regularise the position, therefore, these protected areas were annexed to His Majesty's Dominions and declared to be part and parcel of His Majesty's Gold Coast Colony by Order-in-Council of the 26th September, 1901. The boundaries of the Colony thus

constituted were defined by Order-in-Council dated the 22nd October, 1906, and have since remained unchanged.

#### *Constitution.*

The constitutional instrument providing for the Government of the Colony are the Letters Patent and Royal Instructions dated the 23rd of May, 1925, the former of which create the office of Governor and Commander-in-Chief and constitute an Executive Council consisting of such persons as shall be directed by Instructions under the Royal Sign Manual and Signet, and a Legislative Council constituted in such manner and consisting of the Governor and such persons as are directed by the Order in Council of the 8th of April, 1925, and known as the Gold Coast Colony (Legislative Council) Order in Council, 1925. Royal Instructions were also passed on the 23rd May, 1925, directing that the Executive Council should consist of the Colonial Secretary, the Attorney-General, the Treasurer, the Director of Medical and Sanitary Services, and the Secretary of Native Affairs (these to be styled *ex-officio* Members) and such other persons as were at the date of the coming into operation of the aforesaid Letters Patent Members of the Council or as may be appointed under the Royal Sign Manual and Signet or as the Governor may appoint in pursuance of Instructions through a Secretary of State. The Legislative Council for the first time contains an elective element and consists of the Governor as President together with fifteen Official Members and fourteen Unofficial Members. The Official Members are the five senior Members of the Executive Council, the Comptroller of Customs, the Director of Public Works, the General Manager of the Railway, the Commissioners of the Eastern, Central and Western Provinces, as *ex-officio* Members, and such other officials not exceeding two at any one time as the Governor may appoint. The Unofficial Members are six Provincial Members, namely three for the Eastern Province, two for the Central Province, and one for the Western Province; three Municipal Members, namely; one each for the towns of Accra, Cape Coast and Sekondi respectively; one European Mercantile Member, one European Mining Member and three Europeans nominated by the Governor. The Provincial Members are Head Chiefs elected by the Provincial Councils of the said Provinces; the Municipal Members are elected by the electorate of the said towns; the Mercantile Member is elected by the Chambers of Commerce; and the Mining Member is elected by the Chamber of Mines.

#### *Municipal Government.*

The Town Councils Ordinance has been extended to the towns of Accra, Sekondi and Cape Coast. The town of Kumasi in Ashanti is under the control of a statutory corporation styled the Kumasi Public Health Board.

#### *Law and Justice.*

The Law of the Colony is the Common law, the doctrines of equity, and the statutes of general application in force in England, on the 24th July-1874, modified by a large number of Local Ordinances passed since that date. The Criminal Law was codified in 1892, and the civil and criminal procedure are regulated by the Supreme Court and Criminal Procedure Ordinances both originally passed in 1876.

Justice is administered by the Supreme Court, which is presided over by the Chief Justice and five Puisne Judges. Divisional Courts of the Supreme Court are held in different parts of the colony.

There are also a large number of inferior Courts with limited criminal and civil jurisdiction, some of which are presided over by Police Magistrates and the remainder by Commissioners. The Supreme Court has an original civil and criminal jurisdiction, and also decides appeals from the inferior courts. The Chief Justice, and the Judges in their respective provinces have also powers of revision of the decisions of the Magistrates and Commissioners in criminal cases. Appeals from the Divisional Courts and from the Courts of the Provincial Commissioners in land cases lie to the recently established West African Court of Appeal.

Native customary law is administered in all the Courts, in so far as it is not incompatible with any ordinance, or rule, regulation, order, proclamation, or bye-law made under any ordinance for the time being in force in the Colony, and not repugnant to natural justice, equity and good conscience.

Native Tribunals, presided over by Paramount or Divisional Chiefs, are established throughout the Colony, with criminal and civil jurisdiction in cases where the parties are subject thereto. Such jurisdiction has been much increased by recent legislation, and certain judicial powers have also been conferred upon State Councils and Provincial Councils.

There is an appeal from the Tribunal of a Divisional Chief to that of a Paramount Chief, and from a Paramount Chief's Tribunal to the District Commissioner's Court; but, where a title to land is in dispute, the appeal lies from the Paramount Chief's Tribunal to the Provincial Commissioner's Court.

#### Prisons.

There are four convict and 21 local prisons.

The convict prisons are at Accra, Sekondi, Kumasi and Tamale.

The following industries are carried on successfully: Carpentry, cabinet-making, tailoring, mat and basket making, boot and shoe making, weaving, farming, string and rope making, brick-making, brush and broom making.

The Mark System, whereby the remission of one quarter of a sentence can be earned by hard work and good conduct, is applied to all persons sentenced to two years or more.

A Boys' Industrial Home under the control of the Salvation Army has been established at Ada.

#### Climate.

The climate although hot and damp, is cooler than that of most tropical countries situated in similar latitudes. The most adverse feature relative to the residence of Europeans is the very high relative humidity which only falls below 80° in the dry districts of the north and east and during the Harmattan. The average mean temperature is from 77°—81°, being greatest in the north and east and lowest in the forest areas. Extremes of shade temperature have been 110° in Tamale and 49° at Kumasi.

The rainfall varies with the configuration of the country, being greatest in the south-western corner around Axim and least in the far north and coastal belt. There is the double wet season common to Tropical Africa corresponding to the double passage of the sun, the major rains in the south being in May and June and the lesser rains in September and October. In the Northern Territories intensity of the rains is reversed and in the extreme north the passages of the sun are so near to one another in date that there is only one wet season.

The most pronounced season is the Harmattan characterised by a dry north-east wind which blows from the Sahara carrying clouds of red dust during

the period of cessation of the south-west monsoon. This occurs at the period when the sun is passing southwards to the spring solstice during January and February, and the feature is the terrific desiccation of the atmosphere. A drop of 63% of relative humidity has been experienced in 24 hours with a result that papers and books curl up and the skin appears parched and dry. The daily range of temperature is more than doubled and the period is very trying to Europeans. For the year 1932, the average maximum shade temperatures were:—At Accra 85.7° F., Sekondi 89.3° F., Kumasi 87.6° F. and Tamale 93.7° F. The rainfall was 30.34, 28.88, 55.37 and 33.32 inches whilst the mean temperatures were 79.5° F., 80.6° F., 78.1° F. and 80.3° F. respectively.

#### Mail and Steamship Services.

The African Steamship Company and the British and African Steamship Navigation Company Limited are under contract with the Postmaster-General for conveyance of His Majesty's mails between Liverpool and the West and South-West coasts of Africa.

Regular sailings are maintained between Liverpool and West African ports for mails, passengers and cargo. There are also regular sailings from London.

A mail steamer of these Companies leaves Liverpool for Calabar and Port Harcourt alternately once a fortnight. The Port Harcourt Service calls at Madeira, Freetown, Monrovia, Takoradi, Accra, Lagos and Port Harcourt. The Calabar Service calls at Madeira, Las Palmas, Bathurst, Freetown, Takoradi, Accra, Lagos and Calabar; the usual length of voyage being thirteen days to Gold Coast ports.

Cargo steamers are despatched from Liverpool once every three weeks, calling at the principal Gold Coast ports. Length of voyage varies from 20 to 25 days.

Cargo steamers are despatched monthly, or as inducement offers, from New York, calling at the principal Gold Coast ports outwards and homewards. Length of voyage varies from 30 to 35 days.

Cargo steamers are despatched from Hamburg fortnightly, calling at Rotterdam, Antwerp and London for the principal Gold Coast ports. Length of voyage varies from 20 to 30 days.

Cargo Steamers are despatched monthly, or as inducement offers, from Canada to West, South and East African ports, the usual itinerary being Montreal, Freetown, Cape Town, Port Elizabeth, East London, Durban, Lourenço Marques, Beira. This Service occasionally calls at Gold Coast ports homewards. The length of voyage between Montreal and Cape Town is about 25 days.

Elder Dempster Lines, Limited, act as managers for these two companies, and the Agents in the Gold Coast are the West African Lighterage and Transport Company, Limited.

Mail steamers of Chargeurs Reunis Line, sailing from Bordeaux, call at Accra on the homeward voyage for passengers and cargo once a month. Cargo steamers call at regular intervals outwards and homewards. Local Agents:—United Africa Company, Limited, Lighterage Dept.

Passenger and cargo steamers of Compagnie Francaise de Navigation a Vapeur (Cyp. Fabre), and Compagnie Marseillaise de Navigation a Vapeur (Cie Fraissinet), sailing from Marseilles call frequently outwards and homewards at Gold Coast ports. Local Agents:—United Africa Company, Limited, Lighterage Department.

Cargo steamers, with passenger accommodation, of the American West African Line are despatched twice monthly from New York and from the Gulf of Mexico, calling at the principal Gold Coast ports. These sailings are augmented during the Colony's cacao season to relieve congestion of cacao destined

for America. The voyage from New York is now reduced to 28 days. Calls are also made at all ports to Loanda, including the Belgian Congo. Local Agents:—United Africa Company Limited, Lighterage Department.

Cargo steamers of the United Africa Company, Limited, with limited accommodation for passengers, are despatched from Liverpool and the Continent. There are about two sailings per month, and steamers call outwards at all Gold Coast ports, and call homewards as inducement offers. Local Agents:—United Africa Company, Limited, Lighterage Department.

Cargo steamers of the Societe Navale de L'Ouest sail monthly from Hamburg, Antwerp, Havre and Bordeaux and call at the principal Gold Coast ports. They call homewards at continental ports as inducement offers. Local Agents:—United Africa Company, Limited, Lighterage Department.

Cargo steamers of the Navigazione Libera Triestina Line sailing from Venice, Trieste, Naples, Genoa, Marseilles and Barcelona call at the principal Gold Coast ports once every month outwards and homewards. Local Agents:—United Africa Company, Limited, Lighterage Department.

Mail and Passenger steamers of the German-African Lines (Woermann-Linie A.G., Deutsche Ost-Afrika Linie, Hamburg Amerika Linie (Afrika Dienst) and Hamburg Bremer (Afrika Linie) managed by the Woermann-Linie A.G. of Hamburg, sail from Hamburg to West African ports via Rotterdam, Boulogne s.M. and Southampton at about monthly intervals, calling at Freetown, Monrovia, Takoradi, Accra, Lagos, Port Harcourt, Victoria, Tiko, Duala and Fernando Po.

Two to three Mail and Passenger Steamers to South and East Africa are despatched every month from Hamburg, running either via the Canary Islands and Capetown, or via the Mediterranean and Suez, but these steamers do not always call at Gold Coast ports.

Cargo steamers of the above Lines are despatched from Hamburg via Rotterdam, Antwerp and Havre about twice a month at regular intervals to African ports. Representative for the Gold Coast:—Woermann-Linie, Resident Agent, Accra.

The Holland West-Afrika Lijn N.V., Amsterdam, maintain mail, passenger and freight services from Hamburg, Amsterdam and Bordeaux to the West African ports by two sailings monthly.

The mail and passenger steamers are despatched monthly from Hamburg via Amsterdam, Bordeaux (through tickets from United Kingdom), reaching Takoradi in 13 days from Bordeaux. After Accra they proceed down the coast as far as Togo, Dahomey, Nigeria, Fernando Po and the Cameroons.

They call homewards at Accra and Takoradi and reach Europe via Freetown and Conakry within 14 days. All these steamers call at Le Havre homewards and passengers for the United Kingdom are transhipped to Southampton without additional charge.

Cargo steamers of this Line are despatched once every six weeks from Hamburg, Amsterdam and Bordeaux. Several of these boats have limited passenger accommodation. The length of voyage varies from 17 to 27 days.

Local Agents:—Holland West-Afrika Lijn N.V., P.O. Box 269, Accra.

#### Harbours.

The Gold Coast was for many years at a great disadvantage in that it possessed no deep-water harbour. Jetties protected by breakwaters were built at Sekondi and Accra, for the use of surf boats and lighters.

Sekondi has been replaced by a deep-water harbour a few miles to the westward at Takoradi which was

opened to shipping in 1928. The Harbour is 220 acres in extent and provides moorings for six ocean-going ships whilst four can be berthed alongside the main wharf, which contains a large manganese-loading transporter.

#### Internal Communications.

Railway communication consists of a main line running from Sekondi to Kumasi, thence to Accra, a distance of 361 miles, with branches, Takoradi Junction to Takoradi (7 miles), Inohaban Junction to Inohaban (4 miles), Tarkwa to Prestea (19 miles), and Huni Valley to Kade (99 miles). The Main Line and Branches are 3' 6" gauge. There is a branch line, Accra to Weehang (Accra Water Works), 10 miles in length, which is 2' 6" gauge.

The railway gross earnings for the year 1932-33 were 683,103*l*, and the working expenditure, including provision for pensions, was 420,800*l*. (Transport Section excluded.) The total number of miles open for traffic on the 31st March, 1933, was 500, and the capital cost 9,308,174*l*.

The mileage of motor roads maintained by the Public Works Department is 1,844½ miles, as follows:—

	Target Miles.	Tar Sprayed Miles.	Gravel Miles.	Total Miles.
Accra District ..	41½	6½	123½	172
Newam District ..	43	2	74½	119½
Koforidua District	46½	20½	50½	116
Keta District ..	1	5	1	7
Winneba District ..	54½	6½	211½	272½
Cape Coast District	6½	9	151½	223
Sekondi District ..	6	5	108½	119½
Dunkwa District ..	—	2	239½	241½
Ashanti District ..	156	1½	169½	327½
Northern Territories	—	—	247	247
	410½	58	1,376½	1,844½

The mileage of metalled and tarred roads now amounts to 468½ miles. In addition to the 1,844½ miles of motor roads which are under the control of the Public Works Department, there are some 3,900 miles of motorable roads which have been constructed and are maintained by the Chiefs. These roads are all motorable during the dry season and have opened up the country in all directions to motor traffic, and ferries have been installed and bridges built whenever necessary.

The Black Volta rises in the hills near Soukouraba, and the White Volta rises near Quahigouga, both in the French province of Haute Volta. These two rivers converge some 280 miles from the sea on the Ashanti-Northern Territories border and become the River Volta which flows into the sea at Ada. This river is navigable for light draught launches as far as Akuse, and, with the exception of the Krachi rapids, can be used for canoe traffic during certain seasons of the year as far as Yeji. The Ankobra River is navigable for many months of the year by surf-boats and light draught launches for a distance of 50 miles. The Tano, connected with Half Assini, by the main lagoon, and by a tramway, three miles in length, is navigable for light draught launches and canoes as far as Tanoso, a distance of about 60 miles. Rapids at Sutri prevent this river being further utilised.

The ferry over the River Volta at Senkye is capable of taking the largest cars and lorries, and is now worked by an endless chain driven by a petrol motor placed on the ferry boat. A similar ferry is in operation over the same river at Yeji.

The Government maintains a Motor Transport Service, which operates in centres where vehicles provided by private enterprise are unobtainable or

more costly than a Government-owned fleet. The headquarters is at Accra, with branches at Kumasi and Tamale. The department also handles Government cargo and officials' baggage and stores arriving by sea and arranges the coastwise shipping of Government personnel and stores between ports within the Colony.

In addition to their departmental duties, the officers of the Transport Department assist in carrying out the provisions of the Motor Traffic Ordinance by acting as Testing and Certifying Officers.

#### *Medical Facilities.*

Medical Officers are stationed at all the principal centres of the Colony, Ashanti and the Northern Territories. The majority of these officers travel in their districts and give treatment in village dispensaries.

There are 7 European Hospitals in the Gold Coast: 5 in the Colony, 1 in Ashanti, and 1 in the Northern Territories.

There are also 33 African Hospitals: 21 in the Colony, 5 in the Northern Territories, 5 in Ashanti and 2 in Togoland, under British Mandate.

There is in addition one Motor Travelling Dispensary which does valuable work in the mandated area of Togoland.

The Gold Coast Hospital was opened at Accra in October, 1923, and does excellent and steady work and continues to grow in popularity with the native community. It contains over 200 beds and 17 cots, which are nearly always occupied.

In the year 1932-33 it dealt with over 13,000 out- and over 3,300 in-patients, and 560 major operations were performed. At the African Hospital, Kumasi, nearly 14,000 out- and over 2,300 in-patients were treated during the same period.

An up-to-date Maternity Hospital in charge of a Woman Medical Officer, and now containing 28 beds and 24 cots was opened in 1928 at Korle Bu in the immediate vicinity of the Gold Coast Hospital and is highly appreciated. The training of Midwives is carried on here.

In addition to the above there is a Laboratory Services Branch consisting of a central Medical Research Institute situated at Accra, close to the Gold Coast Hospital. Valuable work in Research, Clinical pathology, etc., is carried on by this Branch.

#### *Sanitation.*

The Health Branch of the Medical Department is controlled by a Deputy Director of Health Service who is responsible to the Director of Medical and Sanitary Service. Medical Officers of Health are stationed in five of the most important towns in the Colony and in Kumasi in Ashanti. All Medical Officers are charged with public health duties in their respective districts and in the more populous areas are assisted by European Superintending Sanitary Inspectors.

Public health activities are extended into rural areas as far as the available staff will allow. As close a watch as possible is kept on the smaller towns and villages along the main routes. Every encouragement is given to the people to lay-out their villages on open lines and improve the type of houses erected. Particular stress is laid on the protection and improvement of village water supplies. Progress in rural sanitation has been particularly rapid in Ashanti.

Birth and death registration is in force in thirty recognised registration areas, but cannot be applied yet to the Colony as a whole. For the year 1932 a birth rate of 34.7 and a crude death rate of 21.8 were returned. The infantile mortality rate is somewhat high; the figures for the registration areas for the

year 1932 was 102. The maternal mortality figures for the year 1932 were returned as 2.4 per centum of the total number of deaths, and 1.5 per centum of the total number of live births.

Infant Welfare and ante-natal welfare centres, in charge of Women Medical Officers, have been established at Kumasi, Accra and Koforidua. At the Accra and Kumasi centres wards are attached. At Sekondi and Cape Coast the centres are under the charge of European Sisters of the Gold Coast Branch of the British Red Cross Society.

#### *Posts and Telegraphs.*

The mails exchanged fortnightly between the Gold Coast and other British Colonies on the West Coast and the United Kingdom are carried by the steamers of the British and African Steam Navigation Company and of the African Steamship Company. Mails are exchanged over and with Togoland under French Mandate and with the French Ivory Coast; and direct mails from Hamburg are received fortnightly.

There are 73 Post Offices and 214 Postal Agencies, the distribution being effected principally by rail and motor. When this is impossible a runner service is employed. The rate for letters (1 oz.) within the Empire is 2d., to the United States of America 3d., elsewhere 3d.

There are 4,713 miles of Telegraph Line Wire serving all the principal centres. The rate is 1s. for 12 words, and 1d. per word in excess of 12.

There are 5,474 miles of double wire line and underground cable circuits in use which link up 209 Exchanges and Call Offices throughout the country.

Any passenger or cargo boat entering Takoradi Harbour may be connected to the mainland telephone service and telegraph and phonogram system.

There are about 1,907 telephones, including those in Government Offices, in operation, and extensions to the system are in progress.

Parcel Post despatches are exchanged direct with the United Kingdom and with other British Colonies in West Africa, and the United States of America. Parcels for other countries are forwarded through the United Kingdom. The C.O.D. service from the United Kingdom is extensive.

British Imperial Postal Orders are issued and paid, and an inland and foreign Money Order system is in operation.

A coastal radio-telegraph station at Takoradi transmits radio-telegrams at 9d. per word.

The Eastern Telegraph Company transmits messages by cable to any part of the world from Accra.

#### *Education.*

Education in the Gold Coast has hitherto largely been, and is now to a still greater extent, aided and controlled by Government, and all schools are open to inspection by officers of the Education Department. All teachers are registered, and are paid according to an incrementally graded salary scale.

Apart from a large number of non-aided primary schools, there are twenty-five Government schools and 347 Assisted schools in the Colony, Ashanti, and the Northern Territories. The latest figures show that these Government and Assisted Primary Schools have an enrolment of 42,209 pupils, of whom 10,265 are girls. The largest of the Missions working in these territories is the Presbyterian Church with 118 Assisted Schools followed next in order of size by the Ewe Presbyterian Church with 76 Assisted Schools.

In addition to the Government Primary Schools there are the Accra Government Technical School and four Middle Boarding Schools in different parts of the country. They are all boarding schools established by Government for the purpose of giving

instruction in the more common building and engineering trades with simple literary and technological training.

There are also training schools controlled by the departments concerned, e.g., Posts and Telegraphs, Agriculture and Forestry, and Surveys, where pupils are boarded and trained, being paid a salary while undergoing instruction.

Teachers intended for Government service and certain others receive free board and instruction in the Training Department of the Prince of Wales' College, Achimota.

Teachers are also trained at Wesley College, Kumasi, the Presbyterian Training College at Akropong, Akwapim, the Roman Catholic Training Colleges at Amisano, near Elmina, and at Bla in Togoland under British Mandate.

The training of female teachers by Missions, under conditions of grant similar to those applying to male students at the Mission Colleges, has commenced.

There are two residential Secondary Schools at Cape Coast, both of which are Government aided, one being under the Wesleyan Mission and the other under the English Church Mission Local Authority.

The Roman Catholic, English Church, Wesleyan, and Presbyterian Missions each have residential Girls' Schools in which literary and domestic training is given.

The Prince of Wales' College, Achimota, near Accra, which was opened in January, 1927, is a boarding school open to pupils of all nationalities and religions. It is intended ultimately to provide a complete course of instruction for boys and girls from the Kindergarten stage up to the standard of the London Intermediate Examination. The College also trains teachers for Government and Assisted Schools.

The College is administered by a Council consisting partly of elected and partly of nominated members. It is subsidized by Government.

#### *Currency and Banking.*

Prior to 1912 and 1913 the currency consisted chiefly of British gold (comparatively rare), silver and copper. In 1912, subsidiary nickel-bronze coins (1d., ½d. and ¼d. pieces) were introduced, and in 1913 a special silver currency common to all the British West African Colonies of the same weight and fineness as the corresponding British coins. The coins issued are 2s., 1s., 6d. and 3d. pieces. Owing to the great increase in the demand for currency and the difficulties in obtaining adequate supplies, it was found necessary in 1915 to make British Treasury Notes legal tender, and in 1916 special West African Currency Notes were introduced. 20s. and 10s. Notes are the only values now in circulation, 5s., 2s. and 1s. Notes having been withdrawn. In 1920, owing to the rapid disappearance of silver coins, an alloy coinage was introduced of the same denominations as the silver coins and silver has now practically been withdrawn from circulation. The special West Africa silver and alloy currency and the West African Currency Notes are under the management of the West African Currency Board and are secured by sterling securities held by the Board. Current British gold and silver coins, British 20s. and 10s. Treasury Notes, West Africa Currency silver and alloy coins, West African Currency Notes, and West Africa nickel-bronze coins are all legal tender.

The Bank of British West Africa, Limited, opened at Accra on the 1st January, 1897, and now has branches at all the principal business centres in the Colony.

The Colonial Bank (now Barclay's Bank (Dominion, Colonial and Overseas) Ltd.) began business at Accra in 1917, and branches have now been opened at other

centres. Both Banks have a savings department. In 1888, a Government Savings Bank was established which is now under Post Office management. On 31st December, 1932, the amount to the credit of depositors was 102,653l.

Accounts are kept in sterling.

#### *Population.*

The first attempt to take a census was made in 1891, which, however, covered the Colony only. Since then a census has been made at ten-year intervals, viz.:—1901, 1911, 1921 and 1931. Except in 1901, the whole of Ashanti and the Northern Territories have been included. In a country such as the Gold Coast, imperfect communications and lack of education make the holding of a complete census a matter of great difficulty and even now the figures cannot be considered absolutely accurate.

The approximate African population on Census day, 1931, was as follows:—

The Colony	.. ..	1,545,140
Ashanti	.. ..	582,866
Northern Territories	.. ..	717,283
Togoland (under British Mandate)	.. ..	275,925
		<hr/> 3,121,214 <hr/>

The total number of Non-Africans was returned as 3,182 of whom 104 were "maritime", leaving 3,078 resident in the Colony and its Dependencies. Of these the majority were of British origin. The African Population of some of the chief towns was as follows:—

Accra	.. ..	59,895
Kumasi	.. ..	36,200
Cape Coast	.. ..	17,685
Keta	.. ..	6,392
Sekondi	.. ..	16,742
Teshi	.. ..	5,715
Winneba	.. ..	10,990
Saltpond	.. ..	6,398
Nawam	.. ..	8,822
Asamankese	.. ..	5,900
Koforidua	.. ..	19,634

#### *Industries, Trade and Customs.*

The chief products of the Colony are cocoa, gold, diamonds and manganese. Palm oil, palm kernels, lumber, kola and copra are also shipped.

The cultivation of cocoa was started in Akwapim in 1879, and exports in 1891 realised 4l. Coffee at that time fetched a fair price, and it was not until 1898, when the price for the latter article fell so low as to make its cultivation at any distance from the coast unremunerative, that attention was paid to cacao. Since that year the cacao industry has made rapid strides. In 1900 the value exported was 27,280l., in 1918, 1,796,985l., and in 1920, 10,066,298l. In 1921, although the value fell considerably to 4,764,067l., the quantity of cacao exported exceeded the 1920 export by 8,422 tons. In 1928, 225,007 tons, valued at 11,229,512l., in 1929, 238,068 tons, valued at 9,704,493l., in 1930, 190,580 tons, valued at 6,970,385l., in 1931, 244,097 tons, valued at 5,498,165l., and in 1932, 233,745 tons valued at 5,511,360l., were exported respectively. There is a tax of ¼ of a penny per lb. on cacao exported.

Gold has been exported from the Gold Coast more or less continuously since the discovery of the country by Europeans in the fifteenth century. Up to 1874, however, the industry was almost entirely in the hands of the natives. The first company for gold mining in West Africa was founded in 1874, but did little beyond exploration

A second company, formed in 1879, engaged in mining operations in the neighbourhood of Takoradi, and from that year the progress of mining enterprise is indicated by the rapid increase in the exports of gold bars, the result of European operations, as compared with those of gold dust, the produce of native mining. In 1899 there was a very remarkable development of the mining industry, which, though checked for a while by the disturbances in Ashanti, received a fresh impetus from the passing of the Concessions Ordinance in 1900, the progress of the railway, and general improvement in means of transport.

Gold is widely diffused throughout the Colony, Ashanti, and some parts of the Northern Territories, in quartz and alluvial deposits, while in Wassaw there is good conglomerate or banket formation which is now reported to extend to the Birrim District in the Eastern Province. The rivers are said to be rich in alluvial deposits. From the year 1903 (the first in which reliable statistics of production were kept) to 1921, the gold produced in the colony and Ashanti amounted to 5,062,267 fine ozs., valued at 21,504,750*l*. The highest annual production was in 1914, viz.:—410,655 fine ozs., valued at 1,744,498*l*. In 1928 the value of gold and gold dust exported was 684,815*l*.; in 1929, 869,863*l*.; in 1930, 1,055,634*l*.; in 1931, 1,069,581*l*.; and in 1932, 1,692,665*l*. Extensive deposits of Bauxite exist, the most important being situated near Mpraeso in the Kwahu district where a large quantity of high grade ore has been located. In the Eastern Province near Kibi diamonds have been found, and the alluvial is being worked. The diamond exports in 1925 were 77,313 carats, valued at 98,760*l*.; in 1928, 698,826 carats, valued at 584,279*l*.; in 1929, 660,536 carats, valued at 584,613*l*.; in 1930, 861,119 carats, valued at 658,994*l*.; in 1931, 880,479 carats, valued at 440,924*l*.; and in 1932, 842,297 carats valued at 536,946*l*. Small diamonds have also been found in other localities.

Manganese Ore exists in large quantities close to the railway line about 35 miles from the port of Takoradi. Shipments of the Ore reached 338,657 tons in 1925; 419,224 tons, valued at 748,286*l*. in 1929; 417,490 tons, valued at 823,396*l*. in 1930; 247,191 tons, valued at 388,963*l*. in 1931; and in 1932, 50,688 tons, valued at 123,627*l*.

Modern facilities at the port of Takoradi for shipping large quantities of manganese ore were completed early in 1930.

The trade in products of the oil-palm has suffered severely in the last quarter of a century from the competition of cacao, and except in certain localities, notably the Volta River District, the farming of this kind of produce is neglected.

Native manufactures are insignificant. Cloths are woven in many parts of the country, for the most part of English spun yarn, but in the northern districts occasionally of thread manufactured from the indigenous cotton plant. Narrow strips of four to six inches are woven on a rough hand loom, and stitched together to make clothes of various sizes. Gold and brass are worked by native smiths; canoes are made on the coast rivers; pottery for domestic purposes is made by hand, and wood-carving is done chiefly in Ashanti and Kwahu. Salt is roughly prepared from the lagoons between Accra and Keta and sent up country to the markets of the Northern Territories. Fishing is extensively carried on along the coast, and large quantities of sun-dried fish are sent to the villages and markets of the interior.

Quantities and Values of the following Exports for 1932 were:—

	Quantity.	Value.
Cacao .. ..	233,745 tons	£5,511,380
*Gold (raw) ..	318,431 ozs.	1,236,591
Manganese Ore ..	50,688 tons	123,627
Diamonds .. ..	842,297 carats	536,946
Timber .. ..	299,936 cub. feet	37,389
†Kola Nuts .. ..	7,101 cwt.	6,789
Palm Kernels ..	6,999 tons	60,283

The first in value of the imports in 1932 was cotton manufactured piece goods, provisions—all kinds, machinery, motor spirit, cigarettes, artificial silk manufactures, iron and steel manufactures—other kinds, bags and sacks (empty), apparel, motor-cars and lorries, and illuminating oil.

\* The information given in respect of *Raw Gold* exported in 1932 and in previous years relates to bullion ounces and their estimated value at parity.

The number of fine ounces exported in 1932 was approximately 286,508 and their value, as assessed at the time of shipment, was 1,692,565*l*.

† Exclusive of 44,360 cwt. of kola nuts, valued at 51,755*l*., exported from the Northern Territories (including the Northern Section of Togoland under British Mandate).

The Customs Tariff is non-preferential. The principal cotton Manufactures, artificial silk piece goods, alcoholic liquors, tobacco, timber, certain articles of apparel, milk, cordage and twine, sugar, soap, petrol and kerosene, and a number of other articles are liable to specific duties.

All other articles, unless specifically exempted, are liable to an *ad valorem* duty of 20% except newsprint which is dutiable at 10%.

There is a surtax of 5% of the rates of duty on all articles except cotton manufactures (excluding apparel, sewing cotton, and unenumerated cotton manufactures) and spirits.

### ASHANTI.

Ashanti is inhabited by a large number of confederated tribes, the principal of which are the Bekwais, Adansia, Kokofus, Nkwantas, Kumasis, Agunas, Mamponas, Nutas, Kumawus, Bompatas, Juabins and Ejisus. Each tribe has its own Head Chief, but from time immemorial the King of Kumasi was recognised as the King paramount of the Confederation.

In 1873 the King of Ashanti invaded the British Protectorate with a large army, and reached Elmina, where he was entirely defeated by the British forces under Colonel (afterwards Sir) Francis Festing. Later in the year Captain (afterwards Sir) John Glover was sent to the eastern districts of the Protectorate to organise the tribes in that quarter, for a flank movement against the Ashanti territory. At the same time Sir Garnet, (afterwards Viscount) Wolseley was despatched to the Gold Coast, with British and West Indian troops, native levies, and some seamen and marines, to operate against the Ashantis, starting from Cape Coast. On the 31st of January, 1874, he came into general engagement with the enemy at Amoafu, where he drove them from their position after desperate resistance. The next four days were employed continuously in fighting, until, on the evening of the 4th of February, the British force entered Kumasi. The King had fled to the bush. A few days later Sir John Glover also reached Kumasi. On the 13th, messengers sent by the King concluded a peace with Sir Garnet Wolseley at Fomana, which was afterwards signed with a pencil cross by King Kofi. By the Treaty of Fomana, the King of Ashanti renounced all claims on the Protectorate, promised to protect traders, to abandon human sacrifices, and to pay an indemnity of 50,000 ozs. of gold.

In 1894 Prempeh, who was then King of Kumasi, and had successfully fought against the Nkoranzas, who had revolted against his rule, threatened to attack the Atebubus. This attack was averted by the despatch of a force under Sir Francis Scott, and an ultimatum was then sent to Prempeh warning him not to enter British territory, and suggesting that he should acquiesce in the establishment of a Residency at Kumasi. No definite reply to this suggestion could be obtained, and a military expedition accordingly proceeded to Kumasi, to compel compliance with the demands of Her Majesty's Government. The expedition, under the command of Sir Francis Scott, entered Kumasi without resistance, January, 1896. Prempeh made submission, but, failing to comply with the terms dictated, was brought to the coast as a political prisoner and lodged in Elmina Castle, whence he was eventually

deported to the Seychelles. A Resident was at the same time installed at Kumasi, and thus commenced an entirely new departure in the relations of the Gold Coast Colony with Ashanti.

In 1900 the Governor visited Kumasi, and was there besieged by the Ashantis, the town being closely invested. Provisions ran short, and a part of the garrison, with the Governor, cut their way out; the rest were relieved by Colonel (afterwards Sir J.) Willcocks, commanding the Ashanti Field Force, on 15th July, after severe fighting. The Ashantis were subsequently thoroughly routed at Abuosu.

An Order of the King in Council, dated September 26th, 1901, defined the boundaries of Ashanti, annexed it to His Majesty's Dominions, and provided for its administration under the Governor of the Gold Coast. By a subsequent Order in Council of the 22nd of October, 1906, the boundaries between the Colony and Ashanti, and between Ashanti and the Northern Territories, were re-adjusted and defined, with due regard to tribal lands and natural features.

Ashanti is administered by a Chief Commissioner with an Assistant Chief Commissioner as relieving Officer.

The dependency is divided into the following Districts, each under a District Commissioner with limited powers of jurisdiction:—

Ashanti Akim District.  
Kumasi District.  
Mampong District.  
Musi District.  
Sunyani District.  
Wenchi District.

In 1919 a Circuit Judge was appointed for Ashanti. This officer relieves the Chief Commissioner of practically all judicial work except civil cases and matters in which native customary law is applicable. A Police Magistrate exercises limited jurisdiction in the town of Kumasi.

The peaceful relations which, under the auspices of the Gold Coast Government, have existed for many years now between the Ashantis and the neighbouring tribes have been signified by not infrequent petitions emanating from the Gold Coast Colony as well as from Ashanti for the return from exile of Prempeh, the former Chief of Kumasi. The confidence felt by the Government of the Gold Coast in the loyalty of the Ashanti people led to the granting of this request in 1924, and to approval being given in 1926 of his election by his people as Omanhene or Head Chief of the Kumasi tribe.

Prempeh died on the 12th May, 1931 and was succeeded by his nephew Osei Agyeman Prempeh II as Omanhene of Kumasi on the 7th July, 1931.

### THE NORTHERN TERRITORIES.

In 1897 the territories to the north of Ashanti were constituted a separate district with the title of "The Northern Territories," and placed in charge of a Commissioner, and a grant-in-aid of the expenditure in the Northern Territories was voted by Parliament.

Major H. P. Northcott was appointed Commissioner and Commandant of these territories, with the rank of Lieutenant-Colonel. The negotiations between the British and French Governments for the settlement of territorial questions in West Africa, which had been suspended in 1896, were

resumed in October, 1897; and on 14th June, 1898, after a period of considerable tension in consequence of the proximity of the British and French forces in the disputed territories, a Convention was signed at Paris with a proviso that it should be ratified within six (subsequently extended to twelve) months. By this Convention the boundary between the Gold Coast and the French Colony of the Ivory Coast, which had only been settled in 1889, as far as the 9th parallel of north latitude, was continued northwards along the course of the Black Volta River to the 11th parallel, and it was then drawn along the 11th parallel with a deflection to the north in the neighbourhood of Mamprusi, until it met the Franco-German boundary of 1897. The effect of the Anglo-French Convention of 14th June, 1898, was to leave Bona, Lobi, and Moshi to France, while Dagati, Wa, Mamprusi, and the southern portion of Grunshi were included in the British sphere.

On 14th November, 1899, an agreement was concluded with Germany for the partition of the "neutral zone." This partition assigned Salaga to Great Britain, and Yendi to Germany, and to the north of the zone gave Mamprusi to the former and Chakosi to the latter.

Survey operations were undertaken by Anglo-French and Anglo-German Commissions during 1901-2, for the delimitation of those portions of the boundaries which had not yet been settled.

By the demarcation on the ground of the Anglo-German boundary between the Trans-Volta District and the adjoining Colony of Togo; of the Anglo-German boundary north of the 9th parallel of north latitude; and of the Anglo-French boundary along the 11th parallel of north latitude, all the frontiers of the Colony, Ashanti and the Northern Territories have now been exactly defined.

Provision was made for the administration of the Northern Territories under the Gold Coast Government by an Order of the King in Council of 26th September, 1901, and by an Administrative Ordinance of January 1st, 1902, the Northern Territories were placed under a Chief Commissioner, and divided into the White Volta, Black Volta, Kintampo and Gonja Districts with headquarters at Gambaga, Wa, Kintampo and Salaga.

The Northern Territories are administered by a Chief Commissioner with an Assistant Chief Commissioner as Relieving Officer.

The dependency is divided into the following districts, each under a District Commissioner with limited powers of jurisdiction:—

- Mamprusi District.
- Wa District.
- Lawa-Tumu District.
- Dagomba District.
- Gonja District.

By Order in Council, of the 22nd of October, 1906, the boundaries between the Northern Territories and Ashanti were re-adjusted and defined.

An important step was taken with regard to the Government of this Protectorate by replacing, with effect from the 1st of January, 1907, the former semi-military administration by a staff of Civil District and Assistant District Commissioners, and by establishing new stations. Simultaneously, the 2nd Battalion of the Gold Coast Regiment was disbanded and a force of armed constabulary substituted therefor. In 1929, the Northern Territories Constabulary was disbanded and their duties taken over by the Gold Coast Police.

In 1920 the Circuit Judge, Ashanti, was appointed to exercise in the Northern Territories powers similar to those which he exercises in Ashanti.

### TOGOLAND UNDER BRITISH MANDATE.

The former German protectorate of Togoland is situated on the Gulf of Guinea, bounded on the east by Dahomey and on the west by the Gold Coast and its Protectorates. The actual coast-line lies between 1° 45' and 1° 14' W. longitude, the frontiers, however, especially on the west, opening out considerably. The total area is about 36,500 square miles.

Until 1884-85 the majority of the tribes along the littoral and its immediate hinterland, also those adjoining the Northern Territories of the Gold Coast regarded themselves as being under the suzerainty of Great Britain, but by agreements made with the French on the 24th December, 1885, and with the British on the 14th and 28th July, 1886, when provisional frontiers were fixed, German influence was formally recognized by those Powers. Subsequent agreements dated the 23rd July, 1897, and the 14th November, 1899, between Germany and the Governments of France and Great Britain respectively defined the northern frontiers of Togoland.

Immediately upon the outbreak of war between Great Britain and Germany Togoland was invaded by the Gold Coast forces. On the 6th August, 1914, Captain E. B. Barker entered the capital, Lome, under a flag of truce and on the following day that town and the hinterland for a distance of 120 kilometers from the sea were surrendered. On the 8th August Anecho (Petit Popo) was occupied by the French. Operations on a larger scale commenced on the 11th August when Temporary Lieutenant-Colonel F. C. Bryant landed at Lome. After engagements at Agbelufee and Chra River on the 16th and 24th August respectively the enemy retired on the great wireless station at Kamina, which they destroyed. On the 26th August the Acting-Governor surrendered the Colony unconditionally.

Four *parlers* then took place between Sir Hugh Clifford, governor of the Gold Coast, and M. Noufflard, governor of Dahomey, as the result of which an agreement, subsequently ratified by the governments concerned was drawn up. Under this agreement Togoland was provisionally divided into British and French spheres. To the British were allotted the western administrative areas of Lome and Lomeland, Misahohe, Kete-Krachi and Yendi, and to the French Anecho, Atakpame, Sokode and Sansanne Mangu.

By proclamation dated the 30th September, 1914, civil courts were established under the presidency of political officers seconded from the Gold Coast appeal lying from the district courts to that of a senior political officer. In the absence of a local criminal code, that of the Gold Coast was introduced as a basis of procedure.

In June, 1915, the office of senior political officer was merged in that of the senior military commander, without prejudice, however, to the civil nature of the court concerned.

Boundary adjustments with the French took place in 1920 in accordance with an agreement signed by Lord Milner and M. Simon on 10th July, 1919. Lome and the whole of the coast were given over to the French, and the British

received additional territory in the interior. The area of the British sphere is 13,041 square miles.

In October, 1921, the Council of the League of Nations approved in principle the arrangements made between the British and French Governments for the division of Togoland in accordance with the agreement of 10th July, 1919, and the application to the territories of the Mandate system; and on 20th July, 1922, after a delay due to negotiations between the United States Government and the Mandatory Powers, the Council confirmed the mandates and defined their terms.\*

Togoland under British Mandate is now administered under the provisions of the British Sphere of Togoland Order in Council, 1923, which was issued on the 11th of October, 1923.

Under this instrument, the British Sphere is divided into the Northern Section and the Southern Section. The Northern Section is administered as if it formed part of the Northern Territories of the Gold Coast, and the Southern Section is administered as if it formed part of the Eastern Province of the Gold Coast Colony. The Chief Commissioner's Court of the Northern Territories of the Gold Coast exercises jurisdiction in the Northern Section; and the Supreme Court of the Gold Coast Colony exercises the jurisdiction in the Southern Section.

Subject to the terms of the Mandate, the law for the time being in force in the Northern Territories of the Gold Coast is the law in force in the Northern Section, and the law for the time being in force in the Gold Coast Colony is the law in force in the Southern Section. The Governor of the Gold Coast Colony is empowered to enact Ordinances with respect to the British Sphere as a whole, or with respect to either Section thereof separately. Togoland under British Mandate is not distinguished from the Gold Coast in the statistical returns, but it is beyond question that the revenue which it brings to the Gold Coast is inconsiderable compared with the money expended upon it. It contains no part of the old German railway system, which retains most of the export and import trade of the Southern and richest Section. The towns of Ho and Kpandua are joined to the Gold Coast road system by a road which meets the Volta River at Senchi where there is a power ferry. There is also a direct road from Yendi to Tamale, but the Gold Coast cannot offer prices sufficiently attractive to induce the people to abandon their accustomed market centres on the Lome Railway.

**HONG KONG.***Situation and Area.*

Hong Kong is one of a number of islands situated off the south-eastern coast of China, the mouth of the Canton River, and lies about miles east of Macao, 91 miles south of Canton between 22° 9' and 22° 17' N. lat., and 114° and 114° 18' E. long. The island is an irregular ridge, stretching nearly east and west; its broad and abrupt peaks rising to the height of nearly 2,000 feet above the sea level. Its length about 11 miles, its breadth from 2 to 5 miles, its area about 32 square miles. It is separated from the mainland of China by a narrow strait, known as the Lyeemun Pass, which does not exceed half a mile in width. The opposite peninsula of Kowloon (2½ square miles) was ceded to Great Britain by Treaty entered into by Lord Elgin in 1860 with the Government of China, and now forms part of the Colony; which also includes Stonecutters Green, Apichau, Middle, Round, and other islands.

In 1898 an agreement was concluded with the Chinese Government for the extension of Hong Kong territory by an area adjacent to British Kowloon, in the province of Kwang-tung, including Mirs Bay and Deep Bay, this area to be leased for 99 years; a stipulation was included within the walled city of Kowloon (which is outside of British Kowloon) the Chinese often stationed there should continue to exercise jurisdiction except so far as might be inconsistent with the military requirements for the defence of Hong Kong, but that within the remainder of the newly-leased territory Great Britain should have sole jurisdiction. In 1899 the Chinese ceased to exercise jurisdiction within Kowloon which thereafter, by Her late Majesty's Order in Council, was incorporated in the leased territory and became subject to British rule. The area of the mainland and islands leased is about 32 square miles. A careful survey of the territory was completed in 1904. This New Territory divided into two main districts—the Northern and the Southern—and is in charge of two District Officers, who perform the duties of the officers and magistrates, and are authorised to hold small debts courts. The District Officer of the Northern district has his headquarters at Tai Pó on an arm of Mirs Bay; the headquarters of the Southern district are in Victoria.

*General Description.*

The waterways of the Colony form one of the most magnificent harbours in the world, having an area of ten square miles. The granite hills which surround it rise between 2,000 and 3,000 feet high, the whole offering a *coup d'œil* which blends the wild scenery of Scotland with the classic beauty of Italy. The city of Victoria extends for four miles at the base of the hills which protect the south side of the harbour. Being built on the slope of the hills facing the sea, the general aspect of the town is perhaps more striking and picturesque from the water than that of any other city in the world, whilst many of the streets are shaded with well-grown and handsome trees. Some large and handsome buildings stand on the Praya Reclamation, which was completed in 1903.

Other important reclamation schemes completed in recent years are the Praya East (2,249,000 sq. ft.), Tai Kok Tsui (1,868,590 sq. ft.),

# W TERRITC

Shamahuipo (2,842,000 sq. ft.), and Kowloon Bay (9,539,000 sq. ft.). On the reclaimed area at the northern end of Kowloon Bay an aerodrome has been constructed at Kaitak.

#### Climate.

Though situated within the tropics Hong Kong enjoys a cool winter, the mean temperature falling from 82° in August to 59° in February. Temperatures of less than 40° and of greater than 90° occur occasionally.

The mean annual rainfall is 85 inches, of which 67 inches occurs from May to September.

The relative humidity is very high in the spring, frequently reaching 98%. In the winter it occasionally falls as low as 20%.

The prevalent wind is from E.N.E. in the winter with a mean velocity of 15 m.p.h. in March, when the north-east monsoon is at its height. During the summer months the wind is very variable, both in direction and velocity. In some years a south-west monsoon is fairly persistent, in others intermittent and short-lived.

Typhoons occur occasionally from June to October. Very occasionally they occur before or after this period.

The climate of Victoria is similar in its broad features to that of Kowloon and the New Territories, but at the higher levels, from 1,400 to 1,800 feet above sea level, the temperature is on the average about 3° lower than at the Observatory, Kowloon, in the winter, and 8° lower in the summer. The humidity is usually greater than in Kowloon and approaches saturation for several days at a time during March and April when mist is very prevalent. In summer the city of Victoria, and the rising terraces behind it, derive little or no benefit from the south-west monsoon, being sheltered by steep hills from south-east to south-west. In winter it is exposed to the north-east monsoon, which occasionally blows along the harbour through Lyemum Pass with considerable violence. On the other hand the south-west side of the Island is protected from the north-east monsoon in winter and enjoys the benefit of the south-west monsoon in summer.

#### History.

The Colony, then a desolate island sparsely inhabited by fishermen, was ceded to Great Britain in January, 1841; the cession was confirmed by the Treaty of Nankin in August, 1842; and the charter bears date 5th April, 1843. The additions subsequently obtained on the mainland have been noted above.

Hong Kong did not become of much commercial importance until the discovery of gold in Australia in 1851 and the consequent Chinese emigration. Its trade has gradually increased with the opening up of China to foreign trade.

Large local banking, dock, steamboat, and insurance companies were established between 1865 and 1872, and the trade was greatly increased by the opening of the Suez Canal.

The city is the dépôt for an incessant flow of Chinese emigration and immigration, the number in 1932 being: emigrants, 55,639; immigrants, 232,396, excluding to and from China ports.

#### Population.

1932—Non-Chinese ...	19,984
Chinese ...	850,812
Total (Civil) ...	900,796

#### Industry, Trade, and Customs.

Hong Kong is a free port except for an Import Tariff on all intoxicating liquors, on spirituous liquors containing more than two per cent. of pure alcohol by weight, on tobacco, and on light oils (including motor spirit) and on motor vehicles. There is no Export Tariff.

The position of the island has made it a distributing centre for trade in many kinds of goods. Amongst the principal commodities handled are coal, cotton, and cotton goods, hides, iron and steel, matches, nuts, oils, rice, sugar, silk, sandalwood, tea, tin, wolframite, etc.

Ship-building is a large and growing industry, and there are also factories of very considerable importance engaged in the manufacture of cigars and cigarettes, rope, cement, rubber shoes, and the refining of sugar.

Native industries such as the manufacture of vermilion, sauces, bamboo-ware, building of native craft, etc., are of large and increasing dimensions.

The natural products of Hong Kong are few and unimportant. There is little land suitable for tillage, and nothing is grown but a little rice and some vegetables near the outlying villages. There are large granite quarries both on the island and in Kowloon. A dairy farm supplies fresh meat, poultry, eggs, and milk. The fishing in the waters of the Colony is good and is a source of livelihood to a vast number of Chinese.

The New Territories have extensive cultivable land, on which are grown sugar, rice, vegetables, lychees, pineapples, etc. The cultivation is entirely in the hands of the Chinese villagers and it is doubtful whether European enterprises would be successful.

#### Shipping.

The total tonnage entering and clearing during the year 1932 amounted to 43,824,906 tons, a decrease of 325,115 tons compared with 1931.

There were 26,019 arrivals of 20,899,459 tons and 26,340 departures of 20,894,546 tons.

Of British ocean-going tonnage 6,109,649 tons entered, and 6,092,041 tons cleared.

Of British river steamers 4,105,025 tons entered, and 4,111,503 tons cleared.

Of foreign ocean-going tonnage 8,544,831 tons entered, and 8,522,552 tons cleared.

Of foreign river steamers 548,273 tons entered, and 548,014 tons cleared.

Of steamships under 60 tons trading to ports outside the Colony, 98,620 tons entered, and 99,137 tons cleared.

Of junks in foreign trade 1,493,061 tons entered, and 1,521,299 tons cleared.

Of steamships under 60 tons plying within the waters of the Colony 382,976 tons entered, and 383,204 tons cleared.

Of junks in local trade 629,154 tons entered, and 635,567 tons cleared.

#### Docks.

Hong Kong is well provided with dock accommodation. The Hong Kong and Whampoa Dock Company has three dry docks, the larger one being re-constructed, and two slips at their Kowloon establishment, one dry dock at Mong Kok Tai on the western side of the Kowloon Peninsula, and two at Aberdeen on the south side of the island. The Taikoo Dockyard and Engineering Company has one large dock and three slipways situated at Quarry Bay, just inside the Lyemum Pass.

The Admiralty has built a large dock in the Naval Dockyard in the middle of the City of Victoria. Besides these, there are several building alips and repairing shops owned by Europeans and Chinese in various parts of the Colony.

#### Wharves.

The Hong Kong and Kowloon Wharf & Godown Co., situated on the mainland, has five wharves and can accommodate vessels of 550 ft. in length. No. 1 and No. 5 Wharves are capable of accommodating vessels up to 660 feet.

Alf. Holt & Co. have two wharves at the East Point of the Kowloon Peninsula and have accommodation for large vessels.

At North Point on the Hong Kong side of the Harbour, the Ching Siong Land Investment Co. has built about 1,700 feet of quay walling providing a depth of 30 feet of water alongside at L.W.E.S.T.

In addition, there are many wharves privately owned by shipping firms, situated in the Central district.

#### Government Harbour Moorings.

There are at present laid down in the Harbour for the use of vessels frequenting the Port fifty-six (56) complete sets of Government Harbour Moorings, classed as follows:—

A Class. Moorings for vessels of 450 feet to 600 feet in length O.A. ...	19
B Class. Moorings for vessels of 300 feet to 450 feet in length O.A. ...	29
C Class. Moorings for vessels of less than 300 feet in length O.A. ...	8

#### Currency and Banking.

The currency of Hong Kong consists of the following coins (*vide* Order in Council, 2nd Feb., 1895):—

1. The silver dollar of Mexico.
2. British dollar.
3. The Hong Kong dollar, half-dollar, and 20-cent, 10-cent, and 5-cent pieces, issued from the Hong Kong Mint (1866-68).
4. Half-dollars, 20-, 10-, and 5-cent pieces, imported from England, and coined at the Royal Mint and Birmingham Mint.
5. Copper coins representing one-hundredth part of the dollar (called one cent), and one-thousandth part of the dollar (mil or cash), imported from England.

There were issued from the Hong Kong Mint 2,108,054 dollars and 58,587 half-dollars; and 20-, 10-, and 5-cent pieces to the nominal value of \$402,671. There were obtained from England, and there were in circulation on 31st Dec., 1932, subsidiary coins (which now include half dollars) to the nominal value of \$18,054,370.

The coins issued from the Hong Kong Mint are never met with in the Colony now.

The principal Banks are the Hong Kong and Shanghai Banking Corporation, Ltd., the Chartered Bank of India, Australia and China, the Mercantile Bank of India, the P. & O. Banking Corporation, Ltd., the National City Bank of New York, the Yokohama Specie Bank, the Bank of Taiwan, the Netherlands-India Commercial Bank, the Netherlands Trading Society, the Banque de l'Indo-Chine, the Crédit-Foncier d'Extrême Orient. The first named bank conducts a Savings

Bank. There are also a large number of Chinese banks.

The Hong Kong and Shanghai Banking Corporation, the Chartered Bank of India, Australia and China, and the Mercantile Bank of India are authorised to issue notes in the Colony, the total circulation amounting to \$153,611,606 at the close of 1932.

Local weights and measures are the following: tael = 1½ oz.; 1 picul = 133½ lbs. (avoirdupois); catties = 1 imperial gallon.

#### Revenue.

Revenue is derived from duties on intoxicating liquor, which in 1933 were expected to realize \$1,900,000, tobacco \$2,600,000 stamp revenue \$2,136,000. A considerable sum is also derived from the Opium monopoly, municipal rates for police, lighting, water, etc. (the rates according to the districts varying from 15 to 17 per cent. on the annual value of property), land revenue, stamp duties, and other fees. It was expected that land sales would realise \$2,400,000.

The total revenue for 1933 is estimated at \$33,027,000.

There is a Public Debt of 1,485,733½ and \$4,927,000. The amount at credit of the Sinking Fund are £832,751 and £125,792.

#### Means of Communication.

Hong Kong is extremely well situated as regards telegraphic communication in all directions with all parts of the world. The Eastern Extension Telegraph Company (British) by means of three cables to Singapore, one direct and one each *via* Labuan and Cape St. James respectively, provide good connections with Europe *via* India, with Australasia, and with the other British Colonies and possessions. By their cable to Manila connection is made with the direct American cable, thence to San Francisco. Two cables to Shanghai, belonging respectively to the Eastern Extension and to the Great Northern (Danish) Companies, *via* Foochow and Amoy respectively, give a good connection with Shanghai, North China, Japan, and Russia; and the system of the Great Northern Telegraph Company gives a good service to Europe, *via* Asiatic Russia.

Commercial wireless telegraph services are maintained with ships at sea, Canton, Swatow, Shanghai, and North China via Shanghai, points in Kwangtung and Kwangsi Provinces, Yunnanfu, Macau, French Indo-China (direct to Saigon and Hanoi), Kwongchowau, North Borneo, Siam, Dutch East Indies, and *via* Dutch East Indies to Europe and American Continents, Manila and *via* Manila to Europe and American Continents. All services are operated and controlled from the Government Radio Office situated in the central district of Victoria. The transmitters

are grouped at Cape D'Aguilar Station, position lat. 22° 12' 38" 61" N.: long. 114° 15' 18" 94" E. Call signals:—V P S for ship services, Z B W for broadcasting, and the series Z O E to Z C K for commercial services. The main receiving station is situated at Victoria Peak, from which station received signals are passed by tone lines to the Radio Office.

In addition, meteorological and time signal services are carried on, the Police Department has its own communication system, and the Waglan and Gap Rock Lighthouses have installations for emergency communication.

A broadcasting service for the transmission of news items, speeches, music, etc., is maintained by a transmitter installed at Kowloon which is controlled from an up-to-date studio and control room situated on the second floor of the Gloucester Building. The broadcast wave length is 350 metres and the call signal Z B W.

Hong Kong possesses unrivalled steam communication. The P. & O. S. N. Co., M. M. Cie, Holt's Line, City Line, and N.Y.K. maintain a regular service with the United Kingdom and Europe. The Holt's line, O.S.K., N. Y. K., and Dollar Line maintain a regular service between Hong Kong and the United States of America. The Canadian Pacific S.S. Limited maintain a regular service with Vancouver, B.O.

The K. & A., Australian Oriental Line, and N. Y. K. and O. S. K. keep up a frequent service to Australian ports. In addition to these main lines of steamers, there are other lines which call at Hong Kong from various ports, such as the Shire, Glen, and Bank lines, and Lloyd Trestino.

Regular steam communication between Java and Hong Kong has been established by the Java-China-Japan Line. Between the ports on the east coast of China, Formosa, and Hong Kong the steamers of the Douglas S. S. Co. ply regularly twice a week, and those of the Osaka Shosen Kaisha weekly, and there is constant steam communication with Hoihow, Manila, Saigon, Haiphong, Tourane, Bangkok, Borneo, etc. With Shanghai, Tientsin, and the ports of Japan there is frequent communication by steamers of the Indo-China S. N. Co., China Navigation, and other lines, in addition to the English, French and American mail steamers. With Calcutta there are services by the Indo-China S. N. Co., O.S.K., N.Y.K., and the British India Line, about once a fortnight by each line. Between Hong Kong, Macao, and Canton there is a daily steam service, and numerous steamers as far as Wuchow on the West River.

A cable tramway connects the city with the higher levels. An electric tramway from Shauiwan to Kennedy Town, along the whole extent of the city, was completed and opened in July, 1904. The island possesses roads available for vehicular traffic both in the town and outside from which unrivalled views can be obtained, especially from the wind-swept roads in the hill districts. There is also a fine motor road round the island.

There are excellent motor roads in Kowloon and the New Territory—the road to Fanling via Castle Peak and back via Taiipo being a panorama of views over a route of several miles.

The usual means of transport is by motor, ricksha, chair, or boat. A railway was completed in 1910 from Kowloon to the Chinese frontier, where it joins the line from Canton. Telephonic communication is available to all parts of the Colony and to Canton.

Direct Money Orders are exchanged with Great Britain, China, Canada, United States of America, Union of South Africa, India, Ceylon, Mauritius, the Australian Commonwealth, the Dominion of New Zealand, Straits Settlements, Federated Malay States, State of North Borneo, Sarawak, Siam, Macao, Japan, French Indo-China, Netherland Indies, and the Philippine Islands. British Postal Orders are issued and paid in Hong Kong. Telegraphic Money Orders are exchanged with the United Kingdom only.

### Education.

Since 1913 the schools in the Colony, with few exceptions, have been placed by Ordinance under the supervision and control of the Education Department. The total number of pupils is about 71,200, of whom, roughly speaking, one-third are in schools in which English is the medium of instruction, and two-thirds are in Vernacular Schools. There are four schools exclusively for children of British parentage, with an average attendance of 429. Queen's and King's Colleges are the principal schools for Chinese, with an average attendance of 544 and 892 respectively. Including the above, the average attendance at Government schools is 4,119. Most of the non-Government English schools are assisted by grants, which amounted in 1932 to \$183,935. Many of the vernacular schools are assisted by subsidies and grants, amounting in 1932 to \$127,697.

A technical institute supplies instruction in commercial and technical subjects. The enrolment in 1932 was 632.

The University of Hong Kong, incorporated under the local University Ordinance, 1911, and opened in 1912, is a residential University, the object of which is declared by that Ordinance to be "the promotion of Arts, Science and Learning, the provision of higher education, the conferring of degrees, the development and formation of the character of students of all races, nationalities and creeds, and the maintenance of good understanding with the neighbouring country of China."

Instruction is provided in the three Faculties of Medicine, Engineering, and Arts and the following Degrees are awarded: Medicine, M.B.B.S., M.D., M.S.; Engineering, B.Sc. (Eng.), M.Sc. (Eng.); Arts: B.A., M.A. The standard aimed at is that of University degrees in Great Britain, and the Medical degrees of the University are recognized by the General Medical Council for registration in Great Britain.

The buildings, including class-rooms and residential accommodation for 400 students, together with playing fields occupy an area of about 36½ acres.

The endowment funds exceed \$9,000,000, of which \$750,000 represents a grant from the Rockefeller Foundation for the establishment of full-time chairs in Surgery, Medicine, and Obstetrics and Gynaecology. The Colonial

Government has contributed land to the approximate value of \$175,000, together with capital sums amounting to \$1,700,000, and provides an annual grant of \$350,000.

The course is one of 4 years in Engineering and Arts, and of 6 years in Medicine. The annual entry is now about 60. Students are of all nationalities, but the great majority are Chinese drawn from all parts of China and the Far East.

The University is open to students of both sexes. There are at present 40 women students out of a total of 360 students on the rolls.

#### Constitution.

The Government is administered under Letters Patent of 14th February, 1917, by a Governor, aided by an Executive Council, composed of six official and three unofficial members, besides the Governor. The Legislative Council is presided over by the Governor, and is composed of nine official and six unofficial members, eight of whom are nominated by the Crown on the recommendation of the Governor (three being Chinese), one is nominated by the Justices of the Peace from their body, and one by the Chamber of Commerce. The unofficial members of the Executive and Legislative Councils, appointed after receipt of the Additional Instructions passed under the Royal Sign Manual and Signet and dated 10th January, 1922, vacate their seats after five and four years respectively from date of appointment. The "Colonial Courts of Admiralty Act, 1890," regulates the jurisdiction of the Supreme Court in Admiralty cases. The English Common Law forms the basis of the legal system, modified by Colonial Ordinances, of which a revised edition to 1923 has been issued. The law as to civil procedure was codified by Ordinance No. 3 of 1901.

## \*JAMAICA.

### *Situation and Area.*

Jamaica is an island in the Caribbean Sea, to the southward of the eastern extremity of the Island of Cuba, within N. lat. 17° 42' 20" and 18° 32' 30", and W. long. 76° 11' 55" and 78° 23' 35". It is the largest of the British West Indies, being 144 miles in length, and 50 in extreme breadth, and containing about 4,450½ square miles, about half the size of Wales. The island is very mountainous, the main ridge running east and west, with numerous subsidiary ridges, some parallel to the main ridge, others spreading out in a N.W. and S.E. direction from it, terminating in the famous Blue Mountains in the east, the highest peak being 7,388 ft. high. There are numerous rivers and streams, with a rapid fall for the most part, and not navigable. The largest are the Black River in the south-west, and the Rio Grande in the north-east. Kingston, the capital, with a population of 62,707 in 1921, is situated on the south coast of the Island, and has a fine harbour. In St. Ann's Parish, in the middle part of the island, on the north of the main ridge, is the Roaring River, so called on account of its many picturesque waterfalls.

The Cayman Islands, lying between 19° 16' and 19° 45' N. lat., and 79° 83' and 81° 30' W. long, and the Turks and Caicos Islands, are dependencies of Jamaica,† as are also Pedro and Morant Cays (two guano islands in 17° N. lat.).

It is estimated that Jamaica contains 2,848,160 acres, from which may be deducted 80,000 acres as useless for agriculture, consisting chiefly of swamps, rocks, and inaccessible lands, leaving 2,768,160 acres available for cultivation. Of this 760,761 acres are returned as under cultivation in 1931-32.

### *History.*

The island was discovered by Columbus on the 3rd May, 1494. He called it St. Jago, after the patron saint of Spain, but the new name was soon dropped in favour of the native one of Jamaica (Xaymaca—well watered). The first settlement on it was effected on the shores of St. Ann's Bay, by Esquivel in 1509, under the direction of Diego, the son of Columbus, the Governor of Hispaniola. It was raided by Sir Anthony Shirley in 1596-7, and by Colonel Jackson in 1643, but it remained in the possession of the Spaniards for 161 years, when it was attacked by a force, sent by Cromwell, under Admiral Penn and General Venables against Hispaniola, and capitulated, after a trifling resistance, on the 11th May, 1655. Until the Restoration, Jamaica remained under military jurisdiction, but in 1668 a regular civil government was established by Charles II., who appointed General Edward Doyle Governor-in-Chief, with an Elective Council. In 1670 peace was made with Spain, and the title of England to Jamaica was recognised by the Treaty of Madrid. The colony grew fast, stimulated by the wealth brought into it by the buccaneers, who made Port Royal their headquarters and storehouse. Part of this town was engulfed in the great earthquake of 1692. Kingston which then consisted of a few sheds, soon rose into a place of importance. During the 18th century the island suffered from hurricanes, earthquakes, numerous slave insurrections, as well as wars with the maroons, or mountaineers, the descendants of African slaves. These consisted primarily of the slaves the Spaniards left, who inhabited mainly the east of the island, among the Blue Mountains, but before long runaway slaves from English masters took refuge in the mountains, the centre of the island and were only subdued in 1738, when both classes of maroons were settled in five reserves under their own leaders, and henceforth gave little trouble except for a partial rising in 1795, which was soon suppressed, the prisoners taken being sent to Sierra Leone. When the Slave Trade was abolished, in 1807, there were 323,827 slaves in Jamaica. During the last 25 years of the trade, 86,821 slaves were imported. On the abolition of slavery in 1833, Jamaica received 6,161,927l. of the 20,000,000l. granted the Imperial Government as compensation to slave-owners. A rebellion among the coloured population in 1865 was suppressed by Governor Eyre with unnecessary violence, and he was recalled. In January, 1907, Kingston was devastated by a terrible earthquake, which caused great loss of life and immense destruction of property. A Manby House Fund was opened, and contributions poured in from all parts of the Empire for the relief of distress. A free grant of 150,000l. was voted by Parliament, and a loan of 800,000l., chiefly for aid of re-building, was authorised from the Home Exchequer.

### *Climate and Inhabitants.*

There is great variety of climate; the mean temperature of Kingston is 78·7°, rising to 89° in the day time, and falling to 71·0° in the early morning. As the temperature falls about 1° for every 300 feet of ascent, it is possible, in a few hours, to reach, in the central range of mountains, a cool and delightful climate. From Kingston, the capital, a change of 10° or 15° lower in temperature can be attained by a ride of one hour by motor car.

PREPARED FR

The rainy seasons occur generally over the whole island in May and June and again in September, October and November; but besides these heavy and periodical rainfalls, the ground is refreshed by occasional showers; and in the N.E. portion of the island there is usually a rainy season at the end of the year, and light rains generally during the month of August. The mean annual rainfall varies throughout the island from about 32 inches to as much as 173 inches at Fellowship and 208 inches at Moore Town, both on the northern slope of the Blue Mountain Range. And the 60-year average is 74 inches.

Regions of the Island are visited by storms of hurricane force about 14 times in a century and disastrous earthquakes occurred in 1692 and 1907.

Under twenty per cent. of the inhabitants are white; the remainder are chiefly of African descent, somewhat over three-fourths being pure negroes. There are about 17,726 East Indians and about 3,700 Chinese (in 1921). English is universally spoken.

#### *Constitution.*

The original Constitution, granted by Charles II. in 1662, which, after existing for nearly 200 years, was surrendered in 1866, was a representative one, consisting of a Governor, a nominated Council, and an elected Assembly which on its first meeting in 1664, consisted of 30 members but which fluctuated in numbers from time to time. The depression caused by the abolition of slavery led to a grave constitutional crisis, the Assembly refusing to vote supplies, and endeavouring to enforce sweeping reductions in establishments, without compensation to the displaced officers. Lord Melbourne's Government, in 1839, actually introduced a Bill into Parliament for the suspension of the constitution, but was defeated, and it was not till 1854 that, by a change in the constitution of the Council, harmony was temporarily restored. A separate Privy Council was set up and an Executive Committee was established. The latter was to act as a sort of Cabinet, especially as regards financial matters.

After the suppression of the rebellion in 1865, Governor Eyre, at the meeting of the Legislature, urged the unsuitability of the then existing form of Government to meet the circumstances of the community, and the necessity of making some sweeping change, by which a strong Government might be created. The Legislature responded by abrogating all the existing machinery of legislation, and left it to Her Majesty's Government to substitute any other form of Government which might be better suited to the altered circumstances of the Colony.

Accordingly a Legislative Council was, by Orders in Council of the 11th June, 1866, and 11th November, 1869, established, consisting of such numbers of official and unofficial members as Her Majesty might think fit. The numbers of each were six until 1878, when they were enlarged to eight, and a ninth was added in 1881.

By Order in Council dated 19th May, 1884, and Amending Order of 3rd October, 1896, the constitution was fixed in the following manner:—

The Council to consist of the Governor (with only a casting vote) and five *ex-officio* members, viz.: the Senior Military Officer, the Colonial Secretary, Attorney-General, Director of Public Works and Collector-General, and such other persons, not exceeding ten in number, as Her Majesty may from time to time appoint, or as the Governor may from time to time provisionally appoint, and fourteen persons to be elected as therein

provided. The Council shall be dissolved at the end of five years from the last preceding general election, if it shall not have been previously dissolved.

There is also a Privy Council, with the usual powers and functions of an executive council. It consists of the Lieutenant-Governor, if any, the Senior Military Officer in command, the Colonial Secretary, and Attorney-General and such other persons as may be named by the King, or provisionally appointed by the Governor subject to the approval of His Majesty, but the number of members is not to exceed eight. The Governor is to preside at each meeting, and the Governor and two members form a quorum.

A special feature of this constitution is that nine elected members can veto any financial measure, while the unanimous vote of the whole fourteen elected members on other matters cannot be overridden by the other votes unless the governor declares that such a decision is of paramount importance in the public interest.

#### *Administration.*

The Colonial revenue is derived mainly from import duties, an excise duty on rum, and stamp and licence duties. A tax of 1s. (in Kingston 8d.) on every £10 of the gross value of property is levied.

There is a Supreme Court of Judicature together with Resident Magistrate Courts and Petty Sessions of Justices of the Peace throughout the island. The Resident Magistrates, besides holding courts of their own, preside in the courts of Petty Sessions.

An "Island medical service," under the control of a superintending medical officer, was established in 1870. The several medical practitioners, who receive a retaining fee or salary from the Government, are designated "district medical officers." They are located throughout the island, and for the fixed salary paid by Government they have to attend sick paupers, parochial hospitals and alms-houses, the constabulary officers and men, and prisons.

The parish is the unit of local government, and each parish has its own parochial institutions, viz., poorhouses, &c., &c., managed by the Parochial Board of the parish, the members of which are elected by the persons entitled to vote for the election of members of the Legislative Council. The administration of poor relief by the Parochial Boards is controlled by a Board of Supervision.

There is a Corporation of the amalgamated parishes of Kingston and St. Andrew with a Mayor, Council and Corporate officers.

In the 13 other parishes there are elective Parochial Boards under Laws 13 of 1900 and 17 of 1901, with jurisdiction over roads, markets, sanitation, poor relief, water-works, and pounds. The chief towns are Kingston (population, in 1921, 62,707), Port Royal (population 1,004), Spanish Town (population 8,694), Port Antonio (population 6,272), Montego Bay (population 6,580), Falmouth (population 2,136), Port Maria (population 2,481), and Savanna la Mar (population 3,442).

The total revenue of all the local bodies in 1932-33 was 460,289.; their expenditure 436,768. Their debt at the end of the year was 988,482.

#### *Currency and Banking.*

Accounts are kept in sterling, British silver coins of and above the denomination of 6d. are legal tender to any extent; coins below the denomination of 6d. are legal tender to the extent of 40s. in any one payment.

The coin in circulation is mostly British silver and bronze and Jamaica nickel pence, half-pence and farthings, but American half and quarter dollars circulate freely at the rate of 2s. and 1s. respectively.

Total estimated coin 200,000*l*. Barclays Bank (Dominion, Colonial and Overseas) Ltd., the Bank of Nova Scotia, the Royal Bank of Canada and the Canadian Bank of Commerce are the only private banking establishments in the Colony. Barclays Bank has one branch and 9 sub-branches; it had an average weekly note circulation in 1932 of 91,444*l*. The Bank of Nova Scotia has 11 branches and 1 sub-branch, and had an average note circulation in 1932 of 135,125*l*. The Royal Bank of Canada has two branches and had an average note circulation in 1932 of 42,387*l*. The Canadian Bank of Commerce has a branch in Kingston, and had an average note circulation in 1932 of 18,924*l*. Approximately 200,000*l*. of British currency notes formerly in circulation have been withdrawn and replaced by Bank of England Notes, in denominations of 10s. and 1*l*.

Under Law 27 of 1904, local Currency Notes, which are made legal tender under section 5, have been issued to the extent of 212,500*l*, in denominations of 2s. 6*d*., 5s. and 10s.; 2s. 6*d*. notes, 31,250*l*; 5s. notes, 106,250*l*; 10s. notes, 75,000*l*. Estimated amount of local currency notes in circulation on 31st March, 1933, was 78,293*l*. 10s. The 2s. 6*d*. notes have been recalled and nearly all have been withdrawn from circulation.

Government savings banks were instituted in all the principal towns in 1871, the rate of interest allowed being at first 4 per cent., but this was reduced in 1881 to 3 per cent., and in 1897 to 2½ per cent. In 1917 the rate of interest was again increased to 3 per cent. There are 114 branches now operating. The total deposits on 31st December, 1932, was 653,200*l*.

#### Co-Operative Loan Banks.

There are now 56 Loan Banks on the Register of Industrial and Provident Societies. Of these, 36 have obtained loans from the Agricultural Loan Societies Board appointed under Law 6 of 1912, "A Law for the encouragement of Agricultural Loan Societies." In 1930, Law 15 of 1930, was passed giving the Board more extensive powers of control.

The following is a summary of these transactions to 31st December, 1932:—

Loans made under Law 6 of 1912, 54,441 <i>l</i> . 9s. 0 <i>d</i> .	
" " " Hurricane or Special Loan	
Laws ... 80,489 <i>l</i> . 12s. 4 <i>d</i> .	
134,931 <i>l</i> . 1s. 4 <i>d</i> .	

Of this amount, 123,055*l*. 6s. 9*d*. has been repaid, leaving 11,875*l*. 14s. 7*d*. outstanding.

The 42 Banks from which returns were obtained also collected to 31st December, 1932, the sum of over 42,847*l*. share capital. These figures may be taken as an indication that the work of the Loan Banks has been successfully carried on and that they are likely to prove a permanent benefit to Small Holders and Peasant Proprietors. Some of these Banks have extended their sphere of usefulness by taking advantage of the Land Settlement Scheme, whereby Government moneys are lent for the purchase of properties for the purpose of reselling in lots to small settlers. 59,641*l*.

3s. 11*d*. has been loaned to nine Banks, under this head, and 43,445*l*. 19s. 5*d*. repaid. Land settlement is now being operated by the Surveyor General.

#### Education.

Elementary education is provided for from public funds. The number of recognised elementary schools is 653, of which 139 are Government Schools, and the remainder Denominational. There are 76,675 scholars in average attendance, and the grant-in-aid for 1932-33 was £159,286; no fees are charged. The Government maintains a system of inspection, and provides a training college for women teachers which is mainly supported from public funds, besides largely assisting the Mico undenominational training college for men, and two denominational colleges for women teachers. By a law passed in 1892 a Board of Education was constituted. Local School Boards manage the Government schools, some of which are held in Government buildings, others in rented buildings.

The Government maintains a Technical Continuation and Commercial School in Kingston and awards scholarships for trade instruction and apprenticeship. Two Continuation Schools for Girls are aided from public funds.

Provision was made in 1892 for the opening of Government secondary schools where required; there are nineteen secondary schools receiving aid from public funds under regulations for grants in aid. Secondary education is provided for in general by endowed schools, under local governing bodies controlled by the Jamaica Schools Commission, and a number of private schools. There are three scholarships (one for girls) tenable at English universities or elsewhere within the British Empire and one scholarship tenable at the Imperial College of Tropical Agriculture, Trinidad. One Rhodes Scholarship is annually awarded in Jamaica. The following examinations are held:—London University, Cambridge Locals, Associated Board of the Royal Academy of Music and the Royal College of Music, Royal Drawing Society.

In the Institute of Jamaica (in Kingston) is a Public Library with 30,000 books, of which 7,500 form a West India Reference Library; a Natural History Museum, with a small collection of live animals; and a Jamaica History Gallery with 450 portraits and 150 engravings of scenery.

#### Industry.

Fruit is the largest export, 20,360,613 stems of bananas of a value of £1,869,111 being exported in 1932, in which year citrus fruits (grape fruits and oranges) valued at £116,019 were also exported. Other exports were as under:—

The acreage under banana cultivation in 1932-33 was 83,511, under sugar cane 40,849, under coffee 6,191, under cocoa 1,293, under coconuts 45,884, under ginger 6, under tobacco 146. There are

1,500 acres of Government cinchona plantations. The cultivation of cotton has practically been abandoned.

The Island's import trade is divided as follows:—

United States of America ..	17.9	per cent.
United Kingdom .. ..	41.3	" "
Canada .. ..	15.0	" "
Other Countries .. ..	25.8	" "

#### Means of Communication.

There is a daily postal service throughout the island.

The rates of postage are as follows:—

	Letters.	Newspapers.
Within the Colony	For the first oz. id. and id. for each additional oz. or fractional part of an oz.	½d. each.
To places within the British Empire	For the first oz. 1½d. and id. for each additional oz. or fractional part of an oz.	½d. per 2 oz.

Colonies, up to 3 lbs. 1/-, up to 7 lbs. 2/-, up to 11 lbs. 3/-, and up to 22 lbs. 5/- only for Antigua, British Guiana, Grenada, Trinidad, St. Vincent and Bermuda; with United States and Canal Zone, 6d. per lb., maximum 11 lbs. Canada, 6d. per lb. up to 20 lbs. maximum. India, up to 20 lbs. maximum. There is a C.O.D. Parcel Post system in operation with the United Kingdom only. A regular air passenger and letter mail service, inaugurated 10th December, 1930, operates twice weekly between Miami (Florida, U.S.A.) and Cristobal, Canal Zone via Kingston, Jamaica. A similar air service inaugurated 15th June, 1933, operates between Kingston, Jamaica and Porto Rico via Port au Prince, Haiti, once weekly.

The estimated number of letters and post cards handled is as follows:—

Year 1932.

	Internal.		External.		Total.
			Outwards.	Inwards.	
Letters	11,217,268	1,234,719	3,954,803		16,406,790

There is regular and frequent communication between Europe and Jamaica via the United States. Messrs. Elder's and Fyfe's and the Jamaica Dried-Fruit Line furnish frequent and regular services for passengers and freight. The voyage takes 13 to 14 days. The Leyland Line steamers (West India and Pacific Branch) leave Liverpool on the 10th of each month, their average passage being 21 days. There is also frequent steam communication between the United States and Jamaica. The Canadian National Steamships also furnish regular services to Canada and the other West Indian Islands.

Telegraphic communication with Europe is complete. The two cables from Cuba touch at Jamaica, from which they branch away via St. Thomas to Demerara, and in the opposite direction to the Isthmus of Panama. On 31st January, 1898, the Direct West India Cable Company established communication between Jamaica and Halifax via Bermuda and Turks Island.

† Every incoming parcel post packet and every packet containing dutiable matter bears a tax of 6d. which is collected from the addressee.

Telegraph lines connect all the principal towns, and there are 181 telegraph and telephone stations. The total mileage open is 1,794. 1,123 miles along roads, 172 miles P.O. lines on railway, and 231 along railway lines. The receipts in 1932 were 18,345.

The railway extends from Kingston to Montego Bay, in the parish of St. James, a distance of 112 miles 60 chains, and to Port Antonio, in the parish of Portland, in the other direction, by a branch line from Spanish Town of 63 miles; and to Ewarton, by a branch line from Bog Walk, on the Port Antonio branch, of 8 miles 40 chains, and by a branch line from May Pen to Frankfield, 23 miles; also from Linstead to New Works, 2 miles 40 chains. The total length of line open is 210 miles. The railway was purchased by an American syndicate, who, under agreement, extended it to Port Antonio on the north-east and to Montego Bay on the north-west, but the company having failed the Government resumed possession of the line on 16th August, 1900. The total railway debt charge for 1932-33, providing for interest and repayment, is 164,221. The receipts in 1932-33 were more than the expenditure by 77,354, leaving a deficiency of 86,866. There is also a line of telegraph and telephone along the railway from Kingston to Montego Bay, 112½ miles; Spanish Town to Ewarton, 17½ miles; from Bog Walk to Port Antonio, 54½ miles; from May Pen to Frankfield, 23 miles; and from Linstead to New Works, 2½ miles.

The island is intersected by an extensive system of tar-treated and metalled roads, suitable for motoring, the highest one passes over a gap at an elevation of a little over 4,000 feet. Owing to the configuration of the island there are many bridges and culverts and sharp turns; the maximum grades are generally 1 in 15. There are 3,432 miles of main roads, and about 4,417 miles of parochial roads.

A coastal service is run by the United Fruit Co., the Royal Mail Co. and the Webster Co. with motor vessels and sailing vessels whenever cargo is available.

The United Fruit Co., the Royal Mail Co., Jamaica Fruit and Shipping Co., the Jamaica Direct Line, the Standard Fruit & Steamship Corp., and Leyland Line maintain a weekly steamship service and also call at outports when necessary.

Kingston, Montego Bay, Falmouth and St. Ann's Bay are ports of registry. During the year ended 31st December, 1931, no ships were built.

#### CUSTOMS TARIFF.

The import duties are collected at both specific and *ad valorem* rates. The articles paying specific duties fall chiefly under the heads of Food, Drink and Tobacco. Provision is made for preferential rates on Empire Products. The general *ad valorem* duty is 20% and the preferential rate is 15%. There are slight variations in these rates on certain classes of goods.

The following table shows the percentage of trade with the United Kingdom, other parts of the Empire and the principal foreign countries during 1932.

#### CAYMAN ISLANDS.

##### Description.

The Cayman Islands, which form a dependency of Jamaica, consist of three islands—Grand Cayman, Little Cayman and Cayman Brac—lying between 79° 83' and 81° 30' W. longitude and 19° 16' and 19° 45' N. latitude, and having a total area of about 104 square miles. There were discovered by Columbus on his return voyage from Porto Bello to Hispaniola, but were never occupied by the Spaniards. The English took possession soon after the conquest of Jamaica in the middle of the seventeenth century and the islands were mainly colonised from Jamaica, though many English and Scottish mariners, shipwrecked on the coast of Cuba, settled on the islands.

The proportion of white inhabitants in the Cayman Islands is considerably larger than in other parts of the West Indies.

The principal island, Grand Cayman, is distant about 178 miles from the nearest point of Jamaica. It is 17 miles in length, with a varying breadth from 4 to 7 miles, and has an area of 85 square miles. The total population of the islands is about 6,200, of which some 4,800 live in Grand Cayman, where Georgetown, the capital town, with a population of 1,600, is situated.

The coasts are for the most part rock-bound, protected by coral reefs and enclosing some fair-sized deep-water harbours.

#### *Industries, Trade and Customs.*

The chief industry of the inhabitants is catching turtle—or "turtling," as it is called. These turtles are brought to the island and placed in "crawls" to recover and fatten before export. The demand for turtle has, however, declined and at present attention is being given more to "sharking," as there is a ready market for sharkskins in America.

The people are first-class shipbuilders and many fine schooners are built in these islands for local use and sale abroad.

Georgetown is a Port of Registry and 53 sailing vessels and 11 motor vessels, with an aggregate net tonnage of 4,556, are on the registry of shipping there.

The islands are in some parts fruitful and the usual tropical products are grown, but a considerable acreage is traversed by honeycombed limestone and unfit for cultivation. Mahogany, cedar and other valuable timber and some dye-woods are found. Agricultural pursuits are fostered and encouraged by an Agricultural Society.

Many of the islanders find employment on the mainland of America and in foreign vessels, supporting their families in Cayman by remittances from abroad.

An *ad valorem* customs duty of 12½ % is levied on most imported commodities, with specific duties on alcoholic liquors and tobacco. The revenue derived from these duties amounted to 3,704*l.* in 1922.

#### *Climate.*

The climate from November to March is cool, the prevailing winds being from the north, but during the summer months, it is hot, with southerly winds. Mosquitoes abound in the summer. The rainfall at Georgetown during 1931 was 102 inches which was abnormally high, the average annual rainfall being about 55 inches.

The more recent hurricanes at the islands occurred in September, 1917, August, 1909, and August, 1903—previous to this there was a severe hurricane in October, 1876.

#### *Communications.*

Two regular motor-schooner services are maintained from Georgetown—one with Kingston, Jamaica, and the other with Isle of Pines, Cuba, and Tampa, Florida. There is also communication by sailing vessels with the ports of Central America.

#### *Education.*

Education is in charge of a Board of Education which receives an annual grant of 1,425*l.* from the public revenue. Twelve public elementary schools are maintained, with a roll of 916 pupils and an average attendance of 736.

#### *Constitution.*

The Government is administered by a Commissioner who is also Judge of the Grand Court. Justices of the Peace (at present 28) are appointed by the Governor of Jamaica and these, with 27 elected members, known as Vestrymen, constitute the

Legislative Assembly under the presidency of the Commissioner. Elections are held biennially.

The present constitution of this Assembly (Justices and Vestry is 100 years old and the centenary has recently been commemorated by a special issue of postage stamps.

## TURKS AND CAICOS ISLANDS.

#### *Situation and Area.*

The Turks and Caicos Islands lie between 21 and 22° N. lat., and 71° and 72° 37' W. long. Their area is about 186 square miles. The most important island, Grand Turk, is 6½ miles long and 1 mile broad. According to the census of 1921 Grand Turk contains 1,568 inhabitants, being one third of the total population which in 1921 was 5,612. The inhabitants are of mixed European and African extraction. The majority of the people are connected with the Bermudas, from which these islands were first settled. They all speak English. Cockburn Harbour in S. Caicos immediately opposite Grand Turk, is the principal settlement in the Caicos group.

#### *History.*

These Islands were discovered in 1512 by Ponce de Leon, but the group remained uninhabited till the end of the 17th century, when it began to be annually visited by salt rakers from Bermuda. These were expelled by the Spaniards in 1710, but soon returned, and for some 40 years continued this industry with more or less frequent interruption by attacks from the Spaniards. It was not, however, till 1799 that for the purposes of government, they were included in the Colony of the Bahamas, to which group they geographically belong. In 1848 they were made independent of the Bahamas. In 1873 they were annexed to Jamaica and still remain one of its dependencies.

Two hurricanes passed over these Islands in 1926 on July 24th and September 16th respectively and did great damage. The second one was the most disastrous, as regards damage to property, is the history of the Dependency.

Another hurricane passed over these Islands on September 14th, 1928, which did considerable damage and caused the loss of 17 lives.

#### *Industries, Trade and Customs.*

Salt raking is the only industry of any importance, the average quantity annually gathered being about 1,600,000 bushels, equal to 56,000 tons. 577,494 bushels were exported in 1927.

\* For Grand Cayman only. Records for the other Islands are not available.

valued at 10,137*l*. Sponges are found on the Caicos Bank, and there is a sponge-curing establishment at Cockburn Harbour, South Caicos. The export of sponge in 1932, 23,261 lbs., was valued at 2,417*l*. 744,100 dried conchs (shell fish), valued at 744*l*. 343 lbs. turtle shell valued at 341*l*. 43 tons *lignumvitae* valued at 64*l*. 3445 lbs. shark skins valued at 64*l*.

Practically the whole of the food and household necessities are imported. Grand Turk is a port of registry, and had, on the 31st Dec., 1932, 55 vessels registered, of a total tonnage of 1,217 tons. Salt Cay and Cockburn Harbour are ports of entry, possessing good anchorage.

The bulk of the imports (10,516*l*. in 1932 out of a total of 21,942*l*.) are from the U.S. of America. The exports are chiefly to Canada and the United States.

An *ad valorem* customs duty of 15% is levied on most imports and specific duties on alcoholic liquors, tobacco, flour and a few other articles.

The British preferential tariff is 10%.

#### Climate.

The climate is equable and healthy, and rarely unpleasantly hot, owing to the constant sea breezes, but there is a scarcity of fresh provisions and good water, owing to the low lying barren nature of the soil.

The mean temperature (day) is 78°, the extreme range being from 60° to 93°. The rainfall at Grand Turk during 1932 amounted to 51·69 inches, the average rainfall during the five years 1928-1932 was 36·11 inches.

#### Means of Communication.

There is a mail, passenger, and freight service between New York and Grand Turk about twice a month by steamers of the Royal Netherlands West India Mail, and also between Jamaica and Turks Islands once a month by sailing vessel.

The Elders and Fyffes Line make occasional calls on their way to Jamaica when passengers offer and on such occasions take mails to Jamaica.

The rate of letter postage is 2*d*. per ounce to all British Possessions; 2½*d*. to the U.S.A., and to all other countries 3*d*. per ounce.

There are no railways in these Islands.

Internal mails are carried between the several islands by small sailing-craft engaged in local trade.

Mails to and from England and other parts of the world are dispatched and received via New York.

Grand Turk is an important cable junction, there being cables to Jamaica, to Barbados and to Bermuda.

The Government radio-telegraph system provides service between Grand Turk, Cockburn Harbour, and Salt Cay, and with ships at sea within short range.

There is a public telephone service at Grand Turk.

#### Education.

There are eleven elementary schools supported by Government, with 843 pupils enrolled in 1932 and an average attendance of 551. The schools are entirely unsectarian and free.

There is a Government Secondary School at Grand Turk.

Cambridge Local Examinations are held annually at Grand Turk.

#### Currency and Banking.

The coins in circulation, all of them being legal tender under Bahama Acts, 2 Vict. cap. 4, and 8 Vict. cap. 49, also Jamaica Law 10 of 1880, consist of British sterling, United States gold and silver, and Jamaica nickel tokens. There is no limit to the legal tender of silver. There is a local Government paper currency of five shillings, ten shillings and one pound notes. Commercial accounts are usually kept in dollars, and Government accounts in sterling. A Government savings bank was established on 1st Jan., 1890, and had, on 31st Dec., 1932, 859 depositors, with 13,285*l*. deposits.

#### Constitution.

By Jamaica Law No. 6 of 1926 which came into operation on the 1st day of August 1926, the Legislature consists of a Legislative Board comprising the Commissioner, who by virtue of his office is President, and seven other persons, three of whom are holders of offices under the Crown, appointed by the Governor of Jamaica. Taxation and expenditure and all local matters, are regulated by this board. Laws passed by the Legislative Council of Jamaica which are in express terms made applicable to Turks Islands take effect there. The subjects of currency, bills of exchange, patents, and the custody of prisoners and lunatics have been so dealt with.

KENYA COLONY AND  
PROTECTORATE.*Extent and Administration.*

The territories comprised under the name of "Kenya Colony and Protectorate," previously known as the East Africa Protectorate, include the whole of the East African coastline from Umba River to Dick's Head, and territories in the interior bounded in part by international convention lines. The eastern boundary was defined along the Juba and north-east by an agreement with Italy (1891), and on the north by an agreement with Abyssinia in 1908, but upon the cession of Jubaland to Italy in 1925, a Commission was appointed to adjust the eastern and north-eastern boundaries. On the west, the Colony adjoins the Uganda Protectorate, and on the south the mandated Tanganyika Territory. The British East Africa Protectorate was proclaimed on November 19th, 1890. In March, 1891, the Imperial British East Africa Company undertook the administration of the country, from which they withdrew in 1893.

The Kenya Protectorate consists of the mainland dominions of the Sultan of Zanzibar—viz., a strip extending 10 miles inland along the coast from the Tanganyika mandated Territory frontier to Kipini and the islands of the Lamu Archipelago. In respect of these territories Kenya pays a rent of 10,000*l.* per annum to the Sultan of Zanzibar.

The original concession was made to a company, subsequently called the Imperial British East Africa Company, but the territory was transferred in 1895 to His Majesty's Government, and the whole Protectorate was placed under the control of a Commissioner and Commander-in-Chief. It was transferred in 1906, from the authority of the Foreign Office to that of the Colonial Office. By an Order in Council dated 9th November, 1906, the Protectorate was placed under a Governor and Commander-in-Chief, and the Order in Council of 22nd October, 1906, constituted Executive and Legislative Councils. The frontiers were defined by agreements with Germany (1890 and 1893) and Italy (1891), but the latter has now been varied by the cession of Jubaland to Italy under the Treaty with the Italian Government dated 24th July, 1924. All Foreign Consular Jurisdiction was, during the year 1908, transferred to the British Court.

By the "Kenya Annexation Order in Council, 1920," the territories outside the mainland dominions of the Sultan of Zanzibar were recognised as a Colony. This Order in Council came into operation on the 23rd July, 1920, and the Sultan's mainland dominions are now styled the Protectorate of Kenya, whilst the remaining territory is known as the Colony of Kenya. The area of the Protectorate and Colony of Kenya is about 224,960 square miles.

The Colony and Protectorate is divided into nine Provinces.

1. *The Nyanza Province*, comprising the districts of North Kavirondo, South Kavirondo, Central Kavirondo, Kericho, and Kisumu-Londiani.

2. *The Nzoia Province* comprising the districts of Nandi, Uasin Gishu, Elgeyo, Marakwet, and Trans Nzoia.

3. *The Turkana Province* comprising the districts of North and South Turkana and West Suk.

4. *The Rift Valley Province* comprising the districts of Nakuru, Ravine, Baringo, Naivasha, and Laikipia.

5. *The Masai Province* comprising the districts of Narok and Kajiado.

KENYA COLONY AND

The Kenya Protectorate consists of the mainland dominions of the Sultan of Zanzibar—viz., extending 10 miles inland along the coast the Tanganyika mandated Territory fronting Kipini and the islands of the Lamu Archipelago. In respect of these territories Kenya pays a sum of 10,000*l.* per annum to the Sultan of Zanzibar.

The original concession was made to the company subsequently called the Imperial British East Africa Company, but the territory was transferred in 1895 to His Majesty's Government, and the whole Protectorate was placed under the control of a Commissioner and Commander-in-Chief. The Foreign Office to that of the Colonial Office. By an Order in Council dated 9th November, 1906, the Protectorate was placed under the control of a Commissioner and Commander-in-Chief, and the Council of 22nd October, 1906, constituted Executive and Legislative Councils. The officers were defined by agreements with Germany (1890 and 1893) and Italy (1891), but the area has now been varied by the cession of Jubaland to Italy under the Treaty with the Italian Government dated 24th July, 1924. All Foreign Consular Jurisdiction was, during the year 1908, transferred to the British Court.

By the "Kenya Annexation Order in Council, 1920," the territories outside the mainland dominions of the Sultan of Zanzibar were re-named as a Colony. This Order in Council came into operation on the 23rd July, 1920, and the Sultan's mainland dominions are now styled the Protectorate of Kenya, whilst the remainder of the territory is known as the Colony of Kenya. The area of the Protectorate and Colony of Kenya is about 224,960 square miles.

The Colony and Protectorate is divided into six Provinces.

1. *The Nyanza Province*, comprising the districts of North Kavirondo, South Kavirondo, Central Kavirondo, Kericho, and Kisumu-Londiani.

2. *The Nzoia Province* comprising the districts of Nandi, Uasin Gishu, Elgeyo, Marakwet, and Trans Nzoia.

3. *The Turkana Province* comprising the districts of North and South Turkana and West Suk.

4. *The Rift Valley Province* comprising the districts of Nakuru, Ravine, Baringo, Naivasha, and Laikipia.

5. *The Masai Province* comprising the districts of Narok and Kajiado.

6. *The Kikuyu Province* comprising the districts of Nairobi, Kyambu, Fort Hall, South Nyeri, North Nyeri, Embu, and Meru.

7. *The Ukamba Province* comprising the districts of Machakos, Kitui, and Teita.

8. *The Coast Province* comprising the districts of Digo, Mombasa, Kilifi, Tana River, and Lamu.

9. *The Northern Frontier Province* comprising the districts of Laikipia, Marsabit, Moyale, Wajir, and Talemugger.

The Capital of the Colony is Nairobi, which is also the largest centre in the Colony. A Municipality has been established here in respect of a population estimated as under:—

1932.			
Europeans .. .. .	6,789		
Asiatics .. .. .	16,807		
Natives .. .. .	67,131*		
Total .. .. .	90,727		

Mombasa is the principal port; the inhabitants number about 54,894, of whom about 1,023 are Europeans. Mombasa is an island of about seven square miles in area and has two harbours, Mombasa harbour on the eastern side and Kilindini harbour to the south-west. There is a lighthouse and signal station at the entrance to the port. A Municipality was established at Mombasa in 1928.

#### Population.

The total population is estimated at 3,076,343. A census of the non-native population taken in March, 1931, showed a population as follows:—

Europeans .. .. .	16,812
Indians .. .. .	39,644
Arabs .. .. .	12,166
Goans .. .. .	3,979
Other non-natives .. .. .	1,346
	<hr/>
	73,947

Africans (estimated) .. .. .	2,966,993
Total .. .. .	<hr/>
	3,040,940

On the coast the Arabs and Swahilis predominate; further inland are races speaking Bantu languages, and non-Bantu tribes, such as the Nilotic Kavirondo, the Nandi, the Lumbwa, the Suk, the Turkana, the Masai, the Somalis, and the Gallas.

The prevailing religious beliefs are Pagan, but on the coast Mohammedanism has made some progress. There are in the Colony and Protectorate many Christian mission stations, representing thirteen different societies—British, French, Italian, Swedish and American, two of them being Roman Catholic. At these stations are schools for elementary instruction and handicrafts.

#### Constitution.

Under the Royal Instructions dated the 11th September, 1920, as amended by Additional Instructions dated the 7th July, 1928, the Executive Council of the Colony consists of the Colonial Secretary, Attorney-General, Treasurer, Chief Native Commissioner, Commissioner for Local Government, Lands and Settlement, Director of Medical and Sanitary Services, the Director of Agriculture, and Director of Education (*ex officio* members), such other persons holding office in the public service of the Colony as the Governor may appoint (official members), and such persons (if any) not holding such office as the Governor may appoint (unofficial members), with the Governor as President. It is further

provided that the Legislative Council of the Colony shall consist of the Governor as President, eleven *ex officio* members, not more than nine nominated official members, eleven European elected members, five Indian elected members, one Arab elected member, and one nominated unofficial member to represent the interests of the African community. Under royal instructions dated the 28th March, 1927, it was provided that if at any time the number of Indian elected members is less than five the vacancy or vacancies so arising might be filled by the appointment of nominated Indian unofficial members. The *ex officio* members are to be the *ex officio* members of the Executive Council, with the General Manager of the Kenya and Uganda Railways and Harbours, Director of Public Works, and Commissioner of Customs.

By the "Kenya Protectorate Order in Council, 1920," it was provided that the Governor of the Colony should be Governor of the Protectorate, that the Executive Council of the Colony should be deemed to be the Executive Council of the Protectorate, and that it should be lawful for the Legislative Council of the Colony to legislate for the Protectorate. The Supreme Court is situated at Nairobi, and sessions are also held at Mombasa, Nakuru, Eldoret, Kisumu, and various other places. In all cases to which natives are parties local ideas and customs are considered. The legal status of slavery has been abolished throughout the Colony and Protectorate.

By local ordinance in January, 1924, provision was made for the election of the Indian and Arab members. The Indian franchise (like the European franchise) is adult (over 21) suffrage and the whole Colony and Protectorate forms one five-member constituency. The Arab franchise is adult (over 21) male suffrage subject to ability to write Arabic or Swahili in Arabic characters. Here too the whole country forms one constituency.

By the enactment in 1924 of the Native Authority Amendment Ordinance a considerable measure of local self-government was conferred on the various Native Councils in Kenya in regard to the social welfare of the tribes and the management of communal matters such as land, forests, veterinary services, etc., as well as the local control of health, education, agriculture, trade and labour recruitment. Ordinances passed in 1928 aim at the extension of local government in municipalities and settled areas.

#### East Africa Governors' Conference.

In pursuance of a recommendation of the Parliamentary Commission which visited E. Africa in 1924, a first Conference of Governors of the British East African Dependencies was held in Nairobi in January and February, 1926, for the discussion of matters of mutual concern. It was then decided that a permanent Secretariat for the Conference should be established at Nairobi and conferences held as and when necessary. Subsequently the Joint Select Committee on Closer Union in East Africa recommended that the machinery of the Governors' Conference should be increasingly utilised for the purpose of ensuring continuous and effective co-operation and co-ordination in all matters of common interest to East Africa. As a result of this, it was decided that the Conference should be deemed to be in permanent session with a view to its being convened at any time when necessary, and that there should in any case be an annual meeting of the Governors of Kenya, Tanganyika Territory and Uganda, attended, if desired, by the Governors of Northern Rhodesia, Nyassaland, and the British Resident, Zanzibar. The cost of the Secretariat is

\* Includes part of Kyambu and Fort Hall.

contributed in varying proportions by the East African Governments and by the Kenya and Uganda Railway Administration. The Secretary of the Conference is Colonel C. W. G. Walker, C.M.G., D.S.O., who is also Secretary to the High Commissioner for Transport, Kenya and Uganda. Salary 1,500*l*.

#### *Climate.*

For purposes of rainfall Kenya may be divided into three parts:—

(1) Northern Desert area where there is usually less than 20 inches a year.

(2) The coastal strip and the Nyanza and Kikuyu Provinces where there may be from 40 to 80 inches a year, and

(3) The remainder of Kenya where rainfall is from 20 to 40 inches a year. On the Coast there is usually a single rainy season from April to November, but up-country there are generally "long" rains from April to June, and "short" rains from October to December. The Coastal regions have a tropical climate though nights are cool except during the hottest months from December to April. In the Highlands the climate is invigorating with cool breezes; at Nairobi the mean maximum shade temperature in 1931 was 73.1°F., and the mean minimum 54.9°F. The rainfall at Nairobi was 45.59 inches.

#### *Currency and Banks.*

The currency originally consisted of the Indian rupee as the standard coin, with smaller local coins and notes of higher denominations, all expressed in terms of the rupee; the British sovereign was also legal tender at Rs. 15. The exchange value of the rupee, after being maintained for many years by the Government of India at 1*l*. 4*s*., began to rise in 1917 and early in 1920 reached 2*s*. 9*d*. It was then decided to fix the rate in the East Africa Protectorate, the Uganda Protectorate, and the Tanganyika Territory at 2*s*. sterling to the rupee, and to issue a new currency in local rupee coin and notes, but subsequently it was decided that the new coinage should be expressed in terms of florins, instead of rupees, the 50 cent piece being alternatively termed a shilling. Some rupee notes were introduced but no rupee coins. Later the shilling was made the standard coin instead of the florin, and arrangements were made to withdraw from circulation the Indian rupee, which was demonetised from July, 1921. The nickel-bronze coins (1, 5 and 10 cents of a rupee) have been withdrawn from circulation, and new copper-bronze coins (1, 5 and 10 cents of a shilling) have been introduced.

The old Local Board of Currency Commissioners has been abolished, and the Currency of the Colony and Protectorate is now in the hands of the East Africa Currency Board in London, represented locally by the Treasurer.

*The National Bank of India Ltd.* (Head Office:—26, Bishopsgate Street, London) are bankers to the Government of Kenya, with branches in the Colony and Protectorate of Kenya at Mombasa, Nairobi, Nakuru, Eldoret, and Kisumu, and at Kampala, Entebbe, and Jinja in the Uganda Protectorate.

*The Standard Bank of South Africa Ltd.* (Head Office:—10, Clement's Lane, Lombard Street, London) have branches at Mombasa, Nairobi, Eldoret, Nakuru, Kisumu, Nyeri, Nanyuki, Kitale in the Colony and Protectorate of Kenya, and at Kampala and Jinja in the Uganda Protectorate.

*Barclays Bank (Dominion, Colonial and Overseas)* with which is amalgamated *The National Bank of South Africa Ltd.*, has branches at Mombasa, Nairobi, Nakuru, Kitale and Eldoret, and at Kampala and Jinja in the Uganda Protectorate.

#### *Land and Products.*

As the pursuit of agriculture is possible from sea level to altitudes of over 9,000 feet, climatic conditions are extremely varied and tropical, sub-tropical and temperate crops are grown.

Considerable quantities of hides are exported from all parts of the Colony, but the principal producing areas developed at present are at elevations of 4,000 feet and over.

In the highlands coffee, maize, wattle, tea, wheat and potatoes are the principal crops and in the lower parts of the Colony, including the Coast, sisal, maize, coconuts, cotton, sugar cane and miscellaneous grains and oil seeds are grown.

Exports of agricultural commodities in 1932 were valued at £1,967,730.

Whereas considerable quantities of foodstuffs for the non-native population were imported in former years most of these have now been replaced by home-grown supplies.

Extensive pasture grounds exist throughout the highlands and maintain considerable herds of grade and native stock. The dairy industry under European supervision is in a thriving condition. Butter and cheese are prepared, and increased supplies of the former are being exported.

Fishing industries are established on the Coast and Lake Victoria and provide valuable supplies for local consumption.

The forest products of the Coast are mangrove poles and bark, timber, ebony, and gum copal. The highland forests contain large quantities of pencil Cedar and several other good timbers such as Podocarpus, Olive, and East African Camphor, also large areas of bamboo suitable for the manufacture of high quality paper pulp.

A geological survey was inaugurated during the year and the following minerals were located:—*Gold* has been found throughout the Nyanza Province and in the southern part of the Masai Reserve. *Silver* is commonly associated with the gold discoveries.

*Copper* occurs in the north-eastern part of the Ukamba Reserve.

*Lead and Zinc* are found in the Coastal Province. *Asbestos* is being exploited near Sultan Hamud and a local industry developed.

*Arsenic* occurs in the form of arsenical pyrites in the Nyanza Province.

*Barite* is found in the Coastal Province.

*Diatomite* is found near Gilgil and in many other parts where lacustrine beds occur.

*Gypsum* has been discovered near Simba.

*Iron Magnetite-quartzites* occur in the Basement Complex and form a possible ore for the future.

*Ilmenite (Titanium)*. The sand is abundantly concentrated in the rivers of the Nyanza Province.

*Limestone*. Abundant supplies are found near Voi, Kajiado, Loldai, and in the Suk country.

*Mica*. "Kunkar" is worked south of the Kavirondo Gulf, Suk and Ukamba Reserve.

*Olivine* is concentrated in the rivers draining the Aberdares.

*Potash and Soda*. These salts are being exploited at Lake Magadi.

*Tin*. Cassiterite has been discovered in the Trans Nzoia.

*Zircon* is an abundant constituent in the river beds of Nyanza but is particularly plentiful in the streams draining the Coastal ranges.

The total area of land alienated as at December 31st, 1932, was 6,772,480 acres. In addition, there are 357,120 acres of Township and Government Reserves. Sale of leases of land by public auction has been resumed.

*Trade, Customs and Excise.*

Under the terms of the Congo Basin Treaties' equality of treatment in respect of imported goods irrespective of origin is ensured, and the grant of Imperial Preference is therefore inadmissible. Goods declared as in transit are allowed to be imported and forwarded under Customs control on payment of expenses of administration (6d. per package).

For purposes of Customs, Kenya and Uganda form a single unit and by agreement with the Tanganyika Territory Government a common Tariff has been accepted by the three territories, the free and unrestricted movement within the territories of both imported goods and local products being thus secured. The Common Tariff, however, includes a small number of "suspended duties" which are of a protective nature and may be imposed by Proclamation either in part or in full in any or all of the territories.

The general duty rating under the Common Tariff is 20 per cent. *ad valorem* based on the landed value at the port of entry, building materials, artisans' tools, and vehicles and parts being admitted at lower ratings. Specific duties are imposed on such articles as readily lend themselves to this form of assessment and in certain cases alternative specific or *ad valorem* charges are levied. Exemption from duty is allowed on drugs and medicines, packing materials, disinfectants, germicides and vermin killers, machinery, and many articles necessary for road construction, sanitation, irrigation and drainage purposes, and for the agricultural, industrial, and educational development of the territories.

Amendments to the Customs Tariff in 1932 were of a minor character, being confined to a reduction in the duty on currants from 20% *ad valorem* to Shs. 1-75 per 100 lbs. and to the insertion of authority to the Commissioner of Customs to compute for purposes of assessment of duty, the freight on goods conveyed by air at a figure not less than one-fourth of the sum actually charged.

Excise duties are imposed on locally manufactured sugar (£1 per ton), tea (10 cents per lb.), cigarettes and cigars (75 cents per lb.), tobacco (50 cents per lb.), and beer (£2 per standard barrel), the revenue derived from these duties being allocated to the consuming territory as is the case with Customs collections.

For Kenya and Uganda, the value of Trade Imports (excluding imports on Government Account, railway material and goods in transit and transhipment) and of exports (domestic and foreign) and the net amount of Customs receipts from all sources and the tonnage entered at Kenya Ports, were as follows:—

Years.	Trade Imports.	Total Exports.	Customs Receipts.	Tonnage entered.
	£	£	£	Tonnage.
1926	7,690,577	7,844,681	1,160,593	1,444,320

*Communications.*

The Union Castle Line and the British India Steam Navigation Co. maintain a monthly service of passenger steamers from and to London. The Union Castle vessels run either via the Cape or Suez.

The Messageries Maritimes from Marseilles to Madagascar call fortnightly at Mombasa, home-wards and outwards.

The Tirrenia have two lines calling monthly; one steamer running as far as Zanzibar, and back to Genoa, and the other as far as Durban, and also back to Genoa, calling at the principal ports en route, including those of Italian Somaliland.

The Navigazione Libera Triestina Line also maintains a north and south service with Italian ports.

The Clan Ellerman Harrison Line maintains a three-weekly service of fast cargo steamers from Liverpool; also a service from the U.S.A. and Canada.

The Holland Afrika Line maintains a fortnightly service from London and continental ports to South and East Africa calling at this Port.

The Deutsche Ost Afrika Line maintains a three-weekly passenger and cargo service between Mombasa, Continental ports and Southampton.

The Osaka Shosen Kaisha Line connect monthly with Japan.

A fortnightly Mail Service to Bombay and Durban is maintained by the British India Steam Navigation Company's passenger and cargo steamers. The North bound ships connect at Bombay with the P. & O. mail steamers to England.

A monthly passenger service is maintained with Batavia via southern ports by the Royal Packet Company of Holland.

Communication between the coastal ports of the Protectorate is maintained by steamers belonging to the B.I.S.N. Co. & Messrs. Cowasjee Dinshaw Bros.

The Kenya and Uganda Railway was formerly worked as a State Railway of Kenya Colony, but in 1921 it was decided that from 1st April this line together with all branch lines and steamer services both in Kenya and Uganda should be controlled by an Inter-Colonial Railway Council, consisting of a chairman and one official and one unofficial member from each Territory (Kenya and Uganda), and that railway surpluses should not be available for general colonial revenue purposes.

On the 3rd February, 1926, the Kenya and Uganda (Transport) Order-in-Council, 1925, came into force, by which was established the office of High Commissioner for Transport for the Colony and Protectorate of Kenya and the Protectorate of Uganda. It provided that this office should be held by the Officer administering the Government of Kenya, and that he should have the control of the transport services owned, controlled, or managed, by the Governments of either of the two Territories, including railways, ports, wharves and steamships; these services were to be known as the Kenya and Uganda Railway. The Order-in-Council further provided for the constitution of a Kenya and Uganda Railway Advisory Council to consist of not more than two official and two unofficial members representing Kenya, and not more than two official and two unofficial members representing Uganda, each territory's representatives, official and unofficial, to be appointed by the respective Governors; and it directed that a Railway and Harbour Fund should be formed, into which was to be paid all revenue derived from the administration of the services, and from which all disbursements were to be made.

The length of the line, which is metre gauge, including branches open to traffic at the end of 1932, is 1,627 miles, excluding loops and industrial sidings.

The Railway Marine consists of the Lake Victoria, Lake Kioga, Lake Albert, and River Nile flotillas. Their respective strengths are as follows:—

Lake Victoria, 5 Steamers, total displacement 5346 tons.

4 Tugs and 1 Launch.

1 motor vessel (Kagera River Service).

35 Lighters, total capacity 3830 tons.

Lake Kioga, 3 Sternwheel Steamers.

1 Launch.

19 Lighters, total capacity 1900 tons.

Lake Albert

and River Nile 4 Steamers and 3 Lighters.

The following figures include all services both in Kenya and Uganda:—

Total Expenditure on Capital Account at the end of 1932 .. 22,219,141.

#### Revenue for 1932—

Railways .. .. .	1,838,661l.
Harbours .. .. .	282,354l.
Ordinary Working Expenditure excluding Loan and Redemption Charges, for 1932—	
Railways .. .. .	1,044,161l.
Harbours .. .. .	125,224l.
No. of Passengers carried .. ..	558,492.
Goods carried (Revenue earning) Tons .. .. .	726,154.
Total Steamer Mileages (all three services) .. .. .	149,508.

In 1927 the title of the Kenya and Uganda Railway was changed to that of Kenya and Uganda Railways and Harbours, and the Administration assumed control of the working of the Port of Mombasa and coastal ports.

The old harbour at Mombasa is now entirely used by dhows. Kilindini Harbour has been the scene of intensive development during the last eight years, and some 3½ million pounds sterling have been expended there. There is now, in addition to the former lighterage quay, a deep-water quay having a length of approximately 3,000 feet. This quay can accommodate six ships alongside of the normal type using the port. The quay is served by 25 electric level-luffing cranes and there are five transit sheds, three of which are double storey. The total number of quay, shed and stacking ground cranes are 82 up to date. A jetty at which bulk oil ships discharge to tanks ashore has just been brought into use. A Harbour Advisory Board advises the High Commissioner for Transport on Port Matters.

Kilindini Harbour, at the Port of Mombasa is the finest land-locked and sheltered harbour on the East coast of Africa; it possesses an ample water supply.

The principal river flowing into the Indian Ocean is the Tana, which is navigable for about 400 miles by small shallow draft steamers. The bar at Kipini is an obstacle to navigation from the sea.

The Port of Kilifi consists of a land-locked Harbour, 30 miles North-East of Mombasa. It offers good anchorage for small vessels, and opens out into the Bandari Ya Wali, a bay about one-and-half miles wide, with shallow anchorage.

There is a District Commissioner in residence at Kilifi.

The Port of Malindi is an open Harbour, 60 miles North East of Mombasa. Ships of any size can anchor off Malindi, but the anchorage is very exposed to the Monsoons. Cotton, Sim sim, and Copra are exported.

A District Officer resides at Malindi.

About three miles North of Malindi is the mouth of the Sabaki River. This river, which has recently been bridged about a mile from its mouth, passes through a country of great fertility, but is shallow and only navigable by canoes.

The Port of Lamu lies between Lamu and Manda Islands, 140 miles North-East of Mombasa. The town of Lamu, the most important Coast town North of Mombasa, is situated on Lamu Island. There is a good anchorage for vessels of moderate draught, but the bar carries only 15 feet at low water. The exports are cocoa-nuts, copra, rope, mat bags, and some cattle.

There is a District Commissioner in residence at Lamu.

#### Posts and Telegraphs.

The Post Office of the Colony (exclusive of Uganda, which is worked by the Kenya Post Office) received and despatched during 1932, 13,881,200 letters, packets, etc., and 388,543 telegrams.

The Telegraph and Telephone system has 13,919 miles of wire (exclusive of Uganda). The lines connect Mombasa with Lamu (171 miles), Kipini with Witu (13 miles), Mombasa to Tanganyika Border (61 miles), Mombasa with Nairobi (336 miles), Voi to Tanganyika Border (81 miles), Konza with Magadi (91 miles), Konza with Machakos (22 miles), Nairobi with Thika (35 miles), Thika with Makuyu (19 miles), Makuyu with Nyeri (58 miles), Nyeri with Nanyuki (32 miles), Nanyuki with Isiolo and Archer's Post (123 miles), Nairobi with Kiambu (10 miles), Nairobi with Kijabe (43 miles), Kijabe with Narok (61 miles), Kijabe with Gilgil (39 miles), Gilgil with Thomsens Falls (45 miles), Thomsens Falls with Rumuruti (34 miles), Gilgil with Nakuru (40 miles), Nakuru with Nakuru Junction (5 miles), Nakuru Junction with Kisumu (132 miles), Lumwa with Kericho (19 miles), Kericho with Chemagel (32 miles), Muhoroni with Songhor (10 miles), Kibigori with Eldoret (49 miles), Kisumu to Uganda Border (89 miles), Nakuru Junction with Eldoret (122 miles), Rongai with Lake Solai (27 miles), Maji Mazuri with Eldama Ravine (6 miles), Eldoret with Sergoit and Moiben (28 miles), Eldoret to Uganda Border (98 miles), Leseru with Kitale (43 miles), Kitale with Endebess (11 miles), Kitale with Kiminini (10 miles), Kapasabet with Kakamega. Lines follow all Railway routes. Communication between Mombasa and ships at sea and Italian Somaliland is maintained by means of radio-telegraphy. A cable connects Mombasa with Zanzibar. A short-wave wireless station, owned and maintained, under licence from Government, by the Imperial and International Communications Limited, is established at Nairobi and provides communication between the Colony and Protectorate and Great Britain.

Telegraph communication exists with Uganda and Tanganyika Territory. The Kenya telegraph system is also linked up via the Tanganyika Territory, Nyassaland and Rhodesian systems with the South African service. Communication with the Belgian Congo is maintained through Uganda with which the Belgian Congo system is linked up.

Telephone Exchanges are worked at Nairobi, Mombasa, Nakuru, Eldoret, Kisumu, Kitale, Kiambu, Koru, Ruiri, Kabete, Meru, Molo, Nyeri, Thika, Kericho, Kikuyu, Limuru, Njoro, Sotik, Soy and Turbo. There is telephone communication between Nairobi—Dar-es-salaam and intermediate points.

2,675 telephones were in use in Kenya at the end of 1932.

#### Civil Aviation.

Civil aviation has shown rapid development in the Colony. Aerodromes have been established and are maintained by Government as Customs Aerodromes at Mombasa, Nairobi and Kisumu. Landing grounds are also maintained at Nakuru, Naivasha, Voi and Makindu by Government. An aerodrome at Eldoret has been licensed and is controlled by the Municipality. Other landing grounds exist, though unlicensed at present.

Imperial Airways (Africa) Limited operate a regular weekly service for the transport of passengers, mails and freights, between Cairo and Cape Town. The aircraft of this service call at Nairobi and at Kisumu, which place has developed as an important air port. At Cairo the service connects with a similar service to England.

Wilson Airways Limited operate a weekly coastal air mail and passenger service linking Nairobi and the Cairo-Cape Town route with Mombasa, Tanga, Zanzibar and Dar es Salaam.

An experimental passenger and freight air service linking Entebbe, Jinja, Tororo, Eldoret and Kisumu is being started by the Air Survey Company.

## \*THE LEEWARD ISLANDS.

### *Situation and Area.*

The Colony of the Leeward Islands, with a total area of 708 square miles, consists of a number of islands belonging partly to the chain of the Lesser Antilles and partly (the Virgin Islands Group) to the eastern extremity of the Greater Antilles. The islands of Antigua, Barbuda, St. Christopher (St. Kitts), Nevis and Montserrat form a fairly compact group between the 61st and 63rd degree of west longitude and around the 17th degree of north latitude; but Dominica lies about 100 miles to the south, separated by the French island of Guadeloupe from the rest of the Colony, while Anguilla, Sombbrero, and still more the Virgins group (Tortola, Virgin Gorda, Anegada, etc.), lie apart to the north and north-west.

St. Kitts, Nevis, Montserrat and Dominica form part of the volcanic chain of the Lesser Antilles, whilst Antigua and Barbuda form part of the eastern sedimentary series of the same chain.

Politically the Colony is divided into five Presidencies:—Antigua (with Barbuda), St. Christopher and Nevis (with Anguilla), Dominica,

Montserrat and the Virgin Islands. These have been united and separated at various times in their history, and were finally federated in 1871 by Imperial Act 34 and 35 Vict., cap. 107. Sombbrero was added to the Colony by Order in Council under the Colonial Boundaries Act on the 10th August, 1904, being attached to the Virgin Islands Presidency.

### *History.*

The islands were discovered by Columbus on his second voyage, in 1493, and became British during the 17th century. Particulars of their subsequent history will be found in the separate articles, but it may here be mentioned, that with the exception of Dominica, they have been from the first associated politically as well as geographically. They were all colonised from St. Kitts as centre, all included in the Carlisle grant, and possessed a common Legislature as far back as the reign of William and Mary. The General Legislature met for the last time in 1798, when it passed a highly humane slave amelioration Act, which was allowed; a Catholic Emancipation Act, and an Act repealing the duty on exports of 4½ per cent. for the benefit of the English exchequer—both which were disallowed. An attempt was made by Sir William Colebrook in 1837 to revive the General Legislature, and though the attempt was regarded unfavourably in some quarters, and the Legislature never actually met, yet the right to revive it was clear, and there is no doubt that the Act of 1871, the passing of which was largely due to the energy and activity of Sir Benjamin Pine, is no more than a revival of the ancient constitution of the islands. The Presidencies of St. Kitts and Nevis, with Anguilla and their respective dependencies, were united into one Presidency by the Federal Act No. 2 of 1882.

### *Climate.*

The climate of the islands varies, but is usually dry (except in Dominica) and fairly healthy. Antigua is subject to drought, and has an average rainfall of about 45 inches; St. Kitts, Nevis and Montserrat have average rainfalls of from 50 to 60 inches; the rainfall of Dominica averages about 120 inches. The mean temperature is about 80°, with but a slight range. The Virgin Islands are cooler. The hot season is from May to October; the rainy season from August to January.

### *Constitution.*

By "The Leeward Islands Act, 1871," one Executive and one Legislative Council, under one Governor, were constituted for the six (now five) presidencies. The Legislative Council now consists of ten official and ten elected members. Three elected members are chosen by the unofficial members of the Legislative Council of Antigua, two by those of the Legislative Council of Dominica, three by those of the Legislative Council of St. Kitts and Nevis, and one by those of the Legislative Council of Montserrat. They must be and continue members of their respective island councils. As there is no Legislative Council in the Virgin Islands, one member is appointed by the Governor to represent that Presidency. The official members are the Governor, the Colonial Secretary, the Attorney-General, the Federal Treasurer, the Administrators of St. Kitts-Nevis, and Dominica, and the Commissioners of Montserrat and the

Virgin Islands, and such other person holding office under the Government of the Colony of the Leeward Islands as the Governor with the approval of the Secretary of State may appoint.

The Legislative Council has concurrent legislative powers with the local legislatures on certain subjects specified in the Act, such as matters of property, mercantile and criminal law, the law relating to status, the maintenance of a general police force and a common convict establishment, quarantine, postal and telegraph affairs, currency, audit, weights and measures, education and the care of lunatics, all matters relating to immigration, copyright and patents, and its own constitution and procedure. Any island legislature is, in addition, competent to declare other matters to be within the competency of the general legislature. Any island enactment on such subjects is void if repugnant to an enactment of the general legislature, or may at any time be repealed or altered by one.

The Council meets at least once a year, at a place notified by proclamation, and no Council lasts more than three years. The session usually lasts for about one week.

The expenses of the federal establishments are voted by the Council, and apportioned among the Presidencies.

The Council has power to alter its constitution by an ordinary Act, to be reserved for the King's pleasure, and the King has power, by Order in Council, at any time to include any other West Indian Island in the federation, upon joint addresses from the Legislative Body of such island, and from the Council, on such terms and conditions in each case as are in the addresses expressed. This power has not actually been exercised, and the inclusion in the Colony of Sombrero, which had no legislative body, was effected as above mentioned under a different Act.

#### Currency and Banking.

The usual currency is British silver, a few British and United States gold coins being occasionally met with. Barclays Bank (Dominion, Colonial and Overseas) Ltd. and the Royal Bank of Canada have branches in Antigua, St. Kitts, and Dominica, and the latter bank has a branch in Montserrat. In Nevis and the Virgin Islands there are no banks.

Government savings banks have been established in all the Presidencies.

#### Means of Communication.

The following Steamship Lines serve the Colony:—

Canadian National Steamships (from Canada and Bermuda) and Ocean Dominion Line (from Canada) call fortnightly at the chief ports in the Colony, proceeding to Windward Islands, Barbados, Trinidad and British Guiana.

Furness Bermuda Line (Br.), Ocean Dominion Line (U.S.) and Munson Line (U.S.) about once every two weeks from New York and St.

Thomas call at St. Kitts, Antigua and Dominica, proceeding to French West Indies, Windward Is., Barbados, Trinidad, etc.

A passenger steamer from London (Harrison Line) proceeds direct to Antigua every month. Passengers travelling between England and the Leeward Islands can travel direct between England and Barbados by the Elders & Fyffes Line, or Harrison Line, or the Royal Dutch West India Line, etc., and between Barbados and the Leeward Islands by Canadian National Steamships or by the Furness Bermuda Line.

Passengers may also travel to or from England via New York or Canada by the Lines mentioned, but in practice, the route via Barbados is usually adopted for passenger traffic to and from Europe.

An Air Mail service operated by Pan American Airways calls weekly at Antigua from Miami (U.S.A.) via Cuba, Haiti, Santo Domingo Porto Rico and St. Thomas, proceeding to St. Lucia, Trinidad, Georgetown (Br. Guiana) and Paramaribo (Dutch Guiana) and returns, also weekly, in the opposite direction.

Air Mails are also conveyed by the Company to Jamaica, Central America and South America (see below).

#### Posts and Telegraphs.

Mails with Great Britain are exchanged via New York, occasionally via Barbados, and sometimes direct from Antigua, and direct with Canada, the United States and the British West Indies.

Mails are also exchanged by Air with the places served by the Pan American Airways, and with Great Britain and Canada via Miami, U.S.A.

There are 55 Post Offices in the Colony and the rates of postage are as follows:—

*Inland.*—Letters, 1d. for the first 2 oz., ½d. per additional 2 oz.; Post cards, ½d.

*British Empire, Egypt and Tangier.*—Letters, 1½d. for the first oz., 1d. per additional oz.; Post cards, 1d.

*Other places.*—Letters, 2½d. for the first oz., 1½d. per additional oz.; Post cards, 1d.

*All places.*—Printed matter, ½d. per 2 oz.; "small packets," 6d. up to 8 oz.; 1½d. per additional oz.

Parcel post despatches are exchanged with Great Britain via Barbados, Canada and New York and direct with Canada, the United States and British West Indies, Bermuda, Br. Guiana, Guadeloupe and Dependencies and the Dutch West Indies, and via London or New York to other countries.

British Imperial Postal Orders are issued and paid in the Colony and Money Orders are exchanged direct with Great Britain, Canada, the United States and British West Indian Colonies.

Telephone Systems are maintained by the Government in Antigua, St. Kitts, Nevis, Dominica, and Montserrat.

Telegraph communication is maintained by means of Wireless operated by Imperial and International Communications, Ltd., there being stations at Antigua, Dominica and St. Kitts, all of which communicate with one another and with Barbados for telegrams to the United Kingdom, Canada, North America, etc. There is also a wireless station in Montserrat maintained by the Colonial Government but operated by the Company.

The principal tariffs are:—

To England	2/4d. per word.
To Eastern Canada	1/6d. " "
To Western Canada	1/8½d. " "

There are also cheap rates at one half and one third of the ordinary tariff, the latter being subject to a minimum charge.

There are cable stations at Antigua, Dominica and St. Kitts, which have been taken over by the existing Wireless Company.

#### *Chief Towns.*

The most important towns are St. John (Antigua), 6,997; Basseterre (St. Kitts), 7,736; and Roseau (Dominica), 6,803, all 1921 census.

#### *Education.*

The system of elementary education is denominational in Montserrat and the Virgin Islands, the various denominations being Anglicans, Wesleyans and Roman Catholics. In the other Presidencies elementary education is provided by the Government. On 31st December, 1932, there were 112 aided and Government schools in the Colony. The clergy of the various denominations are granted facilities for giving religious instruction during school hours to the children of their respective churches. During the financial year Apl.-Dec., 1931, the Government grants to all the elementary schools in the Colony amounted to £19,635.

School fees have now been abolished in all public elementary schools throughout the colony. The schools are required to receive all children applying for admission. Grants-in-aid are refused to superfluous or inefficient schools. In the 112 aided and Government schools there were enrolled on 31st March, 1931, 25,448 children, with a daily average attendance of 17,681. For secondary education there are government grammar schools for boys in St. Kitts, Dominica and Montserrat, a private grammar school for boys in Antigua, private girls' high schools in Antigua and St. Kitts, and private mixed schools in Antigua, Nevis, St. Kitts (convent) and Dominica (convent). The standard of the secondary schools is the Cambridge School Certificate.

There is a training college for female teachers in Antigua (under the control of the Moravian Church).

#### *Civil Service.*

A system of grading civil service clerks has been established throughout the Colony. The pay assigned to the several grades is as follows:—

\* Includes a Grant-in-Aid from the Imperial Govt. of £90,000.

† Includes Grant-in-Aid of £8,500.

## ANTIGUA.

Antigua is situated in W. long. 61° 45', and N. lat. 17° 6'. It is about 54 miles in circumference, and its area is 108 square miles, about half the size of Middlesex.

The islands of Barbuda (population 902) and Redonda are dependencies of Antigua. They have a total area of 62½ square miles. Barbuda lies about 25 miles due north of the main island, with an area of 62 miles, is very flat, with a large lagoon on the west side, separated from the sea by a spit of sand. It was long owned by the Codrington family. It produces some salt and phosphates of lime, and is well adapted for cattle grazing and horse rearing. Cotton is being grown with favourable results. Deer were introduced by the Codringtons. The island has communication with Antigua by a sailing boat service. Redonda, lying between Montserrat and Nevis, 25 miles S.W. of Antigua, in 25° 6' N. lat., 61° 35' W. long., 1 mile by ½ mile, 1,000 feet high, is valuable for its phosphate of alumina mines, discovered in 1866, formerly worked by the Redonda Phosphate Company under license and subject to an annual rental of 50l.

Antigua was discovered by Columbus in 1493, who named it after a church in Seville, called Santa Maria La Antigua. It was first inhabited by a few English from St. Kitts in 1632. In 1663 Charles II. made a formal grant of the island to Lord Willoughby, who sent out a large number of colonists. After an interval of French occupation, it was declared a British possession by the Treaty of Breda, 1666. There are no rivers, and few springs in the island, and consequently it is exposed to frequent droughts. The island is in the main low-lying and has no forests. Rainfall:—

On the 22nd March, 1898, the Legislative Council, which was previously partly elected and partly nominated by the Governor, passed an Act abrogating itself and substituting the Crown Colony system. The new Council consists of sixteen members, eight official and eight non-official, all nominated by the Governor under Royal Letters Patent. The Governor presides. By Ordinance No. 7 of 1910, the duration of the Council is limited to three years.

The chief products are sugar and cotton. In 1932, 12,043 acres were under sugar-cane, 500 under cotton, 1,400 under provisions, and 55,153 were uncultivated.

St. John, the chief town, has a population of 6,997 (census of 1921), and is a port of registry, having on 31st December, 1932, 23 sailing vessels registered, with a total tonnage of 401.

## ST. CHRISTOPHER AND NEVIS.

This Presidency consists of the Islands of St. Christopher (St. Kitts), Nevis and Anguilla. These were united to form one Presidency by the Federal Act No. 2 of 1882.

The total population on 31st December, 1932, was estimated at 36,730, as compared with 38,214 at the census of 1921. The total area is about 152 square miles.

*Constitution and Government.*

In 1625 Mr. (afterwards Sir Thomas) Warner landed in St. Christopher, bearing a Royal Commission to the Earl of Carlisle, by which the islands of St. Christopher (or Marwar's Hope), Nevis, Barbados and Montserrat were taken under royal protection, and given over to his custody as the King's Lieutenant.

In 1671 St. Christopher, Nevis, Montserrat, Antigua, Barbuda, Anguilla "and all other the Leeward Islands" were separated from Barbados and created the "Leeward Caribbee Islands Government," and Sir Charles Wheler was appointed "Captain-General" of the same. The chief seat of government was then at Nevis, but afterwards transferred to Antigua, and the government of each island, in the absence of the Captain-General, was administered by a Lieutenant-Governor, or, when none such was appointed, by the President of the Council.

In 1689 Colonel Christopher Codrington was appointed Governor-in-Chief, and his Commission, granted by William III., and dated 20th October, 1689, authorised him to call assemblies of freeholders and planters within any of the islands "jointly and severally to make laws for the public peace, welfare and good government of the said islands," thus providing for separate and federal legislatures. The Legislature in St. Christopher and in Nevis, as in the other islands of the government, consisted of two houses, a nominated Council and an elected Assembly, and had secured to it its own peculiar laws and local jurisdiction.

By Letters Patent, dated 26th April, 1816, the Commission originally granted to Sir William Stapleton was revoked, and the Leeward Caribbee Islands formed into two distinct governments, the first comprising Antigua, Montserrat and Barbuda, and the other St. Christopher, Nevis, Anguilla and the Virgin Islands.

By Letters Patent, dated 23rd November, 1832, the General Government was restored, Dominica being for the first time included, and a Governor and Commander-in-Chief, with two Lieutenant-Governors for St. Christopher, Nevis and Anguilla, and for Dominica respectively, were appointed, each island possessing a Legislative Council and a House of Assembly, which continued, under the supervision of the Governor-in-Chief, to legislate for local interests.

In 1866 measures were introduced in each island to alter the constitution, and the two houses then existing were replaced by a single Legislative Assembly, consisting of *ex-officio* members, nominees of the Crown, and representatives of the people elected under a limited franchise.

In 1878 the single chamber constitution was repealed in St. Kitts and in Nevis, and the Crown Colony form of government adopted in its stead, and in 1882 these two islands, with Anguilla, were united into one Presidency.

The office of Lieutenant Governor, which has been held until 1870, has been vacant, in the absence of the Governor, is under the immediate administration of the Administrator.

There is one Executive Council, consisting of the Administrator, certain *ex-officio* members, and other persons as His Majesty may from time to time appoint. The Council consists of seven official and five members, besides the Administrator. Of the unofficial members, more than six shall be from the islands of St. Kitts and Anguilla, and one shall be a member of the people of Nevis. In the absence of the Administrator, one of them, a member of the Council, presides, and the Council enjoys an original jurisdiction. The Council meets at the town of St. Kitts.

### Industry, Trade and Commerce

Sugar is the principal crop. The yield of cane in 1933 crop, 2,000 tons of sugar manufactured in the Basseterre Valley, the slopes round the island, giving the best average yield of sugar produced in the island from Basseterre. A belt of cane encircles the island. The only other important crop, the lint produced in 1933, 100 acres. Successful attempts have been made to encourage the growing of other vegetables for export to the United Kingdom, shipped in 1932.

Coconuts and coconuts are the principal exports from Nevis. Vegetables and cattle, chiefly for local consumption.

Salt is the chief product of the island, produced from ponds at the bay of St. Kitts, the combined value of 750 tons valued at 645*l*. Anguilla also produces cotton.

There are no manufacturing industries. The manufacture of sugar is the main industry. The Customs import tariff is on a sliding scale, with a surtax on a sliding scale, reduction varying in amount equal to one third of the value of the Empire products.

Table is as follows :—

United Kingdom	...
Other British countries	...
U.S. of America	...
Other foreign countries	...

### Education

There are four secondary schools, one grammar school for boys, one high school in St. Kitts, one in Nevis, both state-aided, and one Roman Catholic Sisters.

The office of Lieutenant-Governor, which existed until 1870, has been abolished, and the Presidency, in the absence therefrom of the Governor, is under the immediate supervision of an Administrator.

There is one Executive Council for the Presidency, consisting of the Governor, the Administrator, certain *ex-officio* members, and such other persons as His Majesty may from time to time appoint. The Legislative Council consists of seven official and seven nominated unofficial members, besides the Governor and the Administrator. Of the unofficial members not more than six shall be from among the people of St. Kitts and Anguilla, and one at least from among the people of Nevis. The Governor, or, in his absence, the Administrator, or, in the absence of both of them, a member of the Council appointed in writing, presides, and the President of the Council enjoys an original and a casting vote. The Council meets at the town of Basseterre in St. Kitts.

### Industry, Trade and Customs.

Sugar is the principal crop in St. Kitts (186,648 tons of cane in 1933 crop, from 7,715 acres, 24,169 tons of sugar manufactured). It is grown in the Basseterre Valley and on the lower slopes round the island (the northern side showing the best average yield), and the cane is crushed and sugar produced at a central factory a mile from Basseterre. A light railway for haulage of canes encircles the island. The sugar industry is at present suffering severe depression.

The only other important crop in St. Kitts is cotton, the lint produced in 1932 being 126,403 lbs. on 600 acres. Successful efforts are being made to encourage the growing of tomatoes and other vegetables for export to Canada, 3,160 crates being shipped in 1932.

Cotton and coconuts are the chief products exported from Nevis.

Vegetables and cattle, chiefly for export to St. Kitts and for local consumption, are also produced in Nevis.

Salt is the chief product of Anguilla, and is also produced from ponds at the south eastern part of St. Kitts, the combined quantity in 1932 being 759 tons valued at £451.

Anguilla also produces cotton in small quantities.

There are no manufacturing industries (other than the manufacture of sugar) in the Presidency.

The Customs import tariff is mainly on an *ad valorem* basis with a surtax of 25%. A preferential reduction varying in amount, but in most cases equal to one third of the general rate, is accorded to Empire products. The percentages of trade is as follows:—

United Kingdom .. ..	46
Other British countries .. ..	31
U.S. of America .. ..	14
Other foreign countries .. ..	9
	100

### Education.

There are four secondary schools:—a Government grammar school for boys in St. Kitts, a girls' high school in St. Kitts and a mixed school in Nevis, both state-aided, and a school by the Roman Catholic Sisters.

There are 31 Government primary schools (16 in St. Kitts, including 4 in Basseterre, 10 in Nevis and 5 in Anguilla) and also a Roman Catholic school and a few small private schools.

### St. Kitts.

The island lies in latitude 17° 18' N., and longitude 62° 48' W. The area of the main body of it presents a long oval, from the south-eastern end of which runs a narrow neck, gradually expanding into a small knob of land, within which are the salt ponds.

The total length of the island is about 23 miles. The total area is 68 square miles.

The central part of the main body consists of a range of lofty rugged mountains, which traverses it from south-east to north-west, attaining its greatest height at Mount Misery, which is about 3,711 feet above the sea. A branch of this range encloses the spacious and fertile valley or plain, on the seaboard of which lies Basseterre, the principal town, with a population of about 8,000. Near the town of Sandy Point is Brimstone Hill, strongly fortified and fiercely besieged during the French wars. It is quite isolated, and about 750 feet in height.

The circle of land formed by the skirts and lower slopes of the mountain-range of the main body of the island, and the valley of Basseterre, constitute nearly the whole of the arable and cultivated portion of the island. The higher slopes of the mountains are covered with short grass, affording excellent pasturage, while their summits are crowned with dense wood. The island is of volcanic formation, and the soil, save in the mountains (where it is clayey) is peculiarly light and porous, sandy yet fertile.

The climate, for a tropical one, is decidedly healthy. The highest temperature in the shade is about 88°, the lowest 66°, and the mean average about 76°.

The average rainfall in St. Kitts for the year 1932 was 73·01 inches.

St. Christopher or St. Kitts, the Carib name of which was Liamuiga, "The Fertile Isle," was the first settled of the British West Indies, the settlement having been founded by Mr. Thomas Warner and other settlers, who landed on the 28th January, 1623, at the present village of Old Road. Later, French settlements were formed at the two ends of the island. The whole island was finally assigned to England under the Treaty of Versailles in 1783.

### Nevis.

The island of Nevis is situated in 17° 40' N. lat., and 62° 33' W. long. It was discovered in 1498 by Columbus, and was colonised by the English from St. Kitts in 1628. Charlestown, the principal town, has a population of about 1,100. The population of Nevis largely consists of peasant proprietors.

The island, which is divided into five parishes, is nearly of a circular form; its area is about 50 square miles, or about 32,000 acres, of which about 15,000 acres are fit for cultivation; its greatest elevation 3,596 feet above the sea.

The soil is very different from that of St. Kitts, being of stiff clay, encumbered everywhere with volcanic boulders.

There are hot mineral springs adjoining the Bath House Hotel near Charlestown. These springs have valuable medicinal properties.

The climate is very similar to that of St. Kitts, from which place it is separated by a strait of about two miles in breadth at its narrowest

part, which, however, lies out of the direct course for boats plying between the two islands. The distance between Basseterre (St. Kitts) and Charlestown (Nevis) is about twelve miles.

#### Anguilla.

Anguilla is situated in 18° 12' N. lat., and 63° 5' W. long., about 60 miles N.W. of St. Kitts, and is sixteen miles in length, and varies in breadth from three to one and a half miles, containing an area of thirty-five square miles. The "Dogs" and neighbouring islands are dependencies of Anguilla.

Unlike the mountainous volcanic islands of St. Kitts and Nevis, Anguilla consists of Oligocene limestone and clay and its highest point is 213 ft. above sea level.

The inhabitants are peasant proprietors under the jurisdiction of a medical officer who is also magistrate.

The island is healthy, but suffers from want of an adequate water supply.

Besides sheep and goats the chief product is salt. Sea Island cotton is cultivated.

\* Nine months only.

The office of Lieutenant-Governor, which existed until 1870, has been abolished, and the Presidency, in the absence thereof of the Governor, is under the immediate supervision of an Administrator.

There is one Executive Council for the Presidency, consisting of the Governor, the Administrator, certain *ex-officio* members, and such other persons as His Majesty may from time to time appoint. The Legislative Council consists of seven official and seven nominated unofficial members, besides the Governor and the Administrator. Of the unofficial members not more than six shall be from among the people of St. Kitts and Anguilla, and one at least from among the people of Nevis. The Governor, or, in his absence, the Administrator, or, in the absence of both of them, a member of the Council appointed in writing, presides, and the President of the Council enjoys an original and a casting vote. The Council meets at the town of Basseterre in St. Kitts.

### Industry, Trade and Customs.

Sugar is the principal crop in St. Kitts (186,648 tons of cane in 1933 crop, from 7,715 acres, 21,169 tons of sugar manufactured). It is grown in the Basseterre Valley and on the lower slopes round the island (the northern side showing the best average yield), and the cane is crushed and sugar produced at a central factory a mile from Basseterre. A light railway for haulage of canes encircles the island. The sugar industry is at present suffering severe depression.

The only other important crop in St. Kitts is cotton, the lint produced in 1932 being 126,403 lbs. on 600 acres. Successful efforts are being made to encourage the growing of tomatoes and other vegetables for export to Canada, 3,160 crates being shipped in 1932.

Cotton and coconuts are the chief products exported from Nevis.

Vegetables and cattle, chiefly for export to St. Kitts and for local consumption, are also produced in Nevis.

Salt is the chief product of Anguilla, and is also produced from ponds at the south eastern part of St. Kitts, the combined quantity in 1932 being 759 tons valued at 645*l*.

Anguilla also produces cotton in small quantities.

There are no manufacturing industries (other than the manufacture of sugar) in the Presidency.

The Customs import tariff is mainly on an *ad valorem* basis with a surtax of 25%. A preferential reduction varying in amount, but in most cases equal to one third of the general rate, is accorded to Empire products. The percentages of trade is as follows:—

United Kingdom .. ..	46
Other British countries .. ..	31
U.S. of America .. ..	14

### Education.

There are four secondary schools:—a Government grammar school for boys in St. Kitts, a girls' high school in St. Kitts and a mixed school in Nevis, both state-aided, and a school by the Roman Catholic Sisters.

There are 31 Government primary schools (16 in St. Kitts, including 4 in Basseterre, 10 in Nevis and 5 in Anguilla) and also a Roman Catholic school and a few small private schools.

### St. Kitts.

The island lies in latitude 17° 18' N., and longitude 62° 48' W. The area of the main body of it presents a long oval, from the south-eastern end of which runs a narrow neck, gradually expanding into a small knob of land, within which are the salt ponds.

The total length of the island is about 23 miles. The total area is 68 square miles.

The central part of the main body consists of a range of lofty rugged mountains, which traverses it from south-east to north-west, attaining its greatest height at Mount Misery, which is about 3,711 feet above the sea. A branch of this range encloses the spacious and fertile valley or plain, on the seaboard of which lies Basseterre, the principal town, with a population of about 8,000. Near the town of Sandy Point is Brimstone Hill, strongly fortified and fiercely besieged during the French wars. It is quite isolated, and about 750 feet in height.

The circle of land formed by the skirts and lower slopes of the mountain-range of the main body of the island, and the valley of Basseterre, constitute nearly the whole of the arable and cultivated portion of the island. The higher slopes of the mountains are covered with short grass, affording excellent pasturage, while their summits are crowned with dense wood. The island is of volcanic formation, and the soil, save in the mountains (where it is clayey) is peculiarly light and porous, sandy yet fertile.

The climate, for a tropical one, is decidedly healthy. The highest temperature in the shade is about 88°, the lowest 66°, and the mean average about 76°.

The average rainfall in St. Kitts for the year 1932 was 73·01 inches.

St. Christopher or St. Kitts, the Carib name of which was *Liamuiga*, "The Fertile Isle," was the first settled of the British West Indies, the settlement having been founded by Mr. Thomas Warner and other settlers, who landed on the 28th January, 1623, at the present village of Old Road. Later, French settlements were formed at the two ends of the island. The whole island was finally assigned to England under the Treaty of Versailles in 1763.

### Nevis.

The island of Nevis is situated in 17° 40' N. lat., and 62° 33' W. long. It was discovered in 1498 by Columbus, and was colonised by the English from St. Kitts in 1628. Charlestown, the principal town, has a population of about 1,100. The population of Nevis largely consists of peasant proprietors.

The island, which is divided into five parishes, is nearly of a circular form; its area is about 50 square miles, or about 32,000 acres, of which about 15,000 acres are fit for cultivation; its greatest elevation 3,596 feet above the sea.

The soil is very different from that of St. Kitts, being of stiff clay, encumbered everywhere with volcanic boulders.

There are hot mineral springs adjoining the Bath House Hotel near Charlestown. These springs have valuable medicinal properties.

The climate is very similar to that of St. Kitts, from which place it is separated by a strait of about two miles in breadth at its narrowest

## DOMINICA.

Dominica is situated between 15° 10' and 158 40' N. lat., and 61° 30' W. long.; 29 miles long and 16 broad. It lies between the French Islands of Guadeloupe and Martinique, being distant from each about thirty miles, and has an area of 304½ square miles.

The island is very mountainous and picturesque, rising at Imray's View, the culminating point of Morne Diablotin to 4,747 feet. It was discovered by Christopher Columbus on Sunday (hence its name), the 3rd of November, 1493, in the course of his second voyage. It was included in the grant made of sundry islands in the Caribbean Sea to the Earl of Carlisle, by a patent, dated 2nd June, 1627; but several attempts to bring the place under subjection to the English proved abortive. By the treaty signed at Aix-la-Chapelle, in 1748, it was stipulated between the English and French that Dominica and some other islands should remain neutral, and that the original proprietors, the Caribs, should be left in possession. During the time that Dominica was thus professedly regarded by the English and by the French as a "neutral" island, many French planters and adventurers settled on it and established plantations.

Dominica was captured by the English in 1766, and by the ninth article of the peace of Paris, in 1763, was assigned to Great Britain. Commissioners were sent out for the purpose of surveying and selling lands capable of cultivation, which yielded to the British Crown the sum of 312,092*l.* 11*s.* 1*d.* sterling. The French settlers were generously secured in their possessions, on condition of taking the oath of allegiance and paying a small quit rent. Dominica at this time formed a unit of a General Government, which comprised Grenada and the Grenadines, St. Vincent, and Tobago.

In 1771, the island was constituted a separate Government, under the administration of Sir Wm. Young, Bart. On the 21st June, 1775, a Royal Proclamation was issued, establishing a House of Representatives, fixing a new qualification for candidates and electors, and regulating proceedings at elections.

In 1778, the French, attracted by the fertility of the place, and invited over from Martinique by some of their countrymen, prepared a military and naval expedition against the island, under the Marquis de Bouillé, Governor of Martinique, and became masters of it on the 7th of September, after an obstinate resistance. Marquis Duchilleau, a cruel and tyrannical officer, was appointed Governor. Trade failed, and great distress followed.

In 1783 the island was again restored to the English, and Sir John Ord, Bart., was appointed Governor.

In 1795 another invasion of the island was attempted by Victor Hugues, the French Republican leader, who had previously forced the British troops to evacuate Guadeloupe. The brave and well-directed resistance of the inhabitants, under the command of Governor Hamilton, forced part of the enemy to fly, and the rest to surrender.

In 1805, now referred to in the island for marking the time of events, by the name of *La Grande* (the name of the invading General), the French again landed at each flank of Roseau. The regular troops and the militia fought gallantly, but unfortunately Roseau, the capital, was set on fire accidentally, and was obliged to

capitulate, paying the enemy 12,000*l.* to quit; whilst the Governor, Sir George Prevost, and the troops (regular and militia) proceeded across the island to the superior position of Prince Rupert, near the town of Portsmouth.

In 1833 the island was, with Antigua and the other Leeward Islands, formed into a General Government, under a Governor-in-Chief, resident at Antigua.

Riots occurred in 1893, in the district of La Plaine on the Windward Coast of the island, in connection with the collection of taxes. The police and a party of marines and blue jackets, landed from H.M.S. *Mohawk*, were stoned, and compelled to fire on the rioters, with fatal results. An inquiry into the administration was ordered by the Secretary of State, and entrusted to Sir R. Hamilton, formerly Governor of Tasmania, who visited the island, and made a report (*vide* H. L. 280, 1893, and C-7447, 1894).

Dominica, in common with other West Indian islands, was visited in 1897 by the Royal Commission appointed to inquire into the condition of the West Indian colonies; and an important outcome of their recommendations was the grant, in 1898, of 15,000*l.* by the Imperial Parliament for road construction in the island.

Considerable areas in the island are at present uncultivated. Much of this was at one time under coffee, but "blight" and the marauding of the Maroons led to the abandonment of many estates, while the depreciation of sugar still further reduced the area of cultivation. The soil is good and the climate healthy. Limes and cocoa flourish throughout the coastal zone. The former, however, are being rapidly wiped out by root disease, but this critical situation is being combated by planting limes budded on resistant stocks on a considerable scale. The higher slopes in the centre of the island are well adapted to the cultivation of coffee, nutmeg, spices and such tropical fruits that require humid conditions.

There are many thermal, chalybeate, sulphur, and other medicinal springs in the island, which is volcanic, and on the Grand Soufrière Hills there is a geyser or boiling lake at an elevation of 2,300 feet.

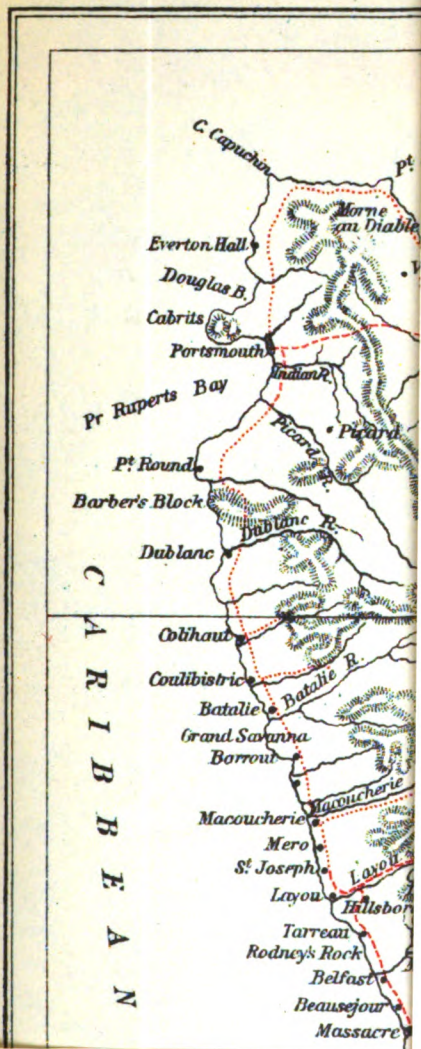

An eruption in the great crater took place on 4th January, 1890, volcanic ash covering the roofs of the houses in Roseau to a depth of two or three inches.

The island abounds in rivers, with fish in some, and there is a plentiful supply of water power.

Lime-juice, cocoa, coconuts, copra, and fruit (including green limes, grapefruit and oranges) are the chief products; sugar, formerly the staple industry, has now ceased to be made. A considerable trade is carried on also in spices, oils, and timber. 1932: cocoa, 1,837*l.*; essential oils, 19,551*l.*; vanilla, 395*l.*; limes, 10,418*l.*; Con. lime juice, 194*l.*; raw lime juice, 2,910*l.*; coconuts, 384*l.*; rum, 1,567*l.*

The rainfall in Roseau for 1932 was 73.89 inches; the average for the whole island was 111.85 inches; the mean temperature 81 Fahr. (Roseau).

The chief town is Roseau, with a population of 6,803 according to the census of April, 1921: it is a port of registry, and had registered on 31st December, 1932, 11 vessels, of a total tonnage of 210 tons. The other town is Portsmouth, to the north-west of the island, in Prince Rupert's Bay. There is a branch of Barclays Bank (Dominions, Colonial and Overseas) at Roseau, and one of the Royal Bank of Canada, established in April, 1915.

There is a Government telephone system of 511 miles, with 6 exchanges, and a Government electric light service for the town of Roseau.

The Local Government is administered by an Administrator, aided by an Executive Council. In July, 1898, the Legislative Assembly, which was previously partly elected and partly nominated, passed an Act abrogating itself, and substituting the Crown Colony system. A Legislative council was created, consisting of twelve members, six officials and six non-officials, all nominated by the Governor under Royal Letters Patent. Ordinance No. 21 of 1924, provides for the election of four of the unofficial members of the council. The Administrator presides in the absence of the Governor from the Presidency.

A considerable number of the inhabitants speak a French *patois*, but the use of English is becoming general.

A remnant of the original Carib inhabitants of the Island is still in existence (*vide* Cd. 1298, 1902).

According to the Census of 1921 there are about 420 Caribs in the Island, of whom about 141 are estimated as of pure blood.

#### Customs Tariff.

The rates of duty under the Customs Tariff are mainly specific. A preferential reduction varying in amount, but in most cases amounting to one-third of the general rate is accorded to Empire products.

The *ad valorem* duty on most articles is 10 % and 15 %. Perfumery, Jewellery and Plate and Plated Ware 20 % and 30 %.

#### MONTserrat.

*This Island, discovered by Columbus in 1493, was named by him after a famous mountain in Spain, where is situated the monastery in which Ignatius Loyola conceived the project of founding the Society of Jesus.*

*It is situated 27 miles from Antigua in 16°45' N. lat., and 61° W. long., and is about 11 miles in length, and 7 in the broadest part. Its total area*

is 32½ square miles. It is of volcanic formation and very rugged and mountainous. The hills are covered with forest, the highest elevation being Chance's Mtn. (3,000 feet) in the southern part of the island. Plymouth, the chief town, with a population of 1,730, is on an open roadstead on the south-west coast. It is a port of registry, and had, on 31st December, 1932, 5 sailing vessels, total tonnage 91 tons net.

Montserrat was colonised by the Irish in 1632; the French took it in 1664, and levied heavy imposts on the inhabitants; it was restored to England in 1668. It capitulated to the French in 1782, but was restored to the English in 1783.

Montserrat possessed a Legislative Council and Assembly as early as 1668. In 1861, these were replaced by a single Chamber of eight elected and four nominated members.

By an Act of the Legislative Assembly, dated 24th Dec., 1866, and confirmed by Order in Council 26th Feb., 1867, this Chamber was replaced by a Legislative Council of not more than six nominated members. By Act No. 2, of 1902, which rescinded these Acts, the number of members was limited to four. Ordinance No. 4 of 1909 repealed No. 2 of 1902 and limited the tenure of office of the members of the Council to three years. Ordinance No. 2 of 1911 amended No. 4 of 1909 and increased the number of members to six. Ordinance No. 18 of 1922 amended No. 4 of 1909 and increased the number to eight. Unofficial representation on the General Legislative Council of the L.I. has now been provided for.

The cultivation of sugar, once the staple industry of the island, has declined, and Sea Island cotton, tomatoes, onions and limes are now the principal products. The lime cultivation, which was considerably extended recently, suffered a severe set back by the hurricane of 12th-13th September, 1923, but is being rehabilitated.

Among the other exports may be mentioned a drug known as "papaïn," essential oils, lime juice, cotton-seed oil, cattle and green vegetables.

There are eight Anglican schools with 1,838 scholars, three Wesleyan with 693, one Roman Catholic with 328, and one undenominational with 255 scholars.

The roads of the island have of late years been much improved, and drained by masonry culverts and surface drains; and every year progress is made in these respects.

On 7th August, 1899, the island was devastated by a hurricane; and again on 28th August, 1924, and 12th September, 1928.

There is telephonic communication throughout the Island; a Wireless Station was erected in 1925.

The island is considered to be one of the most healthy of the Antilles.

The rainfall in 1932 averaged 76·92 inches and the mean temperature was 71·3° minimum and 85·9° maximum.

## VIRGIN ISLANDS.

The Virgin Islands were discovered by Columbus in 1493; they consist of a cluster of islands to eastward of and adjacent to Porto Rico; the largest in the group belonging to Great Britain is Tortola, which is situated in 18° 27' N. lat., and 64° 39' W. long. These islands, so far as they are British, became so in 1666.

The British islands (about 32 in number) include Tortola, Virgin Gorda, Anegada, Jost van Dyke, Peter Island, Salt Island, and all others not in the possession of the United States of America. The total area of the British colony is about 58 square miles. A lighthouse is maintained by the Board of Trade on Sombbrero, which was first included in the Colony in 1904.

The Americans possess St. Thomas, St. John, and St. Croix.

A civil government and courts of justice were established in the Virgin Islands in 1773.

In April, 1867, an Ordinance was passed to amend the Constitution of the Virgin Islands. It was enacted that a Legislative Council should be constituted, to consist of the Colonial Secretary and the Colonial Treasurer, and not more than three unofficial members, to be nominated by the Administrator of the Government. This Ordinance was repealed May 1st, 1902, since when the Governor of the Leeward Islands ordains the laws. There is also an Executive Council.

The chief town is Road Town, Tortola, population (1921) 437, which is a port of registry, having, on 31st December, 1932, 8 vessels, registered total tonnage, 77.

Road Town, which is well built and clean, is provided with well stocked shops and stores. There is a small modern Hospital with a European Matron in charge.

The cultivation of sea island cotton, once the principal industry of the Virgin Islands, has been abandoned in consequence of the low prices. A tobacco industry has been started, and cigars are manufactured for export. Attempts are being made to establish other industries. The land is admirably adapted for the growth of coconuts, sugar-cane, bananas, tobacco, sisal, etc.

A small quantity of sugar is made for local consumption, also rum.

The percentage of trade with the United Kingdom and other parts of the British Empire and the principal Foreign countries is 15%, 5% and 80% respectively. Under the Customs Tariff the preferential rate charged on imports from Empire countries is in general two-thirds of the general rate.

A large area of land in the Virgin Islands is well adapted to coconut cultivation, and the existing trees are quite free from any serious insect or fungoid pests.

The peasants own and cultivate most of the land in small plots for subsistence. They also raise cattle, and catch fish. They take their produce in small boats to St. Thomas, and this constant sailing among the reefs and currents which surround the Virgin Islands, makes them the finest seamen in the West Indies. They are a hardy, intelligent race, remarkably distinct from the inhabitants of the neighbouring islands. Their trade and intercourse is with the Virgin Islands of the U.S., and to a smaller extent with San Domingo and St. Martin.

The currency consists largely of foreign money, which circulates at the varying rates of exchange.

The climate is more healthy than that of the other West Indies, and the heat not so great. The average annual rainfall at Road Town is about 54 inches.

The birth and death rates per 1,000 in 1932 were 39.65 and 23.31 respectively.

Large quantities of fibrous plants (agaves and bromelias) grow wild everywhere in Tortola.

The mail communication is weekly by Government motor launch to St. Thomas. Mails are also despatched to St. Thomas nearly every day, letters for Europe being usually sent via Porto Rico and New York weekly.

MALAYA:  
STRAITS SETTLEMENTS

Malaya comprises the Colony of the Straits Settlements, the Federated Malay States of Perak, Selangor, Negri Sembilan, Pahang, and the Unfederated States of Johore, Kedah, Kelantan, Trengganu and Perlis. Malaya is also regarded as including the State of Brunei, in the island of Borneo, of which the Governor of the Straits Settlements is High Commissioner and which like the Malay States in the Peninsula is in treaty relationship with Great Britain.

The Straits Settlements comprise Singapore, Penang, Malacca, and Labuan. The first three were transferred from the control of the Indian Government to that of the Secretary of State for the Colonies on the 1st April, 1867, by an Order in Council, issued under the authority of an Act of the Imperial Parliament (29 & 30 Vict. c. 115). Labuan, a separate Colony since 1848, was incorporated with the Straits Settlements as part of the Settlement of Singapore in 1907, and became a separate Settlement in 1912.

Situation and Area.

Singapore is an island of which the greatest length is about 27 miles by 14 wide, containing an area of 220 square miles, situated at the southern extremity of the Malay Peninsula, to which it is joined by a causeway across the Straits of Johore, which are about three-quarters of a mile in width. There are a number of small islands adjacent to it which form part of the Settlement, which now comprises also Christmas Island and the Cocos Islands.

The seat of Government is the town of Singapore, at the southern point of the island, in lat. 1° 17' north, and long. 103° 50' east.

Penang comprises the island of Penang, Province Wellesley, and the territory of the Dindings. Penang island is about 15 miles long and 9 broad, containing an area of 110 square miles, situated off the west coast of the Malay Peninsula in 5° N. latitude, and at the northern extremity or entrance to the Straits of Malacca. On the opposite shore of the mainland, from which the island is separated by a strait about 2 miles broad, is Province Wellesley, a strip of territory forming part of the Settlement, averaging 8 miles in width, and extending 45 miles along the coast, including 10 miles of territory to the south of the Krian river (*vide infra*), the whole containing an area of 280 square miles.

The chief town is George Town, in 5° 24' north lat. and 100° 21' east long., on Penang island.

The Dindings, area about 180 square miles, include the island of Pangkor and a strip of territory opposite on the mainland, about 80 miles from Penang, in 4° 15' north lat., and 100° 35' east long. Lumut, the headquarters on the mainland, possesses a fine harbour with deep anchorage, and coasting steamers call regularly.

*Malacca* is situated on the western coast of the peninsula between Singapore and Penang, about 110 miles from the former and 240 miles from the latter, and consists of a strip of territory about 42 miles in length, and from 8 to 25 miles in breadth, containing an area of 640 square miles. The town, called *Malacca*, is in  $2^{\circ} 10'$  north lat. and  $102^{\circ} 14'$  east long.

*The Cocos or Keeling Islands*, which were declared a British possession in 1857, were placed by Letters Patent of 13th October, 1878, under the control of the Governor of Ceylon, and by Letters Patent dated the 1st of February, 1886, under the Governor of the Straits Settlements. In 1903 they were annexed to the Straits Settlements and incorporated with the Settlement of Singapore. The islands lie between lat.  $11^{\circ} 50'$  to  $12^{\circ} 45'$  S., long  $96^{\circ} 50'$  E., 700 miles S.W. of Batavia. The largest is 5 miles by  $\frac{1}{2}$  mile. There are large coconut plantations, and copra, oil and nuts are exported. In 1902 a station on the Cape-Australia cable route was established on Direction Island, in the north-eastern part of the group. The population numbers (1931), 1,142.

*Christmas Island*, situated in the Indian Ocean, 190 miles S. of Java, lat.  $10^{\circ} 30'$  S., long.  $105^{\circ} 40'$  E., was annexed in June, 1888, and placed under the administration of the Governor of the Straits Settlements by Letters Patent of 8th Jan., 1889. In 1900 it was annexed to the Straits Settlements, and incorporated with the Settlement of Singapore. The island, which is densely wooded, has an area of about 60 square miles. In shape it is a rough parallelogram with deeply indented sides, its greatest length being about 12 miles, and its greatest breadth about 9 miles. The inhabitants, who number (1931) 1,059, are all, with the exception of the District Officer and his staff, employees of the Christmas Island Phosphate Company, which was formed in 1897 to work the extensive deposits of phosphate of lime, to which the island owes its importance. An account of *Labuan* will be found below, page 367.

The total area of the Colony with these dependencies is about 1,531 square miles.

By Letters Patent issued at the end of 1906, provision was made for the incorporation of the Colony of *Labuan* in that of the Straits Settlements. The provision came into effect from the 1st of January, 1907, and in 1912 the island became a separate Settlement.

The Colony became associated with the administration of *Brunei* from about the same time. A Commission as High Commissioner for *Brunei* was issued in 1906 to the Governor of the Straits Settlements, and a subsequent Commission of the same year vested the post in the officer for the time being administering the government of the Straits Settlements. An account of *Brunei* will be found below, page 390.

### History.

*Malacca*, said to have been founded by fugitives from the sack of Singapore, and known as an important independent State from early in the fifteenth century, is one of the oldest European settlements in the East, having been captured by the Portuguese under Albuquerque in 1511, and held by them till 1641, when the Dutch, after frequent attempts, succeeded in driving them out. The settlement remained in the possession of the Dutch till 1795, when it was taken by the English, who held it till 1818. It was then restored to Holland, but was again transferred to British rule as a consequence of the Treaty of London (17 March, 1824), being exchanged for the British settlements in Sumatra.

When *Malacca* was captured by the Portuguese in 1511, it was one of the grand *entrepôts* for the

commerce of the East, but as the Portuguese pushed their operations further to the east, in the archipelago and neighbouring countries, the trade of *Malacca* gradually declined and it ceased to be of consequence as a collecting centre, except for the trade of the Malay Peninsula and the Island of Sumatra. This trade it retained under Dutch rule till the establishment of Penang in 1786. In a few years from that date its trade almost ceased, and it became a place of reduced commercial importance, but possessing great agricultural resources. The trade of the Malay Peninsula and Sumatra passed to Penang, which also carried on a large traffic with China, Siam, Borneo, the Celebes, and other places in the archipelago not under Dutch control; but no sooner was Singapore established than Penang in its turn had to yield the first place to Singapore, and came to depend chiefly on the local trade. At first unimportant, that trade has now assumed enormous proportions, owing to the development of the rich tin-mining areas and rubber-bearing lands of the Malay Peninsula. The trade of *Malacca* as an *entrepôt* port for central Malaya has recently revived.

Penang, or Prince of Wales' Island, was the first British settlement in the Malay Peninsula, having been ceded to the East India Company by the Raja of Kedah in 1786, with the proviso that the sum of 6,000 dols. should be paid annually to the Raja of Kedah so long as the British occupied the island. In 1800, in consequence of the prevalence of piracy, a strip of the coast of the mainland, now called Province Wellesley, was acquired from the Raja, the annual payment being in return increased to \$10,000. This has been subsequently enlarged from time to time, until it now extends from the Muda River to 10 miles south of the Krian River, a distance of 45 miles, containing in all 280 square miles. This province is in a high state of cultivation, the chief articles cultivated being sugar, paddy, coconuts, and rubber. In 1805 Penang was made a separate Presidency, of equal rank with Madras and Bombay. In 1826 Singapore and *Malacca* were incorporated with it under one government, Penang still remaining the seat of government. In 1836 the seat of government was transferred to Singapore.

The island of Pangkor and the Sembilan Islands were ceded by Perak in 1826, with a view to the suppression of piracy, but no use was made of the cession at the time. In 1874 the cession of these islands was confirmed by the Treaty of Pangkor (to which reference is made in dealing with the relations of the Colony with the Malay States), by which a strip of territory in the mainland opposite also became British. The whole now forms, under the name of the *Diindings Territory*, an outlying portion of the Settlement of Penang.

The original city of Singapore is said to have been founded by immigrants from Sumatra. It rose into prominence in the fourteenth century. Its greatness came to a sudden end about 1377, when it was sacked and destroyed by the Javanese, and thenceforth the island was scarcely inhabited until Sir Stamford Raffles took possession of it in 1819 by virtue of a treaty with the Johore princes. The new settlement was at first subordinate to Bencoolen (Fort Marlborough) in Sumatra, but in 1823 it was placed under the Government of Bengal; in 1826 it was, as above stated, united with Penang and *Malacca* under the Governor and Council of the Incorporated Settlements.

### Constitution, Law and Justice.

The Government consists of a Governor aided by an Executive and a Legislative Council. The Executive Council consists of 6 official members, excluding the Governor who presides, such other official members as the Governor may nominate, at

present 3 in number, and 3 unofficial members. The Legislative Council consists of 13 official members and 13 unofficial members, of whom 2 are nominated by the Chambers of Commerce of Singapore and Penang.

The law in force is contained in local Ordinances, and in such English and Indian Acts and Orders in Council as have been made applicable to the Colony. The Indian Penal Code, with slight alterations, has been adopted, and there is a Civil Procedure Code based on the English Judicature Acts, and a Criminal Procedure Code based on that in India.

There is a Supreme Court which holds assizes at Singapore and Penang every two months and quarterly at Malacca and civil sittings monthly at Singapore and Penang and once a quarter at Malacca. Ordinance 5/1931 provides for the institution of a Court of Criminal Appeal.

#### Climate.

The climate shows little variation during the year. The mean temperature [ $\frac{1}{2}$  (maximum + minimum)] during 1932 was:—Singapore (Mount Faber) 80.4° F.; Penang (Hospital) 81.9° F.; Province Wellesley (Meteorological Station, Butterworth) 80.6° F.; Malacca (Bukit China) 79.3° F.

The mean monthly maximum and minimum temperatures varied as follows:—

Mean Monthly Maximum.		Mean Monthly Minimum.	
Highest ° F.	Lowest ° F.	Highest ° F.	Lowest ° F.
Singapore, 88.1 (Feb.) 84.9 (Jan.) 71.9 (Jan.) 75.7 (July)			
Penang, 91.8 (Feb.) 86.6 (Nov.) 72.9 (Jan.) 75.9 (May)			

The extremes of temperature (Highest Maximum and Lowest Minimum) recorded during 1932, were:—

	Highest ° F.	Lowest ° F.
Singapore	92 on Mar. 17th, April 69 on January 13th.	
Penang	19th and May 5th 95 on Feb. 12th	68 on February 4th.

There are no well marked dry and wet seasons, rain falling throughout the year. Records for 52 years at Kandang Kerbau, Singapore, show that the average rainfall was 95.07 inches. February being the driest month with an average of 6.62 inches and December the wettest with 10.55 inches. The average number of wet days in 22 years was 183.

Rainfall has been recorded at Kandang Kerbau since 1875, the wettest year being 1913 with 135.92 inches and the driest 1888 with 63.21 inches.

In Penang the average annual rainfall for 7 years was 106.12 inches, October being the wettest month with an average of 22.38 inches and February the driest with 2.66 inches. The average number of wet days was 195.

The force of the monsoons is not much felt, though the prevailing winds are generally in the direction of the monsoon blowing at the time, viz.—S.W. from

May to October, N.E. from November to April. But at the coastal stations the diurnal land and sea breezes are often stronger than the prevailing monsoon.

The Rainfall recorded during 1932 was:—

Total .. .. 1,076,564

#### Commerce.

The foreign trade of the Colony of the Straits Settlements is not separately distinguished, having since 1922 been merged in that of the Malayan Registration area which includes the Colony, the Federated Malay States, and the Unfederated Malay States of Johore, Kedah, Perlis, Kelantan, and Trengganu. This trade passes principally through the ports of Singapore and Penang in the Colony, and Port Swettenham in the F.M.S.

The principal agricultural products are rubber, coconuts, pineapples, palm oil, and rice. Tobacco is a crop of growing importance.

The principal imports comprise foodstuffs, petroleum products, tin ore, rubber, clothing, and machinery; the chief exports, raw materials, particularly rubber, smelted tin, copra, palm oil, and tinned pineapples, with a few manufactured articles. There is an important transit trade in the ports of Singapore and Penang.

The ports of the Straits Settlements are free ports and are subject to no import or export duties. There are excise duties on liquor, tobacco and petroleum, and a tax on first registration of motor vehicles not manufactured in the British Empire.

The following shew the total imports and exports for the six years up to 1932 and the values of some of the principal articles in 1932.

#### Shipping.

Singapore and George Town (Penang) are ports of registry; Singapore had on the 31st December, 1932, 828 steam, motor, and sailing vessels registered, of a total gross tonnage of 140,547 tons.

The ports of Singapore and Penang are administered under Ordinance No. 125 (Merchant Shipping) by the Marine Department, and by Harbour Boards under Ordinance No. 130 (Ports) in each Settlement (Singapore and Penang) for the management of the wharves. Malacca is also a port at which ocean-steamers call. The number of merchant steamers of over 75 tons net register with cargo and in ballast, and the aggregate tonnage entering the ports in 1932 were:—

Port.	Nos.	Tons.
Singapore.. .. .	6,729	14,383,337
Penang .. .. .	2,466	6,355,224
Malacca .. .. .	647	774,289

The following table shows the comparison between British tonnage and the total tonnage of merchant steamers of over 75 tons net register with cargo and ballast, entered and cleared in the ports of the Straits Settlements, Singapore, Penang, Malacca, Labuan, and Christmas Island, for each of the years from 1928 to 1932:—

#### SHIPPING ENTERED AND CLEARED, EXCLUSIVE OF NATIVE CRAFT.

Year	British Tonnage.	Total Tonnage.
1928 .. .. .	20,845,077	42,686,244
1929 .. .. .	21,081,873	45,117,347

1931 .. .. .	19,387,071	43,640,442
1932 .. .. .	18,919,617	43,353,043

NOTE.—The definition of merchant steamers was altered, with effect from January, 1931, from vessels of 50 tons net register and over, to vessels of over 75 tons net register. The figures for the years 1927-1930 have thus been altered on this basis, i.e., decreased by 770, so as to afford a more accurate comparison with those of 1931.

#### COMMUNICATIONS.

##### (i) Steamship Lines.

Over 50 lines of sea-going steamers touch at Singapore. The following table shows the main lines of communication:—

except that the rate of postage on a newspaper

(a) printed and published within the Straits Settlements, the Federated Malay States, or in any British Possession or Protected State in Malaya, or

(b) registered as a newspaper at the General Post Office, London, if posted in the Straits Settlements or Federated Malay States addressed to any place in the Straits Settlements, Federated Malay States, Johore, Kedah, Kelantan, Perlis, Trengganu, North Borneo, Sarawak or Brunei, is 2 cents. for any weight not exceeding 5 ounces, and 2 cents. for each additional 5 ounces or fraction thereof provided that no enclosure which is not part of the newspaper or a supplement thereto is enclosed with the newspaper. If two or more copies are sent in a single packet, each newspaper shall be liable to the same postage as if posted separately. But in no case shall a packet of such newspapers be chargeable with a higher rate than that chargeable on a packet of printed papers of the same weight.

The operations of the Money Order Branch amounted in 1932 to \$4,873,986, the principal business done being with India, the Federated Malay States, the United Kingdom, Netherlands, India, Ceylon and the United States of America.

#### Air Mail Services.

In December, 1933, the England-India weekly Air Mail service was extended from Rangoon to Singapore. The full journey occupies ten days, but it is contemplated that this will shortly be reduced to eight days. The postage rates from England are 11d. per  $\frac{1}{2}$  oz. for letters and 5d. for postcards. The mail leaves London each Saturday and Singapore each Sunday.

The Netherlands Royal Air Mail Company also maintains a regular weekly service, Batavia-Amsterdam, calling at Alor Star in Kedah en route.

#### (iii) Telegraphs and Telephones.

Eleven submarine cables radiate from Singapore :— 5 to Penang, thence to Madras (2), Colombo (2), Deli Sumatra (1), 2 to Batavia of which one thence to Cocos, 1 to Banjoewangi (Java) thence to Port Darwin (2), 1 to Hong Kong, thence to Manila (1), North China (1), Macao (1), 1 to Cochin China, thence to Hong Kong (1) and 1 to Labuan, thence to Hong Kong (1).

Telegraph lines owned by the Governments of the Colony of the S.S. and the various States interconnect Singapore, Penang and other parts of the S.S., Perak, Selangor, Pahang, Negri Sembilan, Kedah, Perlis, Kelantan, Trengganu and Johore and there are also lines to various towns in Siam.

A telephone trunk network embracing Penang, Singapore and the Malay Peninsula permits of reliable trunk communication to all except the most remote Telephone Exchanges in the Peninsula.

The telephone exchange in Singapore is worked by the Oriental Telephone Company Limited, and the exchanges in Penang, Province Wellesley and Malacca are worked by the Post Office. There are 9,007 connections, including extensions to these systems.

There are 415 miles of telegraph line, 21 nautical miles of submarine cable in Penang, Province Wellesley and Dindings and 34,076 miles of telephone line.

#### (iv) Railways and Roads.

The Federated Malay States Railways system connects with the Royal State Railways of Siam, the distance between Singapore and Bangkok being 1,195 miles, the journey taking 50 hours. Sections connect the main line with ports on the West Coast. A line from Gemas in Negri Sembilan, through Pahang and Kelantan, connects with the Royal

State Railways of Siam on the East Coast. A deviation on Singapore Island to bring the terminus to the vicinity of the wharves was completed in 1932.

#### Education.

The control of all Government schools is vested in the Director of Education, Straits Settlements and Federated Malay States.

By an Ordinance passed in 1909, an Education Board has been established, consisting of official and unofficial members, under the chairmanship of the Director of Education. Provision has been made by the same Ordinance for the levying of an Education Rate, the expenditure of which is under the control of the Board.

Vernacular instruction is provided for Malays free of charge. Attendance at these schools is compulsory for Malay children. The Government assists Chinese vernacular education by grants-in-aid to such schools as apply for them and are satisfactorily conducted. Instruction in English for all nationalities is provided in Government or grant-in-aid schools, and fees are charged. All the schools established by Government are secular. Raffles College was opened in Singapore in 1929 for a higher education in English. There is a Reformatory in Singapore for juvenile offenders and vagrants in which technical instruction is provided.

The number of schools and scholars in 1932 was as follows:—

	No. of schools.	Enrolment.	Attendance.
Government English schools (boys and girls).	25	10,279	9,783
Grant-in-aid English schools (boys and girls).	30	16,102	15,307
Government vernacular schools (boys and girls).	216	23,657	22,349
Grant-in-aid vernacular schools (boys and girls).	70	7,144	6,665
Total	341	57,182	54,104

#### Currency and Banking.

The standard coin of the Colony, by an Order of the Queen in Council dated 2nd February, 1895, was the silver Mexican dollar, the British dollar and the old Hong Kong dollar being also at that time legal tender.

A Committee to consider the currency question was appointed in England in 1902, and reported in favour of a change to the gold standard, if the local Government so desired. In accordance with the Committee's recommendations, a new Straits Settlements dollar was coined in India and introduced into the Colony and the adjoining Malay States. This coin was of the same weight and fineness as the British dollar. Under Order of the King in Council of 25th June, 1903, the Government declared this dollar to be the standard coin on 5th October, 1903. The Mexican and British dollars were demonetised from 1st September, 1904.

Under Order of the Governor in Council dated 29th January, 1906, the Currency Commissioners were empowered to issue notes in exchange for gold at the rate of \$60 for £7 sterling, thus fixing the sterling value of the dollar at 2s. 4d. In November, 1906, gold sovereigns were declared legal tender at this rate under an Order of the King in Council of the 22nd October, 1906. In view of the great rise in the value of silver, an Order of the King in Council was passed on 11th February, 1907, under which the weight of the Straits Settlements dollar and fifty cent piece was reduced in order to preserve the fixed ratio

to gold and by an order of the King in Council, dated the 17th day of May, 1920, the fineness of the Straits Settlements dollar and fifty cent piece was reduced.

Local silver and nickel coins representing fractional parts of the dollar are legal tender up to \$2 and copper coins are legal tender up to \$1. The half-dollar is unlimited legal tender. Under an Ordinance passed in 1917 currency notes of denominations 25 cents and ten cents were issued to the public owing to shortage of subsidiary silver. These notes were legal tender to the extent of \$2, and have since been withdrawn from circulation.

By the Currency Ordinance passed in 1923 the various funds controlled by the Currency Commissioners were amalgamated into one fund styled the Currency Guarantee Fund.

The following banks have establishments in the Colony: the Chartered Bank of India, Australia, and China; the Hong Kong and Shanghai Banking Corporation; the Mercantile Bank of India, Limited; the Netherlands Trading Society; the National City Bank of New York; the Banque de l'Indo-Chine; the Netherlands India Commercial Bank; and Sze Hai Tong Banking and Insurance Company, Bank of Taiwan, Chinese Commercial Bank, The Yokohama Specie Bank, The Ho Hong Bank, The Oversea Chinese Bank, the China and Southern Bank, Lee Wah Bank, the P. and O. Banking Corporation, Thomas Cook & Son (Bankers) Limited, Kwong Lee Banking Company and Eastern Bank Limited.

The first-mentioned Bank is allowed under its Charter to issue notes, but none have been issued since 1909. The amount of notes of local banks in circulation at the end of 1932 was \$136,417 only.

In addition to bank-notes a Government Currency Note issue was introduced in 1899. The amount of notes in circulation at the end of 1932 was \$68,496,575. These notes circulate freely within the Colony and the Malay States, and are largely used in North Borneo.

There is a Post Office Savings Bank at each Settlement.

#### Finance.

#### THE SETTLEMENT OF LABUAN.

The Island of Labuan is situated on the north-west coast of Borneo, in 5° 18' N. lat., and 115° 15' E. long. Its area is about 40 square miles. It is distant from the coast at the nearest point, about six miles; from Brunei, the capital of the Protected

State of that name, about forty miles; and from Singapore 725 miles, or three days' steam.

The average annual rainfall is about 130 inches, and the thermometer ranges from 71° to 93°.

An attempt was made by the East India Company's servants, who were expelled from Balambangan by Sulu pirates in 1775, to establish a trading station in Labuan, but the project was soon abandoned, and for practical purposes the history of the island begins with its cession to Great Britain in 1846 by the Sultan of Brunei. It was then uninhabited. The reason for the cession, given in the treaty by which the island was handed over to Great Britain, was that it was "desirable that British Ships shall have some port where they may careen and refit, and deposit such stores and merchandise as shall be necessary for the carrying on of the trade with the dominions of Brunei," and the consideration given by Great Britain was an undertaking to suppress piracy and protect lawful trade.

The island was first occupied only as a naval station under the control of a naval officer, and the formal establishment of a Crown Colony was deferred until 1848. From that date until the end of 1889 Labuan was governed as a separate Colony. Until 1869 it was assisted by grants-in-aid from the Imperial Exchequer, but this help was then withdrawn, and the Colony supported itself, though with difficulty, for the next twenty years. In 1889, the financial troubles came to a head, and, as it was thought that the island could be more economically governed in connection with the territories of the British North Borneo Company, the administration was entrusted, from the 1st January, 1890, to the care of the Company, whose principal representative in Borneo was given a commission as Governor of Labuan. This arrangement was terminated at the end of 1905, when Sir J. Anderson, Governor of the Straits Settlements, was appointed also Governor of Labuan, the island still remaining a separate Colony. On the 1st of January, 1907, Labuan was annexed to the Straits Settlements, and declared part of the settlement of Singapore. On the 1st of December, 1912, the island was constituted a separate Settlement.

When the Colony of Labuan was first founded, great hopes of the success of the new settlement were based upon the existence of rich coal deposits in the island, but hitherto the companies formed to develop these coal resources have not met with great success. In 1893, the Central Borneo Company was re-constructed under the name of the New Central Borneo Company, who transferred their undertaking to the Labuan and Borneo Company. This Company, in its turn, was succeeded on the 8th December, 1902, by the Labuan Coalfields Company, Limited. The mines have been closed since the beginning of 1911.

Labuan has a fine port (Victoria Harbour), perfectly safe, and easy of access. Vessels drawing 15 feet can go alongside the Government jetties.

Ships are supplied with water at \$1 per ton.

Labuan is a market for much of the produce of the neighbouring coasts of Borneo and the Sulu Archipelago, such as sago, rice, sugar, cigarettes, para rubber, jelutong, copra, fresh vegetables, fresh fruits, cattle and pigs, which are forwarded by the Labuan traders to Singapore. Cattle and goats are reared, and over 10,500 acres are estimated to be under cultivation.

There is a branch of the Government Post Office Savings Bank in Labuan. Harrisons and Crosfield (Borneo) Ltd. are the local Sub-Agents of the Hong Kong and Shanghai Banking Corporation. The currency is that of the Straits Settlements.

The inhabitants are chiefly Malays and other natives from Brunei and the mainland of Borneo, and Chinese, the latter being mostly petty traders.

\* Consul de Carrière.

(c) Consul at Singapore with jurisdiction in the Straits Settlements, the Federated and Unfederated Malay States, Brunei, Sarawak and State of North Borneo.

(d) The Italian Consul is in charge of Hungarian interests in Singapore.

(e) The Italian Consul at Singapore is under the superintendence of the Italian Minister at Bangkok.

(f) Consul-General for the whole Colony with jurisdiction extending to all States under British Protection in the Malay Peninsula and Borneo.

(g) Señor Manuel Rivera Inglesias is the Peruvian Consul at Hong Kong with jurisdiction in Ceylon and the Straits Settlements.

(h) Señor Don José Salas is the Peruvian Consul-General at Hong Kong with jurisdiction in the Straits Settlements.

(i) With jurisdiction over Straits Settlements, the Federated and Unfederated Malay States, Brunei and the State of North Borneo.

(a) Consul of Belgium at Penang with jurisdiction covering Penang, Province Wellesley, Dindings, and the States of Perlis, Kedah, Kelantan and Trengganu.

There are four Government schools, viz.:—The Government English School, the Vernacular School for boys, the Vernacular School for Girls in Victoria, and the Vernacular School in Bukit Kallam. In addition there are five private schools, viz.:—St. Anne's School (Roman Catholic Mission), Chung Hwa School, Chi Win School, Phin Min School and Chung Hwa Girls' School.

A reservoir owned by the Government supplies the town of Victoria and shipping with drinking water.

The Eastern Extension, Australasian and China Telegraph Company has a station on the island connected by cable with Singapore, Hong Kong, and North Borneo. The nearest point in telegraphic communication with Europe is Singapore.

The Brunei Government maintains a Wireless Station which communicates with the Stations erected in the neighbouring countries of Brunei, Sarawak, and North Borneo.

A weekly service of steamers plying between Singapore, North Borneo Ports, and the Philippines provides Labuan with regular communication with these places; there are, in addition, local coasting steamers.

A rifle range affords facilities for H.M. Ships exercising their crews.

The chief sources of revenue are harbour dues, land rents and licences.

The public revenue and expenditure for the last three years were respectively:—

	Revenue.	Expenditure.
1930 .. ..	\$122,374.00	\$149,697.00
1931 .. ..	\$100,435.00	\$145,457.00
1932 .. ..	\$ 95,420.00	\$142,831.00

#### CHRISTMAS ISLAND.

Christmas Island with an area of 80 sq. miles lies in the Indian Ocean, latitude 10° 30' and longitude 105° 40' E. 233 miles S. E. of Java Head, and 529 miles N. 79 E. from the Cocos Island. It is densely wooded and of irregular shape, about 12½ miles long (at the longest point) and about 4½ miles wide (at the narrowest point). The climate is healthy with average maximum and minimum temperatures 84° F. and 75° F. There is a prevalent E.S.E. trade wind. The Island has been known to navigators since about the middle of the 17th century. It was formally annexed on the 6th June, 1889. In 1900 it was placed under the administration of the Governor of the Straits Settlements and incorporated with the settlement of Singapore. The Island is administered by a District Officer, who is a member of the Malayan Civil Service. There is a small force of Sikh Police drafted from the S.S. police force. All the inhabitants (mainly Chinese and Malays), with the exception of the District Officer and his staff, are employed by the Christmas Island Phosphate Company, Ltd., registered in London, which works the large natural deposits of phosphate of lime to

which the Island owes its importance. In 1923 a wireless station was installed, and the Island is now in direct communication with Singapore. A school was established in 1931, and a teacher supplied by Government. Population 1932, 31st December, 741 (males 625, adult females 64, and children 52). Expenditure 1932, 3,818l. (including salaries of D.O. and Sikh Police Force, 2,435l.). Imports in 1932, 6,330l., chiefly machinery and engineering stores. Exports in 1932 consisted solely of phosphate of lime. Tonnage entered and cleared 1931, 79,454 tons and in 1932, 96,474 tons; of the latter 14,860 tons (under British colours) were for British ports, 6,122 tons (under Norwegian colours) and 75,492 (under Japanese colours) were for Japanese ports.

#### MALAYA: FEDERATED MALAY STATES.

The Federated Malay States comprise four States: Perak, Selangor, Negri Sembilan, and Pahang.

#### Perak.

Perak is ruled by a dynasty that claims descent from the last Malay Sultan of Malacca. In the 17th century it was overrun by the Achenees, and at some time after 1636 a Johore prince, the husband of a Perak princess, was sent by Aceh to rule it under the title of Sultan Mudzaffar Shah. From 1650 onwards, the Dutch endeavoured to get a monopoly of the tin exported from Perak, establishing near the mouth of the Perak river several factories, which the Malays, from time to time, cut off and destroyed. In 1765 the Sultan made a treaty with the Dutch.

British influence began early in the 19th century. A treaty with Penang in 1818 secured to Britain subjects the right to free trade in Perak. In 1825 a British arbitrator settled the boundary between Perak and Selangor. By the Burney Treaty with Siam, in 1826, the independence of Perak and Selangor was recognised, though the Sultan of Perak was permitted to send tribute to Siam if he desired. In the same year the Sultan ceded to the British the Dindings and the island of Pangkor as posts for the suppression of piracy, and agreed to rely solely on the protection of Great Britain. From 1872 to 1874 there was almost continuous fighting of more or less severity between rival factions of Chinese in the Larut district where valuable tin deposits had been found.

Having regard to the anarchy which prevailed, Sir Andrew Clarke, in 1874, induced the Perak chiefs, to sign the Pangkor Treaty (20th January, 1874), and to accept thereby a Resident whose advice should be "asked and acted upon on all questions other than those touching Malay religion and customs." The murder of the first British Resident (Mr. J. W. Birch) in 1875 led to a military expedition and the banishment of the Sultan and some chiefs implicated in the affair. The country soon settled; and the Malay constitution was restored under a Sultan protected by the British Government.

#### Selangor.

In the 14th century, Klang, which is now a district of Selangor, is said to have been subject to the Javanese Empire of Majapahit. In the next century it was given to a Penghulu of the family of the Bendaharas of old Malacca, and a son of Sultan Mansur Shah (1458–1477 A.D.) of Malacca was made ruler of Jeram, near Langat. During the period of Portuguese ascendancy, little is known of the Selangor

coast. The Dutch opened factories for the purchase of tin at Kuala Selangor and at Kuala Linggi. In 1718 Daeng Chelak, a Bugis chief, who had married a Johore princess, settled at Kuala Selangor, and about 1780 their descendant was recognised as Sultan Salehu'd-din by the Sultan of Perak. The throne has remained in the same family ever since. In 1783, the Dutch blockaded Kuala Selangor and forced the Sultan to acknowledge the suzerainty of Holland.

In 1818 the Sultan of Selangor made a commercial treaty with the East India Company at Penang. In 1874 anarchy prevailed amongst the Malay chiefs at Selangor, and pirates ravaged the coastal trade. The Sultan's difficulties were such that he was glad to accept a British Resident and to come under the protection of Great Britain.

#### *Negri Sembilan.*

This federation of "Nine States" consists of the four major States of Sungai Ujong, Jelebu, Johol, and Rembau, and the five minor States of Ulu Muar, Jempul, Terachi, Gunong Pasir, and Inas. Sungai Ujong is mentioned in a Javanese poem in 1365 as being subject to the Javanese Empire of Majapahit. In the 15th century it was ruled by Chiefs of the old kingdom of Malacca. Nearly all the Malay inhabitants of the "Nine States" are descendants from immigrants from Menangkabau in Sumatra. Portuguese accounts prove that this immigration had begun in the 16th century. The original Malay federation consisted of Sungai Ujong, Klang (now a district of Selangor), Jelebu, Rembau, Naning (now part of Malacca), Segamat (now in Johore), Pasir Besar (also in Johore, its place having been taken by Johol), Jelai (now Inas), and Ulu Pahang, the region between the Ulu Seriting and Temerloh. After the wresting of Malacca from the Portuguese by the Dutch and the Johore Malays in 1641, Johore took a leading part in Negri Sembilan politics until 1773, when the chiefs of the four major States brought from Sumatra a Yam Tuan named Raja Melewar, ancestor of the present Yang di-pertuan Besar.

In 1874, the Dato' Klana, Chief of Sungai Ujong, the most important of the "Nine States," invited and obtained the assistance of the British Government to maintain his rule and the appointment of a British Resident. In 1883, Jelebu applied for a British Officer; and Rembau agreed to refer all its disputes to the British Government, and in 1887 accepted a British adviser. In 1889, the Yam Tuan of Sri Menanti and the Rulers of Tampin and Rembau asked for a Resident, and agreed to a confederation known as "the Old Negri Sembilan." In 1896, the Resident of this confederation took charge of Sungai Ujong and of Jelebu, and the modern Negri Sembilan was constituted. Finally, in 1898, the Yam Tuan of Sri Menanti was elected titular Ruler of the whole State.

#### *Pahang.*

Chao Ju Kua, a Chinese, writing about 1225, mentions Pahang as being subject to the old Sumatran Buddhist Kingdom of Sri Vijaya. Later, Pahang and Tioman are claimed as conquests of Majapahit. In the 15th century, Sultan Mansur Shah of Malacca captured the Ruler of Pahang, and married his daughter. Before the Malacca royal house died out, in 1699, its Pahang branch provided several Rulers for the senior throne of Johore, which directly represented the Malacca dynasty. Later, Pahang fell under the suzerainty of the new Sultans of Johore, who, when they removed to Lingga, left a Dato' Bendahara in charge of Pahang.

In 1887 Sir Frederick Weld negotiated a treaty with the Bendahara of Pahang, promising British help in the event of external attack, and arranging for a British agent to be stationed at his capital.

At the same time, the title of Sultan was substituted for that of Dato' Bendahara. In 1888, the Sultan applied for and obtained British protection, and the appointment of a Resident.

#### *Constitution of the States.*

The supreme authority in each State is vested in the Sultan, or the Ruler, in State Council. His Highness the Sultan or Ruler presides over the State Council. In 1932, the State Councils were reconstituted on the wider basis. In each of the four States they now include besides the British Resident, Malay chiefs and officials of the State, a number of unofficial members representative of Malay, European, Chinese, and Indian interests.

In Perak and Negri Sembilan there are second chambers which are concerned principally with matters of Malay customs and religion.

#### *The Federation.*

In 1895 a treaty was signed by the rulers of the four States, by which they agreed to constitute their countries into a Federation (to be known as the Federated Malay States), to be administered under the advice of the British Government, while all existing treaties and arrangements were to stand. The States agreed to the appointment of an officer, to be styled Resident-General of the Malay States,\* to control the Residents appointed to each State, and to be the means of communication between the State Governments and the High Commissioner. They agreed to follow the Resident-General's advice in all matters of administration other than those touching Islam. Subject to the authority created by the appointment of the Resident-General, the system of administration under the advice of British Residents remained unchanged.

The States undertook to give each other material assistance in men and money, the wealthier States assisting those in want of help, and all moneys so advanced being considered as loans; and also undertook to raise and equip a force of Indian troops for service throughout the States, and to supply a portion of these troops on requisition for the defence of the Colony of the Straits Settlements, should Great Britain be at war with any foreign Power.

It was also provided by the Treaty of 1895 that the rulers of the Federated States should meet periodically in one of the States, under the presidency of the High Commissioner, to discuss affairs of mutual interest. The first of these meetings was held at Kuala Kangsar, Perak, in July, 1897, and was attended by the High Commissioner, the rulers of all the four States, with their most important chiefs, the Resident-General, and all the British Residents. At this meeting many important matters were discussed and arrangements made to deal with them in the councils of the various States.

In 1909, a Federal Council was created by an agreement between the High Commissioner and the four native rulers. The object in view, as stated in the preamble to the agreement, was to provide means "for the joint arrangement of all matters of common interest to the Federation or affecting more than one State and for the proper enactment of all laws intended to have force throughout the Federation or in more than one State." Under an Agreement concluded in 1927 the Federal Council was reconstituted with the High Commissioner as President, twelve official, and eleven unofficial members to be nominated by the High Commissioner with the approval of the King. At least four of the unofficial members are, if possible, to be Malays.

\* The title of this post has since been altered to Chief Secretary to Government.

Since the reconstitution of the council in 1927, the number of members has been increased by the addition of two officials and one unofficial. The Federal Council generally meets three times a year and considers the drafts of laws, which are to apply to more than one State, and the annual estimates of the revenue and expenditure of the four States. The first meeting of the Council was opened on the 11th of December, 1909, at Kuala Kangsar.

#### *Climate.*

The temperature of the West Coast of the Malay Peninsula has but a small annual range. On the East Coast, however, the North-East Monsoon, lasting from November until March, causes a distinct contrast with the rest of the year with regard to temperature, wind and rainfall. At Jelebu, in Negri Sembilan, the driest station where records have been kept, the average rainfall for 1891-1932 was 65 inches, but in the mountains the average yearly rainfall is very high, being nearly 250 inches near Taiping. The heat is at times oppressive, but the nights generally are cool. On some of the higher mountains (5,000 feet) the night temperature has been known to fall to 42°F. In the day time there is almost always a breeze to modify the heat. The Peninsula lies within the region of the South-West and North-East Monsoons, but the only really strong regular wind is the North-East Monsoon, which strikes the East Coast from the China Sea. Violent squalls, known as "Sumatras," are not infrequent on the West Coast of the Peninsula between April and October. Generally they are of short duration and occur during the night.

#### *Population.*

The result of the census taken in 1931, show that the population of the Federated Malay States has increased during the decade from 1,324,890 to 1,713,096 or by 29·3%.

The population as estimated at mid-year 1932, from the formula, census 1931 + births—deaths + migrational surplus, was as follows:—

	Census 1931.	Estimated Mid-year 1932.
Malays of British Malaya ..	443,618	
Other Peoples of Malay Archipelago	150,113	605,521
Chinese .. .. .	711,540	665,206
Indians .. .. .	379,996	324,796
Europeans .. .. .	6,350	5,959
Eurasians .. .. .	4,251	4,329
Others .. .. .	17,228	17,092
Total ..	1,713,096	1,622,903

The decrease in the population is due to the large excess of emigration of Chinese, Indian, and Javanese labourers owing to repatriation as a result of the general depression of trade, especially rubber and tin.

#### *Railways.*

The Federated Malay States Government owns the railways both in the Federated Malay States and the Colony of the Straits Settlements (Singapore Island, Malacca, and Province Wellesley) and also in the Unfederated States of Kedah, Perlis, and Kelantan. It has leased the Johore State Railway (121 miles), extending from Johore Bahru at the Southern extremity of the Peninsula and opposite Singapore, to Gemas on the boundary between Johore and the Federated Malay States. At Gemas

the line branches into the West Coast and the East Coast Lines; the West Coast Line runs North-West through Negri Sembilan, Malacca, Selangor, Perak, and Province Wellesley to Prai—the port opposite Penang Harbour—488 miles from Singapore. From Bukit Mertajam near Prai, the line proceeds northwards through Province Wellesley and the Unfederated States of Kedah and Perlis, to the Siamese frontier station of Padang Besar, 580 miles from Singapore. Through traffic with the Royal State Railways of Siam was opened on July 1st, 1918, the distance between Singapore and Bangkok being 1,195 miles. Through services are in operation between Penang and Bangkok, the journey occupying 26 hours.

The East Coast Line proceeds northward from Gemas through Negri Sembilan, Pahang and Kelantan to Tumpat on the North-East Coast of the Unfederated State of Kelantan, 328 miles from Gemas. At 141 miles the line passes through Kuala Lipis, the Capital of Pahang and at 187½ miles crosses the Pahang-Kelantan Border. Guillemard Bridge across the Kelantan River at 292 miles is the largest bridge in Malaya. It is 2,166 feet long and consists of 5 spans of 250 feet and 5 spans of 150 feet. The East Coast Line provides an alternative route to Siam.

An extension from Pasir Mas in Kelantan runs in a westerly direction for 11½ miles to the Golok River at the Siamese Boundary, where it joins with the Siamese line running to Haad Yai Junction, where connection is made with the main Bangkok-Penang line.

Through working between the Federated Malay States and Kelantan via the Royal State Railways of Siam commenced in 1921, and via the East Coast Railway in 1931.

Branch lines connect the main line with the ports on the West Coast at Malacca, Port Dickson, Port Swettenham, Teluk Anson Wharf and Port Weld.

A causeway carrying two lines of rails and a road-way has been built across the Johore Strait, connecting the Island of Singapore with the Peninsula.

The total length of line now open to traffic under the Federated Malay States Railway Administration is 1,067 miles.

The line is of metre gauge. On the mail trains on the West Coast main line there are sleeping saloons and restaurant or Buffet cars, and on the East Coast Line sleeping saloons run from Tumpat to Singapore and vice versa on the Through Weekly Express, an observation coach being attached to the rear of the trains between Tumpat and Gemas.

The expenditure on the capital account (including lines not open for traffic), was \$233,283,625 up to 31st December, 1932, which, with the exception of \$49,469,953 contributed from Loan Funds, has been met from the general revenues of the Federated Malay States.

In addition \$2,032,801 has been expended on Capital Improvements from the Railway Renewal Fund.

#### *Roads.*

The mileage of metalled roads maintained by the Public Works Department is 2,865, of which approximately 1,935 miles, or 67%, have been treated with bituminous compound, and is made up as follows:—

Perak .. .. .	966 miles
Selangor .. .. .	921 ..
Negri Sembilan .. .. .	533 ..
Pahang, including Highlands .. .. .	Cameron 445 ..
Total ..	2,865 miles

These roads connect up every township of importance throughout the whole of the Federated Malay States.

The total expenditure on the maintenance of metalled roads in 1932 amounted to \$1,654,755 and the average cost of upkeep per mile was \$577 compared with \$1,043 in 1931.

In addition to metalled roads, 153 miles of unmetalled roads and 1,600 miles of bridle paths were maintained.

During the past five years a sum of \$31,370,000 has been spent on road maintenance and reconstruction and on improving the alignment of main roads, treating their surfaces with bituminous material, setting back road side drains and replacing temporary by permanent bridges in order to enable them to cope with present day traffic.

The substantially improved condition of the roads brought about during the past few years has already begun to yield definite results in making reduction of maintenance costs possible.

The cost of maintenance per mile has dropped from \$1,483 per mile for 1928 to \$577 per mile for 1932.

The gradient of the main roads seldom exceeds 1 in 30 and in two instances they lead over the mountain passes between Selangor and Pahang, known as "the Gap," 2,800 feet, and "Ginting Simpah," 2,000 feet. From the pass at "the Gap" the road climbs to the Federated Malay States Hill Station known as "Fraser's Hill," 4,280 feet.

The highest elevation so far reached by a main road is 4,850 at Tanah Sedia, in the Cameron Highlands, a new hill station now being developed.

The Iskandar Bridge over the Perak River near Kuala Kangsar was opened by His Highness the Sultan of Perak in June, 1932. The bridge is 1,028 feet long divided into 7 arched spans, and it replaces the old pontoon bridge originally opened in 1892.

#### *Posts, Savings Bank, Telegraphs and Telephones.*

A well organised system of Posts extends throughout the Federated Malay States by rail, motor car, cycle, runner, sea, and river. All towns and villages of any size have their regular deliveries and collections of mail matter and these facilities are being extended rapidly. The external mail services are frequent to all other parts of the world through Port Swettenham and through the Straits Settlements ports of Singapore and Penang. The postal services include Parcel Post, Cash on Delivery (or Value Payable Post); Insurance, Money Orders, British Postal Orders, all these services extend to a great many different countries. They are operated at 90 Post Offices by officers of the Posts and Telegraphs Department and at 70 other places by station-masters and others. Savings Bank business is transacted at all Post Offices at all hours at which they are open, the Bank being controlled by the Department. The interest payable on deposits is 3 per cent. per annum.

The Public Telegraph and Telephone System of the Federated Malay States is provided and maintained by the P. & T. Department and consisted at 31st December, 1932, of 3,192 miles of overhead lines carrying 26,222 miles of wire. In addition, there were 176 miles of underground cables with 15,899 miles of wire. This included 244 miles of overhead line through Johore, connecting the F.M.S. and Singapore.

The Postal Telegraph System extends throughout the Federated Malay States and is interconnected with the Railway Telegraph System; Railway Telegraph Offices being available for public telegrams where no Postal Telegraph Office exists. At the smaller offices telegrams are transmitted by telephone. Telephone Lines connect the more important

offices to one another, to Singapore, Penang and Malacca in the Straits Settlements, and to various offices in Johore, Kedah, Kelantan and Trengganu; the whole forming the Malayan Telegraph System. There are flat rates for telegrams throughout this system. International telegraphic communication is through Singapore and Penang.

The Telephone system extends throughout the Federated Malay States. There are at present 67 public exchanges, maintaining a continuous night and day service and 30 other places at which Call Offices are maintained, giving a service restricted to the hours during which the local Post Office is open for the transaction of public business. Of the Post Offices in the Federated Malay States, 97, therefore, are provided with public telephone facilities. Public Call Office facilities are also available at a number of Railway Stations. At most of the remaining places, calls, including trunk calls, can in case of emergency be made from the local Police Stations.

All the exchanges are connected by means of trunk lines and trunk communication (which may also be obtained from Call Offices) is possible between all exchanges. In case of emergency trunk calls may be made from the local Police Stations when the Call Offices are closed.

The Federated Malay States telephone system is connected to the telephone system in Singapore, Malacca (and through Malacca with North Johore) and with the telephone system in Penang, Province Wellesley and Kedah.

#### *Trade and Customs.*

The trade of the F.M.S. is principally an export trade in raw materials and produce—agricultural, forest, marine and mineral—in exchange for imports of food, tobacco, fuel oils, clothing, and machinery. The principal export trade was with the U.S.A. and the United Kingdom, the principal import trade with the United Kingdom and the Continent of Europe, India, Burma, Netherlands, Indies, Siam, and the U.S.A.

In 1932 the aggregate value of trade was \$159 million, a decrease of 32% as compared with the previous year. The Fed. Malay States form a single customs unit. The tariff list covers a wide range of dutiable articles and makes provision for a preferential rate of duty on goods produced or manufactured in the British Empire. The principal articles subject to duty are as follows:—Imports: Tobacco, liquors, petroleum, matches, edible oils, cement, cosmetics, textiles and apparel, leather, cycles and tyres, condensed milk, jam and preserved fruits, coffee, tea, rice, linoleum, brassware, printing paper, electric batteries. Export duties: Rubber, tin and tin-ore, other metals, forest products, coconuts and copra.

Details of the tariff can be obtained in London at the Malayan Information Agency, Malaya House, Charing Cross, S.W.1.

*Perak.*

*His Highness Paduka Sri Sultan Iskandar Shah, K.C.M.G., K.C.V.O., G.C.M.G., ibni al-Marhum al-Sultan Idris.*

Perak is the most northerly of the Federated States on the west coast, touching Province Wellesley on the north and Selangor on the south and having an area of 7,740 square miles. About 1850 the discovery of tin in Larut was followed by the immigration of Chinese in great numbers. Since the appointment of a British Resident in 1874, the record of the State has been one of remarkable progress.

The State is well watered, the Perak (with its tributaries, the Singor, the Temengor, the Rui, the Plus, the Kinta, Batang Padang, Bidor and Sungkai), being the most important rivers. Other rivers of importance are the Krian, the Kurau, and the Bernam (with its tributary, the Slim). The mountains on the east boundary which are part of the main range of the Peninsula, rise to a height of over 7,000 feet.

Sanatoria have been established on the Larut Hills and on Gunong Kledang, at heights varying from 3,300 to 4,500 feet. Experimental gardens with English flowers and vegetables are to be found on the Larut Hills.

The chief exports are tin and rubber. Coconuts and rice are extensively grown. In the Krian district the Government has completed an extensive scheme for the irrigation of more than 74,102 acres of land, the larger proportion of which is already under cultivation for rice. A similar scheme is in course of development in the Sungei Manik area in Lower Perak District.

Larut, Kinta, Batang Padang, and Klian Intan are the chief mining districts. The district of Batang Padang lies between the Kinta Valley and the Selangor boundary, and contains a little gold and wolfram mixed with its tin.

The total mileage of completed roads in Perak is (a) 566 of metalled and (b) 69 of unmetalled cart roads, 950 miles of bridle and other paths.

The British Resident has residences at Taiping, the Headquarters of Government, and at Ipoh, the chief commercial centre. The chief towns are

Ipoh, Taiping, Kuala Kangsar, Kampar, and Tapah. The chief port is Teluk Anson.

Since the Anglo-Siamese treaty of 1909 the territory claimed by Perak for many years, and held by Patani since 1826, has been formally ceded to Perak, and the State now includes the whole watershed of the river that gives it its name. The new territory which was taken over in 1909 and incorporated in the Upper Perak District, exceeds 1,000 square miles of area. It extends from Kedah on the West to Legoh on the East, and contains the tin mines of Klian Intan and much good stanniferous country. This territory is well watered, and the rolling plains of the Kroh plateau, 1,000 feet above the sea, afford a healthy Government station. At Tasek on the Kedah border there is a small natural lake. At the time when the territory was taken over the population was about 3,000 of various nationalities.

*Selangor.*

*His Highness Ala'udin Suleiman Shah, G.C.M.G., ibni Al-Marhum Raja Muda Musa, Sultan.*

Selangor, situated on the Western side of the Peninsula, is bounded on the North by Perak, on the East and South-east by Pahang and Negri Sembilan, and on the West by the Straits of Malacca, and has an area of 3,160 square miles.

Its coast line extends for about 125 miles. Where the State touches the central range of the Peninsula there are several peaks of over 5,000 feet and one of 5,812 feet.

The State is drained by four rivers: The Bernam, forming the boundary between Perak and Selangor; the Selangor, the Klang and the Langat. The natives are said to be the descendants of a Colony from the Celebes.

For administrative purposes the State is divided into six districts, viz., Kuala Lumpur, Klang, Ulu Langat, Ulu Selangor, Kuala Langat and Kuala Selangor, each under a District Officer.

The capital of the State is Kuala Lumpur, which is also the headquarters of the administration of the Federated Malay States. It is the largest town on the mainland of the Peninsula, with a population of 104,032 (1932 mid-year). It has a water supply from an impounding reservoir 7 miles distant, and is also lighted by electricity. There are 115 miles of town streets. It also possesses a picturesque public garden covering about 180 acres, and several imposing Government buildings, the principal being the Government offices of modern Saracenic design, with a clock tower 130 feet high, town hall, museum, courts, prison, railway station and offices, and post office. There are also branches of the Chartered Bank of India, Australia and China; the Hong Kong and Shanghai Banking Corporation; and the Mercantile Bank of India. The currency is the Straits Settlements dollar, with a fixed exchange at two shillings and fourpence.

There were 422 Schools in the State in 1932 including 48 English Schools, 88 Malay Schools, 157 Tamil Schools and 129 Chinese Schools.

Port Swettenham, situated at the mouth of the Klang River, and 27 miles by rail from Kuala Lumpur, is the chief port, and is regularly visited by ocean-going steamers. The aggregate tonnage of vessels, exclusive of native craft, which called at the port in 1932 was 5,427,802.

The total revenue of the State in 1932 was \$17,038,199, and the expenditure \$19,487,347. There is no public debt except such as is included in the public debt of the Federation.

The principal sources of revenue are customs, excise, and Land Import duties are charged on spirituous liquors, wines, beers, petroleum, tobacco,

matches and alum. In 1932 the gross total value of imports was \$38,085,650 and the exports \$30,231,667.

The chief industry of the State is tin mining, the amount of tin exported in 1932 was 136,618 pikuls valued at \$9,423,935. The area alienated for mining is 51,254 acres. The area under coffee has increased from 4,838 acres in 1931 to 6,026 acres. Although coffee prices have been low, far more interest was taken in this crop during the year. In 1932 there were 110,584 acres under coconuts. Rice, gambier, pepper and other products are grown with success. The rubber industry which has made great progress has met with a set back owing to the unprecedented fall in the price of rubber. At the end of 1931 the area under rubber cultivation was approximately 488,744 acres. The value of cultivated rubber exported during 1932 was \$14,883,568.

The length of roads upkept in 1932 was 921 miles as against 920 miles in 1931. The total number of miles remetalled during the year 1932 was 25. 52 miles of road were treated with bituminous materials. The average cost of maintenance of metalled and gravelled roads was \$642 per mile.

#### *Negri Sembilan (The Nine States).*

*His Highness Abdulrahman ibni al-Marhum Tuanku Muhammad, Yang Di-pertuan Besar.*

The Federation of States known as Negri Sembilan lies on the Western side of the Peninsula and is bounded on the North-west by Selangor, on the North-east by Pahang, on the East by Johore, on the South by Malacca, and on the South-west by the sea.

The headquarters of the Resident are at Seremban in Sungei Ujong, where the principal Government offices are situated. District Officers are stationed at Port Dickson, at Kuala Klawang in Jelebu, at Ulu Muar in Kuala Pilah, and at Tampin.

The value of imports amounted to \$6,358,029 in 1932 and that of exports to \$9,360,342. The revenue of the State, which in 1932 amounted to \$6,046,881, is derived mainly from tin mining and agriculture.

At the end of 1932, 8,692 acres of land were in occupation for mining, and 540,364 acres for building and agriculture. The alluvial tin fields are worked and owned by Chinese, whilst the hydraulic and other workings requiring the installation of expensive machinery are supervised and financed by Europeans. Gold reefs exist in Gemencheh and on the Muar River, but have not up to the present proved remunerative. The Malay population is almost entirely agricultural. By far the larger portion of this population inhabits the Kuala Pilah and Tampin districts, where there are extensive and fertile rice fields.

A great part of the State is mountainous, the rest consisting of undulating country suitable for agriculture. The whole State is well watered, the chief rivers being the Muar and the Linggi, the latter of which forms, for some distance, the boundary between the State and the Settlement of Malacca.

Much valuable timber is found in the forests of the State, and the areas of reserved forests are being considerably extended with a view to its preservation.

The chief agricultural products are rubber, rice, and coconuts. During 1932 the areas under cultivation with these products were approximately as follows:—

Rubber .. .. .	354,666 acres
Rice .. .. .	33,230 "
Coconuts .. .. .	5,966 "
Other cultivation covered:—	
Oil palm .. .. .	1,173 "
Fruit trees .. .. .	4,074 "

Educational facilities comprise 81 Malay Vernacular Schools, 7 English Schools, and 29 Tamil Schools.

The State is provided with a good system of roads, connecting the centres of each district with headquarters and each other. The total mileage is 533 miles of metalled roads, of which 370 miles were bituminously treated.

#### *Pahang.*

*His Highness al-Sultan Abu Bakar Ri'ayatu'd-Din Mu'adzdzam Shah, C.M.G., ibni al-Marhum al-Mu'tasim Bi'llah al-Sultan Abdul'lah, Sultan.*

Pahang occupies a large portion of that part of the Malay Peninsula which lies on the eastern side of the central mountain range. It is bounded on the North by the States of Kelantan and Trengganu, on the South by the territory of Johore, on the West and South-west by Perak, Selangor, and Negri Sembilan, and on the East by the China Sea. It is the largest of the States of the Federation, with an area of 13,970 square miles.

Several peaks of the main range of mountains forming the western boundary exceed 6,000 feet, the highest being Gunung Kerbau, which is 7,160 feet. Gunung Tahan, in the centre of the Pahang-Kelantan boundary, has been found to be 7,186 feet high, and is therefore the highest elevation in the Federated Malay States, and probably in the Malay Peninsula.

The State is drained by one of the largest rivers in the Peninsula, if not the largest, the Pahang River, which is fed by the Lipis, Jelai, Tembeling, Semantan, Triang, Bera, Luit, Lepar and other rivers. To the north the Kuantan and to the south the Rompin and Endau also debouch into the China Sea, the last named forming part of the boundary between Pahang and Johore.

The total length of the Pahang River is about 285 miles, of which 232 are navigable for houseboats and other small craft. The bars at the mouth of all rivers, with the exception of the Kuantan, prevent the ingress of vessels except those of very shallow draft.

The chief industry of the State, after agriculture, is tin mining, the principal mines being in the Bentong, Raub and Kuantan districts. Gold has been worked for many years by the Raub Australian Gold Mining Company, Limited. Gold-bearing lodes have also been worked by Europeans at Penjun, Selensing, Kechau, and other places in the State; the mines have been closed for some years. From the reports of old travellers it is clear that in the eighteenth and previous centuries very large quantities of alluvial gold were exported from Pahang. The European mines mentioned above were all on the sites of extensive native workings.

The administrative headquarters of the State are at Kuala Lipis, 209 miles up stream from the mouth of the Pahang River.

The Sultan, however, resides at Pekan, the old capital which is near the mouth of the Pahang River.

The East Coast Line of the Federated Malay States Railways runs through Pahang and is now open for traffic as far as Tumpat, Kelantan.

There is a motor car service both ways from Kuala Lumpur to Kuala Lipis, 119 miles; also from Jerantut Station on the Railway to Kuantan, a distance of 109 miles.

The total mileage of metalled roads in Pahang is 445 miles 49 chains. A road from Batu Talam to Kuala Medang has been completed up to the 22nd mile post and it is hoped to link this road with Kuala Lipis, when funds are made available.

The total revenue of the State during 1932 amounted to \$3,681,234 and the expenditure to \$5,208,615.

There are 5 Government English Schools, 2 private English Schools, 80 Malay Boys' Schools, 5 Malay Girls' Schools, 7 Tamil Schools, 20 Chinese Schools, and 1 Javanese School in the State.

## MALAY STATES NOT INCLUDED IN THE FEDERATION.

In addition to the territories comprised in the Federated Malay States, the British sphere in the Malay Peninsula includes the States of Johore, Kedah, Perlis, Kelantan, and Trengganu.

### JOHORE.

*His Highness Sir Ibrahim, G.C.M.G., K.B.E., etc., etc., Sultan and Sovereign Ruler of the State and Territories of Johore.*

The State of Johore lies at the southern extremity of the Malay Peninsula, and is bounded on the North by Pahang, on the North-west by Negri Sembilan and Malacca, on the West by the Straits of Malacca, on the South by the Strait North of Singapore, and on the East by the China Sea.

The area of the State is approximately 7,320 square miles. The interior is in great part covered with jungle. The country is, as a whole, less mountainous than any other part of the Peninsula. The most important mountain group is formed by the Blumut Hills, which lie near the centre of the State. Mount Ophir, or Gunung Ledang, the highest peak in Johore (4,186 feet), is situated near the border of Malacca.

The principal river is the Muar, in the North-west running through the district on the same name, which was formerly a separate State, but was united to Johore in 1877. The only other rivers of importance are the Endau, in the North, which, during part of its course forms the boundary with Pahang and Johore; and the Johore river which flows into the Straits opposite to the eastern end of the island of Singapore.

The only towns of any importance are Johore Bahru, the capital, situated on the Straits, opposite to Singapore, Bandar Maharani in Muar, and Bandar Penggaram in Batu Pahat.

The climate approximates to that of Singapore and the Federated Malay States, the highest maximum and the lowest minimum temperature in 1932 being 96° and 63° respectively.

The population estimated at mid 1932 was 489,749, of whom the Malay inhabitants comprised 238,961 or 49 per cent. The population of Johore Bahru town was estimated as 20,636.

In area, Johore approximates to Wales; in population to Cyprus.

### History.

Of Johore history little is known prior to the advent of the Portuguese. A number of semi-wild "proto-Malay" tribes exist chiefly along the coasts: while the civilised occupants of the country are the descendants of the Malays who brought their civilization from Palembang in Sumatra.

As the Buddhist State of Palembang grew in power, colonies of Malays commenced to settle on the Peninsula. Singapore, founded under the name of Tamasek about this time, was ruled by its own kings. A Siamese law of 1360 includes Ujong Tanah (or Johore), Malaka, and Malayu among tributary states.

About 1365 A.D. Javanese from Majapahit conquered the country and destroyed Singapore.

Malacca then grew to be the first trading centre of the East, and after its conquest by the Portuguese in 1611, a son of the conquered King settled at Johore Lama and founded the historic Sultanate of Johore.

The history of the next 300 years, however, is an almost uninterrupted record of wars. Persistent hostilities with the Portuguese continued nearly

until the arrival of the Dutch in 1602. The State bears no small part in Dutch Colonial history; relations were friendly, despite a diplomatic struggle for commercial privileges. But, after violent attacks by the Achinese, Johore had become by 1637 practically an appanage of the Achinese Kingdom. In return for assistance rendered at the successful attack on Malacca in 1641, the Dutch tried to restore Johore to its former position as the premier Malay State. A port with a customs officer existed at Singapore. But the capital was plundered and burnt by Jambi in 1673, in 1699 the Sultan was assassinated, and in 1717 the throne was seized by a Sumatran adventurer, Raja Kechil. Then the Bugis ships appeared. The subsequent process, partly conquest, partly assimilation, while disturbing to Johore, resulted in a wide extension of its sovereignty, which now spread to Pahang, Siak, Riau, Linggi and part of Selangor.

After 60 years of continuous intrigues between the Malay and Bugis chiefs the Dutch in 1784 recognised the Malay Sultan as ruler of Johore, drove the Bugis from Riau and stationed there a Resident with a garrison; after some further fighting the Malay Sultan and the Bugis viceroy accepted the position of dependent princes, but the old empire of Johore (Linggi and Klang had been ceded to the Dutch in 1757) was in a state of dissolution, the Bendahara and Temenggong being virtually territorial chiefs in Pahang and Johore respectively. This was the position when the English, by virtue of treaties made in 1819 and 1824, obtained a complete cession of the island of Singapore.

Contemporary visitors emphasize the deserted character of the country; in 1847 the capital consisted merely of 25 huts. (In 1855 the capital was moved to its present situation at Johore Bahru.) But the extension of the Pax Britannica and the assistance rendered by the Governor of the Straits Settlements "helped Johore to grow populous again," moreover, the country has been governed since 1862 by two enlightened and progressive rulers, Sultan Abubakar, who died in 1895, and Sultan Ibrahim the present ruler.

In 1895 the Sultan undertook to receive a British Agent having the functions of a Consular Officer; in 1910, the Sultan having had an unofficial adviser for some years, reorganised his Government with the assistance of the Governor of the Straits Settlements; in 1914 a General Adviser with enlarged powers was appointed. The recent history of the State has been a record of continued prosperity. Telephonic communication was established between Johore and Singapore in 1883; a postal service was inaugurated in 1884, letters being transported by coach till the opening of the railway across Singapore Island in 1903; in 1909 the Johore State railway, linking up with the Federated Malay States Railway system, was completed; finally, in 1924, the completion of the causeway across the Straits permits uninterrupted railway connection between Singapore and Bangkok.

#### *Constitution.*

In 1895 the Sultan promulgated a written constitution, to which supplements have been added.

His Highness has a Council of Ministers, consisting entirely of high Malay Officers of State, together with an Executive Council consisting of certain Malay and British officers.

The Orders of the Executive Council are carried out by a Civil Service containing Malay and European Officers.

The Legislature consists of a Council of State, to which Asiatic and European official and unofficial members are appointed.

The Judicial system resembles that of the Federated Malay States, minor cases being decided by Magistrates

with appeal to the Supreme Court, and major cases by the Supreme Court, with appeal to the Court of Appeal, and thence in special cases to the Privy Council.

Cases involving matters regulated by Muhamadan law are decided in the Court of Kathi, with appeal to the Sultan in Executive Council.

Judges of the Supreme Court of the Straits Settlements and of the Federated Malay States are ex-officio Judges of the State of Johore, and vice versa.

There is no Public Debt.

#### *STATISTICS.*

Year.	Revenue.	Expenditure.	Surplus Assets.
1932	\$11,518,363	\$11,383,156	\$21,933,458
Year.	Value of Imports.		Value of Exports.
1932	\$21,809,020		\$29,623,458

The principal items of revenue during 1932 were:—

Land Rents (Recurrent) .. ..	\$2,035,023
Export Duty on Rubber .. ..	144,341
Import Duty on Spirits .. ..	229,337
Import Duty on Tobacco .. ..	948,319
Sale of Chandu .. ..	1,813,256
Interest .. ..	926,171
Land Sales .. ..	702,775
Municipal .. ..	1,033,949

#### *Economic Conditions.*

Johore recovered more quickly than the Federated Malay States from the trade depression which began in 1920, and an era of rapid development commenced.

Johore is primarily an agricultural State. Forest Reserves amount to 526,000 acres and are being largely increased.

The total area of alienated land on 1st Jan., 1932, was 1,209,693 acres.

The chief agricultural exports in 1932 were:—

	Area.	Value of Exports.
Rubber .. ..	854,689 acres	\$39,259,867
Coconuts and Copra .. ..	198,000 "	5,183,037
Tapioca .. ..	17,360 "	803,020
Pineapples .. ..	39,300 "	5,534,801
Areca nuts .. ..	10,000 "	1,328,773
African oil palm .. ..	27,832 "	—

Mining titles cover some 9,122 acres.

The principal minerals exported in 1931 were:—

Tin-ore, 425 tons,
Iron-ore, 485,067 tons,
China clay, 186 tons,
the total value of mineral exports amounting to \$2,782,491.

The chief imports comprise rice, wines and spirits, tobacco, wood and timber (largely Johore Produce re-imported from Singapore), cotton-goods and petroleum products.

A branch of the Hong Kong and Shanghai Banking Corporation is established at Johore Bahru and at Muar, and a Chinese bank at Batu Pahat.

Manufacturing industries are in their infancy, being confined to 7 pineapple factories, 17 tapioca factories, and a few saw-mills, brickworks, and similar undertakings.

Electric power stations have been erected at Johore Bahru, Muar, and Segamat.

#### *Communications.*

Sea.—Regular steamship services run between the various coast ports and Singapore.

During 1932, 90 ocean-going steamers with a tonnage of 302,348; 1,911 coasting steamers with a tonnage of 109,064; and 7,157 sailing vessels with a tonnage of 139,512 entered ports in the State.

There was a decrease in the number and tonnage of Japanese ocean-going steamers calling at Batu Pahat to load iron-ore. The total weight of ore so cleared was 485,067 tons in 1932.

**Railway.**—The Johore State Railway runs for 120 miles through the middle of the State from Gemas on the northern boundary to Johore Bahru on the southern boundary; it is connected on each boundary with the system of the Federated Malay States Railway administration, by whom it was built and to whom it is leased.

**Road.**—At the end of 1932 the State possessed 732 miles of metalled, 65 miles of gravelled and 12 miles of earth roads as well as 50 miles of approach road and back lanes. All the principal towns are now connected by a road-system which is being continually extended.

Hired cars provide a cheap, constant, and rapid means of communication. About 1,200 motor vehicles a day cross the causeway connecting the main land with Singapore Island.

**Posts, Telegraphs, Telephones.**—In addition to the General Post Office at Johore Bahru, 26 branch offices are established.

41 telephone exchanges are in operation, and the number will be increased. Communication is established between Johore Bahru and Singapore, and between Muar and the Malacca and Federated Malay States systems.

**Accommodation.**—The Johore Station Hotel at Johore Bahru provides the usual accommodation for travellers. The Government also maintains Rest Houses at Muar, Batu Pahat, Kota Tinggi, Segamat, Batu Anam, Mersing, and Kluang.

#### General.

**Health.**—Government Hospitals are established in the principal townships, besides a Mental Hospital and Leper Asylum at Johore Bahru. Permanent anti-malarial measures are being undertaken in Johore Bahru and other townships, and oiling operations are in force in all towns.

Travelling dispensaries have been provided.

**Education.**—The Government has established six English Schools and 115 Vernacular Schools.

Grants-in-aid are made to estate Tamil Schools.

**Military Forces.**—The total strength of the Johore Military Forces in 1932 amounted to 646. There are English and Malay Volunteer contingents.

**Police.**—The force numbers 1,329, all ranks: the rank and file consist of Malays and Sikhs under Malay and English Officers.

**Municipal.**—Town Boards are established at Johore Bahru, Muar, Batu Pahat, Segamat, Kota Tinggi and Endau, supervising sanitary work in 27 Town Board Areas and many village areas.

**Sport.**—Subject to the regulations for the protection of wild animals, special permits may be obtained to shoot elephant, guar, rhinoceros, tapir, deer, tiger, panther, crocodile, and pig.

### KEDAH.

*His Highness Sir Abdul Hamid Halimshah ibni Ahmad Tajudin, K.C.M.G., Sultan*; *His Highness Tunku Ibrahim, C.M.G., C.V.O., Regent*.

Kedah is a State on the West coast of the Malay Peninsula, situated between the parallels of 5° 5' and 6° 35' N. lat. and the meridians of 99° 35' and 101° 10' E. long. It is bordered on the interior (North and East) by the States of Singgora and Patani (Siamese) and by the State of Perak (F.M.S.), and extends along the sea coast from the River Sanglang, its boundary with its northern neighbour the State of Perlis (under British protection), to the Muda River, its boundary with Province Wellesley. Thence it extends behind the narrow strip of coast which forms Province Wellesley, down to the northern bank of the Krian River, its boundary with the State of Perak.

Both the island of Penang and the territory of Province Wellesley were originally part of Kedah. Penang was acquired from the "King of Quedah" by Captain Light on behalf of the East India Company by the treaty of 1786, and Province Wellesley was ceded by Kedah to Sir George Leith, on behalf of the Company, by the treaty of 1800, to enable the Company to check the piracies on the coast. A sum of \$10,000 is, under the treaty of 1809, paid annually by the Government of the Straits Settlements to the Kedah Government in respect of Penang and Province Wellesley.

The State includes the island of Langkawi and a number of smaller islands to the South. It formerly included the island of Terutau to the North of Langkawi, but this island and a small area in the interior of the State, in the eastern water-shed, were ceded to Siam in the treaty of 1909.

The mainland of Kedah is about 105 miles in length and about 65 miles in width at its widest part. Its area is, including the Langkawi groups, about 3,640 square miles. The two highest peaks on the mainland are Gunung Jerai (3,986 feet) and Bukit Perak (2,823 feet). Gunung Raia, on Langkawi Island, is 2,880 feet high.

#### History.

There are no authentic records of the early history of the State, and little is known except that the country was converted to Muhammadanism in the 15th or 16th century, and that, like the other States in the Peninsula, it was at various times under the domination of Burmah, Acheen, Malacca, and Siam. Like the other States, too, it depended upon the personality of its ruler. Under a strong raja its boundaries extended to include Setul, Perlis, and part of Singgora on the North, and Krian on the South, and under a weaker man, or upon the rising of a stronger raja beyond the borders its boundaries contracted.

There is no record of the Portuguese, during their occupation of Malacca (A.D. 1511 to 1641), having had any intercourse with Kedah. The Dutch, however, after they had wrested Malacca from the Portuguese, established Opperhoofden (commandants) in Kedah from 1654 to 1711.

From that date until 1786, when Captain Light acquired Penang from the Sultan for the East India Company, little is known of the history of the State.

In 1821, a Siamese fleet appeared off the mouth of the Kedah River, and, by a sudden descent upon the unexpected Malays, took possession of the fort, and later of the river. The Sultan, who was in the Merbok district at the time, fled to Province Wellesley, where he was afforded protection by the British Government. He was later afforded an asylum in Malacca.

In 1831, Tunku Kudin, a nephew of the Sultan, made a desperate attempt to recover Kedah from the Siamese. He succeeded in driving out the Siamese, and held the country from April until October, but was later conquered by a combined force of British and Siamese. In 1838, the Malays made another attempt under Tunku Muhammad Saad, and again succeeded in expelling the Siamese. Again, however, they were worsted by the combination of a Siamese army and a blockade by British gunboats.

In 1841 the Siamese allowed the Sultan to return to Kedah and re-assume the government. The Sultan was, however, only allowed to exercise authority over part of the territory that formerly was subject to him. Setul, Perlis, and Kubang Pasu were given to other rajas independent of him. Setul, under the treaty of 1909, is now part of Siam (Monthon Puket); Perlis is still independent and is now under British protection. Kubang Pasu was some years ago again made part of Kedah.

#### General Description.

The language line between Siamese and Malay runs through Kedah and Perlis, and in the interior parts of these States the Malays speak Siamese as freely as their own language. There is a large number of Sam-sams—a mixed race of Siamese and Malays—who are Muhammadans. Only a few families of the aborigines (Semang) are left in the forest at the source of the Muda River; 209 "nomadic aboriginals" were counted at the 1931 census.

South Kedah, the area lying South of the mountain known as Kedah Peak (Gunong Jerai), is for the most part populated with Europeans, Chinese and Tamils planting rubber, coconuts and tapioca. There is also a Malay population planting rice along the banks of the Muda River and in the low lying land along the coast. Kulim was formerly a tin-mining centre of

some importance, but the alluvial deposits are now said to be worked out.

North Kedah is almost entirely populated by Malay cultivators of rice. The soil is generally a heavy fertile clay. A quantity of rice is exported annually to Penang and to the Federated Malay States.

The population of Kedah was 338,558 at the 1921 census and 429,691 at the 1931 census. At mid 1932 the population was estimated to be 423,074, of whom 291,621 were Malays, 379 Europeans, 108 Eurasians, 73,667 Chinese, 43,590 Indians, and 13,709 "other races."

Galena has been found in Langkawi, and indications of coal and oil have been reported; nothing of commercial value has, however, yet been discovered, with the exception of a deposit of marble which is described as the equal of any in Europe.

#### *Climate.*

The climate resembles that of Perak. Meteorological returns kept in ten places record an average shade temperature in the day-time rising to over 90° F. and falling to nearly 70° F. at night. The driest months are January to March and the wettest August to October, when half the annual rainfall occurs, averaging from 100 to 130 inches a year. Cholera has sometimes broken out in prolonged droughts, but the provision of a good water supply which is now completed, should prevent this. The health on rubber and other estates is good.

#### *Communications.*

Steamers ply between Penang and Sungai Patani (Central Kedah), and between Penang and Alor Star (the capital, six miles up the Kedah River) in North Kedah. There is a bi-weekly steamer communication between Penang and Langkawi Island.

A metalled road connects Alor Star with Province Wellesley, a distance of 45 miles. A metalled road extends to the Perlis boundary (25 miles), and a road which branches off at the 12th mile connects the State with Singgora. Another road extends to Kuala Nerang at the 23rd mile from Alor Star. A metalled road has been made to Baling and North Perak, and other metalled roads have been completed or are under construction. There are a number of earth roads connecting the tapioca and rubber estates in South Kedah with the towns; 225 miles of canals are maintained by the Public Works Department.

The Federated Malay States railway administration has extended its railway service through Kedah into Perlis. The line leaves the main line at Bukit Mertajam, in Province Wellesley and is 98 miles in length to the Siamese frontier, trains have been running regularly since October, 1916. A connection through Perlis with the Siamese railway system has been completed, establishing railway communication between Bangkok and Singapore.

There is an aerodrome at Alor Star, where the Dutch Air Mail make regular weekly landings.

Telegraphic and telephonic communication extends throughout the State.

#### *Education.*

There are English schools in Alor Star (665 pupils) and Sungai Patani (190 pupils) and a Malay Girls' school in Alor Star. There are 88 Malay schools, including 5 Girls' schools, and a Trade school.

#### *Constitution.*

Until the beginning of this century the Siamese Government interfered but little in the government of the country, only requiring the Sultan to refer to Bangkok matters of importance, and applications for land by foreign subjects. In 1905, however, the

finances of the country had reached such a state that the Sultan was compelled to negotiate with Siam for a loan in order to avoid bankruptcy. With the loan the Siamese Government sent an adviser to advise the Sultan in the general management of the country, and more particularly in its finances.

In 1905, the Sultan by an edict appointed a State Council to assist him in the administration of the country. The first President was H.H. the Raja Muda, Tunku Abdul Aziz, who died in 1907. He was succeeded by H.H. Tunku Mahmud who was in turn succeeded in 1918 by H.H. Tunku Ibrahim.

In 1913, the Sultan's health became such that it was necessary to appoint his eldest son, Tunku Ibrahim, C.M.G., C.V.O., as Regent, pending the restoration of the Sultan's health.

With the transfer of the suzerainty of Kedah from Siam to Great Britain under the treaty of 1909, the adviser appointed by Siam has been replaced by an adviser appointed by Great Britain.

Under the terms of the agreement between His Britannic Majesty's Government and the State of Kedah dated the 1st November, 1923 the supreme authority in the State is vested in the Sultan in Council, which Council consists of His Highness the Sultan as President, three other Malay members selected by name or office by His Highness with the approval of His Excellency the High Commissioner for the Malay States, and the British Adviser.

#### *Finance.*

The amount of the loan obtained in 1905 from Siam was of \$2,600,000 at the rate of 6 per cent. This loan was, with the transfer of the suzerainty of the State from Siam to Great Britain under the treaty of 1909, taken over by the Federated Malay States Government at 4 per cent, but the whole amount has been paid off and the State is now free from debt. Accumulated surplus funds (excess of Assets over Liabilities) amounted to \$3,489,791 at the end of 1931, in addition to an "Opium Revenue Replacement Fund" with investments valued at \$6,187,879.

Public revenue and expenditure:—

<i>Year.</i>	<i>Revenue.</i>	<i>Expenditure.</i>
	\$	\$
A.H. 1351 (A.D. 1932-1933)	4,963,345	5,069,401

#### *Trade.*

The following are the principal exports from Kedah:—Padi and rice, rubber, copra, arecanuts, tapioca and sago, forest produce, tin-ore, fish, bricks, cattle, hides and horns, pigs and poultry.

The value of the Kedah trade with the Straits Settlements during 1931 was as follows:—Exports, \$9,235,297; imports, \$6,285,691.

The value of Kedah trade with the F.M.S. during 1931 was: Exports, \$1,187,742; imports, \$65,398.

**PERLIS.**

*His Highness, Syed Alwi, C.M.G., C.B.E., Raja.*

Perlis is a small State on the West coast of the Malay Peninsula, North of Kedah. Its area is 310 square miles.

Until 1821 it was subject to Kedah, but when the Siamese, in 1841, allowed the Sultan of Kedah to re-assume the government, they made Perlis an independent State under Syed Hussein, who was given the title of Raja. The present ruler is the great-great-grandson of Syed Hussein and is the fourth raja.

The country, like Kedah, is a rich alluvial plain, which is devoted to rice cultivation. A little tin is exported from the interior, and some of the limestone hills are rich in guano.

The Federated Malay States Railway runs through the State and connects with the Siamese railway system at Padang Besar. H.H. the Raja resides at Arau which is on the railway. The main Government Offices are at Kangar, about six miles from Arau. There is a Post and Telegraph Office at Kangar and a telephone system exists between the police stations in the State. There are 36½ miles of metalled roads and 26½ miles of gravelled roads and paths kept up by Government.

The population is 48,970 (mid. 1932), of whom 40,128 are Malays. Public revenue and expenditure:—

The State, by loans made in 1905 and 1907, incurred a debt of \$443,000 to the Siamese Government. These loans, with the transfer of suzerainty from Siam to Great Britain, were taken over by the Federated Malay States. Repayment of these loans was completed in 1929, and the State is now free from debt. When the loans were contracted the Siamese Government sent an Adviser to advise the Raja in the general management of the country, and more particularly in its finances. With the transfer of the suzerainty of Perlis from Siam to Great Britain under the treaty of 1909, the Adviser appointed by Siam has been replaced by an Adviser appointed by Great Britain.

The relations between Perlis and Great Britain are defined in a Treaty signed at Aron on 28th April, 1930.

The Raja is assisted by a State Council in the government of the country, and is himself President of the Council. There are four other members of the Council, one of them being the Adviser.

# KELANTAN.

*His Highness the Sultan Ismail ibni*

*Almarhum Sultan Mohamed IV, K.C.M.G.*

The State of Kelantan is situated on the eastern side of the Malay Peninsula, and lies between latitudes 4° 36' and 6° 15' North, and between longitudes 101° 22' and 102° 37' East. It is bounded on the North by the China Sea; on the East by Trengganu and the China Sea; on the South by Pahang; and on the West by Perak and Siamese Territory. The area of the State is estimated to be 6,720 square miles.

As in the case of Kedah, the Government of Siam claimed rights of suzerainty over Kelantan for many years before any attempt was made to direct the administration of the State. Towards the end of the nineteenth century, at the time when the affairs of Kelantan were involved in much confusion owing to a disputed succession, a Siamese Commissioner was appointed to reside at Kota Bharu, the capital, but in spite of this fact the exact rights of Siam were a subject of constant dispute, until matters were placed on a stable footing at the end of 1902 by an agreement under which the Raja undertook to receive a British Officer in the Siamese service as his Adviser, and to administer the State according to his advice. The Adviser took up his post in 1903, and since that date great improvements have been effected in the Government of the State. The transfer to the protection of Great Britain was formally effected on July 15th, 1909.

About a sixth part of the area of Kelantan consists of a fertile plain, extending from ten to twenty-five miles from the shore; the greater part of this plain is under cultivation with padi and coconuts. From this plain the land rises gradually into mountain ranges, which reach their greatest height in the South. Gunong Tahan, on the southern boundary, is 7,186 feet high, and is the highest peak in the Malay Peninsula.

The principal river is the Kelantan, which enters the China Sea about ten miles from the western boundary of the State. The Kelantan River is a fine river some 150 miles long, navigable for launches for 80 miles. The basin of the Kelantan River, with those of its tributaries, comprises the greater part of the State. Of the other rivers, the most important are the Golok and the Semerak. By the Anglo-Siamese treaty of 1909, the Golok forms the boundary between Kelantan and the Siamese territory from its source to Kuala Tabal, where it debouches into the China Sea. The Semerak, like the Golok, is a deep river with a shallow bar at its mouth; it enters the sea near the border of Trengganu.

Kelantan possesses a larger Malay population than any other State in the Peninsula. The total population at the 1931 census was 362,517, including 330,774 Malays, 17,612 Chinese, 6,752 Indians, 124 Europeans, 32 Eurasians, and 7,223 others.

Kota Bharu, the capital, which lies on the right bank of the Kelantan River, about eight miles from

its mouth, has a population of about 14,843 people. It is a clean, well-laid-out town with good metalled roads. It contains the Sultan's Palace and the British Residency. It has 65 schools attended by some 4,235 scholars. Kota Bharu is connected by telegraph with the Siamese Administration. A telegraph line connecting Kota Bharu with Pahang has been completed. Kota Bharu is also connected by telephone with Tumpat, the port of Kelantan, Pasir Puteh, Kuala Krai, Pasir Mas, Bachok and Plekbang. Of the smaller towns the principal are Tumpat (population 3,431), Bachok (population 776), on the coast, Pasir Puteh (population 1,308), and Kuala Krai, the headquarters of the southern district of the State. The trunk road from Kota Bharu to Kuala Krai is open for traffic.

Pasir Puteh is connected with Kota Bharu by a road which is practicable in all weathers. The East Coast Railway, connecting Kelantan with Singapore, has been completed. There is also a daily train service between Tumpat and Penang via the Royal Siamese Railway.

The main industries of the State are agricultural. The soil is exceedingly fertile. The chief product is padi, the last harvest of which amounted to 73,948 tons. Coconuts and betelnuts are also extensively grown in the coastal plain. The coconut palms are remarkably free from disease. As elsewhere in the Malay Peninsula, Para rubber has been largely planted in recent years; in addition to several small properties owned by Malays, there are twenty large estates owned by Europeans. The area under rubber is about 92,889 acres, of which rather more than one half comprises Asiatic holdings. Fishing and fish drying provide occupation for a large number of Coast Malays. Cattle breeding is also a large industry, though it is necessary periodically to restrict the export in order to maintain sufficient cattle for agricultural purposes. The women throughout the State are expert weavers, and a large number of sarongs are annually exported to neighbouring States.

Some 3,088 acres are held on mining titles. Though both tin and gold are found in Kelantan, yet very little mining is being done for either metal. Much prospecting for gold is being done in the Ulu Kelantan district, but is not yet sufficiently advanced to enable any forecast to be made as to its ultimate results. No tin-ore was exported in 1932.

The chief exports of Kelantan are copra, rubber, cattle, betelnuts, fish and silk manufactured goods. The chief imports are rice, tobacco, cotton goods, provisions, kerosene oil, gambier, sugar, timber, salt, and machinery.

The climate of the State is equable, and may be described as hot and dry compared with the rest of the Peninsula (except in the monsoon), but both temperature and rainfall vary a little during each half of the year. In the plain the temperature in the shade rarely exceeds 90°F., or goes below 69°F., except in January and February, when 64°F. is not unknown. The nights are cool; the land breezes in the mornings and the sea breezes in the afternoons keep the air pleasant.

In the interior the range of temperature is slightly higher, the days being hotter and the nights cooler. The rainfall averages 121.71 inches a year.

The currency is the Straits Settlements dollar.

Regular steamship communication is maintained between Singapore and Kelantan.

## TRENGGANU.

*His Highness Sulaiman Badaru'l-alam Shah ibni Almarhum Zainu'l-abidin, K.C.M.G., Sultan.*

The State of Trengganu lies on the eastern seaboard of the Malay Peninsula roughly between latitude 4° 0' and 5° 55' North, and longitude 102° 20' and 103° 30' East. The area of the State is estimated to be about 5,050 square miles.

The total population of the State, as estimated in mid 1932 was 180,797, made up as follows:—

Malays .. ..	166,664
Chinese .. ..	12,369
Indians .. ..	1,169
Europeans .. ..	32
Eurasians .. ..	15
Others .. ..	548

There are 146 miles of road open to traffic, including a road of 66 miles length from Kuala Trengganu which connects with the Kelantan road system at the boundary between Trengganu and Kelantan. There are no railways (except light railways on mines) and communication with the interior is mainly by means of rivers and paths. Telegraphic communication was established between the State, the Federated Malay States, and the Straits Settlements in 1922. There are telephone exchanges at Kuala Trengganu, Kemaman and Besut.

The chief town is Kuala Trengganu, situated on both banks of the mouth of the Trengganu river, with a population of 13,972.

Other navigable rivers with considerable settlements at their mouths are the Kemaman Kretir, Dungun, Paka, Marang, Ibai, Setivu, and Besut.

The public revenue and expenditure for the year 1932 were \$986,901 and \$1,095,584 respectively.

The total value of exports from Trengganu in 1932 was \$3,965,825 and of imports \$3,128,765. The principal exports and imports were:—

	<i>Exports.</i>	<i>value.</i>
Tin ore .. ..	.. ..	\$444,016
Para rubber .. ..	.. ..	277,180
Haematite .. ..	.. ..	855,839

Sugar .. ..	.. ..	182,163
Petroleum .. ..	.. ..	140,121
Tinned milk .. ..	.. ..	53,817

The rainfall is heavy and well distributed throughout the year, though excessive during the North-east monsoon from November to February. The annual average is about 100 inches. The temperature ranges between 76° and 95° F., the greatest range recorded in 24 hours being 25°. Soil and climate are suitable for the cultivation of Para rubber, coconuts, coffee, and pepper. During part of the N.E. monsoon season the coast is difficult of access, though seldom quite unapproachable.

British protection dates only from the 14th July, 1909. The suzerainty of Siam, transferred on that date to Great Britain, was merely a nominal overlordship, of which practically the only token was the triennial despatch of the *bunga mas* (golden leaves and flowers) to Bangkok. An agreement between His Majesty's Government and His Highness Sultan Zainu'l-abidin was made on 22nd April, 1910, and a further Agreement was made on 24th May, 1919. Under these Agreements His Majesty's Government guarantees protection of the State from foreign aggression, and the Trengganu Government accepts a British Adviser whose advice must be asked and acted upon in all matters affecting the general administration of the country and the collection and disbursement of all revenues: the cost of this Adviser and his establishment to be determined by the High Commissioner and to be charged on the revenues of the State.

The ruling of Sultans dates from the seventeenth century, as there is unbroken succession from Sultan Zainu'l-abidin through ten intermediary Sultans to the present ruler.

The Public debt at the end of 1932 amounted to \$3,986,495. It consists of loans by the Government of the Straits Settlements for the purpose of resumption of Ruling House Land Concessions, Surveys, road construction and other development works.

## BRUNEI.

*Sultan, His Highness Ahmed Tajudin.*

*Ministers of State, Pengiran Bendahara Seri Maharaja Permaisura Anak Abdulrahman Pengiran Pemanoha Sahibul Raya Almeshuara Haji Mohamed Yasin.*

Brunei is a State lying between North Borneo and Sarawak between 114° and 116° E. long., and touching the sea at Brunei Bay, in which lies the island of Labuan. It is 770 nautical miles distant from Singapore.

The Sultanate of Brunei was formerly a great and powerful State, and in the early years of the 16th century the authority of its Rulers appears to have extended, not only over the Northern part of the Island of Borneo, but over the Sulu Islands and some part of the Philippines. Its wealth and importance at this period are shown by the description given by Pigafetta of the Sultan's Court, and by the fact that the early European navigators extended the name of the Sultanate to the whole of the island, "Borneo" being a corruption of Brunei. The power of the State appears to have begun to decline about the end of the 16th century, and by the middle of the 19th century it had fallen hopelessly into decay. The cession of the District of Sarawak to Sir James Brooke in 1841 was followed by many similar cessions to Sarawak and to the British North Borneo Company, and the State of Brunei has now been reduced to about 2,230 square miles, containing a population (1931 census) of 30,135, and consisting of the town and district of Brunei and some outlying districts, of which the most important are Tutong, Belait and Temburong. Estimated population on 31-12-32 was 30,590.

In 1888, an agreement was concluded with the Sultan under which the control of foreign relations was placed in the hands of H.M.'s Government, whilst internal affairs were left to the Sultan, and a further agreement was made at the end of 1906, under the terms of which a British Resident has been appointed to advise and assist in the administration of the State. Until 1915 the Resident combined these duties with those of Resident of Labuan, while an Assistant Resident was stationed in Brunei. In 1915 a separate Resident was appointed for Brunei and the appointment of Assistant Resident discontinued. At the beginning of 1931, however, the rapid development of the Belait district owing to the discovery of oil in commercial quantities necessitated the appointment of an additional officer of the Malayan Civil Service and the title of Assistant Resident was revived.

The chief town is Brunei, with a population of 10,453.

Besides the old Malay town which is built over the water on the Brunei River there is a new township on the mainland, which has steadily developed since 1910. There are vernacular schools at Brunei and in the out-districts. The climate resembles that of the Federated Malay States. The average annual rainfall at Brunei is a little over 100 inches.

Trade is chiefly in the hands of Chinese, of whom there are about 3,000 in the State. Native industries include fishing, cloth weaving, brass foundries, and the manufacture of silversmith's ware. The principal imports are rice, cloth, tobacco, sugar and petroleum, and the principal exports oil, cutch (mangrove extract), wild and plantation rubber, sago and dried prawns. The trade, to which an impetus was given by the inauguration of the new system of administration, passes through Labuan.

Concessions and monopolies of all kinds were recklessly granted in the past. Many of these have now lapsed and others have been redeemed.

In 1924 the British Malayan Petroleum Company, Limited, commenced prospecting and drilling operations for petroleum in the Belait District. In 1930 it became definitely established that an oil-field of considerable commercial value had been found at Seria, 10 miles North-west of Kuala Belait. The Company is now developing and testing this field for production and the export of oil by pipe-line from Seria to the Refinery at Lutong in Sarawak territory has already begun.

Several companies are engaged in planting Para Rubber.

A cutch factory, established by a London syndicate, is at work at Brunei. The output of cutch in 1932 was 2,833 tons, valued at \$195,465.

There are two native industries of importance, the manufacture of brassware and silverware, and these are more or less restricted to certain families or guilds. Weaving is done by Brunei women, and the natives are excellent fishermen.

The revenue of the State is derived principally from the land and mining rents, from an opium monopoly under Government control, from the collection of Customs duties, and from purchased Cession moneys. About half of the original Cession moneys have now been purchased by the Government.

## Communications.

There is regular communication with Labuan by steam launch and so with Singapore by the Straits Steamship Company, which maintains a weekly service.

A Central Wireless Telegraph Station was opened in 1921 at Brunei with a subsidiary station at Labuan which enables telegraphic communication to be maintained with Labuan and thence by cable with Singapore and Europe. There are other Wireless Stations in the Belait and Temburong Districts.

The currency is the Straits Settlements dollar.

## MALTA.

## Situation and Area.

The Maltese Islands form a group in the Mediterranean Sea, about 58 miles from the nearest point of Sicily, 80 miles from Syracuse, and 142 from Reggio, and about 180 from the nearest point of the mainland of Africa. The length of Malta is about 17 miles, by 9 miles in breadth; its area is 94,870 square miles; that of Gozo, 25,899 square miles, and that of Comino about one square mile. Filfa and Cominotto are mere islets. The whole group is about half the area of the Isle of Man.

## History.

The Maltese Islands were inhabited as early as the beginning of the Mousterian cultural period, about 40,000 B.C., by Neanderthal man, of whom remains were discovered in a cave to the south-east of Malta. Traces of paleolithic civilization are not wanting in the islands, and evidence of a neolithic civilization, in the shape of cave dwellings, stone circles, menhirs and dolmens, is found all over the islands. The Phoenicians probably

took possession of Malta as soon as they made themselves masters of the Mediterranean Sea. Phœnician remains are few, but there are numerous rock-out graves of Phœnician type.

At the beginning of the Punic wars the islands were held by Carthage. In the course of the first Punic war they changed hands more than once, but at its conclusion they were still in the possession of the Carthaginians. In 218 B.C., they passed finally to Rome. Under the Romans Malta appears to have enjoyed great prosperity. Diodorus Siculus speaks of the excellence of its harbours, the wealth of its inhabitants, and its many skillful artificers, and refers to its fertility, and Cicero, in the Verrine orations, speaks of it as abounding in riches and famous for its textile manufactures. Inscriptions show that it enjoyed municipal rights in the time of Hadrian, and an interesting fact in its recorded history is that it was the scene of St. Paul's shipwreck (Acts xviii.). On the final division of the Empire in 395 A.D., Malta fell to the share of the Byzantine Emperor, and for the next four centuries its history is almost a blank. In the 9th century it was three times invaded by the Arabs, who finally conquered it in 870, the Byzantine garrison being massacred in an insurrection of the inhabitants.

In 1090, Count Roger the Norman, with a handful of men, subjected the islands to Sicily. The Sicilian domination lasted for four hundred years, Norman, Angevin, Aragonese and Castilian ruling in turn. During this time, Malta had Sicilian governors and laws, but there is no record of any extensive Sicilian immigration, and the persistence of the old Semitic names in the parish registers, instituted at this period, stands as further evidence that no great ethnographic changes occurred.

The connexion with Sicily was broken in 1530, when the Emperor Charles V gave Malta to the Knights of St. John of Jerusalem, who had been driven from Rhodes by the Turks, and who held Malta until 1798. The loyalty of the Maltese to their new sovereigns, who for the first time were resident in the island, was put to a severe test on several occasions, the most notable being the great siege of 1565, when the Order of St. John, under Grand Master Jean de la Valette, resisted the attacks of the land and sea forces of Solymán the Magnificent. It was after this great feat of arms that the city of Valletta was built, strong enough to defy the Turkish attacks threatened yearly by the Sultan.

Napoleon Bonaparte invested the island on his way to Egypt, having prepared the ground by intrigue and revolutionary propaganda, and, on the 12th July, 1798, Ferdinand de Hompesch, the last Grand Master in Malta, capitulated without any resistance, and the Order was dispersed.

The French installed themselves in the islands, but their interference with Maltese laws and customs brought about a sharp reaction, and the Maltese drove the French troops within the fortified towns and, with the help of the British fleet, held them closely blockaded for two years, after which the French, reduced to extremities, surrendered to the British.

In 1800 the government was placed in the hands of Great Britain. The Treaty of Amiens provided that the islands should be restored to the Knights, but this was prevented by the recommencement of the war, and they were finally annexed to the British Crown by the Treaty of Paris in 1814.

### *Climate.*

The climate of Malta is equable and very healthy in winter. In July the heat at the sea level approaches that experienced in sub-tropical countries. The nights, however, are pleasant and cool, except during the prevalence of the scirocco wind. The mean maximum temperature during the three coldest months (December, January, February) is 65·5° Fahr., and the mean minimum 44·6°; but during the four hottest months (June, July, August, and September) the mean maximum is 89·6° Fahr., and the mean minimum 65·5°. The mean temperature is 64·5°, and the mean annual rainfall is 21·5 inches. There is no river or rivulet in the island, the water drainage becoming absorbed in the porous sandstone beds and finding its way through underground channels and aqueducts.

### *Industry.*

The island is highly cultivated. Besides products for home consumption, early potatoes, onions, cummin seed and oranges are exported. A large number of the inhabitants are employed in connection with the trade of Valletta as a coaling station and an *entrepôt* and port of call. It is a port of registry, having, on 1st April, 1932, 34 vessels, 4,745 gross tonnage.

### *Chief Towns.*

The chief town and capital is Valletta, having, with its suburbs of Floriana, Sliema, and St. Julian's, a population which, in April, 1931, when a census was last taken, was 51,898. The "Three Cities" (Senglea, Cospicua, and Vittoriosa) have a population of 27,149. Città Vecchia, the old capital, is in the interior of the island, and, with its suburbs, had a population of 10,032. The chief town of Gozo is Victoria (formerly called Rabat), with a population of about 5,351.

### *Inhabitants and Language.*

The Maltese language, which is universally spoken, is of Semitic origin, and is akin to Arabic. The educated and commercial classes also speak English, and some Italian. The Maltese are remarkably thrifty, and industrious. They are excellent seamen and mechanics; large numbers of them are to be found in Algeria, Gibraltar, the Regency of Tunis, Egypt, Canada, Australia, and the United States.

### *Currency and Banking.*

The legal tender currency is, under Order in Council of September 24th, 1886, and Ordinance I of 1929, exclusively British. There are two local banks (Banco di Malta and Anglo-Maltese Bank), and branches of Barclays Bank (Dominion, Colonial and Overseas), the Banco di Roma, and the Crédit Foncier d'Algérie et de Tunisie. There is also Scicluna's Bank which is a private bank. The amount of British Treasury currency notes and Bank of England notes in circulation on 31st March, 1933, was roughly estimated at 650,000. The Government savings bank was established in 1833. On 31st March, 1933, the deposits amounted to 1,189,312. with 12,135 depositors.

### *Means of Communication.*

Motor car-bances services run between all the towns and villages. The telephone service is now under Government control with an exchange at No. 3 Strada Fornie, Valletta, and with 896 miles of wires. Malta is a station of the Eastern Telegraph Company, with direct cables

to Alexandria (3), Gibraltar (3), Bone (2), Messina (1), Tripoli (1), Sicily (1), and Zante (1).

Malta is a port of call for nearly all the Mediterranean lines of steamers, and is an important coaling station, facilities being given for coaling at any hour, day and night. There is direct mail communication with several Mediterranean ports and with England. The rates of postage are as follows:—

**Public Works.**

The drainage of the fortified towns, which was commenced in 1876 at the joint charge of the Colonial and Imperial Treasuries, was completed in 1885, and greatly improved their sanitary condition. New drainage works were commenced in 1899, and Cottonera, Sliema, St. Julian's, Misida, Pietà, Calcara, Zabbar, Hamrun, Curmi, Rabat, Targhien, Paula, Luca, Zeitun, Birciara, Balzan and Attard, part of Casal Lia and other places have been drained. The intercepting sewers to C. Axiak, Musta and Zebbug have also been started. The drainage of Gozo has also been commenced and Victoria, Sda. Fontana and Ghainsiem have been drained. Considerable progress has been made in improving the roads and streets in accordance with the exigencies of modern traffic. The main roads are being asphalted. So far 4.7 miles have been surfaced with sheet asphalt and 44.71 miles with full grouting, semi-grouting and surface asphalt dressing.

The water supply has now been extended to all the villages in Malta and Gozo, and works of considerable importance have been carried out to augment and improve it.

Electric current for lighting and power has been extended to all the towns in Malta, and to all the villages, with the exception of a few of the smaller ones situated at a distance from the supply area. This year extensions are being laid to the villages of St. Paul's Bay, Zurriek, Krendi, 'Mkabba and Dingli. In Gozo current is available only in the chief town, Victoria, which has its own generating station.

**Constitution.**

A Council of Government, partly elected, was constituted by Letters Patent in 1849, and reconstituted in 1887, the Letters Patent being amended in 1898 and again in 1903.

By Letters Patent dated April 14th, 1921, responsible government was established in Malta. The Letters Patent were proclaimed by the Governor at Valletta on 30th April, 1921, and became fully effective when, elections for the Senate and Legislative Assembly having been held, the newly constituted Legislature was formally, on 1st November, 1921, declared open in His Majesty's name by H.R.H. the Prince of Wales.

The previously existing Council of Government gave place to a Legislature composed of two Houses—the Senate and Legislative Assembly.

*The Legislature.*—The Senate is to consist of seventeen members, eight of whom form a quorum: ten of the seventeen to be called "Special Members," and represent the Clergy, Nobility, the Graduates, the Chamber of Commerce and the Trade Union Council. The two members of the Clergy to be nominated by the Archbishop of Malta, and the other eight to be elected, in pairs, by the four special classes of electors whom they represent. The remaining seven Senators to be called "General Members," and for their election Malta and Gozo to be divided into two constituencies, one of which (Valletta and its environs) is to return four senators, and the other (the remoter portions of Malta and Gozo), three. The voters for the special classes must be male British subjects over 21 years of age, and must have special qualifications, which are laid down in the Constitution Letters Patent. The voters for the General Members must be male British subjects over 21, able to read and write, and either paying £20 a year in rent or in possession of £20 a year from real property in Malta or other capital. Any person entitled to vote as a special elector may stand for election by his special class. A person qualified to vote for the general senators may be elected to the Senate upon fulfilling certain conditions, of which the most important are that he be an ecclesiastic of the higher orders, or hold a degree of the University, or be worth £100 a year, or pay rent to that amount.

It is provided that the Senate should continue in being for six years after election, unless sooner dissolved by the Governor.

The Legislative Assembly is to consist of 32 members, returned in groups of four by each of the eight electoral districts constituted by the Letters Patent (now repealed) of 3rd June, 1903; Malta being divided into seven districts, whilst Gozo forms one. Any male British subject who is over 21 years of age, and who either can read or write, or is worth £5 a year, or pays £5 a year in rent may vote in a constituency, and any person entitled to vote may be elected for any division. No person on full pay in the Navy, Army, or Air Force maintained by Imperial funds may, unless he has a legal domicile in Malta, be registered or vote.

For both Houses elections are to be held upon the principle of proportional representation.

It is provided that the Legislative Assembly should continue in being for three years after election unless sooner dissolved by the Governor.

A person cannot be a member of both Houses, and a person elected to both Houses must elect in which he will sit.

The Maltese Legislature may not pass laws touching the public safety and defence of the Empire, or the general interest of British subjects outside Malta. In addition to this general reservation certain subjects are, by specific provision, withheld from its legislative competence. The principal subjects so reserved are matters dealing with the defence of the island, and naval, military or aerial matters generally, external trade, immigration, aliens, and coinage. Measures passed affecting a local Government matter (highways, buildings, territorial waters, etc.) which apply to Imperial property must be reserved by the Governor for the Royal Assent, and do not become operative unless that Assent is given within a year.

The Legislature (provided that two-thirds of each House are in favour) may pass a law to repeal any of the provisions of the Constitution, except those relating to reserved matters or relating to Religious Toleration, Language, or the Reserved Civil List.

Elaborate provisions are made for the contingency of a difference of opinion between the two Houses as to a legislative measure. These provide for joint sittings, a dissolution and other arrangements intended to give time for reflection and compromise.

and, ultimately to give effect to the considered opinion of a two-third's majority of the two Houses sitting together.

Power is reserved to His Majesty to disallow any law passed by the Legislature and assented to by the Governor within one year of the giving of that assent, and the Governor may reserve any Bill for the consideration of His Majesty's pleasure thereon.

H.M. in Council or the Governor, subject to H.M.'s approval, may make laws dealing with the "reserved matters" described in the Constitution Letters Patent.

*The Ministry.*—There is provision for seven Ministries in the Government, to which Ministers may be appointed by the Governor in His Majesty's name, and these include the headships of twelve departments—Justice, Treasury, Public Instruction, Public Health, etc. Ministers must sit in one House, and do not vacate their seats on appointment. They may sit and speak, but not vote, in either House.

Responsible government was temporarily suspended in 1930, but, following the report of the Malta Royal Commission 1931 (Cmd. 3993) it was decided to restore it, and a General Election took place in 1932. Responsible government was again suspended on the 2nd November, 1933\*, and the Senate and Legislative Assembly were dissolved from the same date.

There is a Chief Justice and five judges, whose salaries and tenure are secured by amendments inserted in the Constitution since its publication.

The Roman Catholic religion is by law the religion of the country; but full liberty of conscience and freedom of worship are guaranteed, and persons of any faith may hold any office.

*Language.*—English, and Italian as the language of the Maltese Courts, are the official languages of Malta. All administration is carried on in English, but in notices and documents an Italian translation may accompany the English text so far as desirable and convenient. No legislative or administrative act may be done which will diminish or detract from the position of the English language, or tend to restrict its use in education or the public service. The English and Italian languages are recognised as equal languages of culture in Malta at the University and the Secondary Schools as subjects of study.

Italian remains the official language of the Courts, but English-speaking persons and Maltese-speaking persons charged with a criminal offence have the right to apply for the proceedings to be held in English or Maltese.

English and the Maltese language, which is the language of general intercourse among all classes in the Islands, are the languages of instruction and study in the Elementary Schools. Maltese is one of the languages recognised in the Courts.

*Finance.*—The revenue from all sources is paid into a Consolidated Fund, out of which the Public Service is supplied. Under responsible government the Legislature provides for audit and (subject to an obligation to pay the Reserved Civil List) controls expenditure. Money bills must originate in the Lower House and may not be altered by the Senate, but the Senate may return a money bill with their suggestions, which the Lower House must consider. The Senate may, finally, reject a money bill, but may not alter it. The Legislature can only appropriate money out of the Consolidated Fund or alter or impose taxation upon a recommendation of the Governor (advised by his Ministers), and money may only be paid out of the Treasury upon a Governor's Warrant to the Treasurer. The Consolidated Fund has to defray the expenses of the Maltese Imperial Government, and to pay any other sum which the Governor declares to the Lower House

to be necessary either to pay the expenses of the Nominated Council, the Privy Council (*see infra*) or the Joint Committee of the Privy Council, or to meet other expenses entailed in dealing with questions as to reserved matters.

Appointments to Public Offices in Malta (except those of Ministers) are made by the Governor in Council. The Crown reserves power at any time to revoke or amend all or any of the provisions relating to reserved matters, language in debates, religious toleration, language generally, and the Reserved Civil List.

The Reserved Civil List covers the charges for the Maltese Imperial Government (that is for the Governor's salary and establishment, and the salaries and establishments of the Lieutenant-Governor and Legal Adviser), and also the Judges' salaries.

### *Education and Religion.*

Elementary education is carried on principally in Government schools, which are Roman Catholic and free. There are two secondary schools with 249 scholars, 4 central schools and 90 elementary schools and 62 night schools with an average enrolment of 29,799 pupils, and an average attendance of 25,500. There is a public Lyceum with 673 day scholars, and 280 who attend evening classes, and a university (founded in 1769) with an average attendance of about 120 students. At these two latter institutions the fees are comparatively low, ranging from 80s. to 120s. per annum in the Lyceum and not exceeding 60s. exclusive of laboratory and other fees, per annum for all lectures in the University. There are numerous private, elementary and secondary schools. The total number of these schools is about 43, with an approximate attendance of 3,624 pupils. Education is not compulsory, but attendance is obligatory for all pupils on the registers of a Government Elementary School.

The Roman Catholic Religion is by law the religion of the country, but full liberty of conscience and freedom of worship are guaranteed, and persons of any faith may hold any office.

### *Customs Tariff.*

Up to January, 1917, only specific duties were levied, the main headings being Grain, Wine, Beer, Spirits, Cattle, Petroleum, Sugar and Tobacco.

In January, 1917, *ad valorem* duties, varying from 5 per cent. to 20 per cent. were introduced, embracing all commodities not already affected by specific duties, and not included in a list of exempted articles which:—

- (a) Under Food and Drink shows Butter, Cheese, Coffee, Milk (fresh or preserved), Eggs in the shell, Tea and Cocoa, and certain other articles;
- (b) under Raw Materials and Articles mainly unmanufactured shows Coal, Coke, Patent Fuel and Fuel Oil, Sponges, Vegetables and Flower Seeds and certain other articles;
- (c) under Manufactured Articles, includes Agricultural Machines, Books, Cinema Films, Scientific and Surgical Instruments, Machinery and Plant operated by mechanic power imported for industrial purposes, wrapping and printing paper, Laundry Soap, Yarns for lace-making and weaving, Twines for industrial purposes, certain materials used for cap-making, shoemaking, and bag-making, and certain articles used for divine worship;
- (d) under Miscellaneous and Unclassified Articles—includes articles imported by Government Departments—Bran not containing more than 5 per cent. Flour—Bullion and Specie, and Engravings, Drawings and Paintings representing Maltese views and subjects of local interest.

\* See Proclamations of the 2nd Nov., 1933.

The amount of duty collected in 1932-33 from specific duties was 379,584*l.* and from *ad valorem* duties was 107,398*l.*

With a few exceptions, 10 per cent. *ad valorem* is at present the rate of *ad valorem* duty.

The Customs Tariff does not include provisions for Empire Preference.

The value of imports in 1932 from the United Kingdom was 940,554*l.*, from other parts of the British Empire 228,441*l.*, and from foreign countries 2,122,707*l.*, the respective percentages of imports being:—United Kingdom 28.6 per cent., other parts of the British Empire 5.9 per cent. and Foreign Countries 64.5 per cent.

The value of domestic exports in 1932 to the United Kingdom was 20,489*l.*, to other parts of the British Empire 9,662*l.*, to Foreign Countries 144,207*l.*, and as Ships' Stores 7,892*l.*. The respective percentages were to United Kingdom 11.2 per cent., to other parts of the British Empire 5.3 per cent., to Foreign Countries 79.2 per cent., Ships' Stores 4.3 per cent.

The value of re-exports in 1932 to the United Kingdom was 9,979*l.*, to other parts of the British Empire 309*l.*, to Foreign Countries 64,079*l.*, as Ships' Stores 30,005*l.*, and as Bunkers 72,672*l.*

The respective percentages for re-exports were, United Kingdom 5.7 per cent., other parts of the British Empire 0.2 per cent., Foreign Countries 36.2 per cent., Ships' Stores 16.4 per cent. and as Bunkers 41.5 per cent.

All the foregoing figures are exclusive of Bullion and Specie.

The total percentages of trade compared with the whole import and export trade of the Island (Imports, Domestic Exports and Re-exports), for the respective destinations are as follows:—

United Kingdom .. .. .	26.7%
Other parts of the British Empire .. .. .	6.5%
Foreign Countries .. .. .	63.9%
Ships' Stores .. .. .	1.0%
Bunker Coaling .. .. .	1.9%

#### Public Debt.

There is, strictly speaking, no public debt in Malta, but interest at 2½% is paid by the Government on 79,081*l.* outstanding balance on 31st March, 1933, of the debt known as "*Massa Frumentaria*," incurred by the Municipality of Valletta under the Government of the Order of St. John of Jerusalem, in connection with the monopoly of the trade of wheat. The funds of the "*Massa Frumentaria*" were, in 1798, appropriated by the French Government, when in occupation of the Island.

## MAURITIUS.

### *Situation and Area.*

Mauritius is an island in the Indian Ocean, between 57° 18' and 57° 48' E. long., and 19° 50' and 20° 31' S. lat., distant 115 miles from Réunion, 934 miles from Seychelles, 1,300 miles from Natal, 2,000 miles from Cape Comorin, 11,000 miles from England, 2,300 from the Cape of Good Hope, and 500 from Madagascar. It comprises an area of about 720 square miles (nearly equal to Surrey), having an extreme length of 39 miles from north to south, and an extreme breadth of 29 miles from east to west.

The island is chiefly of volcanic formation but is almost entirely surrounded by coral reefs. There are several small chains of mountains but none of great height. The principal peaks are the Piton de la Rivière Noire (2,711 ft.), Pieter Both (2,690 ft.), and the Pouce (2,661 ft.). There are numerous rivers and streams; they flow generally through deep ravines and their course is broken by many small waterfalls and rapids. None of them are navigable beyond a short distance from the sea. The land rises gradually from the coasts, and the centre of the island is composed chiefly of a fertile and picturesque plateau varying in altitude from 1,000 to 1,800 feet. On this high and healthy tableland the temperature and climate are excellent.

### *History.*

The Mascarene Archipelago was probably known to Arab navigators at an early date. A Dutch map copied from Arab sources shows the islands now known as Mauritius, Rodrigues and Réunion under the names of Dinarobin, Dinanora and Margabin, and it is possible that certain islands marked on Idrisi's map (1163) are intended to indicate them also.

There can be little doubt too that the island was visited by the Malays who colonised Madagascar in the 15th-16th century.

But Mauritius history really begins with its discovery by the Portuguese in the beginning of the sixteenth century—probably between 1507 and 1512, but not later than 1527, when the

island is shown on an official map under the name of Santa Appollonia, borne in common with the other islands known later as the Mascarenes (Reunion and Rodrigues) after the great navigator Dom Pedro Mascarenhas.

The Portuguese named the island *Ilha da Cirnos*, or Swan Island, from the big birds resembling swans found on shore. They merely used the island as a port of call, without making any settlement. The first settlers were the Dutch. In 1598 a Dutch fleet landed in the South-Eastern harbour of the island, to which its commander, Admiral Wybrandt Van Warwyk, gave the name of Mauritius, in honour of the Statholder, Prince Maurice of Nassau. For many years no attempt was made at colonisation, but from 1638 downwards petty settlements were established at various points, the seat of government being at the place known as Old Grand Port. The colony did not prosper, and was finally abandoned by the Dutch in 1710.

In 1715 the Island was formally taken possession of by the French, but was not actually occupied till 1721, when a small party of colonists were sent out on behalf of the French East India Company. The island was then named *Isle de France*. This name was retained until the landing of the English in 1810, when the former name of Mauritius was restored. Of all the Governors of the island, the most celebrated was Mahé de Labourdonnais (1735-1746), "a man of eminent talents" (in the words of Lord Macaulay), who encouraged the cultivation of sugar-cane and introduced many other valuable plants. He was the real founder of the prosperity of the *Isle de France*.

In 1767, the French East India Company, having gone into liquidation, handed over the island to the Crown, Jean Daniel Dumas being appointed Governor General for the King, and Pierre Poivre, Intendant. Poivre was a man of great ability; he introduced into the colony cloves and nutmegs secretly obtained from the Dutch Sunda Archipelago. Having purchased the ancient residence of the Company's Governors, at Monplaisir, he converted the grounds into a nursery where many useful plants introduced by him were cultivated. On his departure this property was sold to Government, the garden being entrusted to Poivre's friend, Nicolas Céré, under whose able management it became famous under the name of King's Gardens. It is now the Royal Botanical Gardens, Pamplemousses.

In 1771 an epidemic of small pox caused many deaths among the slave population.

In 1790, at the outbreak of the French Revolution, a Colonial Assembly was elected, which for 13 years governed the island *de facto*.

In 1792 another very able Governor was sent out from France, Comte de Malartic, who during this troubled period managed to gain the affection of the whole community. In 1803, the *Isle de France* was taken charge of by General Decaen, appointed Captain General by Napoleon Bonaparte, then First Consul, with instructions to suspend the Colonial Assembly and the *Isle de France's* constitution for a period of ten years.

During the long war between England and France, the *Isle de France* was a source of great mischief to our merchant vessels, owing to the facility with which sorties were made from its harbour by French men-of-war and privateers; and in 1809 the British Government determined on its capture. The neighbouring islands of Rodrigues and Reunion were taken possession of and several

naval engagements were fought to the credit of both navies. The most famous of these was the battle of the *Isle de la Passe*, fought in the bay of Grand Port on the 23rd and 24th August, 1810, between four English frigates and two French frigates, a corvette and a captured East Indianman. The English lost the day, two of their ships having gone on shoals early in the engagement, but the great gallantry shown by both sides has rendered the fight memorable in the annals of the two navies.

A strong expeditionary force was then sent out from the three presidencies of India and the Cape. Twelve thousand troops under General Abercromby were landed, and the island finally surrendered to Great Britain on December 3rd, 1810, the laws, religion, and customs of the inhabitants being guaranteed in the instrument of capitulation.

The possession of the island was confirmed to England by the Treaty of Paris, 1814.

The first English Governor, Mr. (later Sir) R. T. Farquhar (1810-1823) gained a well-deserved popularity. During his tenure of office, on 25th September, 1816, the fourth part of the town of Port Louis was destroyed by a conflagration. On 28th February, 1818, the island was laid waste by a terrific cyclone, causing immense destruction to property.

In the year 1832, the Council of Government which was established on the 19th August, 1826, was abolished, and a Legislative Council, with half the members official, created. The oaths of office were taken by the new members on the 23rd January, 1832.

On the 1st April, 1835, the emancipation of slaves took place without disorder; but as this new class of free men refused employment as labourers the planters were obliged to resort to this introduction of labour from India which was finally authorised in 1842, under the supervision of an agent residing in India, and which continued, with temporary interruptions, until 1910.

In 1849, the Legislative Council voted the law constituting a municipal corporation for the town of Port Louis.

During the years 1854, 1856, 1861-62, epidemics of cholera prevailed, of which that of 1854 was the most severe, causing 7,650 deaths.

The year 1864 saw the opening of the North Railway Line from Port Louis to Pamplemousses, the Midland Line being inaugurated two years after.

In December, 1866, malaria broke out with great severity. During the year 1867, 31,758 persons died from fever, including 18,308 in Port Louis.

In 1868 and 1874, Mauritius was visited by severe cyclones. During the former two spans of the Grand River Railway Viaduct were brought down by the force of the wind. On the 29th April, 1892, one of the most violent cyclones ever recorded ruined a considerable portion of Port Louis, besides causing infinite havoc to buildings and crops. The death roll amounted to 1,232. In order to assist the planters and other owners of immovable property affected by the calamity, a loan of £500,000 was guaranteed by the Imperial Government.

On the 23rd of July, 1893, part of Port Louis was again destroyed by fire. At the end of the same year ocean telegraphic communication was opened.

In 1902, an outbreak of Surra caused great loss of draught animals, and mechanical means of transport had to be resorted to for the sugar plantations. A number of locomotives and traction engines were introduced, and a loan was

raised to enable the planters to lay down tramways, and take other steps to provide for transport.

In 1909, a Royal Commission visited the Island to enquire into the administration and finances of the Colony.

During the Great War Mauritius suffered in no way by direct action on the part of the enemy. A number of volunteers proceeded to Europe for military service and a "Labour Battalion" was supplied for Mesopotamia.

The enormous rise in the price of sugar brought great prosperity to the Colony, and the gross value of the crop of 1920-1921 is estimated to have been approximately Rs. 250,000,000.

In 1921 investigations of the sanitary and health conditions were made by Dr. Andrew Balfour, C.B., C.M.G., M.D. Many of the works recommended have been carried out.

In 1923 the Indian Government consented to the resumption of immigration of labourers from India consequent on the repeal of the penal clauses of the Labour Law of 1878 affecting labour.

Immigration was accordingly resumed for a period of 12 months ending on 31st May, 1924, but with disappointing results, most of the immigrants having returned to India by the end of the same year.

In March, 1931, a cyclone lasted three days and caused considerable damage to property. In the same year a Financial Commission visited the Island to enquire into the public finances.

#### General Description.

The permanent settled population of European race is greater in Mauritius than in any other tropical colony of its size. Many of the inhabitants are descendants of the ancient French noblesse. The higher and middle classes possess much intellectual culture.

Six daily newspapers and twenty other periodicals are published in the capital. The French language and a creole *patois* are spoken all over the island, English being used in the supreme court of justice. Debates in the Council of Government may take place in either language.

Mauritius is divided into nine districts, Port Louis, Pamplemousses, Rivière du Rempart, Flacq, Grand Port, Savanne, Moka, Plaines Wilhems, and Black River.

The City of Port Louis is the capital, and seat of Government, and contained, with its suburbs, an estimated population of 54,290 on 31st December, 1931. The harbour is one of the best in the East, and is sufficiently spacious to receive a large number of vessels. It possesses three graving docks.

Works for the reconditioning of the Harbour and improvements thereto have been carried out. The Harbour is defended by Fort Adelaide (the citadel) and by Fort George. There are large barracks and military stores. The trade of the island passes almost entirely through Port Louis. The city has an elected municipal corporation, and raised in 1932 a revenue of Rs. 706,130.54, against an expenditure of Rs. 660,634.20. Its debt amounts to 36,330% and 472,500% at 31st Dec., 1932.

The principal public edifices of Port Louis are the Government House, the Institute, the Roman Catholic and Anglican cathedrals, the Civil Hospital, the Town Hall, the theatre, and the public offices. There is a racecourse most beautifully situated in the Champ de Mars.

A sewage scheme, designed by Messrs. James Mansergh & Sons, provides for the disposal of the sewage of the central part of the town.

After Port Louis, the largest town is Curepipe, incorporated in 1890 (population 19,421, census of 1931), situated on the uplands in the Plaines Wilhems district.

In the district of Grand Port is the small town of Mahebourg (population 7,698, census of 1931), so called in honour of Mahé de Labourdonnais.

#### Population.

At the Census of 1931 the population of Mauritius (exclusive of the Dependencies and Military) was found to consist of:—

Persons of European, African, or mixed descent	...	...	...	115,666
Indian population	...	...	...	268,649*
Chinese	...	...	...	8,923
				<hr/> 93,238

The total number of Indians was 68.3 per cent. of the total population.

At the Census of 26th April, 1931, the Civil population numbered 393,238.

The descendants of the immigrants from India—the Indo-Mauritians—now form the largest section of the population; they are steadily increasing in numbers. They are predominant in the domestic, commercial, and still more in the agricultural callings, and the amount of land held by them as small planters is rapidly growing.

#### Constitution.

The constitution of Mauritius was altered in 1884-85 and in 1933. It now consists of a Governor, with an Executive Council of four *ex-officio* and two un-official members, and a Legislative Council of twenty-seven members, eight being *ex-officio*, nine nominated by the Governor, and ten elected—two for the town of Port Louis, and one for each of the eight rural districts. At least two-thirds of the nominated members must be persons not holding any public office. Under the revised Constitution of 1933 the Governor is empowered to override a majority vote of the Council for the enforcement of any measure which he considers necessary in the interest of public order, public faith or other essentials of good government. Members are not paid; they may speak either in French or English. The number of registered electors on 31st December, 1932, was 10,397; the franchise qualification is ownership of immovables of annual value of Rs. 300, or movables worth Rs. 3,000, or payment of rent of Rs. 25 monthly, or of license duty of Rs. 200 annually, or receipt of salary of Rs. 50 monthly. The session usually lasts from April to December.

The law is based on the Code Napoléon, and other French laws modified by Colonial Ordinances.

#### Climate and Rainfall.

From December to April is the hottest season in Mauritius, but it is comparatively cool during the remainder of the year. The mean temperature of Port Louis is 25.1° C., the mean annual rainfall 40 inches and the mean relative humidity 72 per cent. The mean temperature of Curepipe, at about 1,800 feet above sea level, is 19.7° C., the

\* The Indian section comprises those members of the population following the customs and religions of India.

mean annual rainfall 122 inches, and the mean relative humidity 87 percent. The official cyclone season extends from November to the middle of May, but cyclones have occurred in the South Indian Ocean in every month of the year except August.

During cyclones over 30 inches of rain have occasionally been registered in 24 hours.

#### *Water Supply.*

The Town of Port Louis is supplied by the Grand River, N.W. This source is not altogether satisfactory. Two reservoirs have been constructed by the Government to ensure a better supply to the town. The erection of a chlorination plant with filter beds at Grand River, N.W., to purify the water, has been completed. Besides this supply of about 5,000,000 gallons per 24 hours, Port Louis has been provided with a supply of Mare-aux-Vacoas water. 1,000,000 gallons per 24 hours is available for supply.

The *Mare aux Vacoas* works were started by the Government in 1895, and were extended by the addition of a filtering plant. The whole of the district of Plaines Wilhems, a part of Moka, and a part of Black River and Port Louis are now supplied with pure water from these works.

The water supply of other districts is under the control of Local Boards and with the co-operation of the Government, works have been undertaken to distribute water from upland springs to the villages in the country districts; these works are now completed.

#### *Irrigation.*

Important schemes have been in progress in recent years. A reservoir, with an area of 562 acres and a capacity of 416 million cubic feet has been constructed at "La Ferme," in the District of Black River, and about 4,000 acres of land are now under irrigation.

Another reservoir of an extent of 273 acres and a capacity of 204 million cubic feet has also been constructed at Nicoliere in the District of Pamplemousses and has been connected to high rainfall region by a canal 17 miles long.

#### *Railways.*

There are seven lines of railway, all owned and worked by Government, viz.: (1) The North line, from Port Louis to the sea coast village of Grand River South-east. Its length is 33½ miles, and its course is approximately parallel to the northern coast line of the island. (2) The Montagne Longue branch from Terre Rouge station on the North Line to the village of Montagne Longue; its length is 3½ miles. (3) The Midland line, beginning at Port Louis and running across the island to the sea coast town of Mahebourg on the other side; its length is 35½ miles, with a summit level of 1,822 feet at Curepipe; the gradient in many places is 1 in 26. Four miles of this line have been doubled and opened for traffic. (4) The Moka-Flacq line from the Rose Hill station on the Midland line to Montagne Blanche, length 14½ miles. (5) Savanne branch from Rosebelle station on the Midland line to the sea coast town of Souillac at the southern extremity of the island; its length is 11 miles. (6) Black River branch, from Richelieu on the Midland line to Tamarin, distance 12½ miles. (7) Rivière du Poste to Mexico and Richebois, length 14½ miles. All the above are of standard gauge, 4' 8½", except the 7th which is 75 centimetres (2' 6"). The total

number of miles of railway now open is 110½ of standard gauge and 14½ of 2' 6" gauge, the total cost up to date being about 2,090,762*l*. The receipts in 1932-33 were Rs. 1,776,356 and Working Expenditure Rs. 1,770,279.

#### *Religion.*

The Christian Churches are assisted by State grants. According to the census of 1931, the Roman Catholics numbered 126,153, and the Protestants about 4,466, including Dependencies and Military. The Roman Catholics receive an annual grant from Government amounting to Rs. 149,216, the Protestants Rs. 49,133, and the Church of Scotland Rs. 9,958.

#### *Education.*

The system of education had been remodelled by Ordinance No. 33 of 1899, which repealed all former enactments. This Ordinance was amended in some important respects by Ordinance No. 35 of 1913.

Under the Education Ordinance of 1899, a Department of Public Instruction was created under a "Director of Public Instruction."

This system remained in force until it was superseded by the Education Consolidation Ordinance of 1919, under which the Department of Public Instruction was replaced by a Royal College Department and a Schools Department, the post of Director of Public Instruction being abolished. The Rector is the Head of the Royal College Department; and the Superintendent of Schools of the Schools' Department.

The Royal College, which has now a branch in Port Louis called "The Royal College School, Port Louis," provides for the Secondary Education of Boys. A Committee styled the "Royal College Committee," is annually appointed by the Governor to advise in the framing of Regulations and to act as a consultative body. It consists of the Rector as Chairman, and of six members chosen by the Governor. Twenty Scholarships and Exhibitions tenable at the Royal College are competed for annually by Primary School pupils; fourteen Scholarships and Exhibitions are open each year to College pupils, and there are awarded annually two Scholarships tenable at a British University, of a total value of about £1,300.

The Schools' Department provides for Primary, Secondary, and Technical and Industrial Education:—

- (1) Primary Education is carried on through a system of Government Schools and of Grant-in-aid Denominational Schools, the latter under the immediate control of local managers.
- (2) Secondary Education is provided by means of a system of Grant-in-aid schools for boys and girls.
- (3) As regards Technical and Industrial Education, provision is made for the training of students in Engineering (Mechanical and Civil). A consultative committee styled the "Schools Committee," similar to that of the Royal College, is annually appointed by the Governor. It consists of 10 members: five members are nominated by the Primary and Secondary Grant-in-aid Schools and four are chosen by the Governor, with the Superintendent of Schools as Chairman.
- (4) A sum of Rs. 500,000 has been set aside from the Colony's Surplus Balances as a "Scholar-

ship Fund." The interest on this amount is devoted annually to provide further facilities, in the shape of scholarships and educational grants, for young Mauritians in the Government service and on leaving school to pursue their studies and obtain higher technical qualifications.

#### Higher Education.

On the books of the Royal College and its Branch on the 31st December, 1932, there were 374 pupils.

#### Primary Education.

There were in 1932—

	Number.	Pupils.
Government schools . . . . .	50	13,577
Grant schools. . . . .	77	22,859

Total . . . . . 127 36,436

The total expenditure on education in 1931-32 amounted to Rs. 1,332,810. There are about 1,000 masters, mistresses, assistants, and monitors and monitresses employed in Government and Grant Schools. Of the pupils in the aided schools 48.0 per cent. are Roman Catholics, 1.5 per cent. belong to the Church of England, and 1.0 per cent. to other Christian denominations. Five Hindoo and three Moslem schools are also assisted.

#### Agricultural Education.

To facilitate higher agricultural education, a small Agricultural College has been established. Lectures on Agricultural Science are occasionally made to Primary School Teachers by the Department of Agriculture.

#### Communications.

Postal communication with Europe is chiefly maintained *via* Suez, by the Indian Ocean Line of the Messageries Maritimes, which provides a regular fortnightly service.

Mails are otherwise sent or received through South Africa. The only regular service by this route is being provided by the Koninklijke Paketvaart Maatschappij (K.P.M.) Java-Mauritius-Africa Line. Other opportunities through South Africa are irregular, though not infrequent and are provided by tramp steamers and occasionally by a Union Castle, or Clan Line vessel.

Air mails for Europe are sent by steamer to Mombasa, for inclusion at Nairobi in the Kenya air mail, and also to Durban for inclusion at Johannesburg in the S.A. air mail.

With India and Ceylon communication is also maintained regularly by the Messageries Maritimes Packets, *via* Mombasa or Aden. This is also the usual route for Australia with transit at Colombo.

The British India Steam Navigation Company also runs an occasional steamer between Colombo and Mauritius and *vice versa*.

With the neighbouring islands Réunion and Madagascar communication is frequent by trading vessels, apart from the regular M.M. Packets.

Wireless communication is maintained with ships at sea within a range of 2,800 miles and with the Réunion land station.

Cable communication with every part of the world is provided by the local station of the Eastern and South African Telegraph Company.

Government land telegraphs and telephones (including Railway Block Telegraph and Railway Traffic Control Telephone) extend to 645 miles of telegraph and 386 miles of telephones.

Private telephone communication is provided by the Oriental Telephone Company in the capital, Port Louis, and the two most important rural districts, Plaines Wilhems and Moka.

There are in Mauritius the General Post Office in the city of Port Louis, and 59 branch post offices in the rural districts, 59 money order offices, 49 telegraph and 10 telephone offices. In the island of Rodrigues there is one post office at Port Mathurin and also a station of the Eastern and South African Telegraph Co. There is no post office in any other of the Dependencies.

The rates of postage are:—

Inland and Dependencies . . . Letters per 20 grs., 5 cents; every additional 20 grs. or fraction thereof, 5 cents.

United Kingdom, and British Possessions, &c. . . . . Letters per 20 grs., 15 cents; every additional 20 grs. or fraction thereof, 6 cents.

Other countries . . . Letters per 20 grs., 20 cents; every additional 20 grs. or fraction thereof, 10 cents.

#### Commerce.

The island produces barely one-tenth of the food required for its inhabitants and almost all agricultural enterprise is devoted to the production of exports.

The chief exports are sugar, copra, aloë-fibre, raw hides, &c. Food-stuffs are principally imported from India; manufactured articles from England, oxen from Madagascar.

The imports consist mainly of grain (rice, wheat flour, &c.), cotton manufactures, motor spirits and coal, iron and steel goods and fertilizers. Considerable progress has been made in the tobacco industry; factories have been opened in Port-Louis and efforts are being made to establish an export trade. Other new industries include a textile industry for providing bags for sugar, fruit canning, and the manufacture of matches. About 95 % of the value of the exports consists of shipments of sugar. In 1932, the weight of sugar exported was 197,885 metric tons with an estimated value of Rs. 26,385,522. The value of copra exported was Rs. 287,516; aloë-fibre, Rs. 80,572; fruits, preserved, Rs. 50,884.

The Customs Tariff is mainly on a specific basis, but important classes of goods pay *ad valorem* duties. It includes provisions for preference on numerous items of Imports from the British Empire.

The trade percentages were as follows :—

	1931.	1932.
United Kingdom .. ..	47'6	61'0
Other parts of British Empire	34'3	23'4
Foreign Countries .. ..	18'1	15'6
	100'0	100'0

The number of vessels registered at Port-Louis is now 16 of a total tonnage of 2,688.

#### Currency and Banking.

The Mauritius Commercial Bank has establishments in the Colony, the total amount of deposits on 31st Dec., 1932, being Rs. 7,862,613'76, with paid up capital of Rs. 2,000,000.

The Bank of Mauritius (Limited) was established in October, 1894, with paid up capital of 125,550*l.*, and opened in Mauritius in Dec., 1894. The business of that bank was taken over by the Mercantile Bank of India Limited on the 3rd May, 1916. Total deposits on 31st Dec., 1932, Rs. 2,631,689'03. The total paid up capital is now 1,050,000*l.*

The National Bank of South Africa, now Barclays Bank (Dominion, Colonial and Overseas), has opened branches in the Island since 1919. The paid up capital being 4,975,500*l.*, and the total amount of deposits on 31st December, 1932, Rs. 2,628,295'21.

A Government savings bank was established in 1837. The total deposits during the year ended 30th June, 1932, amounted to Rs. 1,346,128. The sum standing to the credit of depositors at the end of June, 1932, was Rs. 5,114,748.

All accounts are kept in rupees and cents of a rupee, which is the currency of the island. A Government note issue was re-established in 1876, the notes being legal tender except at the office of issue. The average circulation for the year 1931-32 was Rs. 7,287,300.

*Weights and Measures.*—The Metric System, as regards weights and measures, came into force on the 1st May, 1878.

#### DEPENDENCIES.

The dependencies of Mauritius comprise a large number of islands scattered over the Indian Ocean.

*Rodrigues*, the most important, is situated in latitude S. 19° 44' and longitude E. 63° 34', and is 344 nautical miles from Mauritius. The island which has an area of 42 sq. miles, about 26,000 acres, is 18 miles long by 7 miles broad, and is surrounded by coral reefs, extending in some places 5 or 6 miles from the shore. It is under the administration of a magistrate, who takes his instructions from the Governor of Mauritius. Laws for the island are made in the form of regulations framed by the Governor of Mauritius in Executive Council. The estimated population at 31st December, 1932, was 8,691. The birth rate in 1932 was 42'6 and the death rate 13'8 per 1,000. Cable communication, through a branch of the Eastern and South African Telegraph Company, was opened on 16th May, 1902.

The island, which is volcanic, mountainous, and in some parts well wooded, is beautiful and picturesque in the extreme. The highest land is 1,760 feet above the level of the sea, and may be seen in clear weather at a distance of 10 or 12 leagues. The temperature differs little from that of Mauritius, although the breezes are stronger and hurricanes more frequent and severe. The

climate is healthy. The principal industries are fishing and the rearing of cattle and goats, for which latter the pasturage is excellent. The soil is good : cotton, coffee, tobacco, maize, beans, and vanilla grow luxuriantly ; a trained officer has of late (1921) been appointed Agricultural Superintendent in view of the agricultural development of Rodrigues. The wild guinea fowl and partridges, likewise the deer and wild pigs, which used to be plentiful, have almost disappeared.

The value of the imports in 1932 was Rs. 237,433. The exports of the island produce in 1932 were valued at Rs. 324,867. The people are all peasant proprietors and there is abundance of food.

The principal exports are beans, maize, salt-fish, cattle, goats, pigs, poultry, tobacco-leaf and acacia seeds.

Communication with Rodrigues is maintained by a chartered steamer and occasional sailing vessels.

*Diego Garcia* (population, 456, census 1931), the most important of the Oil Islands group, consists of four islands, at four days' steaming from Mauritius, the chief one being about 30 miles in length, extending in an irregular horse-shoe shape, and embracing between its extremities three minor islets. It is a coral atoll, fifteen miles by six and a half, nowhere over ten feet high, but forming a spacious bay, roomy enough for large vessels to enter, being fifteen miles in length from end to end, and from two to five miles in breadth.

Diego Garcia is situated at 7° 20' latitude S. and 72° 26' longitude E., on the straight line between the entrance to the Red Sea and Cape Leeuwin. In 1885 it was placed under the jurisdiction of a magistrate, with a small force of police from Mauritius, which was, however, withdrawn in 1888.

The population of the smaller Dependencies, according to the 1931 census, was 1,457.

## NIGERIA.

## Situation, Area and Population.

The British Colony and Protectorate of Nigeria is situated on the north-eastern shore of that deep indentation in the western coast of the African continent known as the Gulf of Guinea, and is enclosed roughly by parallels of latitude 4° and 14° N. and by meridians of longitude 3° and 14° E.

It is bounded on the north and north-west by the military territories of the French Sudan, on the east and south-east by the Cameroons, on the south and south-west by the waters of the Gulf of Guinea, and on the west by the French colony of Dahomey. Its greatest length from east to west is 700 miles and greatest breadth from north to south 650 miles.

Great Britain has received a mandate over a small portion (amounting to 31,150 square miles) of the former German territory of the Cameroons, which portion has been placed, for purposes of administration, under the Nigerian Government.

The area of Nigeria, including the area of Cameroons under British Mandate, is approximately 373,078 square miles (Southern Provinces and Colony 91,139 square miles, Northern Provinces 281,939 square miles). The country is therefore a little less in area than the United Kingdom, France and Belgium together, or about one-third that of British India. The population of Nigeria, excluding the Mandated Territory, on 1st April, 1931, was estimated at 19,130,859, and of the Mandated Territory at 797,312.

*Physiography.*

Topographically speaking, Nigeria consists of the following four main zones or areas:—

(1) An area of swamp and mangrove forest with almost impenetrable undergrowth, running parallel to the coast-line and varying in depth from 20 to 60 miles. This area, which includes the deltaic region of the River Niger, is covered by a network of creeks and traversed by numerous rivers, the most important of which are the Rivers Benue, Forcados (branch of the River Niger), Nun (branch of the River Niger), Sombreiro, Bonny, Imo, Kwa-Ibo, and Cross.

(2) A belt of dense forest with thick undergrowth extending from the western to the eastern boundary and from 50 to 100 miles in width. The southern border of this area is some 20 miles from the coast-line in the west and thence follows the northern limit of the swamp and mangrove area. Its northern edge is difficult to determine exactly, as the belt gradually changes to patches of forest alternating with thick scrub and grass plains running approximately along a line drawn in a general east-south-easterly direction from about 7° 30' N. on the western border to 6° N. on the extreme east. The country is generally undulating with scattered hills, and an extensive view can seldom be obtained; there are, however, hills rising to over 3,000 feet, and the region becomes mountainous as the Cameroons frontier is approached. The zone is well watered by numerous rivers, which with few exceptions run from north to south, and contains extremely rich oil-palm areas. There are no open spaces, except around villages and clearings for farms.

(3) A zone of comparatively open country gradually developing into park-like land and thence into open expanses covered with high grass as the watershed of the River Benue and that of the Niger (above its confluence with the Benue) are neared. The zone is generally hilly and mountainous on the Cameroons frontier, where heights above 6,000 feet are to be found.

(4) A plateau occupying the greater portion of Nigeria north of the Rivers Niger and Benue. East of longitude 7° the southern limits of this plateau are determined by a zone of hills which succeeds the undulating grass country to the south. The features of the plateau are generally similar, and although many rivers take their rise in this tableland, it is broken to no great extent by their valleys, except in the cases of those of the Rivers Niger and Benue on the south and west. In elevation it does not exceed an altitude of much over 2,000 feet, except in the mountainous parts of Bauchi, where heights of 6,000 feet and more occur, and in the south-west of Yola, which is occupied by a part of the Cameroons mountain system. The surface is generally undulating, marked here and there by hills of granite and sandstone, which rise abruptly from the surrounding land. The country is clothed to a large extent with thin forests which become more and more scanty as the Western Sudan is entered and the arid "steppes" of the Sahara Desert are approached.

*Climate.*

West Africa formerly had the reputation of being so unhealthy that almost certain death would be the fate of the white man who endeavoured to make it his permanent home. And in this general condemnation Nigeria has been included. Though it cannot be claimed, even at the present day, that the country is a healthy

one for the European except to a moderate extent on the plateau, the conditions of living have been so greatly improved during recent years that the possibilities of good health during temporary residence have been enormously increased. Medical and sanitary efforts have effected much by anti-malaria precautions, such as the use of quinine, and, around Lagos, the reclamation of considerable areas of swamp lands at great expense to Government. In spite, however, of this undoubted improvement in the conditions of life, Nigeria is not a land which can be colonised in the proper sense of the term by Europeans.

The "dry season," characterised by the "Harmattan," a dry north-easterly wind accompanied by a thick haze composed chiefly of dust, and the "rainy season" are the predominating features in the climate of Nigeria. The former begins in the north in October, extending its influence gradually southward until it is perceptible at Lagos early in November. There it appears intermittently up to the beginning of March, but in the north the dust and haze are more continuous and last until April. During this period the maximum diurnal variations of temperature occur. The wind blows generally from the north-east, and both diurnal variation and humidity vary with the severity of the Harmattan. Even in Lagos, where hourly observations are taken, during December and January the humidity has been known to fall to 28 per cent. This season is ushered in and out by short periods of tornados and the rainy season fills the remainder of the year. A prevailing south-west wind supplies on the coast a copious precipitation which decreases rapidly as it travels inland. At Bonny, on the coast, the rainfall recorded in 1923 was 150·99 inches, rain falling on 151 days; at Kaduna, in the middle of the country, 43·55 inches, rain falling on 112 days; while the lowest recorded was 25·05 inches at Sokoto, rain falling on 44 days.

*History.*

As far back as the 17th century British traders have had mercantile depôts on the mouths of the Niger and adjacent rivers and creeks, known as the Oil rivers, and in those early times the trade was mainly confined to the traffic in slaves. At this epoch the French attempted a settlement at the mouth of the Niger, but were unsuccessful, and during the 18th century British interests preponderated.

At the beginning of the 19th century the exploration of the upper river, which had hitherto been supposed to be identical with the Nile or Congo, began, and Mungo Park traced its course from Bamako to Bussa, where he lost his life in the rapids. Lander in 1830 demonstrated the identity of Mungo Park's river at Bussa with the lower Niger, and followed its course to the sea.

In the next two decades, 1840-60, efforts were made, both by the British Government and private individuals, including French and German merchants, to develop the trade of the Niger, while our knowledge of the interior was greatly enlarged by the travels of Clapperton and Allen, both British, and of Barth and others, all at British instigation. A consulate was founded at Lokoja, and, at the cost of much money and many lives, some progress seemed to have been made, only to result in failure. The pioneer of these efforts was McGregor Laird, who in 1852 began to establish stations and to endeavour to secure the country for England, but the stations were destroyed by natives, or removed after Laird's

death in 1861. The good results of his work were not, however, entirely lost.

The situation in the early seventies was that there were numerous trading firms—English, French, and German—on the Oil rivers, where the export trade in palm oil had begun to assume importance, the imports being chiefly confined to spirits, guns and powder. The expeditions sent by the British Government to the higher river, and the subsidies voted by Parliament, had been withdrawn, and European intercourse with the Niger would have ceased had it not been for the perseverance of a few British firms, who during the four months of high water each sent a trading steamer up the river, and soon established a few primitive stations, where the white population of Nigeria lived. These bold pioneers were at the mercy of powerful chiefs, and gross outrages were from time to time avenged by the despatch of a light draught gunboat.

At the close of 1877, Mr. Goldie-Taubman—afterwards Sir G. Taubman Goldie—visited the Niger and recognised that amalgamation of interests and a settled government must replace the chaotic rivalry of traders. With this object in view he determined to secure a charter for a British Company. After much negotiation the small British interests, which were the only ones existent on the Niger at that date, were amalgamated in the United African Company in 1879, and in 1881 a charter was applied for. The objection was raised that the capital of the Company was too small, and hence the National African Company was formed with a capital of a million sterling, with the object of opening up direct relations with the great chiefs of the interior.

With great energy the new company founded stations, sent out a river flotilla, and pushed up the Niger and Benue, but meanwhile the foresight of Gambetta had prompted the establishment of two French Companies, which, being backed by the French Government, acquired a great influence on the lower Niger. Of these the *Compagnie du Senegal* had a capital of 600,000*l.*, and some thirty French stations were formed, and while the French flag remained the charter could not, of course, be granted. The energy of Sir George Goldie, however, secured the disappearance of the French flag just in time to announce at the Berlin Conference in 1885 that the British flag alone flew on the Niger, and to secure to Great Britain the guardianship of the international navigation rights on the Niger while the French companies and rival British interests which had meantime grown up were absorbed in the National African Company.

In April, 1885, a new danger arose from the mission of Herr Flegel to secure treaties with Sokoto and Gando on behalf of Germany, but he was anticipated by the British Company, who concluded treaties with those powerful emirs. Great Britain was, therefore, able to conclude the Agreement of 1886 with Germany, which settled the frontiers between Nigeria and the Cameroons as far north as Yola, and in July, 1886, the long-delayed charter was granted, and the Company changed its title to that of the Royal Niger Company. Meanwhile, the territories adjacent to the river had been placed under British protection.

The first decade was spent in founding a number of commercial and quasi-administrative stations on the Niger and Benue Rivers, and in making treaties with the native tribes, and consolidating the commercial organisation on which the Company was dependent for its revenue. The expedi-

tions of Montell to Lake Chad from the west, of Crampel from the south-east, and of Mizon by way of the Niger and Benue, were checkmated, and finally, in 1890, an agreement was arrived at with France by which the line dividing the French Sudan on the north from Nigeria was drawn with certain deflections from Say, on the Niger, to Barua, on Lake Chad, and in 1893 the Cameroons boundary was extended from Yola to the south of the same lake.

In 1897 the growing hostility of the great Fulah Power culminated in a plan to drive the white men out of the country. The Company were not unprepared, and they took the field with some 500 or 600 soldiers, led by about 30 British officers, against many thousands of the enemy, of whom a large proportion were mounted. Nupe, a dependency of Sokoto, which had thus challenged the Company's existence, was divided by the Niger into two nearly equal portions. The southern portion was first conquered, and then northern Nupe after a two days' fight before the capital at Bida. Ilorin, a smaller dependency, was next subdued. Prior to this southern Nupe had been partially cleared of the Fulah slave raiders, and on the 20th June, 1897, the legal status of slavery in the Niger Territories was declared abolished by the Company.

Simultaneously with this crisis another, which was to have far-reaching effects, arose. The only indeterminate frontier remaining was that to the west. The Company perceiving, in 1894, that French enterprise contemplated the annexation to Senegal and Dahomey of the Borgu country, sent out Captain Lugard (now Lord Lugard) to negotiate treaties with the king or chiefs of that country. Anticipating the powerful French expeditions by only a few days, he succeeded in making treaties at the capital of Nikki, and with other semi-independent chiefs of districts. Disregarding these prior British treaties, a swarm of French expeditions spread over Borgu, and having obtained a pledge from our Government that Sir George Goldie's powerful expedition, then in the field against the Fulani, should not advance north of latitude 9°, they invaded Bussa, with which we had a specific treaty of many years' standing, and established themselves on the Niger at several points.

At the end of 1897, in view of this situation, the British Government decided to raise an Imperial local force, and the task was confided to Colonel Lugard, who left England in March, 1898. After a period of great tension, during which the British and French troops faced each other, and a conflict was daily imminent, a convention was signed laying down a boundary line from the intersection of the 9th parallel with the frontier of Dahomey to Illo on the Niger, and thence to the northern frontier, which was more accurately defined, to Lake Chad, and to its junction with the Cameroons frontier. Meanwhile, the Emir installed at Bida by the Company was ousted, and the Nupes were again in arms, while the army of Rabeh, which had penetrated from the Nile Valley to Lake Chad, conquered and laid waste the territory of Bornu, but eventually returned to the south of Lake Chad.

The Imperial force, called the West African Frontier Force, with a "Commissioner and Commandant" at its head, and independent of the Company, was rapidly being formed, with its headquarters at Jebba, and with numerous detachments holding the posts evacuated by the

French throughout Borgu, and a strong garrison at Lokoja.

The Imperial Government having decided that the charter of the Royal Niger Company should be revoked, and that its administrative rights and powers should be transferred to the Crown, steps to this end were taken at the end of 1898, when the convention with the French Government had been signed. The actual transfer of the Company's rights and possessions to the Crown took place on the 1st of January, 1900, when the territories north of a line extending, with deflections, from approximately latitude 9° on the Dahomey frontier to Idah on the River Niger, thence to Takum on the Cameroons border, were formed into the Protectorate of Northern Nigeria under Colonel Lugard as High Commissioner.

During the first years of the protectorate of Northern Nigeria, the Government was engaged in bringing under control the powerful Emirates of the Hausa States and the Kanuri Kingdom of Bornu. These Emirs, who maintained large standing armies, a large proportion of which was mounted, annually took the field and devastated vast tracts of country in slave-raiding expeditions. Despite the treaty with Sokoto, under which the Royal Niger Company paid him an annual subsidy, the Fulani Emirates now defied the Government. The Emirs of Nupe and Kontagora were brought under control in 1901; Yola, Bauchi and Bornu in 1902; and the work of pacification was practically completed in 1903 with the taking of Kano and Sokoto, and the action at Birmi. Since that date the Hausa States have maintained a record of peaceful progress, with the exception of a rising by a so-called "Mahdi" in 1906 at Satiru in the Sokoto Province, which was, however, quickly suppressed with the loyal assistance of the Emir of Sokoto. The minor Emirate of Hadejia in the extreme north, which had not previously been brought under control, assumed an aggressive attitude in 1906 which, however, was suppressed. It was necessary also to send minor expeditions against various unruly and truculent pagan tribes, of which the more important were the Munahis on both banks of the Benue, the Okpotos in the Bassa Province, and various hill-tribes in the Bauchi and Nassarawa Provinces.

In addition to the pacification of these vast areas—hitherto largely unexplored—the early years of the Protectorate were devoted to creating a Civil Government in all its departments, and to the housing of the civil and military officials, and the erection of public offices; the building of the first light railway from Barijuko (on the navigable Kaduna) to Zungeru (22 miles), to which place the seat of Government was transferred in 1902 from the temporary capital at Jebba; and the opening up of communications both by land and by the navigable waterways of the Niger, Benue, Kaduna and Gongola Rivers. In 1907 the construction of the main trunk line from the navigable Niger at Baro to Kano (356 miles), the great market of the Hausa States, was commenced and completed, as a pioneer line, in 1912. During the 14 years from the inception of the Government of Northern Nigeria on 1st January, 1900, to its amalgamation with Southern Nigeria on 1st January, 1914, there were constructed in the Protectorate 700 miles of railways and 5,500 wire miles of telegraphs, while the Marine Department worked 1,000 miles of river.

In the political and administrative sphere a complete Civil Service was created, which in-

creased from half a dozen officers in 1900 to an establishment of 132 residents and assistants in 1913. The guiding principle of the Administration was indirect rule through the native chiefs, the powers delegated to whom varied with their degree of enlightenment. A form of direct taxation was evolved, based on the elaborate system which obtained in the Hausa States prior to the British occupation, but shorn of its abuses. The collection of these taxes was made through the chiefs, a fixed proportion of them being retained in "Native Treasuries," from which the salaries of the native officials were paid.

As an indication of the progress achieved, the Durbar held at Kano on 1st January, 1913, may be instanced, when practically all the chiefs of the Protectorate—from the great Mohammedan Emirs to the petty chiefs of pagan hill tribes— assembled with such retinues as they were allowed to bring, estimated at 20,000 horsemen and 40,000 foot.

**THE OIL RIVERS PROTECTORATE.**—When, in 1885, the British Government at the conference of the European Powers, held at Berlin, was able to obtain acknowledgment of the fact that a British protectorate had been virtually established over the Niger districts, an Order-in-Council defining them was made, and the portion lying on the coast line was designated the Oil Rivers Protectorate, and placed under Consular rule.

In 1891 the rule of the Consul over the Oil Rivers Protectorate was exchanged for that of a Commissioner and Consul-General, stationed at Old Calabar (now Calabar), while Deputy Commissioners and Vice-Consuls were appointed to the Rivers Benin, Bonny, Brass and Forcados, and to the districts of Sapele and Warri.

By an Order-in-Council of 1893 the Oil Rivers Protectorate was extended definitely into the hinterland under the name of the Niger Coast Protectorate, and an administration established under an Imperial Commissioner and Consul-General.

**BENIN.**—In 1892 Captain Gallwey (now Sir H. L. Galway) concluded a treaty with the king of Benin. As time passed, however, it became evident that this potentate had no intention of adhering to its provisions.

At this period Benin held enormous power over the surrounding territory, and it was said that her influence extended even so far as Sierra Leone on one side and the Congo River on the other. The terrible nature of the fetish rites and the wholesale human sacrifices which took place in Benin City, urgently demanded European intervention and the introduction of civilised rule.

Early in 1897 a peaceful mission, organised by the Acting Consul-General to establish friendly relations with Overami, the king of Benin, and to induce him to carry out the terms of the treaty of 1892, was treacherously attacked, and with the exception of two, all the European members of the party were massacred. A powerful expedition was sent against Benin, and in a short time the capital had been captured, but the king made good his escape. The state in which Benin City was found passes all description. In every direction human remains, pits filled with bodies in various stages of decomposition, and altars dripping with fresh human blood were to be seen.

Overami eventually surrendered and was sent into exile at Calabar, where he died in the early part of 1914. In 1899 there was a second expedition into the Benin country, which resulted in

the capture and execution of Ologboahere, the leader of the attack on the mission.

**THE PROTECTORATE OF SOUTHERN NIGERIA, 1900-1906.**—When in 1900 the charter of the Royal Niger Company was revoked by the Crown that portion of its territories lying between Idah and the coast was added to the Niger Coast Protectorate. At the same time by an Order-in-Council the Niger Coast Protectorate was constituted the Protectorate of Southern Nigeria, the administration being transferred from the Foreign Office to the Colonial Office, and placed under Sir R. Moor as High Commissioner. In 1901 the Niger Coast Protectorate troops were organised into a regiment of the West African Frontier Force, and remodelled on the lines of the original corps of that name raised in the Niger Company's territories by Colonel F. D. Lugard in 1898.

Towards the close of 1901 preparations for the Aro Expedition were commenced. These operations were directed against the southern Ibo people in general and the Aro, or Inokun tribe in particular. The Aros, who may be described as the dominant section of the great Ibo family, held paramount power over a large extent of country lying between the Niger and Cross Rivers. They had established a powerful fetish, probably derived from Benin, known as the Long Juju which exercised an extremely evil influence on the ignorant and superstitious natives for miles around. After five months of arduous work, the Field Force accomplished the subjugation and disarmament of the Aro tribe, the destruction of the Long Juju and the bringing under Government control of that portion of the territories as far north as about the 5th parallel.

Between 1905 and 1909 several expeditions were sent into the hinterland with the object of opening to trade and civilisation previously unexplored tracts of country. The principal operations were the Bende-Onitsha Hinterland Expedition, 1905-06, and the Niger-Cross River Expedition, 1908-09. As the troops progressed through the country new administrative districts and stations were formed, broad roads constructed in all directions, and many new markets established.

The eastern frontier from the Cross River rapids to the sea was surveyed by an Anglo-German Commission in 1905-06; and from Cross River rapids to Yola in 1907-09. For some years before these delimitations, there were frequent raids across the border by German native soldiery from the Cameroons, which were invariably accompanied by robbery with violence and seizure; and even after the boundary line had been demarcated this violation of British territory did not cease.

**LAGOS OR EKO.**—During the reign of Kosoko, Lagos, or Eko as it is known to the natives, became the chief centre of the slave trade in the Bight of Benin. Akitoye, his cousin, from whom the throne had been usurped, issued a proclamation to the effect that he would make common cause with the British against slavery if he were reinstated. Acting on this statement, the British Government took decisive measures, and in 1851 a party of bluejackets from Her Majesty's warships attacked and reduced the town. Kosoko fled and Akitoye was restored to power. In 1852 Akitoye and his chiefs signed a treaty by the terms of which they agreed to abolish the export of slaves, and to encourage the work of missionaries and the establishment of stations for them.

A Consul was appointed to Lagos for the protection of British interests.

About nine months after the signature of this treaty some Portuguese slave traders, who had been expelled, returned to Lagos and renewed the old practices. Akitoye was informed of this and was going on, and their attempts were promptly suppressed. In consequence of this, the slave trade party, under the leadership of Kosoko, organised a rebellion which broke out in 1861. Indecisive encounters took place between the two factions, and bluejackets were landed to protect the Consulate. Attempts which were made by the Consul and officers to mediate failed, and finally marines were sent to assist Akitoye, who, after a short fight, Kosoko was defeated and fled. Dosumu, who succeeded his father Akitoye, was unable to adhere to the terms of the treaty, and was induced in 1861 to cede the sovereignty of Lagos and dependent territories to the Crown in consideration of a pension, which he continued to draw until his death in 1885.

**THE COLONY OF LAGOS.**—In 1862 these territories were erected into a Colony, and the following year Kosoko, who in 1854 had been acknowledged king of Lekki and Palma, districts lying to the eastward, ceded these places to the Lagos Government. At the same time Protectorate rights were established over Ado and Oke-Oda on the west. In 1866 the Colony became a portion of the West African Settlements, retaining a separate Legislative Council, but being subject to the Governor-in-Chief at Sierra Leone. In 1874 the Colony, which extended from Badagry on the west to Odi on the east with an indefinite inland boundary, was united to the Gold Coast Colony.

In 1883 Appa, lying on the western border of the Colony, was the next district to be brought under British jurisdiction. In 1884, the British Consul concluded a treaty with the Jakris by which their country as far as Mollume, was placed under British protection, and similar treaties were made with the chiefs of Ogbo and Mahin, small tribal areas situated in the creek region to the eastward. In 1886 the Lagos territories were separated from the Gold Coast and erected into a separate Colony and Protectorate. Between the years 1886 and 1895 Mahin, Ijebu-Ro, Itebu, and Aiyesan to the east, and Kotonu, Igbesa, Ado and Ilaro to the west were proclaimed part of the Protectorate. An expedition was sent against the Ijebus in 1892, which resulted in the military occupation of their country, and in the opening of a most important trade route to the interior.

From this time onward British influence gradually spread inland towards the Niger, and in 1899 the Protectorate was extended to the confines of Northern Nigeria and to the border of the Niger Coast Protectorate. The country generally prospered, and Lagos became a great trading port with many large mercantile firms, both European and native, established. Great trade routes were opened into the interior, and a railway was constructed from Lagos to Ibadan, passing through a thickly populated and fertile agricultural country.

**THE COLONY AND PROTECTORATE OF SOUTHERN NIGERIA, 1906-1913.**—In 1906 the Colony of Lagos and its protected territory were amalgamated with the Protectorate of Southern Nigeria under one administration and designated the Colony and Protectorate of Southern Nigeria. For administrative purposes the country was partitioned into three main divisions—the Western

Province, which coincided with the former Colony and Protectorate of Lagos; and the Central and Eastern Provinces, which previously formed the Protectorate of Southern Nigeria.

The next few years were spent in building up an extensive system of communications. The railway from Lagos to Ibadan was extended over the Northern Nigeria border to Jebba; thence across the Niger to Zungeru; and finally linked up with the railway in operation from Baro on the Niger to Kano, the great Mohammedan trade centre of the north. A light railway was built joining the main line at Zaria with the tin fields of Bauchi. Broad main roads were driven in all directions and telegraph lines constructed between important administrative and trade centres.

In 1901 the great undertaking of making Lagos an open port by the construction of huge moles and by the dredging of the sandbar, which obstructed the entrance to the harbour, was commenced; and by the end of 1913 sufficient progress had been made to permit of large ocean-going steamers entering the harbour and berthing alongside the wharves. For several years vessels drawing 20 feet of water have been able to use the harbour.

Large areas in the north-eastern portion of the Protectorate, notably the country inhabited by the warlike and hitherto intractable Munshi people were brought under Government supervision.

**THE AMALGAMATION OF NORTHERN AND SOUTHERN NIGERIA, 1914.**—By Letters Patent of 29th November, 1913, and an Order-in-Council dated the 22nd of November, 1913, which Instruments came into operation on the 1st January, 1914, the Colony and Protectorate of Southern Nigeria and the Protectorate of Northern Nigeria were formed into the Colony and Protectorate of Nigeria. By another Order of the same date the boundaries of the Colony of Nigeria were defined, and by a third Order, which applied to the Colony and to the Protectorate, an advisory and deliberative body known as the Nigerian Council was established.

Provision was made for an Executive Council and for a Legislative Council for the Colony. The legislative power for the Protectorate was vested in the Governor. The Colony was placed under an Administrator, and the Protectorate, divided into two groups of provinces—Northern and Southern—under two Lieutenant-Governors.

Since the amalgamation, the chief events in the history of Nigeria have been the Great War, which resulted in the conquest of the Cameroons; the building of the Eastern Railway, and the development of the ports of Lagos and Port Harcourt, and of the Government Colliery at Enugu; the great trade boom of 1919 and 1920, and the great trade depression which succeeded it in 1921; the institution in 1923 of an enlarged and partly elected Legislative Council for the Colony and the Southern Provinces of the Protectorate (*see under* Constitution); the visit of the Prince of Wales in 1925, and the introduction of direct taxation in the Southern Provinces.

#### *Political and Administrative Divisions.*

Nigeria is arranged in three main divisions, the "Colony" and two groups of provinces designated the "Northern Provinces" and the "Southern Provinces." The Colony comprises the former Colony of Southern Nigeria, while the two groups of provinces are formed from the late Protectorates of Northern and Southern Nigeria.

The Northern Provinces are Adamawa, Bauchi, Benue, Bornu, Ilorin, Kabba, Kano, Niger, Plateau, Sokoto, and Zaria.

The Southern Provinces are Abeokuta, Benin, Calabar, Cameroons, Ijebu, Oyo, Ogoja, Ondo, Onitsha, Owerri, and Warri.

The Provinces are each partitioned into divisions. The seat of Government is established at Lagos. The Administrative Head-quarters of the Colony is at Lagos, while those of the Northern and Southern Provinces are at Kaduna and Enugu, respectively.

**THE CAMEROONS.**—The conquest of the Cameroons was completed in February, 1916, after a series of operations which commenced in August 1914.

An Anglo-French military and naval force under the command of Brigadier-General C. Dohell, (afterwards Major-General Sir C. Dohell), the Inspector General of the West African Frontier Force, compelled Duala to surrender on 27th September, 1914, and after hard fighting drove the German forces from the surrounding districts.

On the 10th June, 1915, Garua, on the River Benue, fell after a siege of a few weeks by forces from Nigeria and the French Chad Territory under the command of Brigadier-General Cunliffe, the Commandant of the Nigeria Regiment, W.A. F.F.; having cleared the north of the Cameroons, except Mora, these forces marched southwards driving the Germans before them to the Saouga River.

French forces, with a Belgian contingent from the Congo, invaded the Cameroons from French Equatorial Africa under the command of General Aymerich and gradually pushed forward from the south-east and south towards Yaounde, which had become the headquarters of the German forces. Finally the main German forces, being almost surrounded by the converging advance of the Allied troops, retreated southwards into the Spanish territory of Muni, where they were interned, and the isolated garrison of Mora in the north then surrendered.

By an arrangement which came into effect on 1st April, 1916, the Cameroons was provisionally divided into British and French spheres. The British sphere (about 31,150 square miles in extent) consisted of two portions. The smaller, in the extreme north was intended to include the whole of the Sultanate of Dikwa or German Bornu. The larger consisted of a strip of country bordering on Nigeria, about 400 miles in length and with a maximum width of 80 miles, extending from about 30 miles south of Yola to the Cameroon estuary. It included Buea, the German administrative capital of the Cameroons, and the ports of Victoria, Tiko, and Rio del Rey, and consisted of nearly the whole of the Victoria District, the Kumba (or Johann Albrechtshöhe) District, the Ossidinge District, part of the Chang District, the Bamenda District, and parts of the Banyo and Garua Districts.

The estimated population of the British sphere was about 650,000.

The rest of the Cameroons, about 275,000 square miles, with Duala and Kribi, the chief ports, was assigned to France. Boundary adjustments with the French took place in 1920 in accordance with an agreement signed by Lord Milner and M. Simon on 10th July, 1919. The principal features of these were the transfer to the British of the country west of the Mandara Mountains from

the Dikwa Sultanate in the north to the River Tiel in the south, and the transfer of nearly all the Chang District to the French.

The British sphere was placed under the control of the Governor of Nigeria, and the parts of the sphere to the north of the Bamenda District were administered by the staffs of the adjoining Nigerian Provinces of Bornu and Yola. The Bamenda, Ossidinge, Kumba and Victoria Districts were administered as a separate Cameroons Province with four Divisions (Bamenda, Mamfe, Victoria, Kumba) under a Resident stationed at Buea, responsible to the Governor of Nigeria through the Lieutenant-Governor of the Southern Provinces. The large German cocoa, rubber and banana plantations in the Victoria District, with about 48,000 acres under cultivation, were placed in the charge of a Plantation Department, in order that they might be kept in good order as far as possible until their mode of disposal was settled. They were sold by auction in November, 1924.

By the Treaty of Versailles, Germany renounced in favour of the Principal Allied and Associated Powers all her rights over the Cameroons.

In December, 1920, the British and French Governments submitted to the Council of the League of Nations draft mandates for the British and French spheres with a joint recommendation (dated 17th December, 1920) for the division of the Cameroons in accordance with the Milner-Simon agreement of 10th July, 1919. In October, 1921, the Council of the League approved in principle the division of the country in accordance with that agreement and the application of the mandate system to those territories, and on 20th July, 1922, after a delay due to negotiations between the United States Government and the Mandatory Powers, the Council confirmed the mandates and defined their terms.

By an Order in Council, dated 1923 and brought into force in February, 1924, and by Nigerian Ordinance No. 3 of 1924, provision was made for the future government of the British Sphere as if it were part of the Protectorate of Nigeria. Under these enactments, the Cameroons Province is administered and legislated for as if it formed one of the Southern Provinces of the Protectorate, while the northern parts are administered and legislated for as if they formed parts of the Northern Provinces of Bornu and Yola; and most of the laws of Nigeria are applied to the British Sphere, subject to the terms of the mandate as regards the few provisions thereof which are not in accordance with ordinary Nigerian law and practice.

#### *Commerce and Industry.*

The progress of Nigeria may be illustrated by the fact that in 1904 the total value of imports and exports (excluding specie) was a little over 5 millions sterling, as compared with over 12 millions in 1914 and over 27 millions in 1930.

Imports consist chiefly of the following goods, which are arranged alphabetically, and not in order of value:—Aerated waters, bags and sacks, beads, beef, bicycles, biscuits, chemicals and drugs, cigars and cigarettes, kola-nuts, cooper's stores, cotton and woollen goods, cutlery, earthenware, enamelware, firearms, fish, flour, furniture, galvanized iron, gunpowder, haberdashery, hardware, kerosene, matches, motor vehicles, perfumery, rice, rope and twine, salt, silk goods, soap, spirits, stationery, sugar, timber, tobacco, umbrellas, wearing apparel, wines, and a

great number of miscellaneous articles. Cotton-piece goods form the principal class in the import table, 3,045,144l. worth being received in 1930.

The principal exports are palm-kernels, palm-oil, tin, hides and skins, ground-nuts, cotton lint, cocoa, mahogany, rubber, and shea produce.

The influence of railway extensions in the Northern Provinces is shown by the largely increased exports of ground-nuts, hides and skins and shea produce. In 1911, the year before the railway to Kano was opened, the total value of these three products shipped overseas was 89,000l. only, as compared with 3,130,207l. for these products in 1930. There is also a large increase in cotton goods carried to Kano.

Deposits of lignite and coal have been discovered near Asaba and Udi in the Southern Provinces. A colliery was opened by Government in 1915 at Enugu, the coal won being used by Government Departments or sold to the public. The output for 1930 was 364,844 tons.

Amongst minor products exported from the Colony and Protectorate may be mentioned ivory, ebony, copra, coffee, gutta percha, beeswax, silk gums, benniseed, piassava fibre, capsicums, ginger and ostrich feathers.

Crops cultivated for home consumption include maize, yams, cassava, sweet potatoes, sugar cane, guinea corn, ground-nuts, rice, millet, tobacco, plantains and bananas, beans of various kinds, etc. Wheat is grown to a small extent in some parts of the Northern Provinces.

Large herds of cattle, sheep, and goats are raised in the Northern Provinces, and in the extreme north, ostriches and camels are bred. Horses and donkeys are bred and in common use in the northern part of the Protectorate.

The ports served by ocean steamers are, from west to east, Lagos, Forcados and Burutu, Warri, Sapele, Koko Town, Akassa, Bonny, Port Harcourt, Degema, Opobo, Calabar, and Victoria and Tiko, Cameroons.

Import and export merchants are established at the ports, and also up-country along the main waterways, the Niger, Benue, and Cross Rivers, and at inland railway stations.

#### *The Nigerian Tin Fields.*

The principal tin fields are situated on the western boundary of the Bauchi Province and in the Provinces of Nassarawa, Zaria, and Kano adjoining that boundary. Tin is also known to exist in the Provinces of Ilorin, Calabar, and Yola, but as yet has not been found in payable quantities.

The tin is in the form of cassiterite, and is mostly found in the detrital deposits resultant on the vast denudation that has taken place all over the known field; it is therefore more readily discovered in the existing river-beds; and shows a tendency to increase in size and richness of deposit nearer their sources.

The pagan town of Bukuru may be taken roughly as the centre of the field (about 6,000 feet above sea level), from which three great waterways of the Northern Provinces take their origin. Flowing westwards we have the N'gel River becoming the Kwall Danchandon, and eventually the Kaduna, flowing north-east the Delimi River that goes to Lake Chad, and flowing east the numerous tributaries of the Gongola which joins the Benue, such as the Shen, Forum, Ropp and Jarawa Rivers.

Tin ore has been worked and smelted by the natives during the last hundred years, the Seriki (Chief) of Liruein-Delma being a grandson of the

\* For text of the British mandate see Cmd. 1704.

ative who historically first discovered and worked it. There is, however, strong evidence to show that some former race knew of its existence. Beads may be seen that have been found in the deep detrital deposits that could only have been made by man. These beads bear no resemblance to the modern ornaments made by tin workers, or are such beads worn by any existing race of natives near the fields, also the depth at which they have been found precludes a modern origin.

The ore won by the existing mines amounted in 1913 to 5,530 tons. The exports were 8,475 tons in 1923, and 13,070 tons valued at 2,209,545*l.* in 1928, and 10,794 tons valued at 906,185*l.* in 1931.

#### *Banking, Currency, Weights and Measures.*

Banking facilities are afforded by the Bank of British West Africa Ltd., and Barclays Bank Dominion, Colonial and Overseas). The former is established at Lagos (local head office, Marina, and branch office, 196, Broad Street), Aba, Ibonema, Abeokuta, Calabar, Ebute Metta, Enugu, Gusau, Ibadan, Jos, Kaduna, Maiduguri, Kano, Lokoja, Makurdi, Onitsha, Opo, Oshogbo, Port Harcourt, Sapele, Warri and Zaria, and there are also a number of agencies. Barclays Bank Dominion, Colonial and Overseas) is established at Lagos, Aba, Burutu, Ebute Metta, Gusau, Ibadan, Jos, Kano, Port Harcourt, Zaria and Victoria (British Cameroons).

The coins current in Nigeria are:—*U.K.* gold, silver and bronze coins; *West African* silver coins value 2*s.*, 1*s.*, 6*d.*, and 3*d.*, and *West Africa* alloy coins of the same denomination; *West African* nickel-bronze coins value 1*l.*, ½*d.*, and ¼*d.* (tentpence).

All coins, which under the Coinage Acts, 1870 and 1891, are legal tender in the United Kingdom, and all subsidiary coins coined in pursuance of the provisions of His Majesty's Order-in-Council dated 28th July, 1906, as amended by Orders-in-Council dated respectively 9th September, 1907, 9th October, 1908, 2nd August, 1910, and 7th May, 1913, are current in all parts of Nigeria. The United Kingdom coins, however, are being superseded by the West African coins. Gold and silver coins of the United Kingdom and West African silver coins are legal tender to any amount; United Kingdom bronze coins and West African nickel-bronze coins are legal tender to the extent of one shilling.

The West African silver coins, authorised by the Nigerian Coinage Order, 1913, were introduced in May, 1913. Owing to the rapid disappearance of silver coins other West African coins of alloyed metal of the same denominations, and of the same standard weights, but of a low intrinsic value, were introduced in pursuance of the provisions of His Majesty's Order-in-Council dated 9th February, 1920, and the silver coins are being withdrawn. This alloy coinage has been in circulation since 31st July, 1920. The West African nickel-bronze coins were introduced in 1907, 1908 and 1911. Currency notes were introduced in 1916 under the Currency Note Ordinance of that year. Notes of the values of 5*s.* and 10*s.* are now in circulation.

The weights and measures in common use are the same as those in Great Britain.

#### *Chief Towns and Means of Communication.*

The principal towns of the Northern Provinces are:—Bida, Ilorin, Jos, Kaduna, Kano, Katsina,

Lokoja, Maiduguri, Sokoto, Yola, and Zaria; while those of the Southern Provinces are:—Abeokuta, Benin City, Calabar, Enugu, Forcados, Ibadan, Ijebu-Ode, Onitsha, Opo, Oshogbo, Oyo, Port Harcourt, Sapele and Warri. The only large town in the Colony is Lagos, the capital of Nigeria.

Steamships maintain a regular service between Nigeria, Europe, other West African Colonies, etc., and there is cable communication with West and South West African ports, Europe and South Africa, and thus with all parts of the civilised world.

The Western Division of the Nigerian Railway (3ft. 6in. gauge) runs from Lagos on the coast through the important towns of Abeokuta, Ibadan, Kaduna and Zaria, to Kano, a distance of 705 miles, thus connecting large and populous commercial centres in the interior with each other and with the sea. The main line from Kano has been extended to N'Guru, situated just inside Bornu Province; this extension has a length of 144 miles, and was opened on the 1st of October, 1930. There are also three branch lines, one of 111 miles running from Minna to Baro, on the River Niger, another of 137 miles from Zaria through Funtua and Gusau to Kaura Namoda, opened in 1929, and a third, a 2ft. 6in. light railway 134 miles long, from Zaria to Jos on the Bauchi Plateau. In 1913-16 a 3ft. 6in. gauge railway was built from Port Harcourt, on a branch of the Bonny River, to Enugu, a distance of 151 miles. This line, which is generally known as the Eastern Railway, runs through a rich oil-palm belt, and taps the coal field at the Government Colliery at Enugu. Construction was resumed after the war, and the next section, of 139 miles, from Enugu to Makurdi on the Benue River, was completed in 1923. The final section (279 miles), from the Benue to Kaduna, was completed in 1927. The line is 569 miles in length and affords an alternative outlet for the tin-ore and agricultural produce of the north, and renders the coal mined at Enugu available throughout the districts served by the Western Division of the Railway. A branch from the Eastern line at Kafanchan to Jos (63 miles) connects the tin mines of the Bauchi Plateau with Port Harcourt.

A short branch line of 24 miles has been constructed between Ifo-Ilori-Idogo, and was opened on the 1st of June, 1930.

A system of inland telegraphs, also owned and operated by Government, connects the majority of the principal towns on the coast and in the interior, and the African Direct Telegraph Company controls a wireless station at Lagos.

The Government has constructed a very large number of roads, many of which are suitable for motor traffic, between the headquarter stations of the Provinces, and there are, in addition, many minor roads. The Rivers Niger and Benue are in themselves great natural highways, and in the south there are numerous other navigable waterways, which provide means of communication and transport.

#### *Religion and Education.*

The bulk of the population of the Northern Provinces is Muhammadan, the majority of the remainder being pagan. In the Southern Provinces however, the proportions are reversed: Muhammadan communities, occur especially in the western

districts. Missionary societies of various Christian denominations have established many stations with churches and schools throughout the country.

Education in Nigeria is under the control of a Director in Lagos and two Assistant Directors, at Kaduna and Enugu, the headquarters of the Northern and Southern Provinces respectively.

Although there is now one Department of Education for the whole of Nigeria, the unification of the two systems can only be gradual and modifications in curriculum, etc., are necessitated in the Northern Provinces by local conditions.

In the Southern Provinces education work is for the most part carried on by Missionary Societies. There are 51 Government schools, 289 assisted Mission schools in receipt of an annual grant-in-aid and 2,387 un-assisted schools (mostly Mission). All schools are controlled by the Department. The above figures include a number of Middle (Secondary) schools and classes and 23 girls' schools. There are 174,874 children in the Elementary Classes, and 9,862 in the Middle Classes of the above schools, most of the latter leaving after reaching the equivalent of Standard 6.

There are also Mission Training Colleges for Teachers, Government Elementary Training Centres, where teachers for Elementary schools are trained, and a Higher College for the vocational training of selected students from the Middle schools.

A new Education Code was introduced in 1926 and revised in 1931. There is a Board of Education on which the interests of Missionary Societies are largely represented.

In the Northern Provinces there are 117 Government Elementary and Middle schools, all of which are maintained by the Native Administrations. No school yet covers the full Middle course. There are also 3 Elementary Training Centres for Teachers and a Higher College. A beginning has been made in girls' education at two centres.

Mission schools total 183 (mostly elementary, in Pagan areas), of whom 7 are assisted, and 35,452 Native Muslim schools where only the Koran is read.

There are approximately 10,300 pupils in Elementary Classes, 800 in Middle Classes, and 193,000 in the Native Koran schools.

A separate Advisory Board of Education functions in the Northern Provinces.

The total Government expenditure in 1932-33 was £250,000, of which £95,000 was paid in grants to Missions. In addition, the Native Administrations contributed £8,000 in the Southern Provinces and £43,000 in the Northern Provinces.

#### *Constitution.*

The territorial divisions of Nigeria are the "Colony of Nigeria," the "Northern Provinces" and the "Southern Provinces." The Northern Provinces and the Southern Provinces together form the Protectorate.

The Government of the Colony of Nigeria is provided for by Letters Patent of 9th December, 1922, and Royal Instructions to the Governor of the Colony of the same date, as amended by Royal Instructions, dated 17th February, 1928. The Government of the Protectorate is provided for by the Nigeria Protectorate Order in Council, 1922, of 21st November, 1922, and Royal Instructions to the Governor of the Protectorate of 9th December, 1922 and 17th February, 1928.

The Nigeria (Legislative Council) Order in Council, 1922, dated 21st November, 1922, as amended by the Nigeria (Legislative Council) Order in Council, 1928, dated 16th May, 1928, provides for a Legislative Council for the Colony and the Southern Provinces of the Protectorate, and this Council is also given control over Protectorate Government expenditure in the Northern Provinces. The Legislative Council consists of:—The Governor, as President.

The Official Members, viz :

The Members of the Executive Council.

The Senior Residents.

The Deputy Chief Secretary to Government.

The Secretary, Northern Provinces, and the Secretary, Southern Provinces.

The General Manager of the Railway.

The Director of Public Works.

The Director of Agriculture.

Three Nominated Official Members.

The Elected Members, viz :

Three members elected by persons resident within the Municipal Area of Lagos.

One member elected by persons resident within the Municipal Area of Calabar.

The Nominated Unofficial Members, not exceeding 15 in number.

One member nominated by the Lagos Chamber of Commerce.

One member nominated by the Calabar Chamber of Commerce.

One member nominated by the Port Harcourt Chamber of Commerce.

One member nominated by the Kano Chamber of Commerce.

One member nominated by the local Chambers of Mines.

One member to represent Banking interests in Nigeria.

One member to represent Shipping interests in Nigeria.

The qualifications for registration as an elector in Lagos or Calabar are that the elector must be a male person who:—(1) is a British subject, or a native of the Protectorate of Nigeria; (2), is of the age of twenty-one years or upwards; (3), has been ordinarily resident for the twelve months immediately preceding the date of registration in the municipal area for which the election is being held; and (4), was during the calendar year immediately preceding in possession of a gross annual income from all sources, of not less than one hundred pounds.

The Nigerian Council, created in 1914, was abolished in 1923.

## NORTHERN RHODESIA.†

*Situation and Area.*

Northern Rhodesia comprises the northern part of the Territory formerly administered by the British South Africa Company, whose principal field of operations was defined in the Charter of Incorporation as "the region of South Africa lying immediately to the North of British Bechuanaland, and to the North and West of the South African Republic, and to the West of the Portuguese dominions." It lies wholly to the north of the Zambezi River and is bounded by Tanganyika Territory and the Belgian Congo on the north; Nyasaland and Portuguese East Africa on the east; Southern Rhodesia and South-West Africa on the south and Portuguese West Africa on the west.

The area of the Territory is estimated at about 287,950 square miles.

A map of Northern Rhodesia and Southern Rhodesia will be found in the section relating to the latter.

Northern Rhodesia is divided into nine Provinces for fiscal and administrative purposes. The seat of government is at Livingstone, situated seven miles from the Victoria Falls. Other important settlements are at Broken Hill, Fort Jameson, Lusaka, Masabuka, Ndola near which the copper mines of Bwana Mkubwa, Nohanga, Nkana, Roan Antelope, and Mufulira are situated, Abercorn, Kasama, Fort Rosebery, Kasempa and Mongu-Lealui in Barotseland. A new Administrative Headquarters is in course of construction at Lusaka.

*History and Constitution.*

In 1855, Dr. Livingstone, the great explorer, with whose advent the authentic history of Northern Rhodesia may be said to begin, arrived at

the Zambesi near the place where the town bearing its name now stands. The Arab slave trade had begun a few years before Livingstone's arrival and flourished from that time onwards till 1893, twenty years after the death of Livingstone at Zhitambo. The Arab influence was at first most felt in the North but soon extended over the whole country. It was not until 1893, by which time a Government post (Abercorn) near the south of Lake Tanganyika, and several mission stations were established, that this trade received any check. Blow after blow was inflicted by the destruction of the Arab settlements on Lake Nyasa, and with the defeat of the Arab chief Mlozi by Sir Harry Johnston at Karonga in 1894, the days of the slave trade in British Central Africa were numbered. The last caravan of slaves in Northern Rhodesia (intercepted on its way to the East coast via Lake Nyasa) was released at Fort Jameson, which had just been established, in 1898. An account of the early operations of the British South Africa Company under the Royal Charter of Incorporation of 1889 will be found under the section relating to Southern Rhodesia. Prior to 1911 the territory now called Northern Rhodesia consisted of two separate territories (a) Barotseland-North-Western Rhodesia and (b) North-Eastern Rhodesia. On the 4th May of that year these two territories were amalgamated under the title of Northern Rhodesia. Mr. (now Sir) Lawrence Wallace was appointed the first Administrator of the combined territory, and continued in office until 1921.

Several engagements took place during the Great War with forces from German East Africa, and on the 2nd May, 1916, General Northey ordered a general advance into German East Africa of the troops under his command, and by July all enemy territory adjacent to the Northern Rhodesia border had been cleared of the enemy. Towards the end of October, 1918, the fugitive German force, under Colonel Von Lettow-Vorbecke doubled southwards, and on the 1st November made an unsuccessful attack on the frontier station, Fife. From there they proceeded south-west to Kasama, the advanced base of supplies for the forces operating on the border. The bulk of the stores had, however, been evacuated on the first news of the enemy's advance. After burning most of the buildings and their remaining contents, Von Lettow marched along the Kasama-Kashitu motor-road, and early on the 13th November his advanced parties opened fire on the British South Africa Company's rubber factory on the Chambeshi River. At this juncture the news of the Armistice was received by the District Commissioner and communicated to Von Lettow, who accepted the position and suspended hostilities.

In March, 1921, Sir Drummond Chaplin, Administrator of Southern Rhodesia, became also Administrator of Northern Rhodesia. He relinquished office on the 20th September, 1923, and was succeeded by Mr. (now Sir Richard) Goode, C.M.G., C.B.E., as Acting Administrator in Northern Rhodesia.

In July, 1923, a settlement was arranged of the various outstanding questions relating to the British South Africa Company's position in Southern and Northern Rhodesia. As far as Northern Rhodesia was concerned, the effect of the settlement, which was conditional on its acceptance by the shareholders and the approval of Parliament, was that the Company surrendered its buildings and assets used for administrative purposes, and its land and monopoly rights other

than mineral rights under its concessions in Northern Rhodesia but retained three freehold areas in the Tanganyika Province of North-Eastern Rhodesia; on the other hand the Company would receive on the 1st October, 1923, a cash payment from His Majesty's Government, and would retain a half interest for 40 years in the net proceeds of the disposal of land in North-Western Rhodesia, such disposal to be in the hands of the administration of the territory; the Company would receive the Crown's recognition of its mineral rights in Northern Rhodesia and a considerable measure of protection for its railway interests; and the Crown would waive its whole claim against the Company in respect of extraordinary military expenditure incurred in the course of the Great War. Subject to the foregoing, the Company would retain the whole of its commercial rights and assets; no further question would be raised as to any liability of the Company in respect of land appropriated for the purpose of its own commercial undertakings or granted to other parties; and the Company would be relieved of the duty of carrying on the administration of Northern Rhodesia. This provisional arrangement was unanimously approved by the shareholders, and on the 25th July, 1923, was approved by the House of Commons.

By Orders in Council dated 20th February, 1924 the office of Governor of Northern Rhodesia was created, an Executive Council constituted and provision made for the constitution of a Legislative Council. The Executive Council is composed of the Governor as President, the Chief Secretary to the Government, the Attorney-General, the Treasurer, the Secretary for Native Affairs, and the Director of Medical and Sanitary Services. The Legislative Council comprises the Governor as President, the members of the Executive Council, *ex officio*, four nominated official members and seven unofficial elected members. On the 1st April, 1924, Mr. H. J. Stanley, C.M.G. (now Sir Herbert Stanley, G.C.M.G.), assumed office as the first Governor and Commander-in-Chief of Northern Rhodesia.

For the East African Governor's Conference, see under Kenya, page 330.

#### *Administrative and Judicial.*

The natives are administered as far as possible through their own chiefs or headmen, who function as Native Authorities and Courts. Administrative and judicial functions are combined in the District Officers. The Barotse Province is a native reserve, and is administered under conditions differing in some respects from those obtaining elsewhere. The Paramount Chief of the Barotse has a Khotla or Native Council to assist him.

The law of the Territory is that of England except in so far as it may be inapplicable or may have been or may hereafter be modified by legislation, but no Act of Parliament of the United Kingdom passed subsequent to the 17th August, 1911, is deemed to apply to the Territory unless it has been specifically applied.

District Officers in their capacities as Native Commissioners and Magistrates have a limited civil and criminal jurisdiction. Appeals, both civil and criminal, lie from Native Commissioners' Courts to Provincial Commissioners as Magistrates, and from Magistrates Courts to the High Court.

*Education.*

**European.**—For the education of European children there were in August, 1933, controlled Schools at Livingstone, Choma, Mazabuka, Lusaka, Broken Hill, Bwana Mkubwa, Ndola, Luanshya and Nkana offering primary Education up to Standard VII, with the additional subjects Latin, French, Algebra in Standards VI and VII and Geometry in Standard VII. There were Schools at Silver Rest and Fort Jameson, offering primary education up to Standard V. All these schools were under Government Management. The Convent School, Broken Hill, offering education up to the standard of the Southern Rhodesian Junior Certificate Examination was controlled but under private management.

Boarding accommodation was available for girls at the Beit School, Choma, for boys at the Codrington School, Mazabuka, and for boys and girls at Lusaka School, all under Government management, and at the Convent School, Broken Hill, under private management. There was also open during the year a number of uncontrolled schools with small enrolments and uncertain lives.

**Native.**—The Department of Native Education supervises the educational work of the Missionary Societies working in the Territory, and apportions the grants in aid of the Mission Schools which conform to the Government syllabus and requirements. There is an Advisory Board on Native Education upon which Missions, Settlers and Government Departments are represented. A Government School for the training of "Jeanes" Teachers and Agricultural Demonstrators was opened at Mazabuka in 1930, connected with the Central Research Station. The Barotsé National School at Mongu is also a Government Institution. In 1931, Government Elementary Schools were opened at Mazabuka and Ndola, and a Middle School at Mazabuka. In the following year a Normal Training School was opened at Mazabuka, and an Elementary and Middle School at Kasama.

*Climate.*

The climate, except in the low-lying parts, may be described as sub-tropical. Temperatures are moderate during the winter months, viz., from April to August. In low-lying parts the mean temperature varies from 70° to 90° with a maximum of 103° and a minimum of 56°. In the high plateau the mean temperature varies from 55° to 75° with a maximum of 88° and a minimum of 40°. In some parts the maximum temperature has been known to reach the high figure of 120°, whilst minima round about 30° are not infrequent.

As a whole the country may be said to be suitable for white settlement, and Europeans have little to fear from the point of view of health if reasonable precautions are taken.

The average rainfall varies from 50 inches in the northern and high-lying portions of the terri-

tory to 25 and 30 inches only in the southern and south-eastern parts. On the average little or no rain falls during the period May to September. The month of October usually brings from about half an inch to two inches. The period, November to March, is the real wet season, during which anything from 70% to 90% of the total annual rainfall occurs. From April onwards the rains diminish again. The average rainfall so far as present investigations shew is 34.18 inches per annum.

*Agriculture.*

The cattle and ranching industries are gradually attaining a more satisfactory position owing to increased fencing and better cattle-management amongst European-owned stock and to the dipping which has been commenced amongst Native-owned stock in the Reserves.

Owing to the temporary closing down of certain mines, the demand for food-stuffs has diminished considerably, and crops and stocks of cattle in the country are now sufficient to meet all demands made upon them.

The cattle of the Territory are singularly free from major diseases and the mortality is not high upon those farms or ranches where good cattle-mastership is practised.

The dairy industry has not developed to the extent which the local markets require. Arrangements have now been made for the erection of a creamery at Lusaka at which very large supplies of cream can be handled.

The greater portion of the Territory is undeveloped agriculturally. The indigenous population is self-supporting in its food supply, practically the whole of its requirements being produced in the village gardens. There is little or no general trade in food commodities. The staple native cereals are finger-millet (*Eleusine coracana*), Kafir-corn (*Sorghum*), and Maize. The former is produced over extensive tracts of the Territory on a system of shifting cultivation whereby one grain crop is grown in rotation with forest re-growth, and the gardens revert to bush after each grain crop. Other native crops are bulrush millet (*Pennisetum typhoides*), ground-nuts, cassava, sweet-potatoes, and a variety of pumpkins, gourds, and beans. Tobacco is widely cultivated by the natives but on a small scale for private consumption and a small localized trade only. Considerable numbers of cattle are owned by natives in the Territory, but these are mainly confined to certain tribes, notably the Marosi, Baila, Matoka, and, to a less extent, the Angoni in North-eastern Rhodesia.

Many parts of the Territory are impassable to animal transport owing to the presence of tse-tse fly.

In the tracts adjoining the railway line considerable areas are given over to farming and ranching operations under European management.

Maize is the chief crop. During the season 1930-31, 42,974 acres were planted and yielded 193,666 bags. The increasing use of tractors in certain districts is having an important bearing on the total yield and where these up-to-date methods, combined with adequate green manuring, are practised the results are most encouraging. Competition from the south, by grain offered at very low prices caused the matter to be taken up with the Government of the Union of South Africa. As a result, maize was removed from the list of free imports in the Customs Agreement, and a duty of approximately 4/- per bag is now charged on grain entering either territory from the other. For the time being, the importation of grain from Southern Rhodesia is prohibited on account of the restrictions imposed as a result of the outbreak of Foot and Mouth disease in that Territory.

The cultivation of cotton is still confined to experimental work at the Central Research Station and on selected farms. Jamsid resistant varieties have been obtained but attacks by other insects such as Stainer and Bollworm make it impossible, as yet, to state whether this crop is likely to occupy any position amongst the export crops of the Territory. Its value, however, as a rotation crop for maize makes it essential that every avenue should be explored to obtain a variety suitable to local conditions.

The position as regards tobacco is still one of some difficulty. The leaf which can be produced in the Territory has been proved to be of good quality and acceptable to the limited market in the United Kingdom. Every effort is being made to consolidate the position of Northern Rhodesia leaf on the markets by exporting only that leaf which is of good quality.

Most of the wheat produced in the Territory is handled by the Co-operative Society at Lusaka. A trade has sprung up for good beer meal and an increasing amount of white flour is being sold.

The Central Research Station, which is situated about three miles from Mazabuka on the railway line in the centre of the farming areas, was opened on the 2nd November, 1929. This station, which is a joint Agricultural and Veterinary one, is staffed and equipped to deal with general agricultural investigations of local economic importance on the one hand, and on the other, with specific researches designed to lead to the control of animal diseases of economic importance in the Territory.

Two agricultural sub-stations have now been completed, one at Fort Jameson and the other at Abercorn. These sub-stations are under the supervision of the District Agricultural Officers now stationed at these points, and in addition to the conduct of investigations of purely local significance in their respective districts, are undertaking the testing out of local application of results obtained in the more detailed investigations carried out at the Central Station and constitute centres for the dissemination of agricultural information and instruction in the areas which they serve.

### Forestry.

More than 60 per cent. of the entire area of Northern Rhodesia is estimated to be more or less covered with trees and shrubs, but the forest growth, chiefly of the Savannah Woodland type, is undergoing considerable modification in composition and area as a result of native shifting cultivation and annual fires. A Forestry Branch has been instituted in recent years and three forestry officers are now carrying out investigations in various parts of the Territory. Reforestation and protective measures have already been commenced in one forest. It is proposed to maintain certain areas as protection forests for the prevention of soil erosion and the preservation of water supplies in springs and rivers. Further areas are to be dedicated to the production of timber of the more useful indigenous species. The aerial survey at present being carried out over part of the Territory will greatly accelerate the demarcation of Forest Reserves in that region. Experimental plantations of fast growing exotic tree species are being established and private enterprise in this direction has already commenced in the mining areas.

The only commercial timber industry in the Territory at present is that of the Zambesi Saw Mills Ltd., whose operations extend from Livingstone to the Mochill River under concessions granted by the Government. This Company is chiefly concerned with the extraction, by light railway, of timbers of the Kalahari sand belt type, including *Mkuhl*, *Baikaa*

*plurijuga*; *Mukwa*, *Pterocarpus angolensis*; *Mwangu*, *Pterocarpus stevensonii*; *Mupumena*, *Entandophragma* sp.; *Mkamba*, *Azela quanzensis*; *Mugongo*, *Ricinodendron rautanenii*; and *Muhshe*, *Burkea africana*. The Company has contracts for supplying sleepers to the South African and Rhodesian Railways.

### Land Settlement.

An Agricultural Survey Commission has reported upon the unalienated land within 25 miles of the railway suitable for European settlement, and this Commission has advised as to the class of farming or ranching for which the land is suitable. The Government is not embarking on any extensive programme of land settlement. Crown Land and privately owned land, however, suitable for mixed farming and ranching is available within easy distance of the railway and the price ranges between 2s. and 15s. per acre depending upon the quality of the soil, water supply, distance from railway, etc. A settler must be in possession of at least 2,000l. capital in order to obtain a grant of a farm from the Government on permit of occupation. Special travelling facilities are given to bona fide farm settlers and their wives and families proceeding to Northern Rhodesia for the first time to take up land, and special local railway rates are in force for their benefit. Applications for land in Northern Rhodesia should be addressed to the Lands Department, Livingstone.

### Department of Mines.

The Mines Department administers the Mining Law, the Mining Titles Registration Ordinance subsidiary thereto and the Mining and Explosives Regulations. The staff consists of the Commissioner for Mines, two Inspectors of Mines, one European Clerk and one Native Clerk.

The Registry of Claims and Registry of Mining Titles are kept, stamp duty is assessed and the necessary searches are made.

On the Broken Hill Mine zinc production recommenced at the beginning of 1933 on a basis of 1,700 tons of Electrolytic Zinc per month after a lapse of 18 months during which Vanadium had been the only product sold. The demand for Vanadium has been very restricted in 1933 but large tonnages of low grade ore have been proved on the mine.

The Camanor Lead-Vanadium Mine some 24 miles from Broken Hill has been acquired by the Rhodesia Broken Hill Company and will be systematically prospected by them.

The Roan Antelope and Nkana Mines have already increased their copper output since the termination of the world copper restriction agreement in 1932 and their cost of production is amongst the lowest in the world. The present outputs are 3,700 and 4,400 tons respectively per month, most of which is sold in Europe.

Nkana Mine has commenced the construction of a copper refinery and are sinking shafts five miles north of the present mine to develop an area of commercial ore.

After being closed down for 15 months the Mufulira Copper Mine started de-watering in the middle of the year with the expectation of commencing copper production before the end of 1933.

Gold is being produced by the New Jessie and Sasare West Mines on a small scale.

Geological and topographical surveying is being actively carried out on the Rhokana Concession and by the Loangwa Concessions and Rhodesia Minerals Concession.

Loangwa Concessions have acquired the exclusive prospecting rights over the North Charterland Exploration Company's Concession for three years.

During 1932, the mineral production figures were as follows:—

		£	s.	d.
Gold ..	6,349.18 ozs. ..	26,969	10	0
Silver ..	338.68 ozs. ..	25	12	0
Copper ..	67,887.19 tons ..	2,095,214	16	0

Iron Ore	711.00 tons ..	355	19	0
		£2,562,489	6	0

The labour figures at the end of 1932 were as follows:—

	European	Natives.
Mines ..	964	6,235
Concessions ..	36	442

#### Means of Communication.

The Railway was extended from Victoria Falls northward to Broken Hill—374 miles—in 1906, and the extension to the border of Northern Rhodesia, a further 132 miles, where it connects with the railway system of the Congo Belge, was completed in 1909. The Zambezi is crossed by a single span bridge, 650 feet long, 30 feet wide and about 420 feet high. The gauge of the railway is 3 feet 6 inches, the standard gauge of South Africa.

Branch lines have now been constructed from Ndola to Luanshya (Roan Antelope Mine), a distance of 24 miles, and to Nchanga via Nkana, a distance of 84 miles. Another line runs from Mkomboi, in the Belgian Congo, to Mufulira, nine miles distant.

Road communications are being opened up, and dry season motor tracks are now in use from Victoria Falls (via Livingstone, Lusaka and Broken Hill) to Elizabethville in the Congo Belge (790 miles approx.); Broken Hill to Abercorn (574 miles), and thence via Mwenzo, on the border of Northern Rhodesia, to Tanganyika and Kenya Colony; this portion forming part of the Cape to Cairo Route. Lusaka and Fort Jameson are also connected by road, a distance of 406 miles, and a road, leaving the Great North Road about 45 miles north of Broken Hill, runs through the Mining Areas via Ndola, Nohanga, Solwezi, Kasempa, and Mumbwa to rejoin the Great North Road at Chisamba.

The Zambezi, Kafue, Luapula, and Chambeshi Rivers are navigable for small boats for a considerable portion of their course, and where necessary for motor traffic these and other rivers may be crossed by pontoons.

Aerodromes, suitable for large aircraft have been established at Isoka, Broken Hill, Ndola, Mtuga, Kanona, Mpika, Chinsali, Livingstone and Leopard's Hill, and emergency landing grounds have been constructed between Mtuga and Kanona, Kanona and Mpika, at Shiwa Ngandu and between Isoka and Mbeya on the Imperials Airways route.

In addition, emergency landing grounds are situated at Fort Jameson, Mazabuka, Kalomo, Mongu, Kansanshi, Nkana and Luanshya.

The aerodromes at Livingstone, Broken Hill, Ndola and Mpika are equipped with re-fuelling masts, and are connected by telephone to the nearest Administrative office.

Broken Hill aerodrome is equipped with a hanger capable of accommodating three Imperial Airways machines, and a ground staff is in residence both at Broken Hill and Mpika.

Air mails are received from and despatched to all countries on the England-South Africa route, the service being once weekly in each direction. Mails to and from England are despatched and received once weekly via Bulawayo and Cape Town. Mails for Fort Jameson are carried via Beira and Nyasaland. There are 44 post offices, 15 of which are Money

Order offices. The main telegraph and telephone route lies alongside the railway line from Victoria Falls to the Congo Border, with branches from Ndola to Luanshya, Ndola to Nohanga and from Nkana to Mufulira. Wireless stations at Abercorn, Broken Hill, Mpika, Fort Jameson, Livingstone and Mongu-Leashi are equipped for point to point communication on short wave and maintain a public service. Broken Hill and Mpika Stations also provide radio-electrical services in connection with the African International Air Route, and are equipped for communication with aircraft in flight, on a wavelength of 900 metres.

#### Customs Duties.

The Tariff, excluding the Congo Basin tariff, provides for Empire preference for the following classes of goods which are mainly liable to *ad valorem* rates of duty: clothing, blankets and rugs, cotton piece goods and all articles usually imported for household and native use, the duty on Empire products being 10 per cent. and the duty on foreign varying from 15 to 30 per cent. Similarly agricultural, electrical, mining and other industrial machinery, pipes and piping, metals and metal manufactures imported for industrial purposes, if of Empire manufacture are free of duty and if foreign are subject to an *ad valorem* duty of 5 per cent., except foreign electrical machinery which is 15 per cent.

Specific rates of duty apply to practically all imported foodstuffs, and to spirits, wines, beer and tobacco; upon the latter items, apart from rum, no preference is granted except under the terms of the customs agreements with the neighbouring territories in the South but varying rates of preference are granted under the tariff, to foodstuffs of British origin.

" " " " in excess of 1,500l.	"	4s. 0d.

Before arriving at the chargeable amount the following deductions are allowed:—

- (i) Personal, 300*l*.
- (ii) For wife, 420*l*.
- (iii) For children, 100*l* each—age limit 18, unless receiving full time instruction at a University, College, School or other educational establishment, when age limit is 21.
- (iv) For Insurance &c.—One-sixth of chargeable income before making deductions for insurance and deductions under (ii) and (iii) above and (v) below, (v) for dependent, 50*l*.

The tax on the chargeable income of a Company is at the rate of 4*s*. on every pound thereof.

There are branches of the Standard Bank of South Africa at Livingstone and Lusaka and an Agency at Mazabuka and branches of Barclays Bank (Dominion, Colonial and Overseas) at Broken Hill and Fort Jameson, and an Agency at Bwana M'Kubwa.

## NYASALAND PROTECTORATE.†

*Situation and Area.*

The Protectorate comprises the western shore of Lake Nyasa, with the high tablelands separating it from the basin of the Loangwa River, and the region lying between the watershed of the Zambesi and the Shire Rivers on the west, and the Lakes Chiuta and Chilwa and the River Ruu (an affluent of the Shire) on the east, including the mountain systems of the Shire Highlands and Mlanje.

It is bounded on the north by Tanganyika Territory, on the west by Northern Rhodesia, on the south and east by Portuguese East Africa, and according to the most recent survey has a total area of about 47,949 square miles (land, 37,596).

It is divided into two Provinces, each under the control of a Provincial Commissioner. These provinces are sub-divided into twenty districts, each in charge of a district commissioner, who is also a district magistrate.

The chief town is Blantyre, in the Shire Highlands, where there are 666 Europeans. The headquarters of the Government are at Zomba.

*Population (1932).*

Europeans, 1,901; Asiatics, 1,583; Natives, 1,606,431.

† See Map under Southern Rhodesia.

*History.*

In 1859 Dr. Livingstone was placed at the head of a Government Expedition, and reached the southern shore of Lake Nyasa on the 16th of September of that year. His expedition was recalled in 1863, but resulted in the founding, from 1874 to 1881, of various Missionary Societies, notably the Universities Mission, the Livingstonia Mission, and the Church of Scotland Mission.

The Missions were followed by the African Lakes Corporation, and in 1883 Captain Foote, R.N., was appointed first British Consul for the Territories north of the Zambesi, to reside at Blantyre.

Opposition of the new settlers to the slave trade carried on by Arab coastmen and natives alike resulted in a conflict with the Arab traders under Chief Mlozi, settled at the north end of Lake Nyasa, which spread to the Yao chiefs, who were under their influence.

In 1889 public attention was drawn to Nyasaland by the application for a Charter by the British South Africa Company, and the despatch of an imposing expedition under Major Serpa Pinto to the Upper Zambesi and Lower Loangwa. At the same time Mr. D. Rankin announced the discovery of a navigable entrance to the Zambesi by the Chinde mouth.

In the summer of 1889 Mr. Johnston (later Sir H. H. Johnston, G.C.M.G., K.O.B.) arrived at Mozambique as H.B.M. Consul, and proceeded to travel in the interior to inquire into the troubles with the Arabs.

Treaties having been concluded with the remaining Makololo chiefs and with the Yaos round Blantyre, Mr. Johnston proceeded up Lake Nyasa, leaving Mr. John Buchanan, Acting-Consul, in charge, who, after the first encounter between Major Serpa Pinto and Mlauri, a powerful Makololo chief, proclaimed on the 21st September, 1889, a British Protectorate over the Shire districts.

Mr. Johnston, during his progress up the Lake, induced the "Jumbe" or Sultan of Kota-Kota to place his country under British protection, and on arriving at Karonga arranged similar treaties with Mlozi and other Arab and Wahenga chiefs, after which he proceeded to Lake Tanganyika. On his return an agreement was made with Mponda, a Yao chief at the south end of Nyasa.

In 1891, an Anglo-Portuguese convention ratified the work of Mr. Johnston, Mr. Sharpe (later Sir A. Sharpe, K.C.M.G., C.B.), and other pioneers of British Central Africa, and in the following spring a British Protectorate over the countries adjoining Nyasa was proclaimed. The Protectorate of Nyasaland, under the administration of an Imperial Commissioner, was confined to the regions adjoining the Shire and Lake Nyasa; the remainder of the territory under British influence north of the Zambesi being placed, subject to certain conditions, under the British South Africa Company.

In the autumn of 1891 an expedition was successfully conducted by the Commissioner and Captain Maguire against Mohandandji and Mponda, slave-raiding Yaos at the south end of Nyasa, which resulted in the former being attacked and his followers effectually dispersed, and the latter suing for peace after his town had been shelled. The next few years brought much trouble to the Protectorate in the way of slave-trading and constant raids, but owing to three gun-boats being placed on the Lake for the suppression of the slave trade, further reinforcements of Sikhs arriving from India, and the recruitment of native troops

from the Atonga of West Nyasa, the slave trade was abolished and the peaceful development of the Protectorate secured. In 1893, the name of the Protectorate was changed to "The British Central Africa Protectorate," but the old name "Nyasaland Protectorate" was revived in 1907, by the Order in Council which amended the Constitution.

#### *Constitution.*

The administration of the Protectorate, control of which was transferred to the Colonial Office from the Foreign Office in March, 1904, was originally conducted by a Commissioner and Consul-General, assisted by the Deputy and Assistant Deputy Commissioner. On transfer to the Colonial Office the post of Consul-General was abolished, and by an Order in Council which came into force in October, 1907, the Commissioner became a Governor and Commander-in-Chief. By the same Order Executive and Legislative Councils were established.

The Laws consist of local Ordinances duly enacted with such British Acts as are of general application. Justice is administered in the High Court, which has jurisdiction in Civil and Criminal matters, and also as a Court of Admiralty. Subordinate Courts are held by Magistrates and Assistant Magistrates in the various districts. Appeals from decision of the High Court are heard in H.B.M.'s Court of Appeal for Eastern Africa.

For the East African Governor's Conference, see under Kenya, page 330.

#### *Climate and Products.*

There are two distinct climates in the Protectorate, one of the Shire Valley and Lake Nyasa, the other of the Shire Highlands and the rest of the country which lies at a high elevation. The first has a rainfall averaging 35 inches yearly, and a temperature which touches 120° in the summer. The second has a pleasant climate, the thermometer ranging from 96° or 97° in the summer to a minimum of about 40° in the winter. The rainfall in the Shire Highlands varies from about 40 to 100 inches.

#### *Industry and Customs.*

The chief products of the Protectorate are tobacco, cotton, tea, chillies, rubber, rice, maize, wheat, and fibre.

The export of cotton for the year ended 31st December, 1932, was 2,094,962 lbs.: of tobacco 15,082,035 lbs. 99.75 per cent. of the export trade in 1932 was to the United Kingdom and British Colonies.

The chief imports are provisions, cotton goods, motor vehicles, earthenware, hardware, wines and spirits, salt, silk and woollen goods, agricultural machinery, arms and ammunition. 69.16 per cent. of the imports in 1932 came from the United Kingdom and British Colonies.

The Customs revenue is derived principally from an import duty of 17% on the cost at the seaport of discharge, i.e., Beira. No export duties are levied.

Nyasaland being wholly within the regions covered by the Congo Basin Treaties, 1885, and the Convention of St. Germain-en-Laye, 1919, may not grant preferential rates of duty. Its Customs Tariff, therefore, applies equally to imports from all nations.

Customs revenue collected during 1932 amounted to 134,662*l.* as against 126,427*l.* in the previous year.

The following table shows the origin of direct consignments of domestic trade imports during the last five years:—

Year.	United Kingdom.		British Possessions.		Foreign Countries.	
	£	%	£	%	£	%
1928 ...	345,388	39.49	175,557	20.19	360,523	40.33
1929 ...	269,708	30.28	165,908	22.29	308,029	41.43
1930 ...	258,967	34.79	147,642	19.83	337,773	45.36
1931 ...	302,534	41.63	138,663	18.80	287,364	39.57
1932 ...	409,092	55.64	98,396	13.38	227,907	30.96

The total exports of the Protectorate during 1932 weighed 10,861 tons and were valued at 788,998*l.* Of the domestic products exported 91.26 per cent. of the weight and 98.53 per cent. of the value were consigned to the United Kingdom.

#### *Means of Communication.*

A railway from Port Herald, on the Lower Shire, to Blantyre, 113 miles, via Chiromo and Luchenza, was built by the Shire Highlands Railway Company, under an agreement made in 1902 with the Nyasaland Government under which a subsidy was paid to the Railway. Subsequently the Central African Railway Co. constructed a section, opened in 1915, from Chindio on the Zambezi to Port Herald, 61 miles, of which the first 45 are in Portuguese territory. Both lines are of 3ft. 6in. gauge. A railway of the same gauge was opened for traffic in April, 1922, by the Trans-Zambesia Railway Co., which runs from Murrumbidgee on the south bank of the Zambesia to Dondo, the junction with the Mashonaland trunk line, about 20 miles from Beira (165 miles, all in Portuguese territory). A bridge across the Zambezi to connect the Trans-Zambesia Railway with the Central Africa Railway is now under construction, as is also an extension of the railway system from Blantyre to Lake Nyasa. There are eight British steamers plying on the Zambezi and Shire between Chinde and the railway terminus. Main roads and "carrier" roads are open all over the Protectorate, the total mileage being 3,142. The Nyasaland road system is linked up with the Great North Road to Tanganyika Territory and Kenya Colony. There are five steamers on Lake Nyasa.

There are aerodromes suitable for all types of aircraft at Chilika, Zomba, and Lilongwe; and seasonal landing grounds are available at the principal district stations.

Mails to and from England, are despatched every week *via* Cape Town and Beira, and also by Imperial Airways *via* Salisbury.

### Telegraphs.

In 1925 the Government purchased the assets of the African Trans-continental Telegraph Company. The line is in use from Ujiji on Lake Tanganyika southwards through the Protectorate, *via* Blantyre and Tete, to Umtali in Southern Rhodesia and thence to Cape Town and England. The total mileage through the Protectorate is 1028 miles. Telegrams may also be transmitted over the railway line and the Portuguese line between Chinda and Tete. Since Government assumed control of the telegraph service extensions have been constructed providing 233 additional miles of line. The telephone service now links up Zomba, Blantyre, Limbe, Oholo, Luchenza, Mlanje, Chiradzula, and Chikwawa.

### Education.

An educational policy has been prepared by the Director of Education. Provision is made for the education of European children; native education in the hands of the missionary societies is controlled by the Government.

A grant of £10,498 was made by the Government in 1932.

### Currency and Banking.

By a Proclamation of February, 1894, the legal currency is declared to be English sterling, and by Proclamation No. 11 of 1933, Rhodesian Silver Coin was declared legal tender.

Banking operations in the Protectorate are governed by "The Banking Ordinance, 1902."

Two Banks have branches at Blantyre, the principal trading centre of the country, *viz.*, The Standard Bank of South Africa, Limited, and Barclays Bank (Dominion, Colonial and Overseas); the former has a branch at Zomba, and agencies at other centres.

There is a Post Office Savings Bank.

## PALESTINE.

Palestine is bounded on the north by the States of Syria and the Lebanon, which are under French Mandate, on the west by the Mediterranean Sea, on the south by the Egyptian province of Sinai (the boundary running from a point west of Rafa on the Mediterranean to a point two miles to the west of where the thalweg of the Wadi Araba joins the Gulf of Aqaba) and on the east by Trans-Jordan, which is included in the area of the Palestine Mandate.

The boundary on the north was determined by the Franco-British Convention of 23rd December, 1920, (Cmd. 1195) and in pursuance of that Convention was delimited between the Mediterranean and El Hamme in 1922. The Agreement between His Majesty's Government and the French Government giving effect to the delimitation is published as Cmd. 1910 (Treaty Series No. 13 (1923)).

The frontier runs from the Mediterranean at Ras al Nakura eastwards to Yarnun, thence N.E. to the village of Qadis, thence N.N.E. to Metullah and across the Jordan Valley to Tel Al Qadi (in Palestine) and Banias (in Syria), thence S.S.W. to Jisr Banat Yakub, thence southwards along the Jordan to the Lake of Tiberias, thence along the eastern shore of the Lake of Tiberias to a point almost due east of the town of Tiberias, thence S.S.E. to El Hamme Station on the Hejaz railway.

The frontier with Trans-Jordan is defined as a line drawn from a point two miles west of Aqaba on the Gulf of Aqaba up the centre of the Wadi Arabs, the Dead Sea and the River Jordan to the junction of the latter with the River Yarmuk, thence up the centre of the River Yarmuk to the Syrian frontier.

#### *The Natural Divisions of Palestine.*

Palestine comprises four zones of country:—

- (a) The hill country of Galilee and Judaea,
- (b) The five plains, including that lying in the rift of the Jordan Valley, which, from the north of Lake Tiberias to the Dead Sea, is actually below the level of the Mediterranean,
- (c) the Beersheba area, different in character and population from the rest of the country,
- (d) the desert area.

The five plains are:—The Acre Plain, the Plain of Esdraelon, the Huleh Plain, the Coastal Plain and the Plain of the Jordan.

#### *Geology.*

The Hill Country is composed principally of limestone which provides excellent building stone of various colours. Calcareous sandstone abounds along the coast and was used by the Crusaders for their maritime forts and castles (Atlit and Acre); the new Haifa breakwater has been constructed of a similar stone from Atlit. Of metallic minerals, copper ores and important deposits of manganese occur in the southern part of Palestine near the Gulf of Akaba. Petroleum and bitumen exudations are found around the southern part of the Dead Sea. This region and the area westward as far as the Mediterranean Sea is now being explored by Oil Companies. Of non-metallic ores, rock phosphate and bituminous limestone occur in large deposits on the slopes of the Judean Wilderness. Rock salt occurs in unlimited quantity in the salt dome of Jebel Usdum and has been used for the supply of the Jerusalem market. A sulphur deposit of commercial importance has been located south of Gaza. A good quality of gypsum is found at Menahemiya near Tiberias and impure varieties are found on the slopes of the Judean Wilderness. Palestine Potash Limited produces potassium chloride and bromine under the Dead Sea Concession, the former being exported to the eastern market and the latter to England.

There are hot springs of medicinal value at Tiberias and El Hamme where modern baths have been established.

#### *Climate.*

The climate of Palestine varies with the altitude: the coastal region is sub-tropical and humid; the elevated, hilly zone is drier and more temperate, while the Jordan Valley is hot and the rainfall slight. The summer months are almost rainless. January and February are, in general, the wettest months and the main rainfall occurs between November and April. The rainfall varies largely, from a minimum of 2½ inches in the south to a maximum of 31 inches in the north.

Water for domestic use is obtained in the larger towns from piped supplies: in the smaller towns and rural districts, from rock cisterns in which rain water is collected or from small springs or wells.

Jerusalem has a piped water supply, pumped partly from a spring about 15 miles south of the town by an installation made by the Military Authorities soon after the occupation, partly from Solomon's Pools, near Bethlehem, by an installation made by the Civil Administration, and partly from the springs

of Ain Fara, Ain Fawar and Wadi el Qilt by works constructed by the Municipality in 1926, 1931 and 1932.

In 1933 owing to the very poor rainfall in the previous winter, the springs of Arrub, Solomon's Pools and Ain Fawar totally failed.

The water supply is now obtained actually from Ain Fara and Wadi Qilt and approximately 450,000 gallons per day are pumped to Jerusalem from these sources.

In 1932-33 a new Town Service Reservoir was built, with a capacity of 2,200,000 gallons.

Considerable progress has been made towards the eradication of malaria, formerly so prevalent, by Government distribution of quinine in villages, oiling of wells and cisterns, provision of pumps, and drainage of swamps.

The country is relatively free from epidemic disease.

#### *Government.*

Under Turkish rule, part of Palestine was in the Vilayet (Province) of Beirut and part in the Sandjak (District) of Jerusalem. After its conquest in 1917-1918 by the British forces, the country remained under British Military Administration until July, 1920, when Sir Herbert Samuel was appointed High Commissioner, and a Civil Administration set up.

By the Treaty of Peace, signed at Lausanne on 24th July, 1923, Turkey renounced all rights over Palestine. The Principal Allied Powers had selected His Britannic Majesty as Mandatory at the Conference at San Remo, on 26th April, 1920. The terms of the Mandate were approved by the Council of the League of Nations on the 24th July, 1922, and the Mandate came into force on September 29th, 1923. The Mandatory is responsible, *inter alia*, for carrying into effect the terms of the Balfour Declaration of November 2nd, 1917, viz.:—"His Majesty's Government view with favour the establishment in Palestine of a national home for the Jewish people, and will use their best endeavours to facilitate the achievement of that object, it being clearly understood that nothing shall be done which may prejudice the civil and religious rights of existing non-Jewish Communities in Palestine, or the rights and political status enjoyed by Jews in any other country."

On the 1st September, 1922, a Constitution was promulgated.

Under this Constitution Palestine is governed by a High Commissioner, who is also the Commander-in-Chief, assisted by an Executive Council consisting of the Chief Secretary, the Attorney-General and the Treasurer: and by an Advisory Council consisting of heads of certain Departments.

An attempt was made in 1923 to create the Legislative Council provided for in the Constitution, but owing to the refusal of the Arabs to take part in the elections, it was replaced by the Advisory Council in order to secure the enactment of legislation until such time as a Legislative Council is created.

English, Arabic and Hebrew are the official languages of the country.

In 1921, a Supreme Moslem Council was constituted in order to control and manage Moslem Awqaf and Sharia Courts in Palestine. It consists of a President known also as Rais-Al-Ulema, and four members elected by secondary electors, who again are elected by all male Palestinian Moslems over 20 years of age. The Council nominates for approval by Government the officers of the Sharia Courts and appoints the Awqaf officers.

The Council has established a Moslem Orphanage in Jerusalem, and has carried out important repairs of sacred buildings and extensive tree planting on Waqf land and in Moslem cemeteries.

Regulations were made under the Religious Communities Ordinance, 1926, by the High Commissioner in 1927 for the organisation of the Jewish Community in Palestine. The Jewish community, like the Moslem and the various Christian communities enjoys autonomy in the administration of its internal affairs, religious cultural and communal: it has also power to levy rates on its members. The organs of the community are a Chief Rabbinate and local Rabbinical officers, an Elected Assembly, a General Council which is elected by the Assembly and represents the community in its dealings with the Government, and local communities.

Complete freedom in their communal affairs is allowed to those Jewish congregations who have exercised the option to remain outside the recognised community.

The Jewish Agency is recognized as the representative body of the Jewish people in all matters pertaining to the upbuilding of the Jewish National Home: it is represented in Palestine by an Executive whose headquarters are at Jerusalem.

The Palestine Government has maintained in force the status and privileges accorded to the different Christian Communities under the Ottoman regime.

The affairs of the larger towns are administered by Municipal Councils presided over by Mayors. In smaller towns and large villages Local Councils have been set up.

A Central Town Planning Commission supervises the activities of local town planning commissions with the object of securing the proper development of urban areas.

#### *Area and Population.*

The country is, at present, divided into three districts—the Jerusalem, Northern and Southern Districts—each administered by a District Commissioner.

Palestine, as administered by the Palestine Government, is nearly 10,000 square miles in extent.

The population of this territory taken by Census on November 18th, 1931, was 1,035,821, of which number 387,525 were living in 23 towns and large villages and 66,553 were nomad bedouins. An estimate of the settled population at 30.6.33 based on natural increase and excess of immigration is 1,038,331 of whom 723,427 are Moslems, 209,207 Jews, 95,165 Christians and 10,532 persons of other denominations or of no religious confession. To this must be added the nomad bedouin population (Moslem) about whom no figures are available except those given in the Census of 1931 (66,553). The chief town, Jerusalem, which had been in Moslem hands since 1244, and under Turkish rule since 1617, surrendered to General Allenby on December 9th, 1917. Its population in 1931 was 90,503. The Church of the Holy Sepulchre is visited annually by large numbers of Christian pilgrims, principally of the Orthodox and Coptic Churches. The site of Solomon's Temple is occupied by the Dome of the Rock, which contains a relic of Muhammad and the reputed sacrificial stone of Abraham. Bethlehem, the scene of Christ's Nativity and the birthplace of King David, is five miles south of Jerusalem. The Church of the Nativity, at the east end of the present village, is said to be the oldest Christian church in existence.

The population figures of the other principal towns at the date of the Census (18.11.31) were:—

Jaffa, 51,866; Tel-Aviv, 46,101; Haifa, 50,403; Gaza, 17,046; Nazareth, 8,756; Nablus, 17,189; Safad, 9,441; Tiberias, 8,601; Hebron, 17,631; Ramle, 10,347; Bethlehem, 6,814; Lydda, 11,250; Acre, 7,897.

An approximate estimate of the present population of the largest towns is as follows:—

Jerusalem, 95,000; Jaffa, 55,000; Tel-Aviv, 60,000; Haifa, 60,000; Nablus, 18,000; Gaza, 18,000; Hebron, 18,000.

#### *Jewish Colonisation.*

The total Jewish population of Palestine is estimated to be 210,000. Jewish agricultural settlements number 125 and have a population of over 50,000. Sixty-one of them are built on the land of the Jewish National Fund, established by the Zionist Organisation for the purpose of acquiring land to remain the property of the Jewish people. (The total possessions of the Jewish National Fund now amount to 320,000 metric dunams.) These settlements have been equipped and financed by the Keren Hayesod, the Colonisation Fund of the Jewish Agency.

Extensive colonisation work has been performed by the Palestine Jewish Colonisation Association, which took over colonies established by Baron Edmond de Rothschild and established new settlements, the total being about 30.

A number of settlements have been founded on the land acquired by the American Zion Commonwealth and on tracts purchased by private individuals. The total area in Jewish possession is now over 1,200,000 metric dunams, of which 125,000 are planted with oranges.

The Jewish urban population is approximately 160,000, its main centres being:—Jerusalem and suburbs 57,000, Tel-Aviv (a purely Jewish city) 60,000, Haifa 23,000, and Jaffa 8,000. There are about 3,100 Jewish factories and workshops employing 17,000 workers and representing a total capital investment of £P4,500,000, with a total annual output of £P3,500,000.

The local affairs of the smaller Jewish settlements are controlled by Vaads or Councils elected by the male and female residents who own registered holdings or pay taxes.

#### *Education.*

The approximate number of children in Palestine between the ages of 3 and 18 years was in 1931 307,000, of whom 231,000 were Moslems, 49,000 Jews and 27,000 Christians. The number of children who attended school in 1931–32 was 85,672, including 33,100 Moslems, 35,228 Jews, 16,760 Christians and 584 Druzes and Bahais.

The Arab Public System of Education, maintained by Government, embraced in that school year 305 schools with 24,837 pupils, the great majority of whom were Moslems. These schools included 2 Teachers' Training Colleges with 78 men and 63 women students, and 10 schools with 20 secondary classes containing 248 secondary pupils. The Kadoorie Agricultural School at Tulkarm had 40 boarders. This school also provides agricultural training for teachers in rural schools. Technical education is provided in most of the larger schools. The Law School in Jerusalem had 99 students.

The Jewish and Christian Communities provide, the former almost entirely and the latter to a very large extent, for the education of their own children.

The Hebrew Public System, controlled by the Jewish Agency, embraced 256 schools with 22,436 pupils. These included 4 Teachers' Training Colleges, with 133 men and 240 women students, and 6 schools with 26 secondary classes containing 863 secondary pupils. There were also 111 private Jewish schools with 11,970 pupils, including 10 secondary schools with 584 pupils.

There were 5 agricultural schools with 610 pupils, 2 junior technical schools with 80 students and a

Technical Institute at Haifa with 120 students. The Hebrew University at Jerusalem had 160 students and 54 auditors.

The Christian schools, maintained by various foreign and religious bodies, numbered 151, with 17,183 pupils. 31 of these schools had secondary classes, with 995 pupils; the 3 agricultural schools had 82 pupils. There were about 50 schools from which Attendance Returns were not received; the number of pupils in these schools was estimated at 2,500.

There were 38 private Moslem schools maintained by local communities and associations, with 4,302 boys and 910 girls. There were also 119 kuttabs, 28 in towns and 91 in villages. These provided for 3,984 children, of whom 280 were girls.

In 1932-33, the Arab Public System embraced 305 schools with 24,837 pupils and the Hebrew Public System, which was transferred in that year to the Jewish Community of Palestine (Knesseth Israel), embraced 267 schools with 24,400 pupils. The complete statistical returns for 1932-33 have not yet been completed.

Some non-Government schools receive a capitation grant-in-aid from the Department of Education, conditional on the acceptance of a certain measure of Government supervision and inspection. A block grant of £P.20,000 a year is made to the Jewish Community (Knesseth Israel) for its schools.

The Palestine Board of Higher Studies was established in 1924. The Government and many educational institutions are represented on it. It conducts the Palestine Matriculation Examination and the Palestine Diploma Examinations, both of which are public examinations recognised by Government. The Palestine Matriculation Examination is recognised by many British Universities.

### Justice.

The Courts in Palestine are either civil or religious courts. The former have jurisdiction over local subjects in all matters save those of personal status and Waqfs (charitable endowments), and over foreign subjects in all matters, subject to the provisions mentioned below.

There is a Magistrate's Court in every sub-district, and, in the larger towns, such as Jerusalem, Jaffa and Haifa, two or more such courts. The Magistrates are for the most part Palestinian and have jurisdiction in first instance in minor criminal cases for which the punishment is not more than one year's imprisonment or a fine of a hundred pounds or both, and in civil cases where the value of the subject-matter does not exceed £P.100. They also have jurisdiction in actions for the recovery of the possession of land.

There are four District Courts, each composed of a British President and two Palestinian judges. They serve respectively the sub-districts of Jerusalem, Hebron and Beersheba, Jaffa and Gaza, Nablus, Jenin, Tulkarm and Nazareth, and Haifa, Acre, Tiberias and Safad. They go on circuit within the area of their jurisdiction. A District Court has jurisdiction in first instance over all crimes except those punishable with death and in all civil cases outside the jurisdiction of a Magistrate. It also hears appeals from the decisions of Magistrates both in civil and in criminal cases, except in cases for the recovery of the possession of land. Crimes punishable with death are tried by a Court of Criminal Assize composed of the Chief Justice or Senior Puisne Judge of the Supreme Court sitting with the District Court.

In each district, in addition to the District Court, there is a Land Court, composed of the President of the District Court and a Palestinian judge of that court, which hears all cases in which the ownership of land is in issue.

The highest court in Palestine is the Supreme Court which is composed of a British Chief Justice and one other British judge and four Palestinian judges. The court sits in two capacities:—

- (1) As a Court of Appeal, in which capacity it has appellate jurisdiction in civil and criminal matters decided in first instance by the District Courts, the Land Courts and the Court of Criminal Assize;
- (2) As a High Court of Justice, in which capacity it hears applications of the nature of habeas corpus and mandamus proceedings.

Each division of the Court of Appeal is composed normally of three judges, while the High Court may sit with two judges. In either case a British judge presides. An appeal lies from the Supreme Court in civil cases to the Judicial Committee of the Privy Council where the value of the suit exceeds £500.

The Chief Justice of Palestine is *ex officio* President of the Full Court of Appeal of Egypt.

Special arrangements exist in the Beersheba sub-district, where minor cases are disposed of according to tribal custom by the Court of Sheikhs. The District Court of Jerusalem visits Beersheba every month to hear appeals from the local courts and to try more serious criminal cases.

All matters of personal status affecting Moslems are within the jurisdiction of the Sharia Courts. A Sharia Court consists of a Kadi, and appeals from his decision lie to the Moslem Court of Appeal, which is composed of a President and two members.

Jewish Religious Courts have exclusive jurisdiction in certain matters of personal status of Jews, and jurisdiction by consent in other matters. An appeal from the decision of the Jewish Religious Courts lies to the Rabbinical Council.

The different Christian communities (such as the Latin and Orthodox) have similar jurisdiction to that of the Jewish Courts.

Special provisions exist with regard to the trial of foreigners. The general effect of these rules is that where a foreign subject is charged with an offence other than a petty offence, he may claim to be tried by a British magistrate or by a court containing a majority of British judges. In the Court of Appeal he can claim a majority of British judges and in matters of personal status that the action be heard by the British President.

### Security.

The Police establishment in December, 1932, was 146 Officers (including 57 British Officers) and 2,464 other ranks (including 650 British N.C.O.'s and Constables). 1,495 serious offences against property were reported in 1932, and six death sentences were carried out.

There are Central Prisons in Jerusalem and Acre for long-term prisoners, and a Female Prison in Bethlehem. There are also two Jail Labour Companies of approximately 350 each, the prisoners of which are employed on public works.

The garrison in Palestine and Trans-Jordan in 1933 consisted of the following units:—

Air Headquarters Palestine and Trans-Jordan (Jerusalem), which administers the following Army, Royal Air Force and Trans-Jordan Frontier Force units:—

Army:—

Two Battalions of Infantry, one stationed at Jerusalem and one at Haifa.

One W/T Company, Royal Corps of Signals.

One Company, R.A.S.C.

R.A.S.C. Supply Depot (Sarafand).

Detachment R.A.M.C.

**Royal Air Force :—**

One Squadron (Day Bomber) Aircraft.  
 One Flight (General Purpose) Aircraft.  
 (The H.Q. and two Flights of this squadron are stationed in Egypt).

One Armoured Car Company.  
 Meteorological Station, Amman and Ramleh.  
 R.A.F. Supply Depot, Sarafand.  
 R.A.F. General Hospital, Sarafand.

**Trans-Jordan Frontier Force.**

Regimental Headquarters.  
 Mechanical Transport Troop, Attached to  
 Workshops, Regimental  
 Depot Training Cadre. Headquarters.  
 Three Squadrons Cavalry.  
 Two mechanised companies.  
 Six Troops Reserve (Dismounted).

**Industry and Trade.**

The principal industries of export importance are those of the cultivation of citrus fruits in the Southern District and the sub-district of Haifa, soap-boiling in Nablus, Jaffa and Haifa; wine-making, especially in the Jewish Colonies, Zikhron-Ya'a'acov, Rishon-le-Zion and Petah-Tikva; olive oil in Nablus, Acre, Haifa and the district round Jaffa. Cement, textile goods and a variety of other articles are exported to Syria and other neighbouring countries. Durrah, lentils, sesame, barley and edible oils are also exported in considerable quantities, but this largely depends on favourable climatic conditions.

Oranges, grown chiefly in the Jaffa District, are exported to the United Kingdom and Europe, exports during 1932 amounting to 3,524,599 cases valued at £P.1,701,001. The area under citrus cultivation continues to increase.

Melons are exported mainly to Egypt and Syria.

The principal imports are rice, flour, sugar, petroleum products, textiles, building materials, automobiles, industrial machinery.

There is a considerable number of small factories and workshops, including flour mills, soap, brick and tile, knitted goods, textile, artificial teeth, iron and wood furniture, matches, oil mills and distilleries. Of the larger industries, a cement factory produces over 90,000 tons annually, 12 tobacco and cigarette factories produce some 25,000 kilos of cut tobacco, 494,000 kilos of cigarettes, 96,000 kilos of tobacco and 5,000 kilos of snuff, and an oil factory produces over 10,000 tons of refined oil.

The Hydro-electric Power Station of the Palestine Electric Corporation at Jisr Mejamie now supplies current for light and power to Haifa, Tiberias, Jaffa and many rural centres. The Jerusalem Electric and Public Service Corporation serves Jerusalem and its environs, including Ramallah and Bethlehem.

**Agricultural and Forestry.**

Modern methods are making headway and hold out hopes of development and progress. The country is generally fertile, and cereals, wine, oranges, grape fruit and lemons, olives and various fruits are produced, while sheep and goats thrive in the lowlands and in the mountains.

For the most part the crops are raised without irrigation, except where springs exist and in the eastern portion of the Plain of Esdraelon.

There are generally two crops harvested each year—the cereal and leguminous crop in May to June and a summer crop in August and September.

The yields of the main crops in 1931 to 1933 were :

	1931	1932	1933
	Metric tons	Metric tons	Metric tons
Wheat .. ..	79,650	53,100	44,447

Thirteen Government forests nurseries were maintained during 1932 and produced approximately 1 million forest plants. Planting, begun in 1920, is being considerably extended. By the end of 1932 Government had planted 4,000 acres. Special attention is being given to the reclamation of sand dunes.

Nearly 172,000 acres of state forests have been reserved.

Government Agricultural and Horticultural Experiment Stations have been organised at Acre, Beisan, Nablus, Jerusalem, Jericho, Sarafand, Farradih (near Safad) and Majdal (near Gaza). The Acre Station also includes a Stud Farm.

**Customs.**

The Customs Tariff, which is non-differential, is fixed partly on a specific and partly on an *ad valorem* basis: 60% of imports pay specific charges, principally petrol, kerosene, sugar, rice, coffee, wheat, flour, leaf tobacco, cigarettes, wood and timber for building, rubber tyres and tubes, boots and shoes. *Ad valorem* duties are levied on silk (20%), and woollen (12%) goods and motor-cars (25%).

The revenue from import duties in 1932 was £P.1,169,924.

19.98% of imports came from the United Kingdom, 2.80% from other parts of the British Empire, 15% from Egypt, 10.47% from Syria, 9.98% from Germany and 6.68% from Roumania.

Exports to the United Kingdom constituted 56.35% of the total in 1932, to other parts of the British Empire 3.36%, to Germany 13.97%, to Syria 9.65% and to Egypt 5.41%.

**Shipping and Communications.**

The chief ports of Palestine are Haifa and Jaffa. The new harbour at Haifa, started in 1929, was completed in 1933, and adequate facilities for ordinary passenger and cargo vessels, both at moorings and alongside the new quays with transit sheds, road, railway and other services, have been provided.

Acre and Gaza are also ports of entry, but their trade is small and is carried mainly by sailing vessels.

The following are the principal shipping lines which call at Haifa and Jaffa :—

Lloyd Triestino, Servizzi Maritimi, Messageries Maritimes, Fabre Prince, Moses, American Export, Deutsche Levante. Tourist steamers of various lines call at Haifa during February, March and April.

In 1932, 974 steamers, totalling 2,003,111 tons, and 1,969 sailing vessels, totalling 55,194 tons, called at Palestine ports.

Palestine possesses no shipping of its own, other than small sailing vessels and power launches.

Postal despatches are exchanged daily (in some cases thrice daily) between all principal towns. There is also a daily exchange of despatches with Egypt, Syria and Trans-Jordan. Direct mails for Great Britain are despatched thrice weekly by ordinary mail and thrice weekly by air mail.

There is a bi-weekly overland desert mail service with Iraq and Persia, via Amman.

Imperial Airways have an aerodrome at Gaza which is used in connection with the air mail services to and from Great Britain, Iraq and India.

All the principal towns are connected by telegraph and telephone. There is direct telegraphic communication with Cyprus, Egypt, Syria and Trans-Jordan, and a trunk telephone service with Egypt, Syria and Trans-Jordan. The trunk service with Egypt affords radio-telephonic facilities with Great Britain, certain other countries in Europe, Australia, America, India and South Africa.

In 1932 there were conveyed 12,389,400 letters, 918,700 postcards, 6,446,700 printed communications and samples, 135,491 parcels, 252,600 telegrams were transmitted. Total length of main telegraph and telephone lines, 13,556 kilometres; local lines, 16,881 kilometres. Number of telephone subscribers 3,300; telephone instruments in use, 5,248.

The total length of the Palestine Railways, including branch lines and sidings, is approximately 714½ miles, as follows:—

*Standard Gauge (4' 8½").*

Kantara-Rafa.. .. .	139
Rafa-Haifa .. .. .	183½

The Kantara-Rafa Section is operated by the Palestine Railways on behalf of His Majesty's Government.

There is through communication with Egypt, and trains connect at Kantara West daily with Cairo, Alexandria, Port Said, Suez and other parts of Egypt. Goods vehicles are sent across the canal by means of a truck transporter.

Sentinel-Cammell Steam Rail Cars are in use on the Haifa-Lyddah-Khan Yunis, Haifa-Acre and Haifa-Samakh Sections.

East of Haifa the Palestine Railways Administration extends to Ma'an in Trans-Jordan, but with a break between Samakh and Nassib which is operated by the Chemins de fer de Hijaz authorities.

There are 590 miles of metalled roads in Palestine open for traffic throughout the year which are extensively used by motor transport, and in addition, many hundreds of miles of tracks passable for wheeled traffic of all kinds during dry weather.

*Banking, Co-operatives and Currency.*

The most important bank in Palestine is Barclays Bank (Dominion, Colonial and Overseas), with branches at Jerusalem, Jaffa, Tel-Aviv, Haifa, Nazareth, Nablus and an agency at Acre. The Anglo-Palestine Bank has its head office in Jerusalem with branches at Jaffa, Tel-Aviv, Haifa, Tiberias, Safad, Petah Tikvah and an agency at Rehovoth. In addition there are branches in Jerusalem of the Ottoman Bank (also in Haifa, Jaffa, Tel-Aviv, Nablus and Amman), and the Banco di Roma (also in Jaffa, Haifa and Tel-Aviv). There is a Workers' Bank at Tel-Aviv and Banks have been established for granting building loans to Co-operative Societies.

The Co-operative movement is extensively established among the Jewish population, both urban and rural. There is a Registrar of Co-operative Societies whose duties include the encouragement of the growth of a similar movement among the Arab farmers.

A Currency Board was appointed in London in 1926 in order to introduce and control a Palestine currency based on the pound sterling; and the new currency was issued on the 1st November, 1927, under the authority of an Order of His Majesty in Council dated the 7th of February, 1927.

The standard of currency is the Palestine pound, divided into 1,000 mils. The Palestine Currency Order provides for a gold coin of one Palestine pound containing 123.27447 grains of standard gold (the equivalent of the English sovereign). It is not intended at present to introduce gold coins. The Currency Board has issued silver coins of 100 and 50 mils, nickel bronze coins of 20, 10 and 5 mils, bronze coins of 2 and 1 mil, and currency notes of £P.100, £P.50, £P.10, £P.5, £P.1 and 500 mils. The currency notes are legal tender for the amounts expressed therein. Silver coins are legal tender for the payment of £P.2, nickel bronze coins of 20 and 10 mils are legal tender for the payment of an amount not exceeding 200 mils, and coins of lower denomination are legal tender for an amount not exceeding 100 mils. The amount of Palestine currency in circulation at the 31st August, 1933, was:—Coins, £P.369,800; notes, £P.2,896,864.

The metric system is followed by the Government and local authorities, but the use of local weights and measures is still permitted for the general public.

*Antiquities.*

The Administration of the Antiquities Service in Palestine is controlled by the Department of Antiquities, working under the Antiquities Ordinance (1929) and Regulations (1930-32). During 1932, twenty licences to excavate or make soundings were issued. The results of the Department's research work, together with summaries of the results of licensed excavations conducted by non-Government bodies, are published in the Quarterly of the Department of Antiquities in Palestine. (Published by Mr. Humphrey Milford, Oxford University Press, London, E.C.4.)

The Palestine Archaeological Museum, built with funds made available by Mr. John D. Rockefeller, Junior, is in course of construction.

For further information on all the above subjects see the "Handbook of Palestine" (Luke, H. C. and Keith-Roach, E.), published in 1930 by Macmillan and Co., and issued under the authority of the Government of Palestine, the Annual Blue Book of the Palestine Government, obtainable from the Superintendent of Printing and Stationery, Jerusalem, and the Annual Reports on the Administration of Palestine and Trans-Jordan, published by His Majesty's Stationery Office.

## ST. HELENA

*Situation, Area, &c.*

St. Helena is an island in the South Atlantic Ocean, 700 miles S.E. of Ascension, and 1,200 miles from the coast of Africa, in 15° 55' S. lat., and 5° 42' W. long. It is 10½ miles long and 6½ broad, covering an area of 47 square miles, or about 30,000 acres (a little larger than Jersey). The distance from Southampton is 4,477 miles, and from Capetown 1,695 miles. The usual mail passage is, from England, 17 days, and from Capetown, 6 days.

A census taken in April, 1931, showed a population of 3,995, of whom 48 were members of the Garrison.

The capital and only town is Jamestown, on the N.W. of the island, with a population in April, 1931, of 1,381. The climate is mild, and varies little, the thermometer in Jamestown ranging in summer between 68° and 84°, and in winter between 57° and 70°. The country is 10° colder. The rainfall for the years 1929, 1930 and 1931 was 30, 30.30 and 31.83 inches respectively; 1932 rainfall, 30.38. The island is very healthy. The death-rate per 1,000 inhabitants was for 1928, 18.17; for 1929, 10.4; for 1930, 10.24; for 1931, 14.77; and for 1932, 13.99; and the birth-rate per 1,000 inhabitants for 1929, 31.46; for 1930, 30.98; for 1931, 30.8; and 1932, 36.65.

*History.*

St. Helena, then uninhabited and well wooded, was discovered by the Portuguese Commander Juan de Nova Castella, on St. Helena's day, May 21st, 1502. The Portuguese appear to have kept the situation of the island a secret from other European nations until 1588, when it was visited by Captain Cavendish, on his return from a voyage round the world. They built a church there, but made no permanent settlement. After Captain Cavendish's visit, the island became a port of call for ships of various nations voyaging between the East Indies and Europe. In 1633, Jacques Spec formally annexed it on behalf of the States-General; but no attempt to occupy it was made by the Dutch. It was annexed and occupied by Captain John Dutton, who was sent out by the East India Company for the purpose with an expedition which arrived at St. Helena on 5th May, 1659. In January, 1673, the Dutch seized it, but they were driven out in May by Captain Munden, of the English Navy. A charter was issued by Charles II. to the East India Company for its possession in December, 1673, and it remained under that Company, with the exception of the period of Napoleon's imprisonment there, till 22nd April, 1834, when it was brought under the direct government of the Crown by an Act of Parliament of 1833.

*Education and Local Government.*

The Government maintain 3 schools, having 313 scholars. There are also 5 endowed and private day schools, three of which are aided by Government, having 424 scholars. School attendance is compulsory under Ordinance No. 11 of 1903, and fees of 1d. a week per child are charged.

The only local authority is the Poor Relief Board, the revenue and expenditure of which for 1928 was 916l. and 916l.; for the year 1929 was 963l. and 943l.; for the year 1930 was

9017. and 8421. ; for the year 1931 was 9741. and 8634. ; and for the year 1932 was 1,0251. and 9671. respectively.

### Industry, Trade and Customs.

St. Helena is well watered by clear springs, which are abundant. It is situated in the heart of the South Atlantic trade wind, blowing from the S.E. for about 330 days in the year, and in the direct track of vessels homeward bound from the East round the Cape of Good Hope. Previous to the opening of the Red Sea route it was a port of call for a vast quantity of shipping and passengers to and from India and other parts of the East, and in consequence of its importance in connection with the Eastern trade, large establishments were maintained, both civil and military. For many years it was also a depot for liberated Africans landed from slavers captured by the West Coast Squadron. As early as 1818 a law was passed that all future children born in the Island should be free.

Beyond the supply of the passing shipping it has never produced any article of export properly so called, except flax fibre (*phormium tenax*). The company which started this industry failed from bad management in transporting the green leaves to town for treatment. For every 100 tons so transported at a heavy cost the yield was only about three tons of fibre, though, under present conditions of working, ten tons of phormium leaves give one ton of fibre and a quarter ton of tow. The industry was re-started with the help of a grant from the Home Exchequer. The Government Mill opened in 1907, but was closed down in May, 1910, on exhaustion of millable leaf. It was re-opened on 13th November, 1911, and still continues to run; but Government has handed over control to a Limited Liability Company. This company went into voluntary liquidation in 1930 and the Mill is now on lease to Messrs. Solomon & Co., of this Colony.

There are now nine mills operating in the Island, the amount of fibre and tow exported in 1931 being 644 and 296 tons and in 1932, 234 and 144 tons respectively. A rope and twine industry was also established in 1925, the amount of rope and twine exported during 1931 was 23 tons; 1932, 37 tons.

In 1932 the land under cultivation of Flax was estimated at 3,000 acres.

A lace-making industry was established in August, 1907, with the help of a grant from Imperial funds.

The number of ships calling at Jamestown (now a free port) for supplies, including steamers and ships of war was 39 in 1931; 43 in 1932. It is a port of registry.

The chief industries are phormium fibre, lace-making, aloe and bead work, fishing and agriculture, the main arable crop being phormium tenax.

The Government savings bank was established in 1865 (the amount standing to the credit of depositors on 31st December, 1931, was 18,7701. ; 1932, 20,6201.), and the Government issues bills of exchange on England at par.

There are excellent facilities for the supply of coal and water to ships.

The customs duties are mainly specific. The tariff is preferential. A number of essential commodities are exempt from duty if they are the growth, produce or manufacture of the British Empire. Other goods, if of non-British origin, are subject to a surtax of one-quarter of the ordinary duty.

### Means of Communication.

Steamers arrive from England at regular intervals of 4 weeks, and proceed to the Cape and Natal, steamers arrive from thence at the same interval and proceed to England. The interval between the arrival and departure of the mails is 6 days. The rate of postage to the U.K., India, and British Possessions is 2d. for the first oz. and 1½d. for each additional ounce; to other parts of the world 3d. for the first oz. and 1½d. for each additional ounce. There is no internal post, but there are 41 miles of telegraph, constructed by the Colonial Government with the assistance of a loan from the Colonial Development Fund of 4751. The cable from the Cape (which is being worked by the Eastern Telegraph Company with a staff of 5, including a Manager) reached St. Helena at the end of 1899, and was carried forward to Ascension by February, 1900. It is completed to St. Vincent.

### Constitution.

The Government is administered by a Governor, aided by an Executive Council.

The Governor alone makes Ordinances, there being no Legislative Council, but power is reserved to legislate by Order of His Majesty in Council.

## ASCENSION.

The island of Ascension, 34 square miles in area, lying in the South Atlantic, lat. 7° 53' S. and long. 14° 18' W., was taken possession of in 1815, and, until 1922, it was under the supervision of the Admiralty and a small naval station was maintained there.

By Letters Patent dated 12th September, 1922, it was made a Dependency of St. Helena and placed under the control of the Secretary of State for the Colonies.

It is famous for its turtles, large numbers of which are caught between December and May. It is connected by telegraph with St. Vincent, St. Helena, and Sierra Leone, and is an important cable station of the Eastern Telegraph Company. It is a barren, rocky peak of purely volcanic origin, and destitute of vegetation, except at the highest point, 2,870 feet high, but has been cultivated to an extent permitting the maintenance of about 600 sheep and cattle.

Population at 1931 Census, 188, of whom 126 are St. Helenians.

## SEYCHELLES.

*Description.*

The Seychelles Islands are situated between the parallels of S. lat. 4° and 10°. The total area of the Colony and its dependencies is 156½ sq. miles. The number of islands under the Seychelles Government is 92.

The death-rate in 1932 was 12·86 per 1,000; the birth-rate being 30·95 per 1,000.

Mahé is the largest and most populous of the Seychelles Islands. It is 17 miles long and 3 to 7 miles broad, and is estimated to contain 55½ square miles. It has about 105 miles of good roads and paths, and communication between all the districts of the island is easy.

It is distant from Mauritius 934, from Madagascar 600, and from Zanzibar 970 miles. It is fertile, and healthy. The shade temperature seldom exceeds 84, and falls frequently at night to 72, and the records taken on the hills are several degrees lower. The rainfall at Victoria was in 1932, 75·60 inches.

The island rises abruptly from the sea, and the highest peak reaches the elevation of 2,997 feet. Victoria, the capital of the island, is situated in a valley in the north-east, and has a safe and commodious harbour, provided with a lighthouse showing a white flash of 0·7 second duration every 6·7 seconds.

The other chief islands are Praslin (9,700 acres); Silhouette (4,900 acres); La Digue (2,600 acres), Curieuse (900 acres); Félicité (689 acres). North Island (525 acres); St. Anne (500 acres); Providence (500 acres); Frigate (700 acres); Denis (340 acres); Cerf (290 acres); and Bird or Sea Cow Island (160 acres).

The following islands are also dependencies of Seychelles:—The Amirante, Alphonse Island, Bijoutier Island, St. Francois Island, St. Pierre Island, the Cosmoledo Group, Astove Island, Assumption Island, Coetivy, Aldabra and Farquhar Island.

The island of Coetivy, formerly a dependency of Mauritius, was transferred to Seychelles by Letters Patent in 1907, and the Farquhar Island in 1922.

*History.*

The islands are believed to have been discovered by a Portuguese named Pedro Mascaregnas, in 1505, but the discovery was not apparently followed by any attempt at colonisation.

Previous to the French occupation they were the resort of pirates or corsairs who infested the Indian Ocean, some of whose names are borne by descendants in Mahé at the present time.

Under the Government at Mauritius of Labourdonnais, whose name they originally bore, their position was first defined in 1743, and M. Picault, who took possession of the Islands in the name of the King of France, called the principal island Mahé. In 1756 the group was re-named the Seychelles Islands, in honour of the Vicomte Moreau des Sechelles, who was Controller-General of Finance under Louis XV., from 1754 to 1756.

The natural resources of the Islands, and their freedom from hurricanes, induced the French to transplant from the Isle de France (now Mauritius) cinnamon, cloves, and nutmegs, under the directions of M. Poivre. Much secrecy was at first observed in regard to the existence of these retired plantations, the object being to wrest from the Dutch the lucrative spice monopoly which the

colonies of that nation then enjoyed in Europe from their own possessions.

The rumours of the war that broke out between France and England in 1778, induced the then French Governor of Mauritius, Count de Souillac, to issue peremptory orders that in the event of an attack the spice plantations should be at once destroyed. Soon afterwards a French ship from Madagascar, having slaves on board, called at Mahé to take in wood and water, but fearing that the English might be in possession, adopted the ruse of hoisting the English flag. The small French force at Mahé had already been withdrawn, and the officer in charge, knowing that resistance was useless, at once set fire to the whole of the spice trees, each of which had previously been surrounded with dry wood and inflammable material.

During the war of the French Revolution Mahé was extremely useful to French ships as a place of refuge and refitment, but on the 17th May, 1794, it was captured by Captain Newcome, of His Majesty's ship "Orpheus."

The last French Governor, M. De Quincy, who was born at Paris in November, 1748, became, after Lieutenant Sullivan, R.N., who had been placed in charge, knowing that resistance was useless, at once set fire to the whole of the spice trees, each of which had previously been surrounded with dry wood and inflammable material. He remained for eighteen years in the service of the British Government, and died on the 10th July, 1827.

The capitulation was renewed in 1806 by Capt. Ferrier, of His Majesty's ship "Albion," but it was not until the capture of Mauritius in 1810, that Seychelles was formally taken possession of by the appointment of an Agent, and incorporated as a dependency of that Colony. From 1794 to 1810 Seychelles, though nominally a British Colony, seems to have been administered as a French Colony, and all Civil Status Acts ran in the name of the French Government. A Board of Civil Commissioners was appointed in 1872, when the finances of the Seychelles were separated from those of Mauritius. The title of the Head of the Government was changed from that of Civil Commissioner to that of Chief Civil Commissioner. The powers of the Board were further enlarged in 1874 by another Order in Council.

The increasing importance of these islands was considered sufficient to warrant an alteration in the constitution of the Government, and in December, 1888, an Order in Council was passed creating the office of Administrator, and nominating an Executive and Legislative Council. In 1897, by Letters Patent and Royal Instructions, the Administrator was given full powers as Governor, and Seychelles was practically separated from Mauritius. The separation was completely carried out by Letters Patent of 31st August, 1903, by which Seychelles was erected into a separate Colony under its own Governor and Commander-in-Chief.

An education grant of Rs. 22,464 is given for assisting schools of all denominations, of which there were 25 in 1932. All schools are now denominational, and Government Scholarships and Awards are offered both to primary and secondary schools. Technical education is dealt with by means of Government apprenticeships. All schools are inspected by the Inspector of Schools.

*Communications, &c.*

The British India Company's steamers call regularly once every 4 weeks from Bombay to East African Ports, and once every 8 weeks on their return voyage from Mombasa to Bombay. The

Royal Dutch Mail Line steamers call once every 8 weeks on their return journey from Mombasa to Penang and Batavia and the Scandinavian East African Line steamers call irregularly at this port on their way to Europe from Madagascar. The Admiralty used Victoria as a coaling station. Seychelles is now included in the East Indies Naval Station.

Telegraphic communication with Mauritius and Europe via Zanzibar was completed in November, 1893. Direct cables to Aden and Colombo were completed in 1922. The rates for telegrams from Seychelles are 75 cts. per word to Mauritius or Zanzibar, and Ra. 1.50 to Aden or Europe.

The present letter rate of postage to the United Kingdom, India, Dominions and British Possessions is 12 cents; to other countries of the Postal Union 20 cents. The parcels post has been in full operation since April, 1890. The cash on delivery service for parcel post was introduced in 1911. The money order system is in operation with England and numerous other countries and colonies, including Bombay, Aden, Zanzibar, Mauritius and Ceylon.

#### *Savings Bank and Currency.*

A Government Savings bank was established in March, 1897, and at the close of the year 1932, the amount standing to the credit of depositors was Ra. 162,452. All the Savings Bank funds are invested. The branches which were established at Anse Royale and La Digue were closed during 1906, as there were no transactions.

The currency consists of the Indian rupee and the Mauritius subsidiary coinage. Accounts are kept in rupees and cents. Indian, Mauritius, and Seychelles Government Notes also circulate freely.

#### *Local Boards.*

A Local Board of Health, vested with powers and duties somewhat similar to those entrusted to Municipal Bodies, was created in Victoria at the end of 1900. In 1922 the title was changed to that of "The Victoria Town Board." Similar Boards were created for the Islands of Praslin and La Digue at the end of 1901, and for the South Mahe District in March, 1902.

#### *Products and Industries, Trade and Customs, &c.*

In 1932 the chief exports were copra, 4,704 tons; guano, 14,213 tons; tortoise-shell, 1,434 kilos.; vanilla, 1,266 kilos; tripana, 4,107 kilos.; essential oils, 52,153 kilos.

In Victoria, there is a Botanic Garden containing many interesting tropical plants.

More especially at Praslin, though also in other parts of the group, are to be found the celebrated coco-de-mer, with the leaves of which beautiful hats and delicate basket work are made by the natives.

The Aldabra group of islands under the Seychelle administration is the habitat of the gigantic land tortoises; numerous living specimens are, however, to be seen in Mahé and the neighbouring islands.

The revenue is derived principally from specific import duties, which are light, and an *ad valorem* duty of 15 per cent. on articles not otherwise enumerated (10 per cent. surtax on Customs Imports duty was imposed for the period of the War and is still in force), licences, an income tax on a graduated scale and a tax on immovable property and stamps. An export duty of Ra. 1 a ton is levied on guano, prepared fertiliser, and mangrove bark, and Ra. 1 per hectolitre of whale

oil. The Customs Tariff is partly *ad valorem* and specific and provision for Empire preference has been included in 1932.

The percentage of trade is as follows:—

	Imports.	Exports.
	%	%
United Kingdom ..	27	26
British Empire ..	40	51
Foreign Countries ..	33	23

There are lighthouses on Denis Island and Mamelles Island (9 miles north-east of Mahé, long. 55° 37' 20" E., and lat. 4° 29' S.), and in Victoria Harbour. The light installed on Capota Point, discontinued on the 31st July, 1922, was re-exhibited on the 4th December, 1931. The quarantine station is placed on Long Island opposite to Victoria.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific information required.

There are numerous other  
Mammals and birds which  
are found in the  
Florida State. The  
State is also a  
great source of  
game and fish.

Royal Dutch Mail Line steamers call once every 8 weeks on their return journey from Mombasa to Penang and Batavia and the Scandinavian East African Line steamers call irregularly at this port on their way to Europe from Madagascar. The Admiralty used Victoria as a coaling station. Seychelles is now included in the East Indies Naval Station.

Telegraphic communication with Mauritius and Europe via Zanzibar was completed in November, 1893. Direct cables to Aden and Colombo were completed in 1922. The rates for telegrams from Seychelles are 75 cts. per word to Mauritius or Zanzibar, and Rs. 1.50 to Aden or Europe.

The present letter rate of postage to the United Kingdom, India, Dominions and British Possessions is 12 cents; to other countries of the Postal Union 20 cents. The parcels post has been in full operation since April, 1890. The cash on delivery service for parcel post was introduced in 1911. The money order system is in operation with England and numerous other countries and colonies, including Bombay, Aden, Zanzibar, Mauritius and Ceylon.

#### *Savings Bank and Currency.*

A Government Savings bank was established in March, 1897, and at the close of the year 1932, the amount standing to the credit of depositors was Rs. 162,452. All the Savings Bank funds are invested. The branches which were established at Anse Royale and La Digue were closed during 1906, as there were no transactions.

The currency consists of the Indian rupee and the Mauritius subsidiary coinage. Accounts are kept in rupees and cents. Indian, Mauritius, and Seychelles Government Notes also circulate freely.

#### *Local Boards.*

A Local Board of Health, vested with powers and duties somewhat similar to those entrusted to Municipal Bodies, was created in Victoria at the end of 1900. In 1922 the title was changed to that of "The Victoria Town Board." Similar Boards were created for the Islands of Praslin and La Digue at the end of 1901, and for the South Mahé District in March, 1902.

#### *Products and Industries, Trade and Customs, &c.*

In 1932 the chief exports were copra, 4,704 tons; guano, 14,213 tons; tortoise-shell, 1,434 kilos.; vanilla, 1,266 kilos.; tripangs, 4,107 kilos.; essential oils, 52,153 kilos.

In Victoria, there is a Botanic Garden containing many interesting tropical plants.

More especially at Praslin, though also in other parts of the group, are to be found the celebrated coco-de-mer, with the leaves of which beautiful hats and delicate basket work are made by the natives.

The Aldabra group of islands under the Seychelle administration is the habitat of the gigantic land tortoises; numerous living specimens are, however, to be seen in Mahé and the neighbouring islands.

The revenue is derived principally from specific import duties, which are light, and an *ad valorem* duty of 15 per cent. on articles not otherwise enumerated (10 per cent. surtax on Customs Imports duty was imposed for the period of the War and is still in force), licences, an income tax on a graduated scale and a tax on immovable property and stamps. An export duty of Rs. 1 a ton is levied on guano, prepared fertiliser, and mangrove bark, and Rs. 1 per hectolitre of whale

oil. The Customs Tariff is partly *ad valorem* and specific and provision for Empire preference has been included in 1932.

The percentage of trade is as follows:—

	Imports.	Exports.
	%	%
United Kingdom ..	27	26
British Empire ..	40	51
Foreign Countries ..	33	23

There are lighthouses on Denis Island and Mamelles Island (9 miles north-east of Mahe is long. 55° 32' 20" E., and lat. 4° 29' S.), and in Victoria Harbour. The light installed on Caprice Point, discontinued on the 31st July, 1922, was re-exhibited on the 4th December, 1931. The quarantine station is placed on Long Island opposite to Victoria.

## SIERRA LEONE.

*Situation and Area.*

The territory known as the Colony and Protectorate of Sierra Leone is an area of some 27,925 square miles, roughly circular in shape, lying between 6° 55' and 10° of N. lat., and 10° 20' and 13° 25' of W. long. The sea coast, 210 miles in length, extends from Kiragba at about lat. 9° N., on the border of French Guinea, to the Mano River at lat. 6° 55' N. on the border of the Republic of Liberia.

The Colony portion of this area, i.e. the territories acquired by the Crown by Treaty of Cession or otherwise consists of the following:—the Sierra Leone Peninsula in which is situated Freetown (the seat of Government), Sherbro Island, the islands of Tasso, Bananas, Turtles, York, Buna, Shaye and other small islets, the Lower Loko and Matoki Chiefdoms in the Northern Province, and the Bumpo, Kagboro, Bagru, Mano Bagru, Timdel, Bendu, Cha, Mongoba Bullon, Mesi Krim, and part of the Manoesa Krim Chiefdoms in the Southern Province. The Crown has also acquired a strip of land, varying in depth from a quarter of a mile to one mile throughout the whole coast line not included in the areas specified above. Of these areas the Peninsula of Sierra Leone, Tasso Island, Banana Islands, York Island, and the township of Bonthe in Sherbro Island, only, are administered as strictly Colony; the other areas are administered as part of the Protectorate.

*History.*

The Colony of Sierra Leone originated in the sale and cession of a portion of land by "King" Nembana and his subordinate chiefs to Captain John Taylor, of His Britannic Majesty's brig "Miro," on behalf of the "free community of settlers, their heirs, and successors, lately arrived from England, and under the protection of the British Government." This portion of land was described in the treaty as extending from the bay commonly called Frenchman's Bay, but of which the name was changed to St. George's Bay, coast-wise up the River Sierra Leone to Gambia Island, and southerly or inland from the riverside 20 miles. The treaty is dated 22nd August, 1788.

The main purpose of the Colony in its inception was to secure a home on the African Continent for a number of natives of Africa, and some others, who from various circumstances had been separated from the countries of their origin, and were destitute in and about London. Subsequently the Colony was used as a settlement for Africans rescued from slave-ships during the period when England was putting forth her efforts for the suppression of the over-sea traffic in slaves. The territory of the Colony received additions from time to time by various concessions from the native chiefs. Thus, on the 10th July, 1807, "King" Farima and "King" Tom ceded all the land they possessed in the peninsula of Sierra Leone lying to the westward of the Colony; and in 1861 Bai Conteh, "King" of Kwaia, with his chiefs, ceded a portion of the Kwaia country abutting on the Colony of Sierra Leone, measuring 10 miles in width and 16 miles in length from the River Sierra Leone to the River Ribbi, and particularly described as to its inland boundary in the Treaty of Cession. In 1825 the Governor of Sierra Leone made a treaty of cession with various Chiefs in, and in the neighbourhood of, Sherbro Island, for the purpose of adding these countries to the territories of the Colony. The treaty, not immediately ratified by the Crown, was revived by a new agreement made in 1882. Other Treaties of Cession were made from time to time.

On August 21st, 1896, a Proclamation was issued declaring a Protectorate over the Hinterland of Sierra Leone, and Ordinances were passed providing for the administration of this Protectorate, which, by Order-in-Council is divided into two Provinces as follows:—

Northern Province Districts.—Port Loko, Karene, Bombali, Kambia and Koinadugu,  
Southern Province Districts.—Moyamba, Kono, Kenema, Kailahun, Bo, Bonthie and Pujehun.

*General Description.*

The peninsula of Sierra Leone is about 25 miles in length, and from 10 to 12 miles in breadth at its widest part. It is one of the few points on the African coast where there is high land near the sea. It is formed by a range of igneous mountains, running parallel to the sea from N.N.W. to S.S.E., the summits of which, in the Picket Hill, Sugar Loaf and Leicester Mountains, rise in conical form to a height of from 2,000 to 3,000 feet. The mountains are composed principally of porite, and are thickly wooded. They are intersected by ravines and small valleys, and there are considerable tracts of level ground, especially on the eastern side of the peninsula, where it sinks to the mainland.

The configuration of the Protectorate varies much in different localities. The coastal strip

is flat and low-lying and the river estuaries, below high tide mark, are bounded by extensive mangrove swamps. The western and southern part of the Protectorate consists of rolling wooded country, broken in places by ranges of hills rising to 1,000 ft. or more. The ground rises to the north and east to form an upland plateau having a general elevation of about 1,500 ft. The Sula and Kangari hills rise to nearly 3,000 ft., while to the east, near the French Guinea frontier, Bintumane Peak and the summits of the Ting range rises to above 6,000 ft. Unlike many regions on the West Coast of Africa the country is well watered by rivers and streams. The principal rivers of Sierra Leone which empty themselves into the Atlantic Ocean are the Great and Little Scaresies, the Rokel or Seli, the Tonzo or Taia, the Ribbi, the Bum or Sewa, the Moa and the Mano, most of which are navigable by small craft for several miles.

The capital, Freetown, lies about four miles up the Sierra Leone River, at the foot of a chain of hills rising 2,900 feet above the sea. In 1931 it contained 55,369 inhabitants. It possesses the best harbour in West Africa, and is an important coaling station and a port of registry.

The peninsula of Sierra Leone and the lands immediately adjoining have a population (including Freetown and its Districts) of 96,422. It yields only a small quantity of exportable commodities, but ginger and coffee thrive if well looked after. The extent of the territory is, however, small (256 square miles), and the generally rocky soil is not very well adapted for cultivation.

Considerable quantities of palm kernels, palm oil, piassava, with other articles of lesser importance are exported via Bonthie in the Southern Province.

Many districts in the Protectorate are fertile and well adapted to the growth of oil palms, coconuts, bene seed, kola nuts, gum-producing trees, ginger, cocoa, rice, and other tropical products.

Alluvial platinum deposits occur near York, and are being worked on a small scale. Alluvial gold deposits are being worked in the Protectorate and are giving encouraging results.

Chromite has been discovered in several parts of the Protectorate and the most promising deposit, occurring in the Kambui Hills near Hangha, is being actively prospected.

A recently discovered deposit of diamonds in Kono District is now being prospected. Diamonds have also been found in the Kenema District.

Deposits of iron ore have been discovered, and steps are being taken to work and export the ore on a large scale.

The population of the Protectorate was in 1931 estimated at 1,672,057 and is composed of the following tribes:

Northern Province	{ Temnes, Limbas, Susus, Lokos, Fulas, Mandingoes, Korankos, Yalunkas,
Southern Province	{ Mendes, Sherbroes, Konos, Krims, Gallinas, Golas, Vais, a few Kissis.

*Constitution.*

A Charter, issued on May 27th, 1863, created an Executive Council for the Colony composed of four members nominated by the Crown. The Legislative Council was to consist of the members of the Executive Council and nominated members.

A Charter, dated the 19th of February, 1866, established a Central Government of the settlements

on the West Coast of Africa, with the seat of government at Sierra Leone.

A new Charter, dated the 24th of July, 1874, revoked so much of the Charter of the 19th of February, 1866, as provided for the government of the Gold Coast and Lagos under the Governor-in-Chief of the West Africa Settlements, and those settlements were erected into a distinct government. A further Charter, dated 17th of December, 1874, erected a new government of the "West Africa Settlements," consisting of Sierra Leone and the Gambia, and created a Legislative Council in each settlement, consisting of the officer administering the government, and not less than two other persons, to be designated by royal instructions or warrant. New letters patent dated 17th June, 1885, provided for the continuance of the government on the same lines, with some minor differences. By letters patent of 28th Nov., 1888, the Gambia was again made a separate government. By letters patent, dated 3rd April, 1913, and Royal Instructions, dated 4th May, 1922, there were constituted an Executive Council composed of the Officer in command of the troops, the Colonial Secretary, the Attorney-General, the Colonial Treasurer and the Director of Medical and Sanitary Services, and a Legislative Council, composed of the members of the Executive Council and four unofficial members nominated by the Crown.

On March 7, 1913, an Imperial Order-in-Council was issued providing for the administration of the Protectorate of Sierra Leone. The Order applies to the territories, not being portions of the Colony of Sierra Leone, lying between the sixth and tenth degrees of north latitude and the tenth and fourteenth degrees of west longitude, and beginning at the extreme southerly point of the Colony on the Anglo-Liberian boundary, as delimited under the provisions of the Anglo-Liberian Conventions, November 11, 1885, and January 21, 1911.

The Governor and Commander-in-Chief for the time being of the Colony of Sierra Leone is also the Governor of the Protectorate. Authority is given to the Governor by Ordinances passed in the Legislative Council to exercise and provide for giving effect to the powers and jurisdiction acquired by the Crown in Sierra Leone.

Letters Patent, dated the 28th January, 1924, revoked those issued on the 3rd April, 1913, and made fresh provision for the appointment of the Governor and Commander-in-Chief, and instructions issued under the Royal Sign Manual and Signet on the same date cancelled those of the 3rd April, 1913, and 4th May, 1922. An Order of the King in Council dated the 16th January, 1924, provided for a new and considerably enlarged Legislative Council, introducing an elective element and direct representation of Protectorate interests into the constitution of that Council for the first time in the history of Sierra Leone.

#### *Climate.*

The seasons may be divided into wet and dry, the former commencing in May and lasting till October. The shade temperature varies during the year from about 62° to 97°. Tornadoes or violent thunderstorms occur at the commencement and close of the rainy season. They are accompanied by strong wind, but do not last long, and seldom do much damage. The atmosphere during the rainy season is excessively damp. The rainfall in Freetown for the year 1932 was 163·61 inches, but decreases inland to an average annual rainfall of about 96 inches at Kabala and

Kailabam. Between the months of December and March the wind known as the "Harmattan" is prevalent; it is very dry, and often brings with it a fine dust said to come from the Sahara. Its direction ranges from N.E. to S.E.

The climate of Sierra Leone, as elsewhere on the West Coast of Africa, is trying, but conditions have been greatly improved in recent years through the efforts of the Medical and Sanitary Services, and if ordinary precautions are taken the risk of contracting malarial fever can be much reduced.

#### *Vegetation and Agriculture.*

The greater part of the country is covered by bush growth, the height of the bush varying with the length of time since the area was last cultivated. In the north, where the rainfall is less than that nearer the coast, the country passes from bush into orchard bush and grass. Wild oil palms and raphia palms provide some of the principal exports in the shape of palm kernels, palm oil and piassava, while the semi-cultivated kola tree provides an important kola export to West African territories.

The agriculture of the country is still primitive "shifting cultivation" being universally practised. Of recent years the utilisation of swamps for swamp rice has been advocated and steady propaganda has resulted in a remarkable spread in the growth of swamp rice all over the Protectorate. Owing to heavy rainfall there are innumerable swamps and considerable areas available for this form of cultivation.

The chief cultivated crops are rice, cassava, sorghums, sweet potatoes, groundnuts, benniseed, peppers, coffee, ginger, and coconuts, the two last being cultivated chiefly for export. These (excepting the last three) are the food crops of the country, the most important being rice which forms the staple food of the inhabitants of the Protectorate. In the Colony Peninsula, cassava products (chiefly foo-foo) displace rice to some extent as a food.

The agricultural exports for 1932 were as follows:—

	Quantity Tons	Value £
Palm kernels .. ..	77,162	687,477
Kola .. ..	2,085	41,373
Palm oil .. ..	2,208	26,914
Piassava .. ..	2,877	23,290
Ginger .. ..	1,382	22,877
Rice .. ..	553	4,054
Peppers .. ..	67	2,162
Cocoa .. ..	81	1,295
Benniseed .. ..	120	1,122

#### *Minerals.*

All minerals are vested in the Crown and rights to prospect for minerals and titles to mine minerals are issued through the Mines Department, Freetown. The mineral industry owes its inception to the discoveries made by the Government Geological Survey. The minerals mined at present are gold, platinum, and diamonds. The following is a comparative statement of the annual mineral production and its value:—

Year.	Gold oz. troy unrefined bullion	Platinum oz. troy Coarse crude	Diamond Exports in carats	Estimated Value £
1930 ..	957	542	—	6,113
1931 ..	6,650	594	—	30,815
1932 ..	12,125	531	749	71,567

Gold is mined from alluvial deposits in the Protectorate. Platinum is won in the Colony peninsula from stream gravels. Diamonds were first discovered in 1929 in the Nimi Koro chiefdom of Kono district. Diamondiferous alluvial deposits are very widespread. They are worked by a diamond mining company on a profit-sharing basis with Government. Iron ore is to be mined at Marampa whence the ore is to be conveyed by a mineral railway some fifty miles to Pepel for shipment. Exploitation is scheduled to commence in 1933 at a standard rate of 500,000 tons a year. Government has lent more than £400,000 to the Marampa company, secured by first mortgage debentures on the property present and future and the uncalled capital of the company. Large iron ore deposits of good grade have been found in the Tonkolili area. These are to be exploited by the Marampa company under an agreement by which a sliding scale royalty and a profits' tax will be paid to Government. Other minerals which are being prospected or are known to exist are chromite, molybdenite, ilmenite, bauxite, lignite, corundum and garnet.

#### *Customs.*

The import duties, which make provision for preferential treatment to British goods, are mainly *ad valorem* (20 per cent. from the British Empire and 30 per cent. from Foreign Countries); but many important articles such as Tobacco, Spirits, Wines, Beer, Petroleum products, Salt, &c., are liable to a specific duty. There are also export duties on Palm Kernels (£1 10s. 0d. a ton), Kola nuts (½d. a lb.), and Gum Copal (3d. a lb.).

Specific duties in 1932 brought in 215,929*l*.

#### *Currency and Banking.*

Besides English currency, West Africa silver coins (2s., 1s., 6d. and 3d.) were put into circulation in 1913, and alloy coins of similar denominations in 1920. Currency Notes of the value of 20s. and 10s. were introduced in 1916 and of 2s. in 1917, and 1s. in 1919, but the last two denominations are not now current. The Bank of British West Africa has two branches in the Colony and some agencies in the Protectorate. Barclays Bank (Dominion, Colonial & Overseas) Ltd. also is established in Freetown. A Government Savings Bank was established in 1882.

#### *Education.*

From the beginning of 1928 Primary Education in the Colony passed under the new scheme of amalgamating Mission Schools, thus building up stronger centres, and in a measure providing separate schools for Infants and Standard Classes. The payment of Teachers' Salaries having been taken over by government, much closer attention is being made to qualifications, and with the additional supervision now provided, the grade of work should steadily improve. Education is not compulsory. The Church Missionary Society and the Methodist Mission have a College at Fourah Bay, affiliated to Durham University, which prepares students for the Degrees of that University. The College also undertakes the training of Male Teachers for Primary Schools. The training of Female Teachers for Primary Schools is now undertaken by the Methodist Missionary Society at its College

at Wilberforce. In the Protectorate, while the old system still obtains, plans are under consideration for the complete re-organisation of all schools. A Government school for the sons and nominees of native chiefs was established at Bo in the Kenema District of the Protectorate on 1st March, 1906, under European supervision. The number of pupils at the close of 1932 was 93. There is also a Government Model School in Freetown at which 342 pupils attended in 1932. A Protectorate Central College is established at Koyeima with a roll of 82 students. There are also 7 Government Rural Schools in the Protectorate, with a roll of 242 pupils.

The total number of children being instructed in the Government and assisted Mission Schools in the Colony and Protectorate was as follows:—

Primary Schools .. ..	13,011
Prince of Wales School .. ..	107
Secondary Schools .. ..	1,186
Bo School .. ..	93
Government Model School .. ..	342
Protectorate Central College .. ..	82
Government Rural Schools (Protectorate) .. ..	242
Industrial Schools .. ..	673

#### *Means of Communication.*

Mail steamers leave Liverpool for Freetown and Freetown for Plymouth and Liverpool every fortnight. The passage takes about 10 days.

Telegraphic communication with Europe was established in 1886, there being now three cables, to Bathurst, Conakry, and Accra respectively. A wireless telegraphic station was opened in 1913.

The main line of the Sierra Leone Government Railway, which was the first Railway to be constructed in British West Africa, runs from the Freetown terminus to Pendembu in the Railway District, a distance of 227½ miles. The number of stations and flag stations is 53. From Bays Junction, 64½ miles from Freetown, a branch line runs to Makeni, a distance of 82½ miles. The gauge of the Railway is 2 ft. 6 in. The Marampa railway running from the iron ore deposits at Marampa to Pepel, the port of shipment, is 5½ miles long. The railway is open only for the transport of iron ore.

The total railway receipts for 1932 were 159,862*l*.; the working expenses for the same year were 149,294*l*.

There are 1,924½ miles of combined telegraph and telephone lines in operation.

There are 814 miles of first-class roads in the Protectorate constructed under the supervision of the Public Works Department and about 150 miles of Chiefs' roads of an inferior standard of construction. In the Colony peninsula there are about 60 miles of roads suitable for motor traffic, mainly in Freetown and its vicinity.

The Sherbro river is navigable for over 20 miles (up to York Island), the Sierra Leone, or Rokell river, for 40 miles (as far as Magbille).

For six months of the year the Kittam River is navigable for launches to Mopalma (about 80 miles) all the year and for six months to Fajehun. Much of the produce from the Northern Sherbro District is thus transported to Bonthe.

There are 72 post offices and postal agencies. The estimated number of letters, &c., handled in 1932 was 1,922,147: of parcels 33,220, of which the Inland Post dealt with 1,142,338 and 11,843 respectively.

The rates of postage are as follows:—

	Letters, per ½ oz.	Post Cards.	Newspapers Books, etc., per 2 ozs.
	d.	d.	d.
Internal . . . .	1	½	½
To U.K. British Dominions and (1½d. each Colonies additional oz.)	2d. per oz.	1½	½
To Other Coun- tries (1½d. each additional oz.)	3	1½	½

Parcels: maximum weight 22 lbs. for places inland and to certain countries which accept heavy parcels; 11 lbs. other countries.

Inland, 6d. for 2 lbs.; 3d. each additional lb.

Gt. Britain, N. Ireland—Up to 3 lbs.. 2s. 3d.; 7 lbs., 3s. 6d.; 11 lbs., 4s. 9d.; 22 lbs., 7s.; British W. A. Colonies, 2s., 3s., 4s., and 7s. respectively.

Parcels for other countries except U.S.A. are forwarded through the U.K.

British Imperial Postal Orders are issued and paid in the Colony; there is also an Inland and Foreign Money Order Service.

At the close of 1932 the Post Office Savings Bank held 66,598*l.* to the credit of 9,040 depositors.

**SOMALILAND PROTECTORATE.**

In 1884, a Protectorate was established over the tribes on the Somali Coast, extending from Lahadu (Loyi-ada), half-way between Ras Jibouti and Zeyla, to the 49th meridian E. long. The boundary has been settled by agreements with France, Italy, and King Menelik of Abyssinia. Till 1898, the Somaliland Protectorate was administered by the Resident at Aden, as a dependency of the Government of India. In that year, it was transferred to the charge of the Foreign Office, and in 1905, to that of the Colonial Office.

*General Description and History.*

The chief ports are Berbera, Bulhar, and Zeilah. Area about 68,000 square miles.

Although the camel remains the chief means of transport, the last few years have seen a considerable increase in the use of motor transport. The approximate mileage of road and cleared tracks suitable for general traffic and mechanical transport of medium weight is 950 miles. There are no railways in the Protectorate. There is a weekly steamer service with Aden.

The climate at the coast is trying for Europeans, but is comparatively healthy in the interior, where an elevation of from 4,500 feet to 6,800 feet is reached.

The Haud waterless plains constitute the principal pastures of the country. The chief source of wealth of the people lies in their live stock.

In the beginning of 1901, operations were commenced against a fanatical Somali leader, the Mullah Mohammed Abduallah, and a native levy with British Officers penetrated into the Nogal Valley. The Mullah was defeated at Somala and Foddiddin, and driven into Italian territory.

The dervishes afterwards gathered together again, and a similar expedition, strengthened by the 2nd King's African Rifles (Yaos), was despatched in the summer of 1902, and again drove the Mullah into Italian territory with heavy loss, but met with a severe check in Italian territory at Erego, on October 6th. The Mullah, however, retired as the result of this action still further into Italian territory, to Geladi.

Five months later a third expedition, comprising British and Boer M.I. Indian and African troops, with the main base at Obbia in Italian Somaliland, proceeded to Mudug, thence detaching a force to Geladi, which place was up till then the headquarters of the enemy. A force of 200 Yaos and Sikhs, was overwhelmed at Gumburru, in April,

1903, after a fight of the fiercest description. A column of 200 men, was at the same time attacked at Daratoleh, whence it retired fighting to Bohotleh, and in June the expedition fell back on the Berbera-Bohotleh lines of communication, when Lieut.-General Sir C. C. Egerton, K.C.B., was placed in command.

Reinforcements, increasing the force to 7,000 rifles, were despatched and placed in the field, and in January, 1904, 3,250 troops defeated 5,000 dervishes at Jidballi.

In March, 1905, an agreement was concluded between the Italian Government and the Mullah Seyyid Mahommed, whereby peace was declared between the dervishes and the neighbouring tribes, both those subject to the Government of Italy and those under the protection of the British Government. The Mullah was given a port on the east coast and was assigned certain territories within the Italian sphere of interest, beyond which he and his dervishes undertook not to encroach.

In the latter part of 1908, some unrest was caused by the unfriendly attitude of the Mullah, and reinforcements were brought into the Protectorate from East Africa, Uganda, Nyasaland, and India during 1909.

Subsequently, arrangements were made to arm the friendly tribes to enable them to defend themselves against attack, and in March, 1910, all troops were withdrawn from the interior; the 6th Battalion King's African Rifles was disbanded, and a policy of strict coastal concentration was then adopted. This policy having disappointed expectations, a Camel Constabulary, 150 strong, was raised at the end of 1912 to check inter-tribal fighting, which by this time had assumed serious proportions. A measure of peace among the friendly tribes was quickly restored, but in August, 1913, the Corps, at a strength of 169 rank and file, encountered at Dulmadoba a raiding party of dervishes estimated at 2,000 rifles, and in the action which ensued, though heavy losses were inflicted on the enemy, the Constabulary sustained casualties amounting to 50 %, including the Commandant, killed. The force thereupon fell back on Sheikh, and reinforcements of Indian infantry were moved up from the coast. His Majesty's Government later decided to increase the forces of the Protectorate in order to preserve the necessary grazing grounds of the friendlies from dervish attack, and to maintain peace among the tribes living in the west.

In November, 1914, Military Headquarters were established at Burao, 80 miles from the coast. At this time the dervishes were in occupation of the Ain Valley, which is one of the principal grazing grounds of the friendlies. Strong forts had been constructed by the Mullah at Jidali and Shimber Berris and these were used as forward bases for raids against our tribes. The position at Shimber Berris was accordingly attacked by the local troops and after a stubborn resistance all the forts were finally captured and blown up. In 1914 the dervishes made serious raids and their aggressions went on during the war, but early in 1920 operations against them were carried out by air attacks followed up by mounted forces with infantry supports. These operations were completely successful, the power of the dervishes was destroyed, and the Mullah became a fugitive in Abyssinian territory; he died there in 1921. Since 1923 the condition of the country has been peaceful and as a result the stock wealth of the native population has

largely increased while in the western areas the development of agriculture has made great progress. A geological survey of the Protectorate has been made.

In June, 1932, the designation of the officer appointed to administer the Government was changed to Commissioner and Commander-in-Chief.

#### Trade and Customs.

Exports consist of skins and hides, sheep and cattle, gums, ostrich feathers, ghee, and salt.

Imports consist of rice, dates, sugar, cotton piece goods and shirtings, iron and hardware.

The Customs Tariff is mainly on an "ad valorem" basis of 20 % and 25 %, but specific duties are imposed upon rice, dates, cloth (long cloth and grey sheeting in the piece), matches and alcoholic liquors.

Goods of British or Empire origin to the extent of 50 % of their content enjoy preferential rates of duty both specific and "ad valorem." The margin of preference is 10 %.

The percentages of Imports from the countries of origin were as follows :

United Kingdom	..	18 %
British Empire	..	48 %
Foreign	..	34 %

No percentages can be given for exports : all produce is shipped to Aden where it is distributed by dealers, mainly to the United Kingdom and to the United States of America.

## †TANGANYIKA TERRITORY.

### *Extent and Boundaries.*

The Tanganyika Territory consists of that portion of the former Colony of German East Africa which, under Article 23, Part I, of the Treaty of Peace with Germany, the Principal Allied and Associated Powers agreed should be administered under a mandate by His Britannic Majesty. The remaining portions of the Colony, namely the districts of Ruanda and Urundi in the North-West, and the Kionga Area, South of the Rovuma River, were similarly entrusted to the administration of Belgium and of Portugal respectively. The Territory extends from the Umba River on the North to the Rovuma River on the South, the coast line being about 500 miles in length, and includes the adjacent islands. The Northern Boundary runs in a north-westerly direction to Lake Victoria at the intersection of the first parallel of latitude with the eastern shore of the lake (Mohuru Point), and thence along the first parallel of latitude until it strikes the Kagera River about 70 miles west of Lake Victoria. From this point the western boundary follows the Kagera River to approximately latitude 2°25', and thence along the eastern boundary of Urundi to the Mlagarassi River which it follows to Lake Tanganyika. The boundary then follows a line due west until it reaches the centre line of Lake Tanganyika which it follows to Kasanga (formerly Bismarckburg), at the southern end of the lake. Thence it follows the boundary of Rhodesia to the northern end of Lake Nyasa and continues along the centre line of Lake Nyasa to a point due west of the Rovuma River whence the boundary runs east and joins the Rovuma River, whose course it follows to the sea. The total area of the Territory is about 374,085 square miles, which includes about 20,000 square miles of water.

The Island of Mafia was transferred in 1922 from Zanzibar to the Territory.

### *General Description.*

Along the coast lies a plain, varying in width from 10 to 40 miles, behind which the country rises gradually to a plateau constituting the greater part of the hinterland. This plateau falls sharply from a general level of 4,000 feet to the level of

the lakes (Tanganyika, 2,590 feet. Nyasa, 1,607 feet), which mark the great Rift valley extending northwards to Lake Naivasha.

The seat of government is Dar-es-Salaam (population 34,000) which lies along the northern and north-western shores in an almost land-locked harbour, about 3 miles long. The chief buildings are solid and roomy. The second town in importance is Tanga, 136 miles north of Dar-es-Salaam and 80 miles distant from Mombasa. Other seaports are Pangani, Bagamoyo, Kilwa, Lindi, and Mikindani. The most important inland town is Tabora, which has a population of 10,000\*, and is situated at the junction of the main caravan routes from the coast of Tanganyika and from Victoria Nyanza to Nyasa. Other inland towns are, in the north, Moshi and Arusha; in the central area, Morogoro, Kilosa, and Dodoma; and in the south, Iringa, Mahenge, and Songea. On the great lakes the chief towns are Mwanza and Bukoba, on Victoria Nyanza; Kigoma, the terminus of the Central Railway; Ujiji, on Tanganyika; and Mwaya, on Nyasa.

The highest points in the Territory are in the north-east, where are the extinct volcanoes, Kilima Njaro, which rises to 19,720 feet, and is snow-capped, and Mount Meru (14,960 feet). In the south-west are the Livingstone Mountains, where the highest peak is over 9,000 feet.

Portions of the great lakes of Central Africa are included in the Territory, viz.: the southern portion of Lake Victoria, the eastern shores of the lower part of Lake Tanganyika, and the northern and north-eastern shores of Lake Nyasa. There are smaller lakes and numerous rivers.

### *Climate.*

The climate of the Territory varies greatly according to the height above sea-level of the several districts. Roughly, four climatic zones can be distinguished, though even among these there are considerable local variations:—(i) The warm and rather damp coastal region with its adjoining hinterland.—Here, conditions are tropical, though not unpleasant except just before and during the rainy seasons, when the heat is trying and the atmosphere humid. The average yearly temperature is 78 degrees. (ii) The hot and moderately dry zone between the coast and the central plateau (300 feet—2,000 feet). This zone is characterised by low humidity of atmosphere, less rain, and a temperature rather lower but with greater daily and yearly variations. (iii) The hot and dry zone of the central plateau between 2,000 feet and 4,000 feet in height.—The climate of this zone differs greatly in parts, but its prevailing characteristics are low humidity, little rainfall (at Tabora an annual average of 32 inches), a fairly high mean temperature, with great daily and yearly variations, sometimes exceeding 36 degrees Fahrenheit daily. The heat is dry, but not so trying to the European as the moist and steamy warmth of the coast, while the nights are invariably cold. (iv) The semi-temperate regions around the slopes of Kilimanjaro and Meru, of the Usambara Highlands, the Umba Plateau, and the mountainous areas of the south-western area (5,000 feet—10,000 feet).—Frosts occur at the higher altitudes, and the nights are cold. These districts enjoy a bracing climate, and alone can be considered healthy for Europeans, but prolonged residence in these altitudes is apt to produce nervous strain, even though physical fitness is maintained. There are two well-defined

rainy seasons annually. Generally speaking, the long rains begin in February or March, and last for two or three months, while the short rainy season extends from October to November, but the rainfall is low for a tropical country, and droughts are not infrequent.

### *History and Constitution.*

Plentiful evidence exists of Arab traders having visited the Territory for several centuries and of their opening up the great slave route from Bagamoyo on the Indian Ocean to Ujiji on Lake Tanganyika. The British explorer, Burton, first entered the Territory in 1856, and was soon followed by Speke, Livingstone, and Stanley.

The territory was visited in 1884 by Dr. Karl Peters, who made twelve treaties with native chiefs, and in the following year the German Government established a protectorate. This arrangement was recognised by the British Government in 1886. In 1889 an Arab rising was quelled, and the first German steamer launched on Lake Nyasa. A serious native rising took place in 1905. It is estimated that some 120,000 natives died during the struggle or from its immediate results.

Early in 1916 Lieut.-General J. C. Smuts attacked and defeated the German forces at the foot of Kilima Njaro and occupied Moshi on March 13th of that year. By the end of 1916 all the country north of the Central Railway was effectively occupied by His Majesty's Forces or by Belgian troops, and a provisional civil administration was established in that area on January 1st, 1917. In November, 1917, the Germans were driven across the Rovuma River into Portuguese East Africa, and in March, 1918, the jurisdiction of the Administrator was extended to include the greater part of German East Africa. After the surrender of Major-General von Lettow-Vorbeck, in accordance with the terms of the armistice, the military forces were withdrawn, leaving only a garrison of the King's African Rifles; and a Royal Commission was issued in 1919 appointing an Administrator, The Tanganyika Order-in-Council, 1920, which was read and proclaimed in Dar-es-Salaam on September 26th, 1920, constituted the office of Governor and Commander-in-Chief. The Governor is assisted by an Executive Council. In 1921 the district of Ujiji and portions of the districts of Bukoba and Ufipa, which had formerly been administered by the Belgians, were taken over.

In 1920 draft mandates for "German East Africa" were submitted to the Council of the League of Nations in favour of Great Britain and Belgium, and these were approved by the League of Nations in 1922. The mandate for the part to be assigned to Great Britain lays down conditions directed against slavery, forced labour (except for essential public works and services), abuses in connection with the arms traffic and the trade in spirits, the recruiting of labour, transfer of native lands (except between natives) without the consent of the authorities, and usury. It is provided that nationals of States members of the League of Nations are to have complete commercial equality. An annual report is to be made to the Council of the League. By an Order in Council dated the 19th of March, 1926, provision was made for the constitution of a Legislative Council consisting of the Governor as President, thirteen official members, and not more than ten unofficial members, which came into operation on the 1st July, 1926.

For the East African Governors Conference, see under Kenya, page 330.

### *Population.*

The number of Europeans in Tanganyika Territory is approximately 8,151. There are also over 23,000 Indians, 7,000 Arabs, and 1,700 Goans. The natives are estimated at 4,933,179. The majority of the natives are Bantu, but considerable areas in the north are occupied by the Masai and other Hamitic races, and in the south by tribes of Zulu extraction. The most important language is Swahili, which is a hybrid between Arabic and Persian and all sorts of African tongues. It is more or less spoken as a lingua franca from Aden in the north to Durban in the south, and from the Indian Ocean to the waters of the Nile and the Congo.

Most of the natives are pagans, but the majority of the coastal tribes and a few in the hinterland profess Mohammedanism.

The territory is divided into 8 Provinces as follows:—

Provinces.	Capital.	Approx Native Population, 1932.
Central ... ..	Dodoma ... ..	533,746
Eastern ... ..	Dar-es-Salaam ...	630,128
Iringa ... ..	Iringa ... ..	404,006

Totals ... ..		4,933,179

### *Education.*

The amount allocated to Education in 1932 was 100,393/. Further sums were contributed by Native Administrations.

During 1932 there were 90 Government schools for Africans with an attendance of 7,001 children and 3,345 Mission schools with an average attendance of 107,439 children.

There were two schools maintained by Government for the education of European children, one a day school in Dar-es-Salaam and the other a boarding school at Ngare Nairobi, in the Northern Province.

Assistance is given to three Kindergarten Schools at Tabora, Dodoma, and Tanga, three Dutch Schools in the Arusha District, two Roman Catholic Schools in Dar-es-Salaam and Tabora, to four German Schools in the Northern, Tanga and Iringa Provinces and to one Greek School at Kibosho. There were 47 Indian schools, with an enrolment of 3,198 pupils, of which 45 were in receipt of financial assistance.

The Government publishes a monthly journal printed in Swahili to disseminate news and useful information among the vernacular speaking population.

### *Forests and Minerals.*

The total area under close forests is approximately 4,096 square miles, of which 97.1 per cent. is in Government Forest Reserves, 1.4 per cent. awaits reservation, and 1.5 per cent. is valuable forest in private ownership. The forests are most numerous in the north, on the shores and islands of Lake Victoria, in the North-east on Kilimanjaro and Meru Mountains; in the East along the Pare and Usambara ranges and in the Uluguru and Nguu Mountains; and at the coast, in the districts of Rufiji, Kilwa, and Lindi. Further considerable areas of close forest are situated in the highlands of Iringa Province, most of which have now been explored and demarcated for reservation, and have been gazetted as Forest Reserves. The

number of timber-producing species is large and includes among many others the following:—Pencil Cedar (*Juniperus procera*), *Podocarpus*, *Chlorophora* *Excolea* (resembling *Burra Teak*), *Oocotea Usam-barensis*, *Pterocarpus Busei*, *Parinarium Holstii*, *Pygeum africanum*, *Azelia cuanensis*, *Khaya Senegalensis* and *Cassipourea Eikii*. In addition, valuable species of hardwoods occur as single trees or in groups widely scattered throughout large areas of dry savannah forest. Mangroves of excellent quality cover large areas of the littoral. Ebony and gum copal are plentiful near the coast. Bamboo and baobab are found and may prove suitable for the manufacture of paper pulp.

The following have been mined for export or local use:—Gold, diamonds, mica, salt, tin, and red ochre. Other minerals known to exist include:—Coal, copper, iron, graphite, asbestos, and soda. Extensive areas remain to be prospected. The total mineral production for 1932 was valued at £198,697.

Further information with regard to trade and cognate matters in Tanganyika Territory can be obtained from the Chairman, Tanganyika Trade and Information Local Advisory Committee, c/o The Comptroller of Customs, Dar-es-Salaam.

#### Communications.

The Territory is served by two railways of metre gauge.

1. The Central Railway from Dar-es-Salaam to Kigoma on Lake Tanganyika (774½ miles), with a branch line from Manyoni (365 miles) to Kinyangiri (94 miles) via Singida, and a branch line from Tabora (524 miles) to Mwanza (236 miles) on Lake Victoria.

2. The Tanga or Northern Railway from Tanga via Moshi (219 miles) to Arusha (272 miles). From Kahe Junction (206 miles) a line links up with the Kenya and Uganda Railway at Voi. The Voi-Kahe line is run under the management of the Kenya and Uganda Railway.

Light motor traffic is now possible over 13,996 miles of roads during the dry season.

The ports of Lake Victoria are served by the steamers of the Kenya and Uganda Marine; those of Lake Nyasa by the Nyasaland Government steamers, and the Tanganyika Railways steamship "Liemba" and a smaller one "Mwanza," together with a Belgian service, maintain communications on Lake Tanganyika. The British steamer "Liemba" (late German s.s. "Goetzen," 796 and 427 tons gross and net respectively) was put into commission on June 9th, 1927, and maintains a service to Mpuungu, in Northern Rhodesia, via Southern Lake Ports.

#### Posts and Telegraphs.

The telegraph system comprises 3,762½ route miles with 7,950 miles of wire, and the number of offices, including railway telegraph offices, open for public business, is 135. The principal offices are Dar-es-Salaam, Tanga and Lindi on the coast, Bukoba and Mwanza on Lake Victoria, Kigoma on Lake Tanganyika, Kilosa, Dodoma and Tabora on the Central Railway Line, Moshi on the Kenya Border and Iringa, Mbeya and Tukuuyu in the South Western Area.

All classes of business, including Money Order, Postal Order and Savings Bank are conducted at 23 Head Offices, in addition to which 43 offices perform Postal Order and all classes of postal work.

The inland telegraph system forms a link of land line communication between Kenya and Uganda to the north, and Nyasaland, Northern and Southern Rhodesia, and the rest of South Africa to the south, while communication is established with the Belgian Congo through a wireless station at Kigoma.

Dar-es-Salaam is connected by cable with Zanzibar, through which is established communication with all parts of the world.

Trunk Telephone communication is provided on some of the important routes by utilising the telegraph wires when required, while between Tanga and Dar-es-Salaam the telegraph is superimposed on a permanent trunk, with an extension to Mombasa.

Thirty eight Telephone Exchange centres are established, comprising 241 route miles with 1,286½ miles of wire.

A wireless station exists at Dar-es-Salaam for communication with ships and short wave apparatus is used for communication with Mbeya (the principal Air port) and also with the aeronautical stations at Dodoma and Moshi when necessary.

Letter mails from Great Britain are despatched from London weekly via Marseilles, whence they are conveyed direct by vessels of the Messageries Maritimes, and by the P. & O. line via Aden, the average time in transit being 21 days. Letter mails to Great Britain are despatched from Dar-es-Salaam by all available steamers.

Parcel mails are despatched weekly by steamers of the P. & O. line from London by the all-sea route to Aden, whence they are conveyed by any steamer proceeding to Mombasa or beyond. The Aden-Mombasa-Dar-es-Salaam service is irregular, and the average time of transit of parcel mails from London to Dar-es-Salaam is 30 days.

Fortnightly mail services are maintained with India and South Africa, and there is a frequent exchange of mails by sea with Kenya Colony and Zanzibar.

Air mails are exchanged by means of the Imperial Airways Cairo to Cape Town weekly service which passes through the Territory, obtaining connection with the main European and Indian air mail services. The time taken in transit from Dar-es-Salaam to London is 8 days.

Mails are exchanged between offices on the railway as frequently as the regular trains service permit (minimum twice weekly), while places off the railway normally have a weekly service.

#### Currency and Banking.

The German Government and the German East Africa Company issued local rupees of the Indian Standard, and subsidiary coins. But the German rupee was exchanged for two shillings of East African Currency and withdrawn from circulation. Indian Rupees (coins and notes) have been demonetised. Shillings and subsidiary coins, and currency notes of the East African Currency Board have been introduced at the rate of twenty shillings to the pound sterling and this is the only currency now recognised.

The Banks operating in the Territory are the National Bank of India, the Standard Bank of South Africa, Barclay's Bank (Dominion, Colonial, and Overseas), and the Banque du Congo Belge.

#### Trade and Customs.

Since 1923 the Customs Tariff of the Territory has been identical with that in force in Kenya and Uganda and provision was made for the duty-free interchange of all goods grown, produced or manufactured in any one of the three territories. In 1927 the Customs management laws of the three territories were co-ordinated, and on the 1st August, 1927, effect was given to an Agreement under which all goods on which duty had been collected in one of the territories may be transferred to any of the other territories without further formality except the preparation of simple transfer forms, on which inter-territorial adjustments of revenue are subsequently arranged.

The tariff was revised in 1930, being enacted simultaneously in Tanganyika, Kenya, and Uganda. The basic fiscal rate is 20 per cent. *ad valorem*, assessed on the current domestic value of the goods in the exporting country together with the cost of packing, delivery on board, freight, insurance and all other charges up to the time of importation into the Territory. On certain goods which permit of such an imposition duty is charged at specific rates corresponding generally to an equivalent *ad valorem* rate of 20 per cent. On liquors and similar spirits the duty is 48 shillings per Imperial gallon, while whisky, brandy, gin and rum are charged with duty at 48 shillings per proof gallon as ascertained by Syke's hydrometer. Manufactured tobacco is liable to 62½ per cent. *ad valorem*, with a minimum of 5 shillings per pound on cigars, and 2/40 per pound on cigarettes and tobacco. In the case of certain specific commodities such as sugar, timber, wheat flour, bacon and ham, butter, cheese and ghee, which can be produced locally in sufficient quantity to meet the demands of the three territories, provision is made, in the form of additional "suspended" duties, for a modified degree of protection. A reduced rate of 10 per cent. *ad valorem* is payable on building materials, metals, tools, printing materials, paints, children's toys, and infants' foods, while the free list includes machinery, packing materials, ships and

boats, aircraft, motor and steam lorries and tractors, materials and equipment for the construction and maintenance of telegraph and telephone lines and of railways, tramways and roads; medicines, disinfectants and insecticides; coal, coke and oil fuel; fertilisers; blasting compounds; filters and refrigerators; surgical and scientific instruments, and all used personal and household effects imported as passengers' baggage. No provision is made for Imperial Preference.

The values in pounds sterling of the import and export trade of the Territory, the total Customs receipts, and the tonnage of vessels entered at Tanganyika ocean ports, are given below. The import figures are exclusive of Government imports, transit traffic, and bullion and specie, while transit exports are similarly excluded from the export figures.

## \* TRINIDAD AND TOBAGO.

## TRINIDAD.

*Situation and Area.*

The island of Trinidad lies about 16 miles to the eastward of Venezuela, between 10° 3' and 10° 50' N. latitude, and 60° 55' and 61° 56' W. longitude from Greenwich. Its average length is 50 miles, its average breadth 37½ miles, and its area 1,863 square miles. It is separated from S. America by the Gulf of Paria, into which fall the northern mouths of the Orinoco. The distance between Chacachacare, the most westerly of the Bocas Islands and Venezuela is only seven miles. The island of Tobago (formerly in the Windward Islands) was amalgamated with Trinidad by an Order in Council under the Act 50 & 51 Vict., c. 44, on 1st Jan., 1889.

*History.*

Trinidad was discovered by Columbus, on his third voyage, on the 31st July, 1498; and taken possession of by him for the crown of Spain. No Governor was, however, appointed by the King of Spain until 1532, and even then, and for many years afterwards, the Spanish colonists had the greatest difficulty in maintaining a footing in the island. It was visited by Sir Robert Dudley, and by Sir Walter Raleigh in 1595, who signalised his visit by burning the newly-founded town of St. Joseph, and it was included in the Earl of Montgomery's grant, 1628. In 1640 it was raided by the Dutch, and again in 1677 and 1690 by the French. Towards the end of the 17th and the beginning of the 18th centuries, cocoa was largely and successfully cultivated, but a blight fell upon the plantations about 1725, and Trinidad made scarcely any progress until 1783, when, in consequence of the representations made to the Court of Madrid by M. Rome de St. Laurent, a French planter of Grenada, who, when on a visit to the island, had been struck by its extraordinary fertility, a Royal cedula or proclamation was issued, by which extraordinary advantages were offered to foreigners of all nations to settle in Trinidad, the sole condition imposed, and that not very strictly insisted upon, being that they should profess the Roman Catholic religion. The consequence of this proclamation was a large influx of population, which was soon augmented by many French families, who were driven from St. Domingo and elsewhere by the terrible events of the French Revolution, and to this cause is to be traced the preponderance of the French element in a colony which never belonged to France.

On the 12th February 1797, Great Britain being then at war with Spain, a British expedition sailed from Martinique for the reduction of Trinidad. The expedition resulted in the surrender of the island to His Majesty's forces, and on the 18th February, 1797, the articles of capitulation were signed by Sir R. Abercromby, Admiral Harvey, and Chacon, the Spanish Governor.

In 1802 Trinidad was finally ceded to the Crown of Great Britain by the Treaty of Amiens.

The population of Trinidad and Tobago at the census of 1931 was 412,783. The white population is chiefly composed of English, Portuguese, French, and Spanish. There is also a large number of East Indians, totalling 138,667. The French lower classes speak a *patois* peculiar to the West Indies.

\* For general map of West Indies, see under Windward Islands.

*Constitution.*

The Government is administered by a Governor, with an Executive Council of seven members. The legislative body is the Legislative Council of Trinidad and Tobago, which was reconstituted by Letters Patent and an Order in Council which came into operation on 21st August, 1924. It now consists of the Governor, the Colonial Secretary, the Attorney-General, the Treasurer, nine nominated official members, six nominated unofficial members and seven elected members. Trinidad is divided into six electoral districts, each returning one member. Tobago forms the seventh electoral district.

*General Description.*

The north coast is rock bound through its whole extent, the east coast is so exposed to the surf as to be almost unapproachable, while the south coast is steep in most parts; only on the west coast is there a good natural harbour, at Chaguanas. The whole Gulf of Paria, however, is so shut in and sheltered as to afford a most safe anchorage. The climate of Trinidad is tropical and may be divided into two seasons, a dry season from January to the middle of May, with an average rainfall of 2 to 3 inches per month, and a wet season from June to December, with an average of 8 inches per month. The coolest months of the year are December to April. The average temperature during the day is 84 and during the night 74. The total rainfall in 1932, from records taken at 111 stations, was 83.96 ins. The climate is healthy and by no means harmful to Europeans, provided reasonable precautions are taken.

There are three ranges of hills running roughly east and west, the most northerly fringing the north coast, and rising to 3,000 feet; the central range runs south-west from Manzanilla point to San Fernando, and the southern runs parallel and near to the south coast. There are numerous rivers, but none of them of any size or navigable, and all running east or west.

The soil is varied, extremely fertile, and excellently adapted to the growth of tropical products, more particularly of sugar, cacao, and coconuts, which are its staples.

The chief town and principal port is Port of Spain (population by the census of 1931, 70,334), situated on a gently inclined plane near the north-east angle of the Gulf of Paria. It is a port of registry, and had, on 31st Dec., 1932, 32 vessels registered. Fifteen miles of electric tramway and 21,326 miles of telephone have been constructed in Port of Spain and its environs. The latter also extends to some of the country districts.

*Production and Industry, Trade and Customs.*

The quantity and value of the principal products exported during the year 1932 were:—

	Quantity.	Value. £
Asphalt . . . . .	51,488 tons	131,651
Bitters . . . . .	10,564 galls.	18,962
Cocoa . . . . .	41,822,127 lbs.	579,170
Coconuts . . . . .	3,847,245 nuts	12,822
Copra . . . . .	15,418,906 lbs.	91,444
Molasses . . . . .	2,701,921 galls.	14,697
Rum . . . . .	139,540 "	10,564
Petroleum (crude & fuel)	266,974,841 "	1,350,006
Petrol Spirit . . . . .	67,891,008 "	978,444
Refined Kerosene . . . . .	2,145,226 "	48,280

*Sugar.*—The sugar crop yielded 97,598 tons in 1932.

Canees are grown not only by the Estates but also by Cane Farmers, who sell usually on a sliding scale, to the Factories.

*Coconuts.*—The value of the exports of coconuts, copra and coconut oil in 1932 being 104,266*l.* compared with 113,697*l.* in 1931.

The factories established in 1930, continued to manufacture copra products, and as a result the sum of 7,097*l.* 11*s.* 5*d.* was distributed by copra producers by way of bonus, while 364,271 gallons edible oil, 1,576,716 lbs. lard substitute and 428,250 lbs. laundry soap were manufactured, of which 10,298 gallons of edible oil and 250 lbs. lard substitute were exported. Excise duty collected during 1932 on edible oil, lard substitute and laundry soap amounted to 7,579*l.* 5*s.* 3*d.*

*Asphalt.*—The asphalt lake, 114 acres in extent, situated in the Ward of La Brea, was first leased as a whole in 1888 for 21 years. The lease was renewed for a further period of 21 years from the 1st February, 1909. In February, 1925, a fresh lease of the lake comprising 109 acres was made to the Trinidad Lake Asphalt, Limited, for 21 years, from the 1st February, 1930, on payment of the following Royalties and Export Duties:—

For each ton of Crude Pitch or Asphaltum a Royalty of 2*s.* 6*d.* and an Export Duty, of 6*s.*

For each ton of Dried Pitch or Asphaltum a Royalty of 3*s.* 6*d.* and an Export Duty of 6*s.* 11*d.*

The quantity of Asphalt produced during 1932 was 107,457 tons as against 123,138 tons in 1931.

The quantity of Asphalt exported during 1932 was 52,679 tons of the value of 131,651*l.* and yielding a revenue of 25,573*l.*, as compared with 94,584 tons exported in 1931 of a value of 226,597*l.* and yielding a revenue of 45,855*l.*

*Petroleum.*—At the close of 1932 there were sixteen Companies actively engaged in the exploitation of oil in the Colony. These Companies, having a total share capital of more than 14,000,000*l.*, held over 147,000 acres of Crown Lands under licenses and leases, of which approximately 125,000 acres were held under mining lease. In addition, appreciable areas of private lands are held. Up to 30th January, 1902, oil rights were not reserved by the Government when disposing of Crown Land, but after that year all Crown grants reserved the oil rights to the Crown. There are, consequently, three categories of oil lands, viz., lands disposed of prior to 1902 in which the oil rights rest in the surface owner. Land sold since that date in which the oil rights are reserved to the Crown, and lands where both the surface and the underlying oil remain the property of the Crown.

The principal oil producing companies are the Trinidad Leaseholds, Limited, from Crown and private lands at Fyzabad, Barrackpore, etc.; the United British Oilfields of Trinidad, Limited, from Crown and private lands at Point Fortin, Parry Lands, etc.; the Trinidad Lake Petroleum Company, Limited, from their own lands at Brighton; the Petroleum Development Company, Limited, from Crown Lands in the Ward of Oropuche; the Apex (Trinidad) Oilfields, Limited, from Crown and Private Lands at Fyzabad; Siparia; the Trinidad Central Oilfields, Limited, from Crown Lands at Tabaquite and Guapo; the Kern (Trinidad) Oilfields, Limited, from Crown and private lands at Guapo, the Trinidad Oilfields

Operating Co., Ltd., from Crown and private lands at Palo Seco, Fyzabad and San Francisco, the Trinidad Petroleum Development Co., Ltd., from Crown and private lands at Palo Seco, Fyzabad Dome Oilfields from private lands at Fyzabad, and the Siparia Trinidad Oilfields, Ltd. from Crown lands at Palo Seco. There are refineries at Pointe-à-Pierre, Point Fortin, Brighton, Tabaquite and La Brea, and all grades of petroleum products from petrol to road oil are produced. The total quantity of oil produced during 1932 was 10,123,859 barrels, an increase of 380,357 barrels over the production for 1931. Of this total, 5,610,901 barrels were from Crown Lands or lands in which the oil rights belonged to the Crown. The Royalty paid by operating companies on oil, won from Crown rights during the year 1932, amounted to 90,053*l.*, as against 84,547*l.* in 1931, and wayleaves to 2,620*l.* as against 6,421*l.* in 1931. The quantity of crude oil and products exported amounted to 9,637,474 barrels valued at 2,382,846*l.* as against 8,964,303 barrels valued at 1,949,455*l.* in 1931.

*Fruit.*—Large areas are being planted in grapefruit, and the area under cultivation increased from 535 acres in 1931 to 885 acres in 1932. There was accordingly a marked increase in the number exported, the amount rising from 4,377 boxes in 1931 to 10,973 boxes in 1932.

Owing to the short lime crop there was a considerable falling off in the value of the limes and lime products exported. Exports during the year 1932 were valued at 18,086*l.* as compared with 34,921*l.* in the previous year.

Of the total area of the Colony, including Tobago, 1,267,236 acres, the alienated acreage at the end of December, 1932, was estimated to be approximately 688,388 acres. About 370,000 acres are under cultivation.

The chief imports are textiles, flour, and rice, dried fish and meat, hardware, machinery, and lumber. About one-third, and one-fourth of the whole trade of the Colony is with the United Kingdom, and the United States of America respectively.

Under the Customs Tariff, goods of Empire origin are admitted at a preferential rate of duty, the principal items being entitled to a preference of 50% of the general rate of duty. Approximately one half the list of items on the tariff are chargeable with duty *ad valorem*, the remainder, including all high duty goods, being subject to specific duties.

The following tables show the direction of the import and export trade of the Colony for 1932:—

## Municipalities.

In 1914 Port of Spain was constituted a municipal city. The corporate body created under provisions of the Port of Spain Board Ordinance, 1907, and known as the Port of Spain Town Board, was dissolved.

The next town and port is San Fernando, about 30 miles south from Port of Spain. The population at the census of 1931 was 14,287.

San Fernando has an elective municipal council and mayor. The chief source of revenue in both boroughs is a rate on property.

A charter of incorporation has been granted to Arima, an inland town about 16 miles from Port of Spain (population at 1931 census, 5,072). The total municipal revenue of the two boroughs, and town of Port of Spain for the year ended 31st December, 1932, was 199,076*l.*, the expenditure, 183,030*l.*, and the debt was 407,700*l.* on the 31st December, 1932. This includes the loan for the purchase of the Woodbrook Estate, which has become an important suburb of Port of Spain.

## Means of Communication.

The service to Tobago is maintained by the Government coastal steamers "Tobago" and "Trinidad." The "Tobago" plys between Trinidad and Tobago five times per fortnight, going every alternate week by the northern and southern routes. The "Tobago" is mainly for passengers and the "Trinidad" for cargo.

The railway system consists of the following:—

The Port of Spain—Arima—Sangre Grande line (opened in 1897) 29 miles along the southern foot hills of the northern range of hills to within 8 miles of the eastern coast.

The San Fernando—Siparia line, 44 miles (leaving the former line at St. Joseph) following roughly the western coast line of the Colony (opened to Couva in 1880, San Fernando in 1882, Siparia in 1913); total distance, Port of Spain to Siparia, 51 miles.

The Caparo valley and Caparo valley extension lines, 28½ miles (opened to Tabaquite in 1888, Rio Claro in 1914), leaving the Port of Spain—San Fernando—Siparia line at Jerningham Junction (14½ miles from Port of Spain) and running in a generally south-eastern direction; total distance from Port of Spain 43 miles.

The Guayacana line (10 miles) opened in 1884, leaving the Port of Spain—San Fernando—Siparia line at Marabella Junction (33 miles from Port of Spain) and running in an easterly direction to Princes Town; total distance from Port of Spain 43 miles, and

The Cipero tramway, to the south of San Fernando, also proceeding by another route to Princes Town.

The total length of this system is now 123 miles.

The railways afford opportunities of communication for passengers between all lines three times a day, and there are goods train opportunities once a day.

A suburban service of trains is run between Port of Spain and Arima (16 miles) at low fares, giving a service of 6 trains daily each way.

Road transport feeder service between the principal terminal stations and the coast provide for through transport between all the Districts of the Colony.

In connection with the railway, a steamer makes three trips a week each way between Port-of-Spain and the Bocas entrance to the Gulf, including the Islands to the West of Port-of-Spain.

The railway stations are in telegraphic communication one with the other on all parts of the system, giving a total length of about 118 miles of telegraph and about 14 miles of telephone lines. There is also a service telephone along the Cipero Section between San Fernando and Princes Town.

The total receipts from the railways, railway-steamers, telegraphs and telephones for the year 1932 amounted to 121,379L, and the working expenses to 148,180L, exclusive of provision for loan and capital interest and sinking fund amounting to 98,487L. There has been a considerable falling off in the Railway receipts during the last few years, due to competition from motor omnibuses and lorries.

The total number of passengers carried during 1932 was 1,845,655. The total tonnage of goods was 370,000 tons.

The Island is intersected by numerous roads either metalled or gravelled, and capable of carrying fairly heavy motor traffic. Many of the most important roads have been reconstructed in recent years, and their surfaces treated with Trinidad Road Oil or Trinidad Road Binder. This method of construction is being steadily pursued. The total mileage of roadway is 2,344.79, of which 1,077.21 miles of main and 761.04 miles of local roads are under the control of the Public Works Department, and 515.05 miles of local roads are under the control of Road Boards.

There are numerous motor bus services plying along the Eastern Main Road between Port of Spain and Arima, and along the Southern Main Road between Port of Spain and San Fernando. These services are not continuous, individual owners plying for hire along different sections of the routes. There is also a bus service which links the suburb of Woodbrook to the city.

There is a General Post Office in Port of Spain, branch offices at San Fernando and Tobago, and 119 out-offices throughout the Colony.

Communication by cable with the United Kingdom, Europe, North America and other parts of the world is maintained by the Pacific Cable Board (All Red Route) and the West India and Panama Telegraph Company. The Pacific Cable Board and the West India and Panama Telegraph Company are both now under the management of Imperial and International Communications Ltd. of Electric House, London, and have recently been amalgamated, the West India and Panama Telegraph Company's office being used as the joint office.

A wireless system of communication is also maintained between the following Islands—Barbados, St. Vincent, Grenada, Carriacou, St. Lucia, Dominica, Antigua, Montserrat and St. Kitts.

The principal tariffs are:—

To the United Kingdom from

Port-of-Spain	...	...	2/4 per word
To Eastern Canada	...	...	1/6 " "
To Western Canada	...	...	1/8½ " "

There are also cheap rates at half and quarter of the ordinary tariff, the latter being subject to a minimum charge.

Three wireless stations are maintained by the Trinidad Government, namely Port-of-Spain, North Post in Trinidad, and at Scarborough Tobago. The North Post Station deals exclusively with ship, Tobago and St. Martin and Martinique traffic while communication with British Guiana, Venezuela and Paramaribo is carried out by Port-of-Spain.

Steamers calling at Trinidad comprised the following lines:—Elders and Fyffe, Leyland (Line), Harrison (Line), Compagnie Generale Transatlantique, Socuta Italia (Line), Trinidad (Line) (Furness Withy and Coy., Ltd.), Prince (Line), Ocean Dominion Steamship Corporation, Royal Netherlands West India Mail, Canadian National Steamers, Aluminium (Line), Orinoco (Line), Nourse (Line), Hamburg-Amerika (Line), Ocean Dominion, New York Service, Lamport & Holt, Munson Steamship, Bermuda & West Indies, Vancouver & West Indies, McCormick S.S. Co., Pacific Argentine Brazil (Line), the Horn (Line), Canadian Transport Company and Compania Anonima Venezolana de Navegacion. Mails are regularly forwarded and received by these steamers.

In addition an increasing number of steamers call to load oil cargoes, or to take in coal or fuel oil for bunker purposes. During the winter months a number of tourist ships call.

Aerial services were established in the Colony in 1929 by two American Companies, viz: the Pan American Airways, Incorporated, and the New York, Rio de Janeiro and Buenos Aires Line. In August, 1930, the Pan American Airways Inc., and the New York, Rio and Buenos Aires Line were amalgamated.

The Pan American Airways maintain a regular air service with the United States via the Lesser Antilles, Cuba and Miami, and with Buenos Aires via a number of South American ports. There is also an Air Mail service to Venezuela terminating at Maracaibo.

#### Currency and Banking.

British Currency and United States gold are legal tender. Accounts are kept in sterling by the Government and in dollars by the public, and the coin in circulation is almost exclusively British silver and bronze, there being no limit to silver as legal tender.

In 1903 an Ordinance providing for the issue of Government Currency Notes was brought into force. Under this Ordinance notes of the

denominations of \$1, \$2, and \$1,000 have been issued, the total value in circulation at 31st December, 1932, amounting to \$625,440.

Government Savings Banks are established in 36 districts with a head office in Port-of-Spain. The total number of depositors at 31st December, 1932, was 39,850, with deposits amounting to 432,097. The savings banks are largely made use of by the East Indians, of whom at the 31st December, 1932, there were 13,062 depositors. The amount deposited by this section of the community during the year is estimated at 67,455l.

The Commercial Banks are (1) Barclays Bank (Dominion, Colonial and Overseas) Ltd., with a note circulation in the Colony estimated at 1,500,000l.; (2) the Royal Bank of Canada, with an authorized note circulation in the Colony of 1,500,000l.; (3) The Canadian Bank of Commerce, with an authorized note circulation of \$750,000; (4) Messrs. Gordon, Grant & Company, Limited. Barclays Bank (Dominion, Colonial and Overseas) Ltd., the Royal Bank of Canada, and the Canadian Bank of Commerce have Savings bank branches and pay the same rate of interest as is paid by the Government Savings Bank, viz., 3 per cent. The Bank of Messrs. Gordon Grant and Co., Limited, is not a bank of issue. In addition to the above Banks there is the Trinidad Co-operative Bank, an institution established in 1914, for the encouragement of thrift.

#### *Education.*

At the close of 1932 there were 290 elementary and intermediate schools in the Colony, 43 being Government and 247 assisted schools. There were 254 schools in Trinidad and 36 in Tobago.

The number of pupils on the roll in December, 1932, was 68,211. The average daily attendance was 47,493, or 69·6 per cent. of the number on roll. As compared with the previous year there was an increase of 2,100 on the roll, and of 4,384 in average attendance. The number of teachers and pupil teachers employed was 1,813 (1,853 in 1931).

The total expenditure on education during the year 1932, deducting the amount received in school and examination fees, was 154,215l. as compared with 151,928l. 16s. 6d. in 1931.

#### *Secondary Education.*

The following Colleges afford facilities for the higher education of boys:—The Queen's Royal College and its affiliated institutions, the St. Mary's College in Port-of-Spain, and the Naparima College in San Fernando, the Bishop's High School in Tobago. The St. Joseph's Convent and the St. Hilary's High School in Port-of-Spain, and the Naparima Girls' High School at San Fernando, which are also affiliated to the Queen's Royal College, provide similar education for girls.

The affiliated institutions work under the same curriculum as the Queen's Royal College, and receive a Government grant-in-aid.

Besides the public schools, of which mention has been made above, there are many private schools.

Opportunities for technical education are afforded by a Board of Industrial Training established in 1906, which also supervises a small institution for the instruction of the blind.

## TOBAGO.

### *History.*

Tobago was discovered by Columbus in 1498, at which time it was occupied by Caribs. The British flag was first planted on the island in 1580, and the sovereignty was regularly claimed by James I. in 1608. In 1625 an attempt was made by some adventurers from Barbados to form a colony; but many were killed by the Carib Indians, and the remaining few escaped and settled at Providence. In 1628 a grant of the island was made by Charles I. to the Earl of Pembroke. The island remained unoccupied until 1632, when 300 Zealanders were sent out by a company of Dutch merchants, who styled it New Walcheren. After a residence of about two years these settlers were all destroyed or expelled by the Indians and Spaniards from Trinidad. In 1641 James Duke of Courland obtained a grant of the island from Charles I., and in 1642 two vessels arrived with a number of Courlanders, who settled on the north side of the island. These were followed by a second Dutch colony in 1654, who, having effected a compromise with the Courlanders, established themselves on the southern coast; but in 1658 the Courlanders were overpowered by the Dutch, who remained in possession of the whole island until 1662, when the Dutch Company resigned their right to it. In this year Cornelius Lampsis procured letters patent from Louis the Fourteenth, creating him Baron of Tobago, and proprietor of the island under the Crown of France.

In 1664 the grant of the Island to the Duke of Courland was renewed by Charles II. The Dutch refused to recognise the Duke's title, but in 1667 they themselves were compelled by the French Admiral Estras, to evacuate the island the Dutch Admiral Binks being defeated in Scarborough Bay, whereupon Louis the Fourteenth restored the island to the Duke of Courland, who, in 1681, made over his title to a company of London merchants. In 1748, by the Treaty of Aix-la-Chapelle, the island was declared neutral; the subjects of all European Powers being at liberty to form settlements or carry on commerce but not to place garrisons on it. At the peace in 1763, by the Treaty of Paris, Tobago was ceded by France to England in perpetuity.

In 1781 Tobago was captured by the French under the Duke of Bouille, after a most gallant defence by the Colonists. In 1783 it was surrendered by treaty to the French Crown. On 15th April, 1793, it was captured by a British force under Admiral Lefrey and General Cuyler, and was once more restored to the French by the Treaty of Peace in 1802, and again reconquered in 1803 by Commander Hood and General Greenfield, and in 1814 finally ceded in perpetuity to the British Crown.

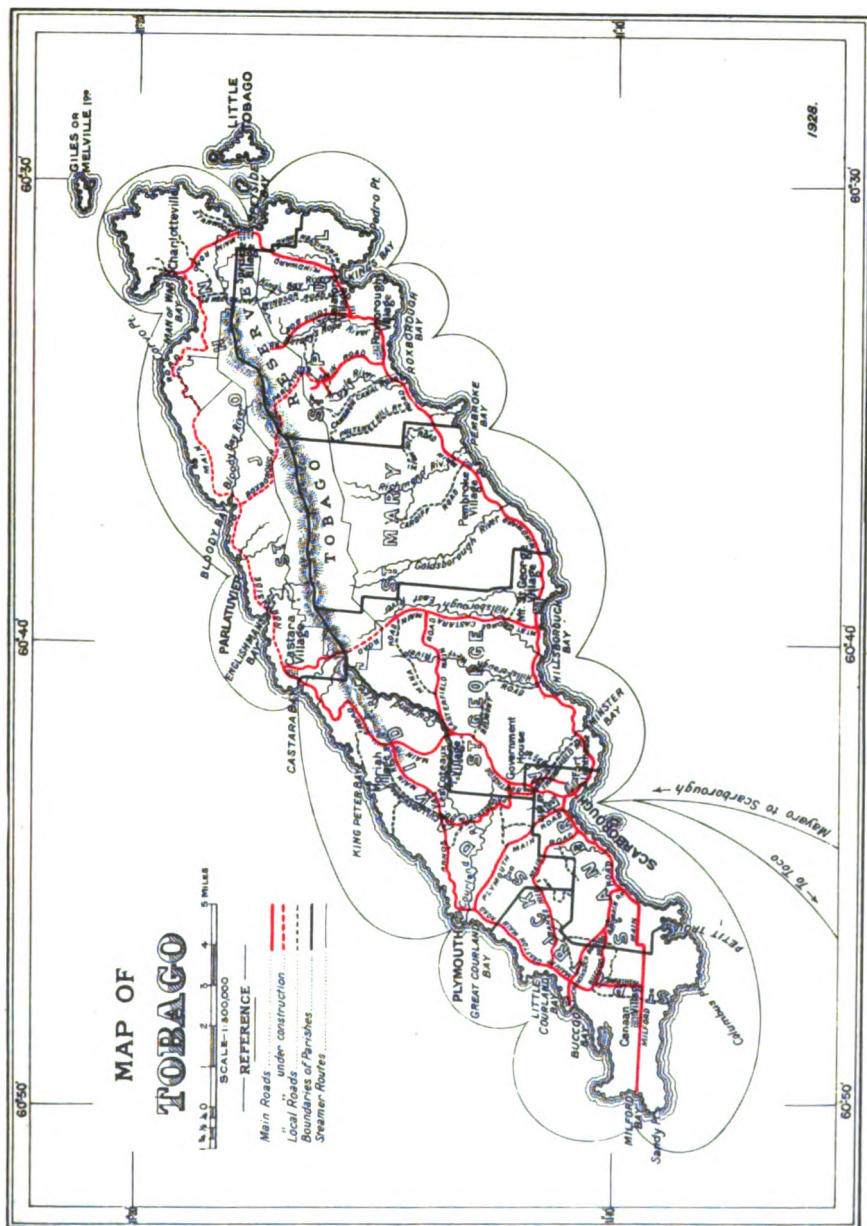

### *Situation and Area.*

Tobago lies between 11° 8' and 11° 21' N. lat. and 60° 30' and 60° 50' W. long., distant from Barbados 120 miles, from Grenada 75 miles, and from Trinidad, 25 miles. It is 26 miles long and 7½ miles at its greatest breadth, and has an area of 116 square miles, or 74,392 acres, of which about 41,675 acres are under cultivation.

The formation of the island is volcanic; its physical aspect is irregular and picturesque, with conical hills and ridges, which descend from a common base or dorsal ridge 1,800 feet high and 18 miles in length.

The population of Tobago in 1931 was 25,358 according to census.

*General Description.*

Tobago is a Ward of Trinidad and its exports out of the Colony all pass through Trinidad and are included in the general statistics of the Colony. It has also a considerable trade in minor products, vegetables, live stock, etc., with Trinidad. The total value of the Tobago trade in 1932 was 81,710*l*.

The great progress made by Tobago in the last thirty-four years is shown by comparing the value of the chief products for 1897 and 1932 :—

	1897.	1932.
	£	£
Cacao .. .. .	1,671 ..	40,253
Cocoanuts, Copra and Oil	776 ..	27,357
Live Stock .. ..	7,694 ..	14,100

The island is divided into seven parishes. Scarborough, the principal town, is on the south side of the island, about 8 miles from the S.W. point, and is situated at the south-western base of a hill 425 feet above the level of the sea, on which stands Fort King George, now without a garrison. The town had a population, according to the census of 1931, of 833. It is a port of registry. Courland Bay, at Plymouth, also has good anchorage. There is a lighthouse at Fort King George, Scarborough; it is a fixed white light, at an elevation of about 425 feet above the level of the sea.

Regular communication with Trinidad is maintained by means of wireless telegraphy, and a service of a coastal steamer, provided by the Government.

The island possesses a large mileage of good roads and these are rapidly being extended and improved.

Education is in the hands of the Anglican, Roman Catholic, Moravian, and Wesleyan bodies, who are assisted by a Government grant.

*Constitution.*

The Government was formerly administered by a resident Administrator, subordinate to the Governor-in-Chief of the Windward Islands at Grenada, and a Legislative Council was established by an Order in Council of the 7th of February, 1877, to consist of not less than three persons, designated by Her Majesty.

By an Order in Council of 17th November, 1888, issued under Act 50 & 51 Vict. cap. 44, Tobago was amalgamated with Trinidad, the name of the new Colony being Trinidad and Tobago. The latter island was administered by a Commissioner appointed by the Governor of the United Colony, who was *ex officio* a member of the Legislative Council, and one unofficial member of Council represented Tobago. The Commissioner was assisted by a financial board of five members, two nominated by the Governor and three elected. The revenue, expenditure, and debt of the islands remained distinct, but there was entire freedom of commercial intercourse between them, and the laws of Trinidad were, with some specified exceptions, the laws of both.

By an Order in Council of the 20th of October, 1898, the Order in Council of the 17th of November, 1888, was almost entirely revoked, and it was provided that the Island of Tobago should become a ward of the United Colony of Trinidad and Tobago; that the revenue, expenditure, and debt of Tobago should be merged in those of the United Colony; that the debt due from Tobago to Trinidad should be cancelled; that (with some specified exceptions) the laws of Trinidad should

operate in Tobago, and those of Tobago cease to operate so far as they conflicted with the laws of Trinidad; that all future Ordinances of the Legislature of the Colony should extend to Tobago, with the proviso that the Legislature should be able to enact special and local Ordinances and regulations applicable to Tobago as distinguished from the rest of the Colony.

This Order in Council was brought into effect from the 1st of January, 1899, by a proclamation of the Governor issued on the 8th of December, 1898. The post of Commissioner ceased to exist, and the post of Warden and Magistrate was created.

## UGANDA.

(FOR MAP SEE UNDER KENYA.)

*Extent and Boundaries.*

The British Protectorate over Buganda was proclaimed on August 27th, 1894. The Protectorate was further extended over Bunyoro and Busoga on July 3rd, 1896. By numerous treaties concluded by various officers in the service of the Protectorate, the British administration has spread still further over countries adjoining the kingdom of Buganda proper, and the boundaries of the Protectorate may now be set forth as follows:—

On the east by Kenya Colony as far north as Mount Zulin, near the 4th degree of north latitude, the natural boundaries being the Turkana escarpment, Mount Elgon, and the Sio River running into the north-east corner of Lake Victoria; on the south, by Tanganyika Territory and by the 1st degree of south latitude; on the west, by the frontier of the Belgian Congo, the natural boundaries being Lake Edward, Mt. Ruwenzori, the Semliki River, Lake Albert and the Nile watershed; and on the north, by the Uganda-Sudan boundary.

The area of the Uganda Protectorate is estimated at 94,204 square miles, including 13,616 square miles of water. Pending the complete survey of the country, it is not possible to give the correct area.

For administrative purposes the Protectorate is divided into four provinces (Eastern, Northern, Western, and Buganda), and then again into numerous districts.

The headquarters of the Uganda administration are at Entebbe, and the chief commercial towns in the Protectorate are Kampala and Jinja; all three are on or near the North shore of Lake Victoria.

*Climate.*

The climate, when compared with that of some tropical countries, is not unpleasant, but there are parts of the country which can by no means be called healthy. The conditions vary with the altitude in different parts of the Protectorate: the Nile Valley, which lies about 2,000 feet above sea-level, is hot, and is considerably more unhealthy than the higher-lying regions between Lakes Victoria and Albert. The most congenial climate for European residence is found in the Buganda kingdom and in the Western Province, where in some districts the altitude exceeds 5,000 feet above sea-level. European children thrive well in infancy in a few of the healthier stations, but considerable risk is attached to bringing them out when over six or seven years old, as they are always liable to attacks of malaria and the anæmia and general ill-health resulting therefrom.

The climate is mild, neither excessively hot nor cold, the average temperature for the year 1932 at Entebbe being—Mean maximum, 78.6° Fahrenheit; mean minimum, 63.2° Fahrenheit. Average daily sunshine, 6.7 hours.

The lowest rainfall for 1932 was recorded at Mbarara, which registered 32.17 inches, the highest (88.96 inches) being recorded at Kalangala, Sese Islands.

The seasons are not well defined, but there are two dry seasons within the year; one dry season usually includes June and July, and the other December, January and February.

The healthiest months of the year are usually January, February and March, July, August, September and October, and the least healthy, April, May, November and December, or the periods corresponding to those immediately following the rains, when the mosquitoes become more in evidence and malarial infections more numerous.

No part of the Uganda Protectorate can be said to be absolutely free from malaria, but in some districts, for example those of Toro and Ankole in the Western Province, there is comparatively little, while on the other hand, in the Nile valley and along the courses of the larger rivers, malaria prevails at all seasons of the year.

Sleeping sickness, which proved such a scourge to the country in 1902 and the years following and necessitated the evacuation of the natives from the islands in Victoria Nyanza, and from the shores of the great lakes and rivers, is now well under control. During 1921 and 1922 the island population was to a great extent restored and many of the islands were successfully reopened. The focus of the disease is no longer on Lake Victoria.

Plague and smallpox are unfortunately endemic in the native population, but it has been possible to confine outbreaks for the most part within narrow limits. Active measures against these diseases are constantly engaging the attention of the medical and administrative authorities.

*History.*

The countries that now make up the Uganda Protectorate did not become known to Europe until the journey of Speke and Grant in search of the sources of the Nile, which brought them to Buganda in 1862 and to Bunyoro a year later. In both countries they found a somewhat advanced indigenous civilisation, and it is around the rivalries of these two principalities that all the early history of the country centres. The Swahili form of "Buganda," the country of the Baganda people, has been adopted as the name of the whole Protectorate, although there are many other quite separate races and tribes among its inhabitants. Speke's discoveries were not at first credited, but were soon confirmed by Sir Samuel Baker and his wife who discovered Lake Albert. The first missionaries arrived in Buganda in 1877, and the rivalries of Protestant, Catholic and Mohammedan which soon naturally arose ended after the death of the old king, Mutesa, and the accession of his weak and vacillating son, Mwanga, to the throne in 1884, in bloodshed. The Imperial British East Africa Company which, after concluding a treaty with Mwanga in 1890, had occupied Kampala with a weak force under Capt. Lugard, had much difficulty in trying to compose these rivalries, and would have been forced to abandon the country but for the intervention of the British Government, which sent out a Special Commissioner, Sir Gerald Portal, in 1893. His enquiry and negotiations led to the establishment of the Protectorate in the following year. For three years the country remained quiet, but in 1897 mutiny broke out among some of the Sudanese troops who had been recruited by the Company from the remains of the Egyptian forces cut off by the Mahdist rebellion. It soon spread to all the discontented elements, but was ultimately overcome after having seriously menaced British rule. Finally the two kings—Mwanga of Buganda and Kabarega of Bunyoro—who had always resented European penetration and had seized upon the mutiny as a good opportunity to put an end to it, were captured and deported.

Since then there is little but peaceful progress to record. Sir Harry Johnston was sent out by the British Government in 1900 as Special Commissioner to settle the country, and concluded agreements with the heads of the native principalities of Buganda, Toro and Ankole, which laid down the principles governing their administrative relations with the Crown and the ownership of the land. No such arrangements could be made at the time with regard to the rest of the present Protectorate, but administration has since been extended gradually over the

more primitive and unorganised tribes, and the same principles of "indirect rule" have been followed wherever and whenever it was possible as in the "agreement districts." In 1903 the Eastern highlands of the Protectorate along with the Kavirondo country were transferred to what is now Kenya Colony, and the succeeding years saw further adjustments of frontiers with the Sudan, the Belgian Congo, and German East Africa, now Tanganyika Territory. In 1903 the superintendence of the Protectorates affairs passed from the Foreign to the Colonial Office. In the Great War the population, of all races, remained devotedly loyal and played a great part in the East African campaign. Since then progress, both material and cultural, has continued, the former made possible by the success of the cotton industry and the development of communications, the latter based on the activities of the missions, both Protestant and Catholic, in whose hands was all educational work until 1925.

#### Population.

Estimated population, December, 1932 :—			
Europeans, males	..	..	1,124
females	..	..	687
Asiatics	..	..	14,061
Native Population	..	..	3,568,886
Total			3,584,758

#### Constitution.

By the Uganda Order in Council, 1920, it was provided that there should be an Executive Council and a Legislative Council both consisting of such persons as may be directed by Royal Instructions. Under the Royal Instructions dated the 5th June, 1920, the Executive Council consists of the Chief Secretary, Attorney-General, Treasurer, and Director of Medical and Sanitary Services (*ex-officio* members), and such other persons holding office in the public service as the Governor may appoint (official members), and such other persons (if any) not holding such office as the Governor may appoint (unofficial members), with the Governor as President.

It is further provided that the Legislative Council shall consist of the Governor, Attorney-General, Treasurer, and Director of Medical and Sanitary Services (*ex-officio* members), with official and unofficial members as in the case of the Executive Council.

The membership of both Councils has now been increased by the addition of the Director of Education and the Director of Agriculture; the Provincial Commissioner Buganda has been appointed a member of the Executive Council.

For the East African Governors Conference, see under Kenya, page 330.

The Native Government of Buganda has certain rights of internal legislation granted by agreement. The king or *Kabaka*, who is accorded the title of "His Highness," rules the Buganda people with the advice of the Governor and of a native Council known as the *Lukiko*, which also has judicial functions.

#### Communications.

The Uganda Protectorate is separated by about 500 miles from the nearest point on the east coast of Africa. Over this stretch of country, all of which lies within the Colony of Kenya, transport was exceedingly difficult before the construction of the "Uganda Railway" from Mombasa to the north-east corner of Lake Victoria, which the Imperial Government decided in 1895 to undertake. This railway at the end of 1901 had covered the whole 584 miles separating Mombasa from Kisumu on Victoria Nyanza, which was the terminus of the railway until recent years.

There is a Lake Steamer Service connecting Entebbe, Port Bell (Kampala), and Jinja with Kisumu and the other ports on Lake Victoria. Steamers ply also on Lake Kioga and on Lake Albert and the Albert Nile as far North as Nimule. All these services are maintained by the Kenya and Uganda Railways and Harbours Administration.

A railway, 62 miles long, from Jinja to Namasagali on the Victoria Nile, giving access to the waterways of Lake Kioga, was completed in 1912, and one from Port Bell on Lake Victoria to Kampala, the principal commercial centre, a distance of 7½ miles, was opened for public traffic in 1915.

Since the Great War considerable railway development has taken place, and a main line of the Kenya and Uganda Railway, leaving the original line at Nakuru, now extends into the Eastern Province of Uganda to join the Jinja-Namasagali railway at Mbulamuti, and so places Uganda in direct communication with the Coast. An extension of this line from Tororo, near the Kenya border, to Mbale and Soroti was completed in 1929, and the linking up of Jinja with Kampala—a scheme which involved the bridging of the Victoria Nile at the former place was completed in the early part of 1931.

The system of all-weather main roads radiating from Kampala to the principal administrative centres is maintained by the Public Works Department, which has a road mileage of 1,795 under its control. A new system of roads is coming into being in the Western Province for the purpose of establishing connection between the tin-mines and the Kagera River steamship service, to tap the resources of the Ruchuru area of the Belgian Congo for that service, and to link up direct the district headquarters in the west of the Protectorate, and this system is now nearing completion. Many miles of excellent roads are also kept up by the Native Administration. Motor-transport, in consequence of these facilities, has reached an advanced stage of development in the Protectorate.

The Uganda Posts and Telegraphs Department is amalgamated with that of Kenya under the control of the Postmaster-General at Nairobi.

Uganda is now in telegraphic communication with Mombasa and Dar-es-Salaam by land lines, and thence by cable with Great Britain and other countries. All important centres within the Protectorate are connected also by telegraph.

The total mileage of telegraph and telephone pole route at the end of 1932 was 1,618 and the wire mileage 3,547. Telephone exchanges are worked at Entebbe, Kampala, Jinja, Iganga, and Mbale, and connected by trunk lines.

#### Aviation.

Landing grounds are kept up at Entebbe, Tororo and Jinja, and landing facilities for sea-planes exist at Entebbe, Port Bell near Kampala, and Butiaba. There is no accommodation in Uganda for housing aircraft, but repairs can be carried out at the above places. Weekly communication by air with Europe and South Africa has now been established by means of Imperial Airways, Ltd.

#### Industries.

Coffee of the *Arabica* and *Robusta* varieties has been introduced and thrives exceedingly well; the former is the principal crop on European plantations, and both are being grown in increasing quantities by natives. The principal industry is cotton, and 829,303 cents of lint, valued at 1,584,172., as well as 56,311 tons of cotton seed, of a value of 168,366., were exported in 1932. Rubber (principally plantation grown), hides and skins, ground-nuts and

chillies, are the other principal agricultural exports, and, except for rubber, practically all the production is in native hands. Mineral discoveries have been made in recent years, and there is a considerable export of high-grade tin ore from the Western Province. This amounted in 1932 to 335 tons, of a value of 47,168*l*. Cattle are plentiful. Leasehold grants of land can be obtained from the government, but the issue of freehold concessions has been withdrawn for the present.

The weights and measures in common use in the Protectorate are the Imperial weights and measures. The currency is the same as that of Kenya.

Banking facilities are afforded by the National Bank of India Ltd., with branches at Entebbe, Kampala, and Jinja, the Standard Bank of South Africa Ltd., with branches at Kampala and Jinja, and by Barclays Bank (Dominions, Colonial and Overseas), with branches at Kampala and Jinja.

### *Trade and Customs.*

Since 1917 Kenya and Uganda have been one administrative unit for purposes of Customs.

Following lengthy negotiations, a uniform Tariff was adopted in 1923 for Kenya and Uganda, operating also in Tanganyika Territory. Under this tariff all export duties were abolished and the import schedules were remodelled to provide for the imposition of "specific" duties and of "ad valorem" duties varying from 10% to 62½% of the landed value of goods liable to duty on importation. In addition, free trade between Kenya, Uganda and Tanganyika Territory in goods, the growth produce or manufacture of each of the territories was established. The 1923 Tariff with minor alterations, remained in force until April, 1930, advantage of the existence of a tariff common to the three territories being taken to institute in August, 1927, a system of extending unrestricted trading to imported goods passing between the territories. Under this procedure, which is operated by means of transfer forms, single payment of duty only is chargeable, the Customs Revenue involved being credited to the consuming territory by inter-departmental entry.

In 1930 a uniform modernised Tariff scheduled according to commodities as opposed to rates was negotiated and enacted in the three territories simultaneously. Included in the provisions of the Tariff Ordinance is an amended definition of value for purposes of assessment of duty which brings the East Africa Tariff Laws into conformity with the practice followed in many other countries and allows of the acceptance of certificates of value endorsed on invoices in the stereotyped form approved by the Imperial Customs Conference, 1921.

The basis of assessment is now the current domestic value in the country of export plus freight and other charges incurred up to the time of importation of goods into Kenya, Uganda or Tanganyika Territory as the case may be. As regards certain specially protected commodities (wheat flour, sugar, timber, etc.) the device of "suspended duties" has been adopted in order to allow of a defined margin of elasticity in each territory in the matter of imposition on specified articles of "suspended duties" as distinct from basic duties, without interference with the main principle of a common Tariff. The 1930 Tariff Ordinances of the three territories provide that the Governor, with the approval of Legislative Council, may impose by Proclamation either in part or in full a duty referred to in the Tariff schedules as a "suspended duty," the effect being that each Government has the right to vary "suspended duties" up to the amount specified in the Tariff. At the same time an undertaking has been given by

each Government that removals of any of the "suspended duties" will only take place after prior consultation with the other Governments concerned.

In 1931 the Consumption Tax previously leviable on wines and spirits cleared for consumption in Kenya was incorporated in the common Tariff and certain increases in the rates of duty chargeable on vehicles and parts (including tyres and tubes) were imposed in the three territories.

The import tariff as it now stands admits free of duty goods essential to the agricultural, industrial, educational and scientific development of the territories and has been designed, as far as possible, to protect imports essential to the opening up and development of the country and to foster local production of agricultural and other commodities in which Kenya, Uganda and Tanganyika Territory, taken as an economic unit, are, or can be made, self-supporting.

For Kenya and Uganda, the value in pounds sterling, of Trade Imports (excluding imports on Government Account, railway material and goods in transit and transhipment) and of exports (domestic and foreign) and the net amount of Customs receipts from all sources and the tonnage entered at Kenya Ports were as follows:—

Year.	Trade Imports. £	Total Exports. £	Customs Receipts. £	Tonnage entered Net Tonnage
1926	7,680,577	7,944,681	1,150,593	1,444,320

## WESTERN PACIFIC.

#### *High Commission.*

The office of High Commissioner in, over, and for the Western Pacific Islands, was created by an Order in Council, cited as the Western Pacific Order in Council of 1877.

The jurisdiction of the High Commissioner extends over all islands in the Western Pacific not being within the limits of the territories administered by His Majesty's Governments in the Commonwealth of Australia and in New Zealand or the Colony of Fiji, and not being within the jurisdiction of any other civilised Power.

In 1893 a new Order in Council was issued, known as the Pacific Order in Council, 1893, in accordance with which the High Commissioner's jurisdiction is extended to foreigners and (in most cases) to natives residing in British settlements or protectorates within the limits of the Order. Under the provisions of the New Hebrides Order in Council, 1922, the jurisdiction of the High Commissioner extends also to the islands in the Pacific Ocean known as the New Hebrides, and all the islands known as the Banks Islands and Torres Islands. The expenses of the High Commission at Suva, Fiji, are met from the funds of the Gilbert and Ellice Islands Colony and the British Solomon Islands Protectorate, but a contribution is paid from Imperial funds in respect of work in connection with Tonga and the New Hebrides.

The Chief Justice of Fiji, and every other Judge for the time being of the Supreme Court of Fiji, is by virtue of his office a Judicial Commissioner.

Deputy Commissioners are appointed by the High Commissioner on behalf of His Majesty.

The High Commissioner's Court consists of the High Commissioner, the Judicial Commissioners,

and the Deputy Commissioners, and in it is vested all His Majesty's civil and criminal jurisdiction exercisable in the Western Pacific Islands.

The Court of a Judicial Commissioner has powers similar to those of the Superior Courts of England, and the Deputy Commissioners have civil jurisdiction in Common Law, Equity and Bankruptcy, with a limited jurisdiction in Probate, and have a criminal jurisdiction in respect of offences not punishable with seven years' penal servitude or upwards.

With some few exceptions all decisions of the High Commissioner's Court may be appealed against to the Supreme Court of Fiji.

In addition to the other means of preserving order the High Commissioner has certain special powers for the deportation of persons whose proceedings endanger the peace of the Islands.

The principal groups under the High Commissioner are:—

- The Gilbert and Ellice Islands Colony.
- The British Solomon Islands Protectorate.
- Tonga.
- The New Hebrides.
- The Phoenix Group.
- Pitcairn Island.

Particulars of these are given below.

### THE GILBERT AND ELLICE ISLANDS COLONY.

The Colony, which includes Ocean, Christmas, Fanning, and Washington Islands, besides the Gilbert and Ellice groups, is under the charge of a Resident Commissioner, who is responsible to the High Commissioner for the Western Pacific who resides in Fiji.

(c)

**THE GILBERT AND ELLICE GROUPS.**—The Gilbert Group is comprised of the following sixteen islands:—Makin, Butaritari, Marakei and Abaiang (Northern Gilberts); Tarawa, Maiana, Abemama Kuria, Aruanuka and Nonouti (Central Gilberts); Tabiteuea, Beru, Nikunau, Onotoa, Tamana and Arorae (Southern Gilberts).

The Ellice Islands are the following nine:—Nanumea, Nanumaga, Nukunono, Nui, Vaitupu, Nukufetau, Funafuti, Nukulaelae and Nukakita.

The two groups consist of a series of coral atolls lying between 4° N. latitude and 10° S. and 170° to 180° E. longitude with an area of 180 square miles. The principal export is copra.

The population of the Colony on the 30th June, 1933, was approximately as follows:—Ocean Island, 2,220; Northern Gilberts District, 6,638; Central Gilberts District, 8,337; Southern Gilberts District, 11,676; Ellice Islands District, 4,074; Fanning Island District, 569; Total 33,604. These figures may be divided into three broad groups: Europeans 277, Asiatics 411, and Natives 32,816. Total 33,604.

With few exceptions the hereditary chieftainships have ceased to exist, but each island has its own native government, presided over by a native magistrate.

A revised code of native laws is validated by an Ordinance of the Colony, and law and order is well maintained under the general supervision of European officials.

The natives are of Malayo-Polynesian race. The majority are adherents either of the London Missionary Society or the Roman Catholic Mission of the Sacred Heart. There is no similarity between the languages of the Gilbert and Ellice Groups.

**OCEAN ISLAND** (or Banaba), in lat. 0° 52' S., long. 169° 35' E., about 1,500 acres in extent, is the Headquarters of the Government and the site of operations of the British Phosphate Commission. Reaching a height of 280ft. and covered with vegetation, it is the only island of the Colony not of atoll formation. The population of Ocean Island on the 30th June, 1933, was 2,220. Of these 127 were Europeans. The natives numbered 1,718. Indentured labourers with their wives and families numbered 841. There were also 375 Chinese, all employees of the British Phosphate Commissioners with the exception of the Government Interpreter and his wife.

**FANNING AND WASHINGTON ISLANDS** lie about 3° 51' N. latitude, and 159° 21' W. longitude. There is no indigenous population but labour is recruited from the Gilbert Islands for the copra industry. An Administrative Officer is in charge of these islands under the Resident Commissioner. On Fanning Island is the mid-ocean Station of the Pacific Cable Board, whose employees and their wives comprise practically the entire European population of 30. There is no regular communication between these islands and the rest of the Colony; periodical visits are made for engaging and repatriating labour by a small auxiliary vessel of the Fanning Island Company. The total population on the 30th June, 1933, was 521, Fanning Island 332 and Washington 189.

**CHRISTMAS ISLAND** (about 1° 59' N. latitude, 157° 30' W. longitude) lies 164 miles South-East by East of Fanning Island. The area is about 60,000 acres, of which 1,200 are under coconuts. Under the terms of a License dated the 27th October, 1914, the Central Pacific Coconut

Plantations Limited of London were granted the exclusive right to occupy the island for their own use for the planting of coconuts, the manufacture of copra, the export of coconut oil, pearl shell, and guano during the term of 87 years from the 1st January, 1914. All vessels employed or chartered by the Company trading between the Society Islands and Christmas Island have been exempted from the Quarantine Ordinance, and may visit Christmas Island without a preliminary call at a prescribed port of entry in the Colony. Periodical visits are made by H.M.'s ships.

The climate of all the groups is fairly healthy for Europeans, but the natives suffer from lung diseases, especially pulmonary tuberculosis. A considerable amount of medical work has been undertaken of late years and a large central hospital is maintained at Tarawa in the Gilbert Group. Every Island has a native hospital under the charge of a native student trained at the Tarawa Hospital.

Communication between the various islands was formerly infrequent, depending on the irregular movements of vessels belonging to or chartered by Messrs. Burns, Philp and Company, Limited, On Chong and Company, and the British Phosphate Commissioners, but the acquisition by the Administration of the auxiliary sailing vessel "Nimanoa" has considerably increased the facilities for regular communication.

The principal sources of revenue are import duties (general *ad valorem* rate 12½%); export duty on copra; land tax (paid in copra) on native communities; capitation tax 10s. a head p.a. on non-natives; ship, trading and other licences; royalty on phosphate shipped from Ocean Island; and interest on invested funds.

The Revenue and Expenditure of the Colony have been as follows:—

Year ended 30th June.	Revenue.	Expenditure.
	£	£
1927-28 ... ..	71,964	45,632
1928-29 ... ..	73,712	60,695

1931-32 ... ..	49,111	53,947
1932-33* ... ..	57,400*	48,600*

\* Partly estimated.

The imports and exports have been as follows:—

Year.	Imports.	Exports.
	£	£
1927-28 ... ..	150,271	312,834
1928-29 ... ..	190,436	348,272

### THE BRITISH SOLOMON ISLANDS PROTECTORATE.

The British Solomon Islands Protectorate is situated between the parallels of 5° South and 12° 30' South, and the meridians of 155° and 170° of East longitude.

The Protectorate consists of a double row of mountainous islands, extending at its extremities from Bougainville Straits to Mitre Island, in the Santa Cruz Group, for a distance of 900 miles, and north and south from the Ontong Java Group to Rennell Island for a distance of 430 miles, in an area approximately 249,000 square nautical miles, of which about 11,000 square miles are land.

The native population (mainly Melanesian) is 93,415.

The Solomon Islands were first discovered in the year 1568 by Alvaro de Mendana, while on a voyage of discovery from Peru. The island first sighted they named Ysabel because it was on that Saint's day that they left Callao. In the year 1595 a second expedition under Mendana sailed from Peru, but failed to locate the island of Guadalcanal, whereon it was intended he should form a settlement, and he arrived in the Santa Cruz Group, and landed at Graciosa Bay. The new colony proved a failure, the death of Mendana put an end to any prospect of success, and the remnants of the original party returned to Peru.

In 1767 Captain Carteret re-discovered the Santa Cruz Group and the north-west coast line of the island of Malaita.

In the same year de Bougainville in the frigate *La Boudese*, sailed from Monte Video on a deliberate quest of the Terra Australis which he missed, and arrived at New Guinea; in sailing back he passed through the Straits which are the present north-eastern boundary of the Protectorate, the island on the right being named Bougainville after him, and the one on the left named after Choiseul, who was at the time Minister of France.

Twenty years later, and 700 miles to the south-east, la Perouse, in command of the French frigates *L'Astrolabe* and *La Boussole*, on a voyage of discovery, was wrecked at P'iou on the island of Vanikoro. His fate was unknown for 40 years.

From this time, many Europeans visited the Group, and British ships-of-war paid periodical visits.

In 1860 natives were recruited to work on plantations in Queensland and Fiji. The recruiting for Queensland ceased in 1903 and most of the natives were repatriated.

Recruiting for Fiji continued until 1910.

Between the years 1860 and 1893 the number of resident white traders gradually increased, until at the time of the Proclamation in 1893 of the British Protectorate over the Southern Solomon Islands (Guadalcanal, Savo, Malaita, San Cristoval, the New Georgia Group and its Dependencies) the number of white residents approached 50.

In 1898 and 1899 the islands of the Santa Cruz Group, including Utupua, Tucopia, Vanikoro, the remote islands of Cherry and Mitre, Sikaiana, and the islands of Rennell and Bellona, were added to the Protectorate, and in 1900 the Northern Islands, namely, Ysabel, Choiseul, the islands of the Bougainville Straits, south and south-east of the main island of Bougainville, and the atoll group of Ontong Java, were transferred under convention from Germany to Great Britain.

The population of the Protectorate in April, 1931, was:—

Europeans .. .. .	478
Native (Melanesian) .. .. .	89,568
Native (Polynesian) .. .. .	3,847
Chinese .. .. .	164
Japanese .. .. .	8
Malays .. .. .	1
<b>Total ..</b>	<b>94,066</b>

The climate of the Solomon Islands, owing to the prevalence of malaria, is not healthy, but the conditions of living have been greatly improved during recent years and the possibilities of good health during temporary residence have been enormously increased.

Generally speaking, the seasons are well defined by the trade winds. The south-east season lasts from April until November when the lowest minimum temperature is recorded, and the highest mean and maximum temperatures are, as a rule, recorded in the months from November to April which is commonly known as the north-west season.

The rainfall varies considerably from month to month and year to year, though the average rainfall, recorded at Tulagi, is approximately 120 inches a year.

The British Solomon Islands Protectorate is administered by a Resident Commissioner (stationed in Tulagi) acting under the authority and control of the High Commissioner for the Western Pacific (who resides in Suva, Fiji).

There is no Legislative Council. Laws are made by the High Commissioner—in the form of King's Regulations—under powers conferred by the Pacific Order in Council, 1893.

There is an Advisory Council, consisting of the Resident Commissioner and not more than seven members, three of whom may be officials.

The Protectorate is divided up into eight administrative areas, each under a District Officer. There is regular steam communication with Sydney, New South Wales.

The Customs Tariff consists of duties at specific or *ad valorem* rates on certain imports and exports.

## TONGA.

THE TONGAN, or FRIENDLY ISLANDS, with an area of about 250 square miles, are situated between the 18th and 22nd degrees of south latitude. They were discovered by Tasman in 1643. Most of the islands are of coral formation, but some are volcanic, notably Tofua, Kao, and Niuafoou (Good Hope Island). The natives belong to the Polynesian race, and are closely allied to the natives of New Zealand and Samoa. The islands are very rich in coconuts; and copra forms the principal export. There is monthly communication by steamer with Auckland. Passengers, goods, and mails from other countries tranship, as a rule, at Suva. During the dry season, i.e., from April to December, steamers call at regular intervals for copra freights.

In 1845 George Tubou I, who was the first to establish an effective government over the whole of Tonga, was proclaimed King. The present Ruler is assisted by a Parliament and a Privy Council. The Privy Council is composed of two European and six Native Ministers of the Crown who are also heads of the various government departments. The civil service is composed mostly of Tongans, the European officials numbering about 43. The general tariff is 12½ % ad valorem and there are no preferential duties.

Of the rest of the imports during 1932 the United Kingdom supplied 12 per cent, New Zealand 35 per cent, Australia 33 per cent and other British possessions 6 per cent.

The climate may be considered a healthy one. The thermometer ranges between 53 and 93 degrees Fahrenheit.

There are seven churches in Tonga, viz., the Wesleyan Free Church of Tonga, with about 16,560 adherents; the Free Church of Tonga, and the Church of Tonga, with about 1,500; the Roman

Catholic Mission, with about 3,000; the Church of England, 180; the Church of Latter Day Saints, 630; and the Seventh Day Adventist Mission, with about 190 adherents.

The Wesleyan Mission was first founded in Tonga in the year 1826, and a few years later the chiefs and people embraced Christianity and became members of the Church. The control and management of the Mission in Tonga were entrusted about the year 1857 to the Australasian Conference and continued until the year 1886, when King George Tubou I, after trying unsuccessfully to obtain local autonomy for the Church in Tonga, seceded, with a large majority of his chiefs and people and, with the assistance of the Rev. Shirley Baker, established the Wesleyan Free Church of Tonga as a separate and independent body though retaining the same doctrines, discipline, and form of worship as the Wesleyan Church. In January, 1887, an attempt was made by some escaped native convicts on the life of Mr. Shirley Baker, the Premier. The attempt was made the pretext for increased persecution of the "Fakaogos," or members of the Wesleyan Mission Church. About 100, whom no ill-usage could induce to abandon the Mission Church, were ordered to be deported to Pylstart Island, a barren islet south of Tonga, but they were finally allowed to go to Fiji. Shortly after an inquiry was made into the causes of the disturbances by Sir Charles Mitchell. At this inquiry the allegation that the attempt on Mr. Baker's life was due to a "Fakaogo" conspiracy was abandoned, and a letter written by Mr. Baker, purporting to be signed by the king, was addressed to Sir Charles Mitchell, promising an amnesty to political prisoners and freedom of worship. The services in the Mission Church at once recommenced.

In 1890 complaints were made that freedom of worship was still being interfered with; that persons were deprived of their lands and unjustly imprisoned on account of their adherence to the Wesleyan Church; and Tongan officials denied that the king had written to Sir Charles Mitchell promising to accord freedom of worship. Sir John Thurston therefore made a further inquiry, and finding that Mr. Baker was the principal cause of the wrongs endured by the Wesleyans, he issued an Order prohibiting Mr. Baker from being within the group for a term of two years from the 17th July, 1890. A few days before the issue of the Order, the king, on the request of the leading chiefs, had dismissed the Premier from office, and a fresh Government was formed with a native Premier (Tukuaho). Under the new Government the fullest freedom of worship was allowed, and the exiles were recalled from Fiji, the king having requested Sir John Thurston to make arrangements for their return.

In the year 1923 much dissatisfaction existed in the Wesleyan Free Church, and an enquiry that was held into the state of the finances disclosed a very lax state of affairs. As a result of this enquiry it was decided to approach the Wesleyan Church with a view to the union of the two bodies as a separate and independent Conference of the Wesleyan Methodist Church. At a joint conference of the two churches held in April, 1924, union was decided upon. A minority, under the leadership of the late Rev. J. A. Watkin, declined to join the united body and carried on under the title of the Free Church of Tonga. Protracted litigation ensued as a result of this division in respect of the ownership of the churches and

property of the Wesleyan Free Church of Tonga established by King George I in 1885. It was finally decided on appeal in favour of the united Church, of which the present Queen is the head.

King George Tubou died on 18th February, 1893, and was succeeded by his great-grandson, George Taufa'ahau, under the title of George Tubou II. On the death of the latter on the 5th April, 1918, Princess Salote, his daughter by his first wife the late Queen Lavinia, succeeded to the throne. The young Queen, who was born on the 13th March, 1900, was married in 1917 to Prince Uiliami Tugi, the present Premier, and chief of highest rank in Tonga.

Early in 1900 Mr. Basil Thomson was sent out to Tonga by Her Majesty's Government, and concluded a Treaty with the king by which the latter placed himself and his territory under Her Majesty's protection. A protectorate was proclaimed on 18th May, 1900.

The present premier, Uiliame Tugi, is the Prince Consort, and was formerly Minister for Lands. The progress of Tonga since 1905 has been satisfactory.

Every Tongan is entitled to an allotment of land for cultivation, so that no unemployment exists. Primary education for Tongans between the ages of 6 and 14 is compulsory. There are two boys' colleges at which provision is made for secondary education. Secondary education of girls is entirely in the hands of the Christian missions. Medical work is well organised; and, unlike most native communities in the Pacific, the native population steadily increases in number.

British and foreign nationals charged with any offence against the laws of Tonga, not including crimes punishable by death or by imprisonment exceeding two years, are subject to the jurisdiction of the Tonga Courts. In other respects they are subject to the jurisdiction of the Court of the High Commissioner. Licences are charged for carrying on stores and trades.

#### *Currency and Banking.*

The legal tender currency is British and Australian sterling.

Arrangements were made in 1919 for the issue of Tongan Government Treasury notes. At the end of 1931, 4s., 10s., 1l., and 5l. notes were in circulation to the value of 21,000l. The issue is secured by a coin and investment reserve.

There are no private banks in the Kingdom. A Government Savings Bank was established in 1926. At the end of 1932 there were 654 depositors and 30,676l. in deposits.

*Minister for Finance, W. G. Bagnall.*

*Minister for Lands, Solomon Ata.*

*Governor of Vavau, Sateki Faletau.*

*Governor of Haapai, J. Tuihaateiho.*

The foregoing Ministers constitute the Privy Council, meetings of which are presided over by the Queen.

The Cabinet Council is composed of the same Ministers, with the exception of the Minister of the Crown.

#### THE NEW HEBRIDES.

THE NEW HEBRIDES, to which are attached the Banks and Torres Islands, lie between the 12th and 20th degrees of south latitude, and the 165th and 170th degrees of east longitude. The area is about 5,700 sq. miles, and the population under 3,000.

The natives are Melanesians, but in many places there is an admixture of Polynesian blood. The Europeans are mostly British or French.

Missions have been established by the Melanesian Missionary Society, Seventh Day Adventists and Church of Christ, by the Presbyterian churches of Canada and Australia, and by the Roman Catholic Church.

The principal exports are copra, cocoa, cotton, coffee, trocas; maize, hides and various miscellaneous products are also exported. The climate of most of the islands is rather unhealthy and malarial fever is prevalent. At first, a joint commission, of British and French naval officers, was appointed to protect the lives and property of British and French subjects, and to maintain order. British and French Residents were appointed in 1902. In February, 1906, a conference of British and French officials took place in London, and a draft convention was prepared to provide for the settlement of land claims, and for an arrangement which would put an end to the difficulties arising from the absence of jurisdiction over the natives. A convention confirming the above-mentioned draft was signed in London on October 20th, 1906, and was provisionally proclaimed at Vila, the chief town of the New Hebrides, on December 2nd, 1907. Its provisions include the establishment of a joint court, and of an executive government consisting, for some purposes, of the British and French representatives in the group acting in concert. For other purposes British and French nationals remain subject to the control only of their own authorities.

A Protocol drawn up in London in 1914 to replace the Convention of 1906, was ratified on March 18th, 1922. It was proclaimed in the New Hebrides in August, 1923.

British and French Resident Commissioners subordinate to their respective High Commissioners, each with a staff of officers have been appointed. In addition there is a Condominium Staff working in Departments under the joint control of the two Resident Commissioners.

The Customs Tariff in force in the New Hebrides is mainly on an ad valorem basis at varying rates with specific duties in a few cases.

The import trade of the Group is mainly confined to Australia and France in roughly equal proportions, while the bulk of the exports are

shipped to the latter country. No statistics are available of imports from and exports to the United Kingdom.

#### British Staff.

*Resident Commissioner*, G. A. Joy, 800*l.* to 1,000*l.* quarters and duty allowance 100*l.*

*Judicial Commissioner*, A. de J. Carey, receives 800*l.* as British Judge of the Joint Court and quarters, and an allowance of 50*l.* as Legal Adviser to the Resident Commissioner.

*Assistant to Commandant of Police*, R. J. Keegan, 340*l.* to 400*l.* and quarters.

*Correspondence Clerk*, Bernard Blackwell, 230*l.* and quarters.

#### PHENIX GROUP.

The Phoenix group comprises Phoenix, Birnie, Hull, Canton, Gardner, McKean, Enderbury, Sydney, Baker and Howland Islands, and is situated to the east of the Gilbert and Ellice groups. The Islands are of coral formation, and several of them are planted with coconuts. All except McKean and Enderbury Islands are leased to Messrs. Burns, Philp (South Sea) Company, Limited, for 87 years, from 1st January, 1914.

#### PITCAIRN ISLAND.

Pitcairn Island (two square miles) is situated in the Pacific Ocean, nearly equidistant from Australia and America (25° 3' S. lat., 130° 8' E. long). It was discovered by Carteret in 1767, but remained uninhabited until 1790, when it was occupied by the mutineers of H.M.S. "Bounty," with some women from Otaheite. Nothing was known of their existence until the island was visited in 1808. No regular government was established, but assistance of various kinds was given on the subsequent visits of English vessels. In 1856, the population having become too large for the island's resources, the inhabitants (192 in number) were, at their own request, removed, with all their possessions, to Norfolk Island; but 40 of them soon returned. In 1879 these had increased to 90. The population numbers 200 persons.

It is a British Colony by settlement, and was brought within the jurisdiction of the High Commissioner for the W. Pacific in 1898 under s. 6 of the Pacific Order in Council, 1893. *Chief Magistrate*, P. R. Christian.

The islands of Henderson, Ducie, and Oeno were annexed in 1902, and are included in the district of Pitcairn.

#### THE WINDWARD ISLANDS.

##### *Situation, Area, and Trade.*

The Windward Islands consist of the three islands of St. Lucia, St. Vincent and Grenada, lying in the order named from north to south, together with the smaller islands known as the Grenadines, which lie between St. Vincent and Grenada, and are attached partly to the one island and partly to the other. Geographically, Barbados,

Trinidad and Tobago belong to the group, and were formerly associated with it politically, Tobago from 1764 to 1783, and all three in 1833. The three first-named islands are grouped for administrative purposes under one Governor, who usually resides at St. George's, Grenada. The total area of the three Colonies is 524 square miles (about twice the size of Middlesex), and their estimated population at the census of 24th April, 1921, 162,254.

#### History.

Some account is given of the history of each island in its proper place, but particulars of their several federal unions may be conveniently inserted here. As early as 1764 there was one Governor for the "Southern Caribbee Islands" of Grenada, Dominica, St. Vincent, and Tobago. Dominica was separated in 1771, St. Vincent in 1776, and in 1783 Tobago was ceded to the French. In 1833 St. Vincent was included with Barbados, Grenada, and Tobago in one general government, the Governor-in-Chief being resident at Barbados, with Lieutenant-Governors in each of the other islands. In 1838 St. Lucia was included in this general government.

On the 17th March, 1885, Letters Patent were passed constituting the Government of the Windward Islands, Barbados being omitted. Tobago was subsequently united with Trinidad.

The majority of the inhabitants are of the negro race, less than 5 per cent. being white and there are some Indian Coolies. A few Caribs still remain in St. Vincent. English is spoken throughout, but in St. Lucia, the prevailing language with the peasantry is a French *patois*. In Grenada the same condition obtains, but to a less extent.

#### Constitution.

Each island retains its own institutions, and, when the Governor is absent, is presided over by a resident Administrator, who is also Colonial Secretary. There is no common legislature, nor common laws, revenue, or tariff. A Windward Islands Court of Appeal was set up in 1850 (13 & 14 Vict. c. 15), and abolished in 1920 by an Act (9 & 10 Geo. V. c. 47), which set up a Court of Appeal for the West Indies, consisting of the chief justices of the several West India Islands except Jamaica. There is also a common audit system instituted in 1889.

*Currency and Banking.*

The legal tender currency is British sterling and the gold coins of the United States. Barclays Bank (Dominion, Colonial and Overseas) Ltd. and the Royal Bank of Canada, which have branches in the larger islands, issue five-dollar notes. Public accounts are kept in sterling, but banking and private accounts generally in dollars. There is no limit to the legal tender of silver.

*Communications.*

The usual length of the voyage from England to Grenada is about 14 days.

The steamers of Harrison Direct Line call at Grenada on the outward voyage, and on the homeward voyage they call at the three islands as cargo offers. There is also direct communication between Grenada and New York by the steamers of the Furness, Withy Line. The passenger and cargo steamers of the Canadian National Line call regularly at Grenada, St. Lucia and St. Vincent, and connect these islands with Canada, St. John and Halifax being the ports of arrival and departure there.

There are no railways in any of the islands. Government-owned telephonesystems exist throughout the islands. All three islands of the group are in communication with Europe, the United States, Canada, and the other West Indian islands by wireless, operated by the Pacific Cable Board, and by the Cables of the West India and Panama Telegraph Company Ltd. The rate per word for

telegrams to the United Kingdom from Grenada, St. Lucia and St. Vincent is 2s. 4d. The rate to Europe varies from 3s. 2½d. to 3s. 7½d. per word. (Government messages pay half rates.) There are also cheap rates at half and quarter of the ordinary tariff, the latter being subject to a minimum charge.

A wireless installation has been erected at Carriacou by the local Government. It communicates with Grenada and through that island to the United Kingdom, Canada, North America, &c., the ordinary tariff being 2d. per word more than from Grenada.

**GRENADA.***Situation, Area, &c.*

Grenada, the most southerly of the Windward group, is situated between the parallels of 12° 30' and 11° 58' N. lat., and 61° 20' and 61° 35' W. long.; is about 21 miles in length, 12 miles in its greatest breadth, and contains about 133 square miles (about half the size of Middlesex). It lies 68 miles S.S.W. of St. Vincent, and about 90 miles north of Trinidad, and between it and the former island are certain small islands called the Grenadines, attached partly to the government of St. Vincent, and partly to that of Grenada; the largest of the latter is Carriacou, which has an area of 8,467 acres, and a population (at 24th April, 1921) of 7,104.

*General Description.*

Grenada is mountainous and very picturesque, its ridges of hills being covered with trees and

brushwood. The mountains are chiefly volcanic, and have several lofty peaks, the highest of which is Mount St. Catherine, 2,749 feet, running off in spurs from the centre of the island, giving it an appearance of romantic beauty when viewed from the sea.

The island abounds in streams, and in mineral and other springs. The Grand Etang, a lake on the summit of a mountain ridge 1,740 feet above the level of the sea, and 7 miles from the town of St. George, and Lake Antoine, both old craters, are among the most remarkable natural curiosities; near the former a sanatorium is established. The roads of the colony are in excellent condition, and are kept in a state of thorough repair. About 146 miles of main roads, and a network of by-ways (275 miles), provide good inland communication. The island is divided into six districts or parishes—St. George, St. David, St. Andrew, St. Patrick, St. Mark, and St. John—while the dependencies of Carriacou, Petit Martinique and other adjacent islets form a separate district, administered by a Commissioner. St. George's, the principal town, is a port of registry for shipping and had on 31st December, 1932, 143 vessels registered, of a total tonnage of 2,644 tons; its fine harbour, owing to its situation, healthiness, and great natural advantages, including a plentiful supply of water of the purest quality, offers exceptional inducements as a port of call for steamers. The town had a population of 4,629 by census of 24th April, 1921.

The other towns in the colony are Gouyave (or Charlotte Town), Victoria (or Grand Pauvre), Sauters; Grenville (or La Baye); and Hilla-borough, in Carriacou. English is universally spoken, but the peasantry speak among themselves a French patois. About two per cent. are of European blood, the remainder being of the Negro race, except the East Indian population, which was 181 in number according to the census of 1921.

#### Climate.

The climate in the dry season is delightful. In the wet season, as in all other tropical islands, it is damp and hot. But for six winter months, say from December to May, it is excellent, and is healthy at all times. The average annual rainfall at St. George's for the last 30 years is 74·56 inches and the highest and lowest readings of the thermometer for the last five years are 90°·0 and 60°·0 respectively, 60°·0 8th August, 1928, the average mean temperature being 80°·0 in the shade. The rainfall in other parts of the island is much greater; at the Grand Etang, in 1932, it was 175·79 inches.

#### Industry, Trade and Customs.

The prosperity of the island, like that of its neighbours, depends almost entirely upon the planting industry. It has long ceased to be a sugar-producing colony. The chief produce of Grenada is cocoa, of which a total value of 101,231*l.* was shipped in 1932. Attention has been turned with some success to the cultivation of other economic plants, such, for instance, as rubber, limes, coffee, kola nut, cloves, vanilla, pepper, cardamoms, coconuts, etc. Nutmeg cultivation occupies a prominent position. The value of spices exported in 1932 was 60,758*l.* In Carriacou cotton is the staple product, its cultivation having never been wholly abandoned there; the value exported in 1932 was with cotton seed, 8,307*l.* The cultivation of limes has now

been successfully established in Carriacou, the exports of lime products in 1932 amounting to 11,027*l.* Tropical fruits of almost every description and of the finest quality are fairly plentiful, and are shipped to the Barbados and Trinidad markets. The principal food resources are yams, sweet potatoes, tannias, kush-kush, pigeon-peas, plantains, bananas, Indian corn, cassava, bread fruit, etc. Fresh meat is always obtainable, and the animals slaughtered for the purpose are reared in the island. An excellent oyster is obtained in Carriacou, and turtles and fresh fish are plentiful. The forests produce valuable timber, such as bullet wood, locust, mahogany, red and white cedar, galba, etc. Rum is manufactured for local consumption, the total number of proof gallons in 1932 being 35,291.

The main imports are food-stuffs, textiles, timber for building purposes, and hardware.

The principal exports, besides those products already mentioned, are turtles and turtle-shell, hides and skins, fruit and poultry.

The tariff of Import duties is partly on an *ad valorem* and partly on a specific basis. The rates in the case of the former are mainly 15% on Empire goods and 22½% on foreign goods. The preference on Empire goods is generally 33½%.

The percentages of Trade in 1932 were as follows:—

	Imports.	Exports.
United Kingdom ..	45%	46%
United States of America ..	10	27
Canada ..	18	19
Other British Possessions ..	20	7
Other Foreign Countries ..	7	1
	100%	100%

The total acreage of land, exclusive of Carriacou is 76,548; acreage of Carriacou, 8,467.

There is a Government savings bank in St. George's, established in 1881, and extended to the out districts in 1889, and on 31st December, 1932, the amount at credit of depositors was 50,108*l.*

#### History.

Grenada was discovered by Columbus on 15th August, 1498, and was named by him Conception. It was at that time inhabited by Caribs. A settlement was attempted in 1609 by a company of London merchants, but the colonists were so harassed by the Caribs that the attempt was abandoned. In 1650 Du Parquet, Governor of Martinique, purchased Grenada from a French Company, and established a settlement at St. George's. Finding the expense of maintaining an armed force to support his authority not compensated by the expectation of future profits, Du Parquet sold the island in 1657 to the Comte de Cerrillac for 30,000 crowns. The Governor appointed by the new proprietor ruled with so much tyranny that the most respectable settlers left the island; he was at length seized, tried, and executed by the colonists.

In 1674 the island was annexed to France, and the proprietors received compensation for their claims; and in 1762 it was surrendered to the British under Commodore Swanton, and was formally ceded to Great Britain by the Treaty of Paris on the 10th of February, 1763. In 1779 it was retaken by the French under the Count D'Estaing; and in 1783 it was restored to Great Britain by the Treaty of Versailles. In 1795-6 it was the scene of a rebellion against the British rule, instigated by the French Republic. The Lieut.-Governor and 47 other British subjects

were massacred by the rebels, and the colony brought to the verge of ruin. In June, 1796, Sir Ralph Abercrombie suppressed the rising, and the ringleaders were executed.

In 1834 the apprenticeship system was established in regard to the African slaves, and this was followed in 1838 by their unconditional emancipation.

#### *Constitution.*

There was from 1766 a Legislative Council as well as a House of Assembly, the latter consisting of 21 elected members.

Under an Act of 1856, and limited in its duration to a term of three years, an Executive Council was formed, composed of members of both branches of the Legislature. The Act was allowed to expire, and the Legislative Council resumed its executive functions under the style of Her Majesty's Council.

This constitution was remodelled by an Act of the 7th of October, 1875, and a single Legislative Assembly established in lieu of the Council and Assembly. The Assembly consisted of 17 Members, 8 elected by the people, and 9 nominated by the Crown. The Act also appointed an Executive Committee of 5 members, 3 being nominated and the other 2 elected Members of Assembly. These Members received each a salary of 100*l.* a year, and were charged with the duty of advising the Lieut.-Governor on the conduct of affairs.

This Assembly at its first meeting on the 9th of February, 1876, addressed the Queen, informing Her Majesty that it had passed a Bill providing for its own extinction, and leaving "it entirely to your Majesty's wisdom and discretion to erect such form of Government as your Majesty may deem most desirable for the welfare of the Colony." The Imperial Act (39 and 40 Vict. c. 47) empowered Her Majesty to comply with this address, and Crown Colony Government was established in December, 1877.

On the 17th March, 1885, letters patent were passed constituting anew the office of Governor of the Windward Islands, and on 1st June, 1885, Grenada became the headquarters of the Government, which includes the colonies of St. Lucia and St. Vincent.

Until the 1st of December, 1924, the Legislative Council consisted of six official members besides the Governor, and seven unofficial members nominated by the Crown.

By an Order in Council dated 21st March, 1924, which came into operation on 1st December, 1924, a partly elective Legislative Council was constituted, consisting of the Governor, seven *ex officio* members, three nominated unofficial members and five elected members. The Island is divided into five electoral districts, each returning one elected member.

The Government is assisted in the internal administration by six semi-elective District Boards.

#### *Education.*

There are 60 elementary schools, 10 Government and 50 aided. These schools are of five classes, Senior, Combined, Junior, Infant and Manual Training Centres. Head teachers of senior and combined schools are paid from 80*l.* to 160*l.* per annum, according to their certificates of proficiency, and to the class of school. Bonuses are given them for extra duties. Grants are also given by Government in aid of buildings, furniture and apparatus. The administration is entrusted to a Board of Education nominated by the Governor, half the members being Roman Catholic. In

1932 the average attendance was 8,444 children, the number on the rolls being 13,942. There is a Government secondary school for boys, and three for girls which receive grants-in-aid from the general revenue.

The island of St. Lucia was discovered by Columbus, during his fourth voyage, on the 15th June, 1502. It is situated in 13° 54' N. lat., and 60° 59' W. long.; at a distance of 24 miles to the south of Martinique, and 21 to the north-east of St. Vincent. It is 27 miles in length, and 14 at its greatest breadth; its circumference is 150 miles, and its area 233 sq. miles, rather less than Middlesex. Near its northern extremity lies Pigeon Island, formerly a military post of some importance.

Castries, the capital of the island, contains about 1,422 houses, and a population of 5,899 according to the census of 24th April, 1921. Next in importance is the town of Soufrière, containing a population of 2,480.

†Each District Medical Officer keeps a horse and a motor car for his duties and receives a motor car allowance of 80*l.* The Medical Officer stationed at Carriacou is allowed quarters.

*History.*

At the period of its discovery St. Lucia was inhabited by the Caribs, and continued in their possession till 1635, when it was granted by the King of France to MM. de L'Olive and Duplessis. In 1639 the English formed their first settlement, but in the following year the colonists were all murdered by the Caribs.

In 1642 the King of France, still claiming a right of sovereignty over the island, ceded it to the French West India Company, who in 1650 sold it for 1,600*l.* to MM. Honel and Du Parquet. After repeated attempts by the Caribs to expel the French, the latter concluded a Treaty of Peace with them in 1660.

In 1663, Thomas Warner, the natural son of the Governor of St. Christopher, made a descent on St. Lucia. The English continued in possession till the Peace of Breda in 1667, when the island was restored to the French. In 1674 it was re-annexed to the Crown of France, and made a dependency of Martinique.

After the Peace of Utrecht, in 1713, the rival pretensions of England and France to the possession of St. Lucia resulted in open hostility. In 1718 the Regent, d'Orléans, made a grant of the island to Marshal d'Estrees, and in 1722, the King of England made a grant of it to the Duke of Montague. In the following year, however, a body of troops, despatched to St. Lucia by the Governor of Martinique, compelled the English settlers to evacuate the island, and it was declared neutral.

In 1744, the French took advantage of the declaration of war to resume possession of St. Lucia, which they retained till the Treaty of Aix-la-Chapelle in 1748, when it was again declared neutral. In 1756, on the renewal of hostilities, the French put the island in a state of defence; but in 1762 it surrendered to the joint operations of Admiral Rodney and General Monckton. In the following year, by the Treaty of Paris, it was assigned to France.

St. Lucia continued in the peaceable possession of the French till 1778, when effective measures were taken by the British for its conquest. In the early part of 1782, Rodney took up his station in Gros Islet Bay, in St. Lucia, with a fleet of 36 sail of the line, and it was from thence that he pursued Count de Grasse, when he gained the memorable battle of the 12th of April in that year. This event was followed by the Peace of Versailles, and St. Lucia was once more restored to France.

In 1793, on the declaration of war against revolutionary France, the West Indies became the scene of a series of naval and military operations which resulted in the surrender of St. Lucia to the British arms on the 4th of April, 1794.

In 1796 the British Government despatched to the relief of their West Indian possessions a body of troops, 12,000 strong, under the command of Sir Ralph Abercrombie, supported by a squadron under Admiral Sir Hugh Christian. On the 26th April these forces appeared off St. Lucia, and after an obstinate and sanguinary contest, which lasted till the 26th May, the Republican party, which had been aided by insurgent slaves under Victor Hughes, laid down their arms, and surrendered as prisoners of war.

The British retained possession of St. Lucia till 1802, when it was restored to France by the Treaty of Amiens; but on the renewal of hostilities it surrendered by capitulation to General Greenfield on the 22nd June, 1803, since which period it has continued under British rule.

*General Description.*

On its final acquisition by the English, the island had become much depopulated, partly by war, but chiefly by internecine struggles, the fruits of the French Revolution. The recovery from this state of things has been slow, having been retarded by the severe epidemics of cholera and small-pox which have at different times visited the West Indies. Each census, however, has shown an advance in this respect, and the population at 31 December, 1932, is estimated at 61,135. Most of the inhabitants speak a French *patois*, but English is gradually becoming more generally used. A very small percentage is of European descent, the remainder being of the negro race, except 2,189 of East Indian origin. The reputation of the island for peculiar unhealthiness is undeserved, the death rate for 1932 being 18.3 per 1,000, and for the year 1931 18.2 per 1,000. Certain spots situated in narrow valleys between high mountains are undoubtedly unhealthy, but are becoming less and less so as the forests fall before a yearly extending cultivation.

The danger from venomous reptiles is also much exaggerated. Owing to the introduction and spread of the mongoose snakes are now but rarely met with. Among white inhabitants, consumption and other of the most fatal diseases of temperate climates are almost unknown. The temperature from December to April seldom exceeds 80° Fahr., even at midday, in spots situated a few hundred feet above the sea, and a fresh trade wind blows continuously. The scenery is of peculiar beauty, even as compared with that of other West India Islands, and in the neighbourhood of the Pitons has the less common element of grandeur. These are two cone-shaped rocks rising sheer out of the sea to a height of nearly 3,000 feet, and near them is the crater of a volcano and a *soufrière*, the ordinary characteristics of the Caribbean Cordillera.

Castries, the chief town, has an excellent harbour. Dredging operations have been carried out in the harbour, rendering it more commodious. A substantial concrete wharf, 650 feet in length, with a depth alongside of 27 feet at low water, has been completed, and the western wharf, having a length of 552 feet, has been refaced in wood, and dredged to an average depth alongside of 18 feet to 24 feet. The facilities offered by the port as a port of call and coaling station are widely recognised. It is a port of registry, and had, on 31st December, 1932, 16 vessels registered, of a total tonnage of 455 tons.

A Government savings bank was established in 1871, and has now 724 depositors, with 9,957*l.* to their credit on 31st December, 1932. Branch savings banks were opened at Soufrière and Vieux Fort in March, 1898, at Dennery and Gros Islet in November, 1903, and at Anse-la-Raye in December, 1906.

*Constitution and Law.*

Up to the period of the French Revolution, and after the restoration of order in 1800, the island was governed according to the law and ordinances of the French monarchy. The Courts of Justice were an inferior Court called the "Senéchaussée," and a higher Court, called the "Conseil Supérieur," or Court of Appeal. The latter Court was composed of a President and twelve Councillors; the Governor often presided, and it was invested with certain executive and administrative functions.

The Government is now conducted by an Administrator (who is subordinate to the Governor of the Windward Islands), aided by an Executive

Council. By an Order in Council dated 21st March, 1924, which came into operation on 1st December, 1924, a partly elective Legislative Council was constituted, consisting of six *ex-officio* members, three nominated unofficial members and three elected members. On the 12th February, 1931, that Order in Council was amended to provide that the Council should consist of three *ex-officio* members, three nominated official members, three nominated unofficial members, and three elected members. The Island is divided into three electoral districts, each returning one elected member. The first election under this constitution was held in March, 1925. Law is administered by a Chief Justice, from whom in civil cases there is an appeal to the West Indian Court of Appeal, and two magistrates, whose decisions are liable to review by the judge. In criminal cases tried in the Superior Court facts are decided upon by a jury of twelve as in England.

A code of civil law, the authors of which were Sir G. W. Des Voeux, G.C.M.G., and Mr. James Armstrong, C.M.G., became law in October, 1879. This code was framed upon the principles of the ancient law of the island, with such modifications as are required by existing circumstances. The Statute Law of the Colony was consolidated to 1916 by Mr. F. H. Collier, Chief Justice, who also edited the Commercial Code, 1916.

The revising and editing of the Criminal Law and Procedure of the Colony by Mr. J. E. M. Salmon was completed during 1920 and proclaimed as the Criminal Code, 1920. It came into force on the 1st January, 1921.

#### Education.

On the 30th June, 1891, the trustees of the Lady Mico charity closed the eleven schools which they had till then maintained, and withdrew their connection with the Colony. Three of these schools became Government schools, and the others assisted schools under the new Education Ordinance. In 1898 all the Government schools were handed over to the Roman Catholic body, and became assisted schools. There were, on the 31st December, 1932, 50 assisted schools. Of these, four were Anglican, three Methodist and 43 Roman Catholic. The number of children on the rolls was 10,017, with an average attendance of 6,621, and the amount spent by the Colony on primary education was 5,070*l*. The Government grants 450*l*. a year to a Roman Catholic second-grade school, which has 59 boys on the roll; the Sisters of St. Joseph conduct a similar school for Girls. The number of pupils on the roll is 98 and a Government grant of 175*l*. is made to the school annually.

#### Industry, Trade and Customs.

Sugar, rum, cocoa, logwood, coconuts, copra, limes, bananas, Lime oil, Bay oil, Bay rum, and spices are produced. There are four sugar "Usines" with the best machinery. Limes are being extensively planted, and a Government Factory has been erected in Castries, with the object of encouraging the establishment of the industry among small proprietors, at which limes and lime-juice are purchased at market rates. This factory has now been leased to private individuals. Rubber and cotton grow well, and samples of the former prepared at the Botanic Station, from trees growing there, have received favourable reports.

A considerable amount of land is in the possession of the Crown, and may be purchased in lots up to and including 50 acres, at £1 per acre, and for

every acre beyond 50 at 10/- per acre, payable by four equal annual instalments. In the event of a certain area being put into permanent cultivation before the due date of the last instalment, that instalment may be remitted. Under the Crown Lands Regulations, the period over which (in certain cases) the payment of the purchase money may be spread is ten years. The soil will grow any kind of tropical fruit trees or economic plants.

Surveys are made at the cost of the purchaser.

The Customs Import Tariff is mainly on a specific duty basis, with a preference in favour of Empire products which in most cases amounts to one third of the general tariff rate.

The percentage of the Colony's Import Trade with the United Kingdom, other parts of the British Empire, and the principal foreign countries during 1932 was as follows:—

## ST. VINCENT.

*Situation and Area.*

The Island of St. Vincent is popularly supposed to have been discovered by Columbus on the 22nd of January, 1498. It is situated in 13° 10' N. latitude, and 60° 57' W. longitude, at a distance of 21 miles to the south-west of St. Lucia, and 100 miles west of Barbados. It is 18 miles in length, and 11 in breadth, and contains about 96,000 acres of land, about half the area of Middlesex. Most of the Grenadines, a chain of small islands lying between Grenada and St. Vincent, are comprised within the government of the latter island. The principal is Bequia, situated at a distance of 9 miles from Kingstown.

*General Description.*

Kingstown, the capital of St. Vincent, is situated at the side of an extensive bay, at the south-western extremity of the island. It consists of three principal streets, each about a mile long, running parallel with the beach, and contained at the census of 1931, a population of 4,269 souls. It is a port of registry, and had, on 31st December, 1932, 22 sailing vessels of a net tonnage of 716 tons and 2 motor vessels of 54 tons net.

There are five other small towns in the island, the most important being Georgetown on the north-east, and Barrouallie on the west.

The most striking natural feature of the island is its "Soufrière," or volcano, situated at the northern extremity of the island, and rising to about 4,048 feet above the level of the sea. After a violent eruption in 1812, it remained dormant for a period of ninety years, and then broke into violent eruption again on May 7th, 1902, when the entire northern half of the island was devastated, and nearly 2,000 lives were lost. The eruption synchronised with that of Mont Pelée in Martinique which destroyed the town of St. Pierre. The "Soufrière" remained inter-

mittently active throughout 1902, and there was a further eruption in March, 1903, since when it has remained quiescent.

The whole island is of volcanic origin. A backbone of densely wooded and almost impassable mountains traverses it from the "Soufrière" at its northern end to Mount St. Andrew (2,500 ft.), dominating the Kingstown valley at its southern extremity. This range sends off spurs on each side, cutting up the island into a series of valleys, trending east and west from the central range to the coast. There is a somewhat level tract called the Carib Country at the north-east of the island, between the "Soufrière" and the sea. This district formerly comprised the most fertile sugar estates. The next highest point after the "Soufrière" in the range is Richmond Peak, 3,539 feet high. The streams are numerous but small, except after heavy rains; the principal is the Richmond River.

In September, 1898, the island was visited by a severe hurricane, which caused widespread destruction, and reduced large numbers of the inhabitants to destitution. In September, 1921, the island was again struck by a hurricane which, although not as violent as its predecessor, did considerable damage to property and crops, entailing considerable hardship on the populace and necessitating the expenditure by Government of 3,288*l.* on relief measures.

*Climate.*

In the dry season, January to May, the climate is charming. In the wet season, and especially from August to November, the climate is damp and hot, but not at all unhealthy. The nights are cool all the year round. The rainfall during 1932 was 95.87 inches. The highest reading of the thermometer during the same year was 89° F., the lowest 65° F., the mean monthly temperature being 79.9° F. in the shade. The prevailing wind is N.E.

*Industry, Trade and Customs.*

Sugar, syrup, rum, cocoa, copra, and excellent arrowroot are produced. The cultivation of ground nuts and spices is also attracting attention, and Sea Island cotton, the best in the Empire, is extensively planted, for the ginning of which a Government Ginnery has been erected. Most of the sugar and all the arrowroot mills are worked by water power. A large proportion of the cultivable land is owned by a few individuals; portions of Crown lands, have been alienated to peasant proprietors, and several estates have been purchased by the Government with the aid of an Imperial grant and allotted to the same class of settlers. The forests produce excellent woods. There are 65 miles of highway running round the island, for the most part close to the coast, but on the leeward coast communication is mainly by boat, and nearly all the produce is water borne. There are also some 300 miles of byway connecting with the highway.

The port of Kingstown is visited weekly by steamers of the Canadian National Steamships, fortnightly by Steamers of the Ocean Dominion Steamship Corporation and Furness Withy Lines and occasionally by steamers of the Harrison and Munsee Lines.

A telephone system has been established, having 1 central and 3 branch exchanges, with 231 connections and some 446 miles of line.

The import duties are largely *ad valorem*, mostly 15 %; but there are many specific duties,

Preferential rates, mostly two-thirds of the general rate, are charged on imports from other British countries.

Export duties are levied on cotton, arrowroot, ground nuts, cocoa, and copra.

The following table shows the direction of the Trade for the year 1932.

#### History.

At the time of its discovery, St. Vincent, like some of the other small islands, was inhabited by the Caribs, who continued in the undisputed possession of it until 1627, when the King of England made a grant of the island to the Earl of Carlisle. In 1660 it was declared neutral, and in 1672 it was granted to Lord Willoughby.

No steps, however, appear to have been taken to form a settlement on the island, and the English and French came to an agreement to abandon the Islands of Dominica and St. Vincent to the Caribs, on condition of their renouncing all claim to the other islands.

In 1722 George I. made a grant to the Duke of Montague of some of the West India Islands, including St. Vincent.

From statistics of the year 1740 it appears that the white inhabitants then amounted to about 800, and the slaves to 3,000, producing commodities for exportation to the value of 63,625*l*.

In 1748 St. Vincent was declared neutral by the Treaty of Aix-la-Chapelle. In 1756, however, hostilities were renewed, and the island was taken in 1762 by General Monckton; and by the Treaty of Paris in the following year it was ceded to Great Britain, when General Melville was appointed Governor.

By a treaty, which was concluded in February, 1773, an extensive district of St. Vincent was allotted to the Caribs (who for some time had been in a state of open rebellion) on condition of their laying down their arms and acknowledging the King of Great Britain as the rightful sovereign of the island.

In 1779 the island surrendered to the French. The following year has been rendered memorable by the occurrence of the greatest hurricane of which there is any record in West Indian annals. By the Treaty of Versailles in 1783, St. Vincent was restored to Great Britain.

From this period to the breaking out of the French Revolution the island appears to have enjoyed comparative prosperity and peace; but in 1795 the Caribs and their allies (the French) again overran the country, burning the cane-fields, plundering the houses, and mercilessly murdering the English colonists. This state of things continued till the arrival of the "Zebra" sloop of war, with succours from Martinique, then the British headquarters.

The contest was carried on, with alternations of good and ill fortune, until the arrival of Sir

Ralph Abercrombie with reinforcements in June, 1796. After an obstinate struggle the insurgents surrendered at discretion. The Government, in anticipation of such an event, had resolved that the Caribs should be transported to the Island of Ruatan, in the Bay of Honduras; and accordingly, on the 11th March, 1797, the necessary transports having been provided, the Caribs, to the number of 5,080, were embarked at Bequia, and sailed for their appointed destination.

In 1834 the apprenticeship system was established, and was followed in 1838 by unconditional emancipation of the negro slaves. The year 1846 witnessed the first introduction of Portuguese labourers, a class of immigrants who amounted in a few years to 2,400, and have proved a valuable addition to the general population of the island.

St. Vincent received its first East Indian Coolie labourers in 1861. Most of them returned to India, but some made their home in the Colony.

#### Constitution.

The Government of St. Vincent originally consisted of a Governor, Council, and Assembly.

The Council consisted of twelve members, one half of whom were named in the Governor's Commission, and the remainder appointed on his recommendation. The Assembly was composed of nineteen members, including two for the Grenadines. In 1856 an Executive Council was created, consisting of ten members, five from the Legislative Council, and five from the Assembly. In 1859 this Council was re-modelled, with the addition of an Administrative Committee, selected by the Governor and composed of three members—one from the Legislative Council, and two from the Assembly. This Act of 1859 had, however, a duration of only five years.

The constitution, however, was found no longer suited to the altered circumstances of the Colony, and in 1867 the Legislative Council and House of Assembly were abrogated, and a single Legislative Assembly was created instead thereof. This Assembly was composed of 12 members, viz.:—three *ex officio*, three nominated by the Crown, and six elected by the people. (The number of electors registered for the year 1874 was only 388.)

But this constitution also was abrogated by an Act of the Local Legislature (confirmed by an Imperial Act, 39 & 40 Vict. c. 47), by which the future modelling of the constitution was left to the Crown. Until 1st December 1924, the Legislative Council consisted of official and unofficial members nominated and appointed by the Crown.

By an Order in Council dated 21st March, 1924, which came into operation on 1st December, 1924, a partly elective Legislative Council was constituted, consisting of the Governor, four *ex officio* members, one nominated unofficial member and three elected members. By the Saint Vincent (Legislative Council) Amendment Order in Council, 1931, the Legislative Council was constituted of the Governor, of three *ex officio* members, of one nominated official member, of one nominated unofficial member, and of three elected members. The Island is divided into three electoral districts, each returning one elected member.

The several courts of the Colony were, by an Ordinance of the Local Legislature passed in 1880, consolidated into one court, styled the Supreme Court of Judicature. The Chief Justice of the Colony is the sole Judge of this court.

**Education.**

There were, on 31st December, 1932, 36 primary schools, with 9,105 children on the rolls. The average attendance during 1932 was 5,153. There is also a government secondary school for boys, and a high school for girls.

An Island Scholarship is awarded biennially tenable for from three to five years at an approved University. Annual value 250*l.* and cost of passage.

The Government expenditure on primary education in 1932 was 7,476*l.*

**Savings Bank.**

A savings bank was established in 1866, and had 730 depositors, with 13,675*l.* deposited, on 31st December, 1932. Branches of the bank have been opened at Georgetown, Barrouallie, and Union Island.

**ZANZIBAR.****Situation and Area.**

The island of Zanzibar is situated in 6° S. latitude and is separated from the mainland by a channel 22½ miles across at its narrowest part. It is 53 miles long by 24 broad (maximum measurements), and has an area of 640 square miles. To the north-east at a distance of some twenty-five miles lies the island of Pemba in 5° S. latitude. It is smaller than Zanzibar, being 42 miles long by 14 broad (maximum measurements), and having an area of 380 square miles.

**Climate.**

The normal annual rainfall amounts in Zanzibar to 58·59 inches and in Pemba to 73·25 inches. The rainy seasons are well defined: the heavy rains occur in April and May previous to the setting in of the south-west monsoon, the light rains in November and December before the recurrence of the north-east monsoon. The mean maximum temperature in Zanzibar is 84·4° and the mean minimum 76·6°. The corresponding figures for Pemba are 86·6° and 76·1° respectively.

**People.**

The Arabs were the conquerors of the islands. They founded the clove industry and still possess considerable property in plantations. They understand the natives and the natives understand them and accept their control and that of Europeans more readily than that of other races.

The bulk of the native population numbering 186,000 is known by the generic name of Swahili, a term formerly used to denote the Bantu coast tribes from Somaliland to Mozambique, "sawahili" in Arabic meaning "coasts." This general appellation includes the descendants of the early settlers of the island of Zanzibar who intermarried with negro women. They are called Wahadimu and live on the eastern and southern portions of the islands. A quiet shy people, occupied mainly in the cultivation of native crops and fishing, they rarely move from their homes except to pick cloves. The name Swahili also includes the descendants of the early settlers in Pemba who are known as Wapemba. These people engage chiefly in agriculture but raise a smaller variety of native crops than the Wahadimu. Many of them own clove and coconut plantations. They live in less seclusion than the natives on the larger island. Another tribe included in the term are the Watumbatu whose chief stronghold is Tumbatu Island. They are a very exclusive people but by no means shy. They go down to the sea and man most of the craft plying in Zanzibar waters.

There is in addition a considerable influx of various tribes from the mainland, of whom the Wanyamwezi are economically the most important, being now the chief source of supply for the weeding of plantations.

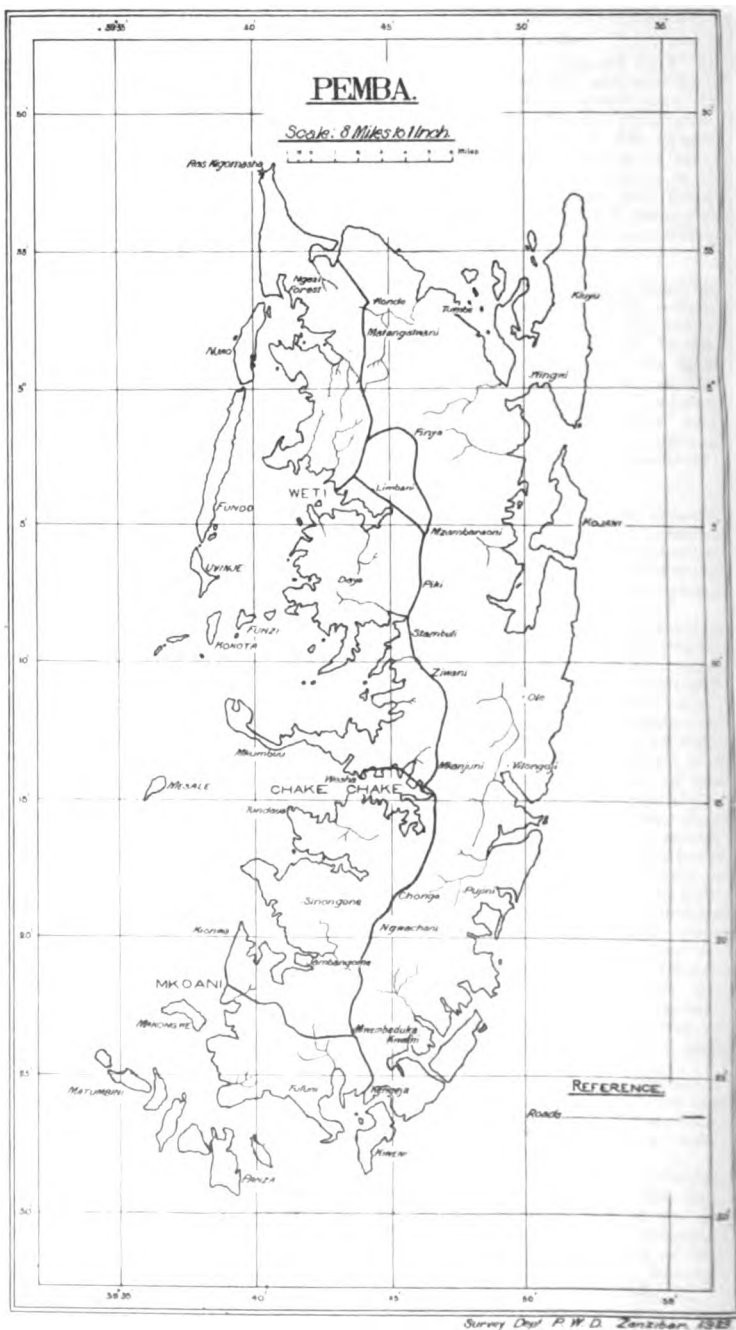

In the 1931 Census the total population of the Protectorate was returned as 235,428. The non-native population numbers 49,000 of whom 33,400 are Arabs. The Khojas, Bohoras, Hindoos, Parsees, and Goans possess most of the trade, either as merchants, shopkeepers, money-lenders, small traders, or skilled mechanics.

**History and Constitution.**

The beginnings of Zanzibar history are lost in antiquity. It appears more than probable that the islands of Zanzibar and Pemba were known to the ancient Egyptians, Phoenicians, Assyrians, and Jews, but though the expedition of Necho

(C. 600 B.C.) doubtless passed the Islands it is not till the first century that the Periplus gives a description of one of them under the name of Menuthias. The Hindus appear to have settled at a very early date and traces of Greek colonisation are not lacking. From about the 7th Century B.C. the Islands appear to have had a close connection with the South Arabian States. Bantu settlers probably made their appearance during the first five centuries A.D., and thereafter for the next five hundred years or so came also traders from China and Malaya in addition to those from the Persian Gulf. The Coast was probably converted to Islam early in the 10th Century. The Zanj Empire was founded by Ali bin Hasan, a prince of Shiraz, about 975 A.D. but it soon broke up into separate states and, by the time the Portuguese began the conquest of the East African littoral, was already declining. It was during the sixteenth century that the Arabs of the East Coast sought the assistance of the Imams of Muscat to drive out the Portuguese, and the capture of Mombasa Fort in 1698 may be said to mark the downfall of Portuguese power north of Mozambique. On the ruins of the Portuguese power in the seventeenth century arose that of the Imams of Muscat. The allegiance to Muscat, however, was of a more or less nominal character until Seyyid Said, after having subdued his enemies on the mainland, transferred his capital to Zanzibar in 1832. On his death in 1856 a dispute as to the succession arising between his sons Seyyid Thwain of Muscat and Seyyid Majid of Zanzibar the African possessions were made independent and confirmed under Majid by an arbitration (dated 1861) of Lord Canning, then Governor-General of India.

Seyyid Said laid the foundations of Zanzibar's importance by transferring his capital from Muscat and making the island his permanent residence in the year 1832. Under his direction Zanzibar soon became both politically and commercially the principal native city in East Africa. "If you play on the flute at Zanzibar," says an Arab proverb of the period, "everybody as far as the lakes dances." Said's son Majid succeeded in 1870 by Barghash, the first of his race to be commonly known as Sultan of Zanzibar.

In the year 1890 the supremacy of British interests in the islands themselves was recognized by France and Germany, and they were declared a British Protectorate in accordance with conventions by which Great Britain waived all claims to Madagascar in favour of France and ceded Heligoland to Germany. In the same year the mainland possessions which extended over the coast of East Africa, from Warsheikh in 3° N. latitude to Tunghi Bay in 10°42' S. latitude were ceded to Italy, Great Britain, and Germany respectively, Great Britain and Italy paying rent for the territories under their protection, while Germany acquired the Sultan's rights by the payment of a sum of 200,000*l.* At a later date Italy also acquired these rights by payment of a sum of 144,000*l.*

In 1891 a regular government was constituted with a British representative as first minister. On the death of the Sultan in 1896 the palace was seized by a member of his family, Seyyid Khaled, and to compel the latter's submission the palace was bombarded by British warships. In 1906, the British Government assumed more direct control over the Protectorate and reorganized the Government. In 1911 Seyyid Ali abdicated the

throne and was succeeded by the present ruler, Seyyid Khalifa bin Harub. On 1st July, 1913, the control of the Protectorate was transferred from the Foreign Office to the Colonial Office, legal effect being given to the change of administration in the following year.

The Government was vested in a High Commissioner, who was also Governor of the British East Africa Protectorate, and a British Resident.

A Protectorate Council, with His Highness as President, was established at the same time. It was of an advisory and consultative nature and ceased to exist in 1926 when Executive and Legislative Councils were constituted.

During the Great War a European Defence Force and a Native Carrier Corps were raised and many natives enlisted in the King's African Rifles. Zanzibar contributed £70,000 to the Imperial Government and £245,000 was invested in War Loan. £19,000 was raised by public subscription for the British Red Cross Society.

Since the War the principal event has been the abolition of the High Commissionership in 1925. During the last few years great progress has been made in Education and the provision of improved means of transport. Much attention is being directed to the regeneration of the clove industry.

For the East African Governors' Conference, see under Kenya, page 330.

#### *Industries and Trade.*

Zanzibar is now the dominant partner in the clove industry, holding as it does about 83 % of the shares. The other partners are Penang, Amboyna and some other islands in the East Indian Archipelago, and Madagascar.

Authorities differ as to the date when and country from which the clove tree was first introduced into Zanzibar. Some say that it was brought from Réunion by an Arab at the end of the 18th century. Colonel Rigby, Her Majesty's Consul and British Agent, in his report on the Zanzibar dominions written in the year 1860, states "the first clove trees were introduced about 30 years ago from Mauritius; being found to thrive they were extensively planted and they have now become the most valuable production of these Islands."

To Seyyid Said belongs the credit of establishing and promoting the clove industry. Burton records that he threatened confiscation to those who did not plant three clove trees for every coconut and that the country was almost denuded of the latter to make room for cloves. In 1839-40 the output amounted to about 9,000 frasilas. (The Frasila, equivalent to 35 lbs., is the local measure of weight for cloves.) In 1849 it had risen to frasilas 120,000. In 1859 frasilas 139,000, valued at 55,66*l.*, were exported, and the average output during the next decade was frasilas 200,000, valued at about 85,000*l.* Owing to the increase in production the price had, however, fallen from \$5-8*l.* to \$1-2*l.*

In 1872, a hurricane of great violence swept over the Island of Zanzibar and destroyed two-thirds of the clove and coconut trees. Pemba, though touched by the hurricane, sustained little damage. The years following this disaster were years of short supply, high prices, and intensive cultivation. The Pemba owners, actuated by motives of gain, hastened to cut down coconut trees on a wholesale scale throughout the island and to plant clove trees in their place. The Zanzibar owners, though temporarily ruined, set to work with commendable fortitude to replace

the trees which the hurricane had destroyed, and ten years after the hurricane the normal output of cloves had not only been restored but increased.

Another event of great economic importance to the industry was the abolition of slavery. The industry was built up and for many years sustained on slave labour imported from the interior of Africa. In 1873 Seyyid Burghash entered into a treaty to suppress the sea-borne traffic in slaves and to close all public markets in his dominions for the buying or selling of imported slaves. Various treaties and legislative measures followed until the year 1897, when by a decree of Seyyid Hamoud the legal status of slavery was abolished. It may be noted parenthetically that in the year 1890 Great Britain assumed a protectorate over Zanzibar.

The history of labour subsequent to 1897 is a tale of shortage, disinclination on the part of the labour available to engage in any form of settled work, inability or disinclination on the part of the Arabs to pay money wages, and administrative effort to organize the available supply. The introduction of Indian labour was at one time or another canvassed but never materialized. In 1904 and 1906 and at other subsequent times recourse was had to recruitment of labour on the mainland. Mainlanders have also come voluntarily, settled in appreciable numbers, and are now the chief source of supply for cultivation of plantations. The situation has also doubtless been eased by the gradual passing of much property in plantations from Arabs to natives.

Since the abolition of slavery no event of major economic consequence has occurred. There have been the usual ups and downs, but production has steadily increased, 162,054 cwts. of cloves valued at Rs. 64,98,598 were exported in 1932.

The growers were organised into a Clove Growers' Association in 1927, with the primary object of reducing the cost of production of cloves. Later in the year the activities of this body were extended to include co-operative transport and marketing of produce. The first annual conference of the association was held in Zanzibar in July, 1928, and was attended by delegates from both islands.

The coconut industry ranks next in importance after cloves, the conditions in both Islands being favourable to the growth of the tree and its nut-bearing properties. It is estimated that there are about 55,000 acres under cultivation and 34 million trees in both Islands. The export of domestic copra, amounted to 11,804 tons in 1932. Much is produced by the small grower or trader, neither of whom possesses proper drying facilities, with the result that the quality of the product compares unfavourably with that of Cochin and Ceylon.

There is a general *ad valorem* duty of 15 per cent. on imported goods with the exception of certain articles which have either a specific duty or a higher *ad valorem* duty, such as spirits, motor spirits, kerosene, cigarettes, tobacco, matches, tea, milk, etc. There is also a schedule of articles exempt from duty. The Tariff includes no provisions for Empire preference.

The principal articles of import are rice and grain, cotton piece goods, motor spirit and petroleum, copra, sugar, tobacco, manufactured (including cigars and cigarettes), flour, and ghee.

The principal articles of export (including re-exports) are cloves, copra, cotton piece goods, clove stems, rice and grain, motor spirit and petroleum, ivory, and millet.

The percentage of trade with the principal foreign countries in 1932 was as follows:—India and Burma 24·55, Dutch East Indies 9·37, Great Britain and Northern Ireland 14·25, Tanganyika Territory 9·53, United States of America 5·23, Italy 6·07, France 5·63, Japan 4·42, Holland 3·02, Germany 1·99, Kenya Colony 2·40, Italian Somaliland 2·12, Persia 1·35, Portuguese East Africa 1·06, Arabia 0·97, Straits Settlement 0·61, Ceylon 0·34, Belgium 0·27, China 1·09, Canada 0·29, Egypt 0·50, Russia 0·21, Union of South Africa 0·23, Sweden 0·40.

#### *Currency and Banking.*

The silver rupee of British India of the standard weight and fineness enacted in the Indian Coinage Act, 1906, is the standard coin of Zanzibar. All other silver coins of British India of the standard weight and fineness enacted in the Indian Coinage Act, 1906, are legal tender for the payment of an amount not exceeding 5 rupees. These coins are  $\frac{1}{2}$ ,  $\frac{1}{4}$ , and  $\frac{1}{8}$  of a rupee. Seyyidiah copper pice are legal tender at the rate of 64 pice to 1 rupee for the payment of an amount not exceeding 1 rupee. There is a Government note issue of the denominations Rupees 1, 5, 10, 20, 50, 100, and 500.

The National Bank of India, Ltd., and the Standard Bank of South Africa, Ltd., have branches in Zanzibar.

#### *Shipping and Communications.*

The port of Zanzibar is one of the finest in Africa, and was for long a main centre of commerce between India, Arabia, and the mainland. Of late years, however, the importance of Zanzibar as a port of trans-shipment and distributing centre has largely decreased owing to the development of the mainland, to the opening up of the coast ports to direct steamship service with Europe, and to the transfer to Aden of the seat of trade with the Benadir coast. Recent figures, nevertheless, tend to indicate that the Island will continue, by reason of its geographical position, to retain control of the local traffic.

It possesses an excellent water supply, the best on the East Coast of Africa. A considerable quantity is supplied to shipping annually.

The British India Steam Navigation Company maintain a monthly service between London—Zanzibar—Beira, the Union Castle Mail Steamship Company a monthly service London—Zanzibar—London round Africa in alternate directions, the Clan—Ellerman—Harrison Line between Glasgow—Liverpool—Zanzibar—Beira (cargo only), the Compagnie des Messageries Maritimes a fortnightly service Marseilles—Zanzibar—Madagascar, the German East Africa Line a monthly service Hamburg—Zanzibar—Durban—Hamburg in alternate directions, the Holland Africa Line a monthly service Rotterdam—Zanzibar—Rotterdam round Africa in alternate directions, Royal Packet Steamship Co. a monthly service Durban—Zanzibar—Batavia and vice versa, the Tirrenia a monthly service between Genoa and Zanzibar and an irregular coastal service between Zanzibar and Italian Somaliland, the Navigazione Luera Triestina a monthly service Venice—Zanzibar—Venice in alternate directions. The British India Steam Navigation Company also maintain a fortnightly service Bombay—Zanzibar—Durban, also a coastal service Lamu—Zanzibar—Mikindani, the Osaka Shosen Kaisha a monthly service Kobe—Zanzibar—Durban and South America. Messrs. Cowasjee Dinshaw & Bros.

maintain irregular service between Zanzibar and Kismayu. Government steamers maintain regular weekly connection with Pemba and Dar-es-Salaam. Zanzibar has become a port of call in the itinerary of a number of large tourist steamers. There is cable communication with Europe either *via* Aden or *via* Durban.

There are 165·46 miles of roads throughout the Island of Zanzibar and 73·22 miles in Pemba suitable for motor traffic. The Government maintains wireless stations and telephone systems in Zanzibar and Pemba.

There are 7 post offices in the two Islands.

There is a regular weekly air service (passenger and mail) between Zanzibar, Dar-es-Salaam and Tanga in Tanganyika Territory, and Mombasa and Nairobi in Kenya Colony, which connects with the Imperial Airways Service at Nairobi for destinations on the London to Capetown air route. This feeder service is maintained by a private company operating from Nairobi, Kenya Colony.

#### *Constitution and Government.*

The Government is administered by a British Resident, who is appointed by commission under His Majesty's Sign Manual and Signet, and exercises his functions under the Zanzibar Orders in Council, 1924 and 1925.

Legislation consists of the Decrees of the Sultan, and certain Imperial Statutes of general application. Many Indian Acts, such as Penal Code, Civil and Criminal Procedure, etc., have been adapted to local requirements and enacted in the form of Decrees. His Highness's decrees when countersigned by the British Resident under Article 42 of the Zanzibar Order-in-Council, 1924, are binding upon all persons. The Muhammadan Law, declared in civil matters to be the fundamental law of His Highness's Dominions, controls in some measure personal relationship and land tenure among the Islamic population.

There are Executive and Legislative Councils, established by the Sultan's Decree No. 1 of 1926 (see below).

Justice, in cases in which persons subject to the Zanzibar Orders-in-Council, 1924 and 1925, are concerned, is administered by H.B.M.'s High Court and the Courts subordinate to it, and in other cases by H.H. the Sultan's Court for Zanzibar and the Courts subordinate to that Court. Subordinate Courts are held by Resident Magistrates, Administrative Officers, and Arab Kathis. In addition, District Courts, composed of benches of local headmen, exercise a limited criminal jurisdiction. An Appeal lies from the British Court and from the Zanzibar Court in the exercise of their original civil and criminal jurisdiction to His Majesty's Court of Appeal for Eastern Africa and thence to the Privy Council.

## APPENDIX.

This Appendix gives some account of North Borneo, Sarawak, Trans-Jordan and certain miscellaneous British Possessions and Protectorates which are not included in the main portion of the Historical and Statistical Account above.

## NORTH BORNEO.

*Situation and Area.*

The territory under the jurisdiction of the British North Borneo Company (incorporated by Royal Charter under date of 1st Nov., 1881), now known as "The State of North Borneo," comprises the whole of the northern portion of the island of Borneo from the Sipitang River on the west to lat. 4° 10' N. on the east coast, together with adjacent islands; it is held under grants from the Sultans of Brunei and Sulu, and contains an area of about 31,000 square miles (equal to Scotland), with a coast line of about 900 miles. It extends from 115° 20' to 119° 20' E. long., and from 4° 10' to 7° 25' N. lat. The southern frontier was delimited in 1912-1913 by an Anglo-Dutch boundary commission, whose report was confirmed by a treaty at London on the 28th September, 1915.

The principal stations of the Company are at Sandakan, Lahad Datu, and Tawau, on the east, Kudat on the north, and Jesselton on the west. At each of these there are excellent harbours, especially at the first-named, which is situated in a magnificent bay some fifteen miles in length, with an average breadth of five miles. It is 1,000 miles from Singapore, 1,200 from Hong Kong, and 1,600 from Port Darwin. The headquarters of administration are at present at Sandakan. Other stations are at Semporna, Lamag, Beluran, Langkon, Kotabelud, Tuaran, Penampang, Papar, Beaufort, Mempakul, Sipitang, Tenom, Keningau, Tambunan, Ranau, and Pensiangan.

*General Description.*

The greater part of the country is at present covered with jungle, but the soil is well adapted for the growth of almost all tropical products, more particularly rubber, tobacco, coconuts, sugar, coffee, sago, tapioca, and pepper.

The country is mountainous. The highest point is Kinabalu, over 13,000 feet.

The inhabitants, who at the Census taken in 1931 numbered 270,223, are mainly Bruneis, Bajaus, and Sulus on the coast, who subsist by fishing and trade. Further back, the Dusuns, the most numerous native race in North Borneo, cultivate yearly well-irrigated rice fields, and in the uplands they plant tobacco and hill padi (rice), and hunt. The Muruts, another interior tribe, are numerous; formerly they varied more peaceful pursuits by head-hunting but are now peaceable. The Chinese population is steadily increasing and is now not far short of 48,000; they form the trading, gardening and artisan section of the community. There is a State-aided scheme of Chinese immigration. Europeans number about 400. Sandakan, the chief town, with suburbs, has a population of about 17,600. There are several missions, including the Church of England, with stations at Sandakan, Kudat,

and Jesselton, and the Roman Catholic with a church and school at Sandakan and four stations on the West Coast and eighteen schools in various parts of the country. The Church of England, which is supported by the Society for the Propagation of the Gospel in Foreign Parts and the Church of England Community, has a stone church and two schools at Sandakan and six schools elsewhere. The Basel Mission has fourteen schools, the principal ones being at Jesselton, Sandakan, Kudat, and Papar. Government maintains ten vernacular schools at various places in the territory.

*History.*

The State and town of Brunei appear to have been prosperous from a very early age. They were visited by Europeans in 1522, 1503, and 1520, but the first settlement in Borneo was made by the Dutch at Landak and Sukadana in 1608, and soon abandoned. Two English settlements were made about 1609, and abandoned in 1623. The Dutch factories were re-established in 1747 and 1776, but finally given up in 1790.

A British settlement was formed under the East India Company in 1762, at the island of Balam-bangan, which had been ceded by the Sultan of Sulu. This was attacked by pirates in 1775, and the staff was removed to Labuan, a small factory being at the same time established at Brunei. A second attempt in 1803 was made to establish a settlement on the former island, and in Marudu Bay, and on its failure the East India Company gave up its connection with Northern Borneo.

Sir James Brooke, in 1842, established the independent State of Sarawak, which, as well as Brunei, is under the exclusive influence of Great Britain; and Labuan became a British Colony in 1846. Some Americans obtained extensive cessions in North Borneo in 1866 from the Sultan of Brunei, but they were never utilised. In 1872 a Company, called the Labuan Trading Company, established itself in Sandakan, the business of which was later carried on by its manager, Mr. W. C. Cowie. Finally, in 1877 and 1878, the Sultans of Brunei and Sulu ceded to a syndicate formed by Baron Overbeck and Mr. (afterwards Sir Alfred) Dent the greater portion of the territory now known as the State of North Borneo. This syndicate's rights were acquired in 1881 by the British North Borneo Provisional Association, and transferred by that body in 1882 to the British North Borneo Company. Some further cessions have since been added to the Company's territory. The British Government assumed a formal protectorate over the territory by agreement with "The State of North Borneo," dated the 12th May, 1888. By this agreement the State is to continue to be administered by the Company as an independent State, under the protection of Her Majesty's Government, who may appoint consular officers, and shall conduct all foreign relations, but does not interfere in internal administration.

*Climate.*

The climate, though tropical, is equable; the temperature varies from 70° to 90°, but there is usually a light breeze. The annual rainfall is from 80 to 160 inches, according to situation.

Annual Mean Temperature... 81 degrees

Recorded extremes maximum 96 "

" minimum 60 "

*Constitution.*

The territory is administered by a Court of Directors in London, and a Governor and Civil Service appointed by them. There are four Residencies, viz., the Sandakan, West Coast, Tawau, and Interior Residencies.

The appointment of the Governor is subject to the approval of the Secretary of State.

The law of the country is based upon Indian law and the principal Indian Codes have been adopted in the State. Many enactments of the Straits Settlements also have been incorporated in local Ordinances. Courts of law are correlative to the Indian Courts under the Indian Criminal and Civil Procedure Codes, while there are Imams' Courts for the administration of Moslem matrimonial law, and Native Courts to deal with matters of native custom.

*Industry.*

The principal products of the country are estate rubber, timber, tobacco, coal, copra, and cutch. The last decade has witnessed a rapid expansion of the rubber industry; exports of rubber increased from 3,749 tons in 1922 to 5,379 tons in 1932. The vast timber resources of the country form one of its principal assets, but until recently only the fringe of the forests was being worked. A Company was however formed in 1920 for more adequate timber exploitation with modern lumbering apparatus. Timber is being exported in increasing quantities to China, Japan, and England; the exports in 1932 were valued at 283,897. At Sandakan two large steam driven sawmills have been working for some years and a modern band sawmill has been installed. An electrically driven sawmill was recently installed in Sandakan. Tobacco is grown in the Darvel Bay district, the variety cultivated being wrapper leaf tobacco for cigars; exports in 1932 were valued at 74,523. Coal exports 1932, 13,749. The number of coconut plantations has rapidly increased, and exports of copra have risen considerably in value; exports of copra in 1932 were valued at 44,591. The fishing industry gives employment to a large number of natives; exports of dried and salt fish in 1932 were valued at 38,283. Cutch, a tanning material obtained from the bark of certain mangrove trees, is manufactured at Sandakan; exports in 1932, 20,411. Agriculture is now beyond the primitive state and certain of the more advanced tribes use the plough and harrow. There is a large trade in the collection of jungle produce. The hill lands are well adapted for the cultivation of tapioca, gambier, pepper, and tea. Shipbuilding is increasing in Sandakan Bay.

The exports comprise also, sago, coffee, pepper, gutta-percha, rotan, firewood, beeswax, edible birds' nests, camphor, resin (called damar), cattle, etc., sent almost entirely to Singapore and China; from Singapore part of these find their way to Europe.

The Chartered Company does not itself directly engage in trade.

The revenue is derived from import and export duties, excise, quit rents, licences, royalties, poll tax, and other usual sources of revenue.

Sandakan on the East and Jesselton on the West are the principal ports. Both towns have developed rapidly, and are now supplied with electric light and cold storage. Considerable sums have been spent by Government on reclamation, improvement of water supplies, etc., at both ports.

Large resources of coal exist in the country behind Cowie Harbour in the south east and seams occur elsewhere in the territory. Gold in alluvial form is found in certain of the rivers on the East Coast.

Large deposits of iron ore have been discovered. Indications of the presence of petroleum occur in many parts of the State, but so far it has not been found to exist in commercial quantity; prospecting work is still proceeding.

*Customs Tariff.*

Customs duties are leviable in North Borneo both on an *ad valorem* and a *specific* basis. The prevailing *ad valorem* duty rates are 5 per cent. and 10 per cent.; chiefly the latter.

A preferential import tariff (varying from one-third to three-quarters of the general tariff import rates) came into force on 10th October, 1933, applicable to certain specified goods imported from any part of the British Empire. Following Colonial practice, as in the United Kingdom, a proportion of 25 per cent. of Empire material labour, etc., is required in most cases and of 50 per cent. in a selected few.

The rates of duty on the most important articles are as follows:—

*Currency and Banking.*

The Company has a copper coinage of  $\frac{1}{2}$  and 1 cent. pieces, a nickel coinage of 1 cent.,  $\frac{2}{3}$  cent. and 5 cent. pieces, and it issues notes. There is also a silver coin of 25 cents. The State Bank of North Borneo has its head office at Sandakan. There are agencies of the Hong Kong and Shanghai Banking Corporation, the Chartered Bank of India, Australia and China, and the Bank of Taiwan.

Money orders on North Borneo are issued in England, India, the Straits Settlements, Ceylon, Hong Kong, and elsewhere, and *vice versa*, and British postal orders came into use in the State during 1908.

*Means of Communication.*

The Straits Steamship Company run steamers every week between Singapore and local ports. There is additional communication by steamer with Hong Kong, Japan, and the Dutch East Indies, and a local company maintains a service along the coast and to the Philippine Islands. The State Railway on the West Coast, which is a metre gauge line, connects Jesselton with Beaufort, 57 miles distant. At Beaufort the line divides, one section proceeding to the port of Weston (20 miles), the other to Melalap in the interior (40 miles). In all, the length of railway (including branches) completed is 124 miles. At Jesselton there is a steel jetty where vessels up to 1,000 tons can load and discharge cargo. There is a first class metalled road 21 miles long, from Jesselton to Tuaran; another proceeds from Sandakan in a north-westerly direction, 15 miles of metalling have been completed and earth-works to mile 19. Road construction is being pushed forward in other localities of the State. There is a system of bridle-paths covering a total distance of 600 miles. Wireless stations exist at Jesselton, Kudat, Sandakan, Tawau, and Lahad Datu. The State has joined the Postal Union. Course of post from London, about thirty days. Postage to all British possessions for letters 8 cents for the first oz., 4 cents each succeeding oz.; foreign countries, 12 cents for the first oz., 6 cents each succeeding oz.

On the completion of the Singapore-Labuan-Hong Kong cable in 1894, the mainland of Borneo was joined to Labuan by a cable covering a distance of about 10 miles to Mempakul.

There is a telegraph line from Mempakul where the cable reaches land to Jesselton, whence messages are transmitted by radiotelegraphy to Kudat, Sandakan, Tawau, and Lahad Datu. Branch telegraph lines establish communication with Beaufort and Tenom from Jesselton. The majority of the smaller Government stations are in telephonic communication with one another and with the local centres of administration. Telephone exchanges are in operation at Jesselton, Sandakan, and Kudat.

### SARAWAK.

#### General.

In 1864 Great Britain recognized Sarawak as an independent State. An agreement was entered into with the Rajah of Sarawak, on the north-west coast of Borneo, on the 14th of June, 1888, under which that State has been placed under British protection. Her Majesty's Government undertake not to interfere with the internal administration of the State, but they are to determine any questions that arise as to the succession, to control the foreign relations, and to have the right to establish consular officers in the territory. British subjects are to have most-favoured-nation treatment, and no part of the territory is to be alienated without the consent of H.M.'s Government.

The territory of Sarawak comprises an area of about 50,000 square miles (more than equal to Ireland and Wales together), with a population of about 475,000 composed of various races. It is intersected by many rivers, navigable for a considerable distance inland, and commands about 450 miles of coast line. The government of the district from Tanjong Datu to the entrance of the Samarahan River was obtained from the Sultan of Brunei in the year 1842 by Sir James Brooke, who became well known as Rajah Brooke of Sarawak. In 1861 a second cession was obtained from the Sultan of Brunei of all the rivers and lands from the Samarahan River to Kedurong Point. In 1882 a third cession was obtained of 100 miles of coast line and all the country and rivers that lie between Kedurong Point and the Baram River, including about three miles of coast on the north-east side of the latter; and in 1884 another cession was obtained of the Trusan River, situated on the north of the mouth of the Brunei River. The Limbang River was also obtained in 1890, the transfer being approved and confirmed by H.M.'s Government in 1891. The Lawas River was added in 1906. The present Rajah, H. H. Sir Charles Vyner Brooke, G.C.M.G. (born 26th September 1874, married, 1911, Hon. Sylvia Brett), succeeded his father, H. H. Sir Charles Johnson Brooke, G.C.M.G., in 1917.

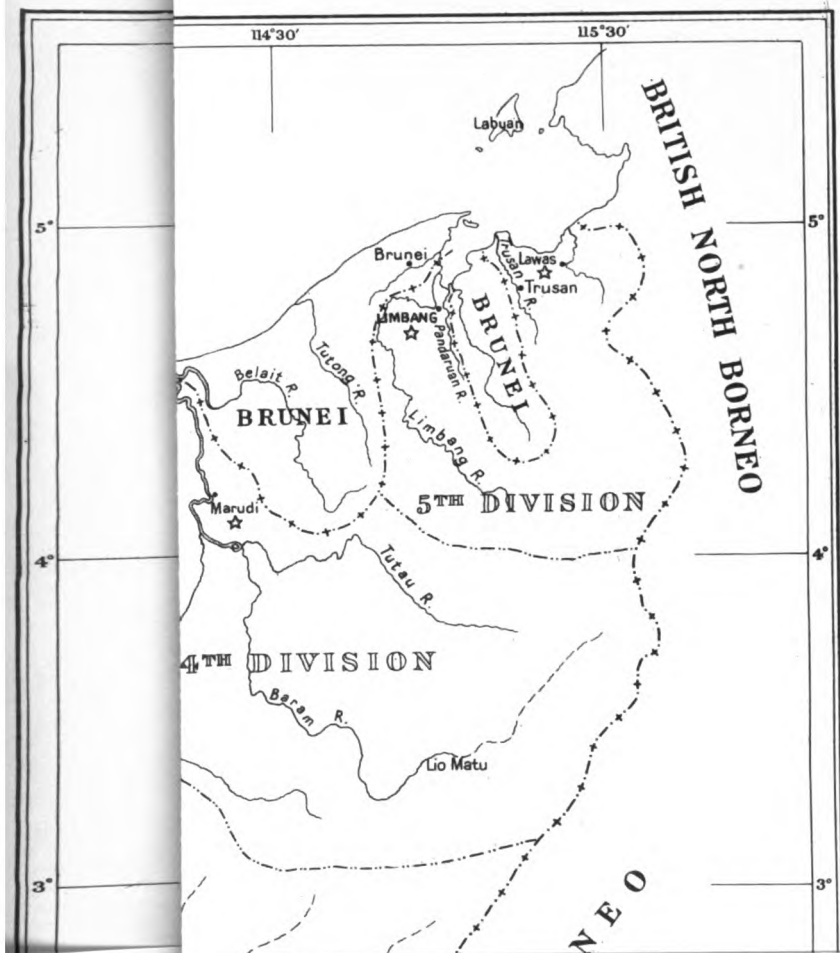

*His presumptive*, Bertram Brooke (H. H. the Tuan Muda), born 8th August, 1876.

Pepper and rubber grow well throughout the Territory. The cultivation of sago is one of the most important industries. All these articles figure in the list of exports, which also includes gutta-

percha, indiarubber, canes, rattans, camphor, beeswax, birds' nests, gambier, jelutong, illipe nuts, copra, cutch, betel nuts, damar, and tuba. The value of the principal exports was:—

\* *NOTE*.—Jelutong gutta is the sap of a fairly common jungle tree. It is said to be shipped mostly to America, and used in the manufacture of paint, chewing gum, and insulating material.

—The bulk of the trade is with Singapore.

### Chief Towns.

Kuching, the capital, population about 25,000, on the Sarawak River, about 23 miles inland (N. lat. 1° 33' 10", E. long. 110° 20' 13"), besides excellent Government offices and Court House, possesses hospitals and a museum with a complete collection of exhibits relating to Borneo. The Bishop of Labuan and Sarawak has his headquarters there, and has a mission school with 565 scholars, and also a girls' school. The Roman Catholics also have a mission there, with a boys' school under four resident priests, and a girls' school under the sisters.

The S.P.G., and Roman Catholic Missions have stations at various other places all over the Country.

Sibu, on the Rejang River, has a large population of Chinese traders, who exchange European goods for jungle produce. The river has a native population estimated at 90,000. The Chinese here trade direct with Singapore, as well as with Kuching. Muka, a large town on the Muka River, near its mouth, is devoted to the production of sago, the stems of the sago palm being cut in the upper reaches of the river and floated down to the town, where the pith is extracted and beaten, to be carried in native schooners to Kuching, to be cleaned.

Other towns are Sadong, Lundu, Simanggang, Betong, Sarafok, Engkilili, Sarikei, Binatang, Matu, Kapit, Oya, Rejang, Miri, Baram, Bintulu, Limbang, Lawas, Trusan.

### Communications.

Vessels of the Sarawak Steamship Company Limited and Straits Steamship Company Limited, provide a service every week between Kuching and Singapore. A service between Sibu and Singapore is maintained by the Sarawak Steamship Company Limited, which also provide a coasting service.

There are roads across the capital and thence to Upper Sarawak (about 25 miles) and to Satong (about 40 miles). Internal communication is almost entirely by means of the numerous rivers, which form natural highways and byways, by which any point in the country can be reached in steam launches or boats.

### Posts and Telegraphs.

Sarawak joined the Postal Union in 1897.

*Local*.—To any place in the country, 5 cents per 2 oz., and 5 cents to Singapore. Inland post cards 2 cents.

*Foreign*.—The same as from Singapore (Sarawak stamps).

Letters come in direct bag from London, but *via* Singapore.

Wireless installations have been erected at Kuching Town, Kuching Substation, Lundu, Simanggang, Sarafok, Sibu, Binatang, Kapit, Muka, Bintulu, Belangian, Tatau, Miri, Baram, Limbang, Lawas, Kanowit.

### Sources of Revenue.

The principal sources of revenue are the Monopolies, Customs, and Mineral Royalties.

The Customs Tariff covers a wide range of imports and exports. Import duties are levied on an *ad valorem* basis at the Sarawak port of entry. Goods produced or manufactured within the British Empire are admitted at preferential rates. Detailed information can be obtained at the Sarawak Govt. Offices, Millbank House, London, S.W.1.

Harbour, buoy, and light dues:—Five cents per ton, payable on arrival, and chargeable to all vessels of five tons and upwards.

The taxes levied are:—Exemption, \$2 per annum, payable by Malays; \$1 per annum per door, payable by sea Dyaks; \$2 per annum for every able-bodied land Dyak.

The weights are, 1 picul = 133½ lbs.; 1 coyan = 2 tons 7 cwt. 2 qrs. 18 lbs.

## TRANS-JORDAN.

A strip of country fringing the Syrian desert and extending from Syria in the north to the Gulf of Akaba in the south forms the territory known as Trans-Jordan. It is divided from Palestine by the Rivers Yarmuk and Jordan and the Dead Sea.

The frontier between Nejd and Trans-Jordan starts in the north-east from the point of intersection of meridian 39°E. and parallel 32°N., and proceeds in a straight line to the point of intersection of meridian 37°E. and parallel 31°36'N. and thence along meridian 37°E. to the point of its intersection with parallel 31°25'N. From this point, it proceeds in a straight line to the point of intersection of meridian 38°E. and parallel 30°N. leaving all projecting edges of the Wadi Sirhan in Nejd Territory, and thence proceeds along meridian 38°E. to the point of its intersection with parallel 29°35'N.

The southern boundary of Trans-Jordan is yet to be defined.

The northern portion of Trans-Jordan consists of elevated country, rising to 3,500 to 4,000 feet above sea level, which on the western margin falls abruptly to the narrow fertile plain of the Jordan valley, and on the eastern falls more gradually to grass lands through which runs the Hejaz Railway line and which gradually merges into the desert.

The grass land strip forms the summer pastures of Bedouin tribes who in the winter move further east for pasturage. West of the railway are the wheat and barley lands of the Kerak, Balqa and Ajlun tribes as well as of the Circassian colonies in the Balqa and the numerous Arab villages in the north. Perennial water is found in the deep lateral valleys which is used for the irrigation of cultivable land in the valleys themselves, and subsequently waters relatively large areas of the fertile land of the Jordan depression which are cultivated by semi-nomad tribes. The remainder of this depression is used by these tribes as winter grazing grounds. In the north there are a number of large villages, but the only towns of any size are Amman, Salt and Kerak.

No census has been taken but the population is believed to be between 250,000 and 300,000.

His Britannic Majesty is the Mandatory for Trans-Jordan, to which the terms of the Mandate for Palestine, with the exception of the provisions dealing with the establishment of a national home for the Jewish people, are applicable. The declaration of His Majesty's Government with regard to its Mandatory obligations in Trans-Jordan made to the Council of the League of Nations in September, 1922 (Cmd. 1785) was in the following terms:—

"In the application of the Mandate to Trans-Jordan, the action which in Palestine is taken by the Administration of the latter country, will be taken by the Administration of Trans-Jordan under the general supervision of the Mandatory.

His Majesty's Government accept full responsibility as Mandatory for Trans-Jordan and undertake that such provision as may be made for the administration of that country in accordance with Article 25 of the Mandate shall be in no way inconsistent with those provisions of the Mandate which are not by this resolution declared inapplicable."

On the 20th February, 1928, an Agreement between His Britannic Majesty and his Highness

the Amir for the purposes of setting up an independent and constitutional Government and placing His Britannic Majesty in a position to fulfil his international obligations in respect of Trans-Jordan, was signed by the representatives of the High Contracting Parties and an Organic Law thereupon came into force provisionally, pending the ratification of the Agreement after its acceptance by the Legislative Council provided for in the Law.

The Legislative Council, consisting of six official and sixteen elected members, met for the first time on the 2nd April, 1929, and accepted the Agreement during its first session.

The Mandatory is represented in Trans-Jordan by the British Resident, assisted by a few British officers and a small clerical staff. The British Resident acts under the instructions of the High Commissioner for Trans-Jordan, who is also the High Commissioner for Palestine.

A local Arab Administration has been formed under His Highness the Emir Abdullah ibn Hussain, G.B.E., K.C.M.G. (son of ex-King Hussain of the Hejaz and brother of King Faisal of Iraq).

Amman is the capital, while Salt, Kerak, Irbid and Ma'an are headquarters of District Governors. The Ottoman Code is in operation with but few changes. The official language is Arabic.

The system of taxation is unchanged from the Turkish, although additional contributions have been levied for special educational or religious purposes. In its incidence, however, taxation has been most uneven, for it is only in the Balqa that the tithe is collected, while Kerak and Irbid pay a specific sum in commutation.

The Customs Tariff is mainly on a specific basis. The following are the principal articles subject to specific duties:—Cigarettes, Tobacco, Benzine and Kerosene, Flour, Rice, Sugar, Coffee, Cotton, woollen and silk materials, Timber, Rubber Tyres and Tubes, and Matches.

Palestine pays Trans-Jordan an annual sum of £P.25,500 on account of the Customs Duties collected on goods of foreign origin which are re-exported to Trans-Jordan. The Trans-Jordan Government refunds, however, the duties collected at Amman on goods imported *in transit* through Palestine, under a special convention. The Syrian Government also refunds the duty collected on articles of foreign origin when re-exported to Trans-Jordan; and Trans-Jordan in addition collects a further small percentage of the value of the goods as assessed at Damascus. Until May, 1924, the import duty into Syria was 11 per cent., but was then raised to 15 per cent. on goods exported from States members of the League of Nations, and to 30 per cent. on others. Trans-Jordan collects a specific additional excise duty on imported alcohol and tobacco.

Until 1926, public security in Trans-Jordan was maintained by a locally-recruited force known as the Arab Legion and a number of civil police in the larger towns. In 1926 these forces were reorganised. A military force called the Trans-Jordan Frontier Force was raised in Palestine and Trans-Jordan for the defence of the two territories, and police duties in Trans-Jordan were entrusted to a civil police force, to which the old name of the Arab Legion was given.

Aden is an important oil fuel and bunkering station, and also an *entrepôt* for the trade with Arabia. The exports consist of coffee, gums, skins and hides, cotton goods, dyes, feathers, spices, etc.

#### *Administration.*

The administration of Aden was formerly directly under the Government of Bombay, but new arrangements came into operation in 1923. The Imperial Government is now responsible for military and political affairs in Aden and the Aden Protectorate. The Settlement of Aden itself remains under the Government of India. The financial settlement required by this division of authority provides for the payment by India to Imperial Revenues of £150,000 a year. This amount is considerably less than the annual expenditure falling upon Indian revenues under the former system of control.

The administrative control of the Settlement of Aden was transferred from the Bombay Government on 1st April, 1932, when Aden was formed into a separate province under the direct control of the Government of India.

The administration is vested in a Chief Commissioner who is also Resident and Commander-in-Chief. Since the introduction of the dual control referred to above, the Resident's post is to be held alternately by an officer of the Indian Service and an officer of the Colonial Service. The Court of the Resident is the Colonial Court of Admiralty under Act XVI of 1891, and its procedure as such is regulated by the provisions of the Colonial Courts of the Admiralty Act 1890 (53 and 54 Vic. Chapter 27). The laws in force in the Settlement are, generally speaking, those in force in India, supplemented on certain points by special regulations to suit local conditions. The management of the port is under the control of a Board of Trustees formed in 1888. The principal business of the Port Trust in recent years has been the deepening of the harbour so as to allow vessels of large size to enter and leave at all states of the tide. The police force, consisting of land, harbour and armed police, has recently been reorganised.

Aden is a free port and there is no customs tariff. Excise duty is, however, levied on spirits, wines and beer, perfumed spirits, intoxicating and dangerous drugs on specific duty basis.

The percentages of sea-borne trade with the United Kingdom, other parts of the British Empire, and the principal foreign countries for the year 1932-33 are appended.

## MISCELLANEOUS POSSESSIONS.

### ADEN.

The peninsula of Aden is situated in lat. 12° 47' N. and long. 45° 10' E., about 100 miles east of the Straits of Bab-el-Mandeb, on the Arabian coast. The Settlement (the total area of which, exclusive of Perim, is 75 square miles) consists of two old craters forming rocky peninsulas:—Aden proper (area 21 square miles; population 34,471), on the south, and Little Aden (area 15 square miles) on the west—and a flat strip of coast, about three miles broad (area 39 square miles; population, including Sheikh Othman, Imad, and Hiswa, 12,167). The peninsulas form the horns of a bay called Aden Back Bay, which is about eight miles broad from east to west and about four miles deep. Its entrance is about three miles across. The native town of Aden is situated on the east of the Aden peninsula, opposite a gap in the crater walls. On the west side of the peninsula, some five miles from the town, is Steamer Point, off which the large steamers lie. The highest point of the peninsula is 1,725 feet above sea level. The average annual rainfall is about 3 inches, and the maximum is about 8 inches. The climate is very hot and damp, especially during the summer months.

Aden, after being a trade centre under its native kings, became subject in succession to the Abyssinians, the Persians and the early Caliphs. In 1538 it was captured by the Turks, who lost it some years later, but captured it again in 1551 and held it until they evacuated the Yemen in 1630. The Aden peninsula was occupied by the British in 1839, and in 1868 Little Aden was obtained by purchase. The coastal strip between the two peninsulas was secured by purchases in 1882 and 1888.

The Aden Protectorate, to the north and north-east of Aden, has an area of about 42,000 square miles and a population of over 100,000.

**PERIM**, a bare rocky island, five square miles in area, with a population of 1,700, lies in the Straits of Bab-el-Mandeb, about 1½ miles from the south-west corner of Arabia. It possesses a good harbour on the south-west side, with an entrance 360 yards in breadth. It was occupied by the British in 1799, but subsequently abandoned, and was only re-occupied in 1857, when the overland route to India made the position important. It is a coaling, oil-fuel and cable station, and forms part of the Settlement of Aden.

*Government Agent, Perim,* C. Davey.

**SOCOTRA**, an island situated about 150 miles E.N.E. of Cape Guardafui, in 12° 19'—12° 42' N. lat., and 3° 21'—3° 30' E. long. and lying in the direct route to India, has been since 1876 under the Government of Aden, which pays a small subsidy to the Sultan of Qishu, on the Arabian mainland, to whom it belongs. It is famous for its aloes. The population of the island is about 12,000. It is rather less than 100 miles from east to west and about 30 miles broad. Its interior is mountainous. It was formally placed under British protection by agreement with the Sultan in October, 1886, together with the neighbouring Abdal Kuri and Bromers Islands.

**TRISTAN DA CUNHA.**

Tristan da Cunha is the principal of a group of islands lying in lat. 37° 6' S. long., 12° 2' W., about midway between South Africa and South America. It is an extinct volcano rising to 7,640 feet above sea level, with a crater-lake near its summit. It was taken possession of by a military force during the residence of Napoleon at St. Helena. When the garrison was withdrawn in 1817, William Glass, a corporal of artillery, and his wife elected to remain, and they were joined by two ex-Navy men, Alexander Cotton and John Mooney, and these, with certain ship-wrecked sailors, became the founders of the present settlement, which is on the north-west of the island, where there is a comparatively level area about 9 miles long and 1½ miles broad and about 100 feet above the sea. After some years, the five unmarried settlers contracted with a sea captain to bring them wives from St. Helena. A supply of stores and provisions was provided out of a grant voted by Parliament, and sent out by a man-of-war in 1886, nearly all the able-bodied men having been drowned while attempting to board a vessel in December, 1885.

In November, 1933, the population numbered 167, all with the exception of 6 having been born in the island. 13 were over the age of 60, including one man aged 76 and one woman aged 94. The inhabitants are generally healthy, and are spoken of as moral, religious, and hospitable.

In the way of live stock, the inhabitants have between them about 170 head of cattle, about 600 sheep and a stock of poultry. Potatoes do well, and crops are got in annually. Potatoes form the staple article of diet. Fish of good quality is obtainable in plenty. During the nesting season penguin and albatross eggs are gathered. For flour, sugar, jam and other prepared or manufactured food the island is dependent upon passing ships. Despite the limited choice of diet no evidence of malnutrition or deficiency disease is observable. Apple trees are in fair number, and bear well; there are also a few fig trees, but they do not fruit. The tree of the island, which apparently is a juniper, and upon which the islanders are dependent for their wood for fuel, is getting scarce in the neighbourhood of the settlement, but is abundant further off, and there is no fear of supply failing.

The Society for the Propagation of the Gospel has from time to time maintained a clergyman in the island.

In January, 1904, the island was visited by H.M.S. "Odin" in order to ascertain whether the islanders would accept the offer of the Cape Government to settle them in the Cape Colony, but out of eleven families only three families elected to go. The islanders are liable from time to time to privations. In March, 1907, owing to information indicating probability of failure of supplies, relief was sent by His Majesty's Government by the "Greyhound," chartered at Cape Town. On this occasion also the inhabitants were unwilling to leave the island, and the Rev. J. G. Barrow, a clergyman who had gone to the island in April, 1906, reported that though there is sure to be privation from time to time, it does not cause absolute distress. (See correspondence presented to Parliament in Cd. 3098 and Cd. 3764.)

Arrangements are usually made for the island to be visited by a ship at least once a year.

January, February, and March are the best months for visiting the island. It is in these

months that weather at times becomes so settled that the islanders are able to make visits to Inaccessible and Nightingale Islands, which are some 20 miles off. They also are often able to visit these islands in November to gather eggs, etc.

#### MISCELLANEOUS ISLANDS.

A number of islands and rocks throughout the world are British territory, or under British protection, but are not included in any Colony or separate Protectorate. Many of these have no permanent inhabitants, but are, or have been, leased by the Lords Commissioners of the Treasury for guano collection, or for coconut planting. The rents are paid into the Exchequer.

Among such may be mentioned the Ashmore Group (Indian Ocean), Bird Island and Case Island (in the Norfolk Island Group), Raine Island, and Bell Cay (near British New Guinea), Caroline Island, Flint Island and Vostoc Island (Pacific Ocean, 9° 56' S. lat., 150° 6' W. long., and 11° 26' S. lat., and 151° 48' W. long.), Maiden Island (4° 1' S. lat., 155° 57' W. long.), leased to Messrs. Grice, Sumner, and Co., and Starbuck Island; also Gough, Nightingale and Inaccessible Islands (in the S. Atlantic), and there are many others.

The Kuria-Muria Islands, five in number, off the south-east coast of Arabia, were ceded by the Imam of Muskat for the purpose of landing the Red Sea telegraph cable.

## INFORMATION AS TO COLONIAL APPOINTMENTS.

### THE COLONIAL SERVICE.

Below will be found a summary of the principal classes of appointment in the Colonial Service which are dealt with respectively :—

- (I) By the Director of Recruitment (Colonial Service) ;
- (II) By the Crown Agents for the Colonies ; or
- (III) Which are filled by open competitive examination.

### (I) APPOINTMENTS WITH WHICH THE DIRECTOR OF RECRUITMENT (COLONIAL SERVICE) DEALS.\*

Applications for the following appointments should be addressed in writing to the *Director of Recruitment (Colonial Service), 2 Richmond Terrace, Whitehall, S.W.1.*, from whom memoranda giving full details of these appointments may be obtained on written request.

#### VACANCIES.

Where information is given in the following paragraphs as to the number of vacancies available annually it is based, unless otherwise stated, upon the average requirements of the four or five years prior to 1931 during which, in the case of certain classes of appointment, a considerable amount of expansion of staff took place. In consequence of the economic depression the number of vacancies filled in and since 1931 has been considerably reduced. A continued reduction in the number of vacancies of all descriptions is inevitable so long as the period of financial stringency lasts, and it is not possible to say whether normal recruitment, when conditions have become more stable, will approximate to that of the years immediately preceding 1931, since this will depend upon so many factors which are at present unknown. Whilst it seems likely that recruitment may continue to be on a reduced scale for some years, developments may arise in the future, as in the past, which will require the provision of additional staff.

#### AGE LIMITS AND QUALIFICATIONS.

It will be seen that the fourth group of appointments is the only group open to boys of school leaving age, but there is a wide range of administrative, scientific, and professional posts open to candidates who obtain appropriate qualifications. Specialised training is required in some cases but not in others. In all cases special importance is attached to personal qualifications and general record.

#### ADMINISTRATIVE APPOINTMENTS.

The Colonial Administrative Service was constituted as a "Unified" Service with effect from the 1st of July, 1932.

The following paragraphs contain information regarding Administrative Appointments in Tropical Africa, where most vacancies occur, Cadetships in Malaya and Hong Kong, and Fiji and Western Pacific Cadetships. As regards Cadetships in Ceylon see page 586.

##### (a) QUALIFICATIONS.

A high standard of general education is essential for these appointments. Whilst a University Degree is not an absolutely indispensable qualification, the candidates selected for Administrative appointments in the last few years have nearly all been in possession of a University Degree, usually with Honours. The few exceptions have been in cases where a candidate has had some special qualifications (*e.g.* legal qualifications), or where the higher maximum age limit for appointments in Tropical Africa permits of consideration being given to candidates who have acquired some special experience likely to prove of value (*e.g.* such experience as that of an officer of H.M.'s. Forces, especially one who has commanded native African troops with success, and has been recommended for civil employment), and there is no reason to anticipate that at future selections the standard in this respect will be any less high.

##### (b) EAST AND WEST AFRICA.

The average number of Administrative Officers recruited for Tropical Africa from the end of the war until 1930 was 95 per annum.

During this period very considerable enlargements of staff contributed to maintain the average recruitment at this high rate despite the small number of 18 vacancies filled in 1922 as a result of the financial depression prevailing at that time, and a continuation of recruitment at so high a rate was not to be expected. In recent years, however, an average of between 50 and 60 cadets would have been required to replace annual wastage through retirement, etc., without allowing for any increase of staff. In 1930 the actual number of vacancies filled was 74, but in 1931 and 1932 it fell to 20 as a result of the financial depression. In 1933, 24 vacancies were filled, and for the present, it is feared that this reduction in the number of vacancies must be expected to continue.

One annual selection takes place in the summer. Completed applications must reach the Director of Recruitment between the 1st of January and the 31st of May, in the year of the selection.

\*The Secretary of State for the Colonies set up a Colonial Service Appointments Board in 1931 to make selections on his behalf for all the first appointments to the Colonial Service which are at his disposal. Selections so made are submitted to the Secretary of State for his final approval and ensuing appointments are made on his authority.

Candidates must be between the ages of 21½ and 35 when they take up their duties in Africa, but there is a definite preference for candidates of under 30. Selected candidates are, however, required to undergo a course of training in this country before embarkation (as explained below) and candidates who are under 21½ years of age may therefore apply, but must be not less than 20½ years of age on the 1st of August in the year of application.

The course of training undergone by selected candidates takes place at Oxford or Cambridge, and lasts one academic year, during which allowances are paid at the rate of £75 at the beginning of the first term, £50 at the beginning of the second and third terms, and £50 on completion of the course.

An Administrative Officer may be employed either in the Secretariat of a Colony or in a District. His duties may be very varied. If employed in a district his functions are of a magisterial and political nature, and he is the immediate agent of the Government in his District, and his responsibilities extend to all departments of the Administration which have no local representative. His duties may involve a considerable amount of travelling.

In West African Colonies, salaries start at £450 per annum and rise on a long scale to £960. In East Africa, new conditions of service, which take effect from August, 1934, provide for an initial salary of £350, rising on a long scale to £1,000 per annum. There are higher posts above these scales.

The normal age of retirement in West Africa is between 50 and 55 years of age, and pensions are calculated at the rate of ⅓ of an officer's pensionable emoluments for each completed month of service. In East Africa, pensions will be calculated at the rate of ⅓ of the normal retiring age being 55.

It should be noted that in the Tropical African Dependencies, free quarters are provided, or an allowance in lieu is given, in addition to the salaries described above.

In the interests of economy it has been found necessary, in the case of most Colonies, to impose a temporary levy on all salaries.

#### (c) CADETSHIPS IN MALAYA AND HONG KONG.

The average number of cadets appointed to Malaya and Hong Kong during the period 1919-1931 was between 9 and 10 annually. In 1932 3 cadets were appointed to Hong Kong, but there were no vacancies in Malaya. In 1933, 2 cadets were appointed to Hong Kong and 6 to Malaya.

Prior to 1932 these appointments were filled through the competitive examination for Eastern Cadetships, but the method of appointment is now assimilated to that already in force for Administrative appointments in the Colonial Service generally.

One annual selection will take place in the summer, concurrently with the selection for Administrative appointments elsewhere in the Colonial Service, and completed applications must reach the Director of Recruitment between the 1st of January and the 31st of May in the year of the selection.

Cadets may be required to undergo a course of instruction at Oxford or Cambridge, resembling that described in section (b).

Candidates must have attained the age of 21 and must not have attained the age of 25 on the 1st of August in the year in which the selection takes place.

The Cadet Services provide the higher Administrative staff for all the various Government activities including the Secretariats, the Courts, the Treasuries, District and Land Offices, and in Malaya the Residencies in the Malay States.

In Malaya the Cadet starts at \$350 per mensem (£490 per annum) and has the prospect of rising eventually to appointments in Class I, with salaries between \$1,050 per mensem (£1,470 per annum) and \$1,300 per mensem (£1,820 per annum).

In Hong Kong the initial salary is £450 per annum and the appointments in Class I are on a scale of from £1,600 to £1,800 per annum.

In both Malaya and Hong Kong there are special appointments (not necessarily reserved for Cadets) above these scales.

#### (d) FIJI AND WESTERN PACIFIC CADETSHIPS.

Up to three or four vacancies may occur annually for Cadets in the Fiji and Western Pacific Services, though five occurred in 1933. Selection to fill any such vacancies is made as circumstances require.

The age limits are 22 to 25.

There is no course of training in this country, but a Cadet is required, within the probationary period of three years from the date of his appointment, to pass certain examinations.

The duties correspond to those of an Administrative Officer in Tropical Africa.

The initial salary is £350 per annum for Cadets serving in Fiji, and £375 per annum for Cadets serving in the Gilbert and Ellice Islands Colony and the British Solomon Islands Protectorate. In the British Solomon Islands Protectorate, a local allowance of £50 a year is also paid.

#### (e) OTHER ADMINISTRATIVE APPOINTMENTS.

In many Dependencies, including those in the West Indies, vacancies for junior officers in the Administration and Secretariat are usually filled by the selection of local candidates or by promotion or transfer within the Service.

Vacancies may, however, occasionally occur for Assistant Secretaries in Cyprus. They are filled as and when they occur, but are very infrequent. The age limits are 21½ to 35, with a definite preference for candidates of under 30. The initial salary is £400, rising by annual increments of £20 to £600.

#### EDUCATIONAL APPOINTMENTS.

A considerable number of vacancies for junior Educational officers may be expected to occur in any year of normal prosperity. The great majority of these occur in either East and West Africa, or Malaya and Hong Kong, and are filled during the summer months; though a few vacancies may occur to be filled during the winter. Applications to be considered for vacancies in the summer should reach the Director of Recruitment as soon as possible after the end of February.

Candidates must have a Degree, usually a Degree with Honours, of a British University. For a proportion of vacancies they must normally have also a recognised Diploma in Education, or equivalent professional

qualifications though candidates who have had sufficient proved experience of school teaching may sometimes be considered. For other vacancies candidates having no professional qualification, and little or no teaching experience, are considered who, if selected, will be required to undergo a special course of training in educational method, practice, etc., at the University of London Institute of Education (leading to the Diploma in Education of London University) before proceeding overseas. Fees for this course are paid from Public funds and Probationers attending it receive an allowance of £20 a month.

Candidates must be between the ages of 21½ and 35 at the time of taking up their duties overseas: definite preference is given to men under the age of 30. Those who would be required to take the London training course may apply when they are under 21 years of age, provided that they will be not less than 20½ on the 1st of August in the year of application. Such candidates will often be men who, like the majority of applicants for Administrative appointments in Tropical Africa, expect to graduate at a University in the current summer.

In Tropical Africa, while there is one common Educational policy which aims at providing a sufficient and wisely adapted system of education for the Native populations, there are naturally variations of organisation and method in the different Dependencies, and the duties of a junior Educational officer will vary accordingly. In general it may be said that his work demands both skill as a teacher and ability, born of enthusiasm, to participate in and supervise all forms of school activities, e.g. organised games, Boy Scout work, etc., which experience has shown to be of particular value in creating *esprit de corps* and a sense of service and leadership amongst African native boys. Sooner or later an officer may be called upon to undertake the duties of an Inspector of Schools, though the work of administration is generally confined to the higher appointments in the Education Department.

The normal scale of salary in East Africa is £400 (for 2 years on probation) rising by annual increments to £920 per annum. In West Africa the normal scale is £480 (for 3 years on probation) rising to £920 per annum.

In Malaya and Hong Kong a junior officer is usually appointed as a "European Master" for duty on the staff of a secondary school organised on lines somewhat similar to those of a Public School in this country. He will be required to teach either English subjects, or Mathematics or Science up to London Matriculation or equivalent standard. The "English" schools in Malaya are attended by Malay, Chinese and Indian boys. In Hong Kong there are both English and Chinese schools, and also some "Anglo-Chinese" schools, where the study of English and Chinese is carried on side by side. In all cases games, Boy Scout work or Cadet Corps, etc., play an important part. Above the time scale there are a number of senior administrative offices, promotion to which is by merit; and opportunities may occur for appointment to an Assistant Inspectorship, or other post connected with vernacular education, at an earlier stage in an officer's career.

The scale of salary for European Masters in Malaya is \$400 per mensem rising by annual increments to \$800 per mensem (£560-£1,120 per annum). In Hong Kong European Masters receive £500 per annum rising to £950. In both cases appointments are in the first instance on a three years' agreement.

#### EAST AND WEST AFRICAN POLICE (GAZETTED APPOINTMENTS).

Prior to 1931 about eight vacancies for Police Officers in East and West Africa occurred annually. Vacancies are filled as and when they occur, but in consequence of the economic depression, there have been no vacancies during the last three years and they are likely to be of very infrequent occurrence for some time to come.

The age limits are 21½ to 35, but candidates of over 30 years of age are now seldom selected. There is a preference for unmarried candidates.

A high standard of general education is essential and as the organisation of the majority of Police Forces is on military or quasi-military lines experience either in the Regular or Territorial Army or in an Officers Training Corps is desirable and in some cases essential.

Salaries usually commence at £360 or £400 and rise to between £800 and £920, with higher posts above these scales.

#### APPOINTMENTS FOR BOYS OF SCHOOL LEAVING AGE. (GAZETTED).

These appointments comprise Police Probationerships in Ceylon, Malaya, Hong Kong and Palestine; Probationerships in the Malayan Customs and Monopolies Departments; Sub-Inspectorships of Constabulary in British Guiana, Trinidad and Jamaica.

During the years prior to 1932, between twelve and twenty vacancies occurred annually. Two appointments were made in 1932 and nine in 1933.

The selection takes place in the summer and completed applications should be submitted between the 1st of January and the 15th of March.

Candidates for Probationerships in the Police, Customs and Monopolies Services of Malaya and for Probationerships in the Police Service of Hong Kong must be not less than 19 on the 1st of August and under 22 years of age on the 1st of January in the year in which selection takes place. Candidates for Police Probationerships in Palestine and Ceylon must be over 19 and under 22 years of age on the 1st of August in the year in which selection takes place. For the West Indian Services they must be over 19 and under 26 years of age on the same date.

Candidates should be in possession of the School Certificate, or of certain equivalent or higher educational qualifications, except in the case of Ceylon for which a special qualifying examination is held in the years in which vacancies occur. The part taken by a boy in the general and athletic life of his school is also taken into consideration.

Police Probationers selected for Malaya may be required to take a three months course in the Malay language at the School of Oriental Studies in London, during which they receive an allowance of £20 a month.

Commencing salaries are as follows:—Hong Kong, £400; Ceylon, £360; Malaya, £350; Palestine £300 with pensionable expatriation allowance of £50; Trinidad, £300; British Guiana, £200; Jamaica, £200; with other allowances which vary. Salaries in the Far Eastern Services are on a long scale. To take the Malayan Police as an instance. A Probationer who is appointed at £350 receives, if he has passed the necessary

examinations, £420 after two years, and after three years £480 rising by £35 per annum to £1,120. Above this scale there are a number of appointments on the scale £1,120 to £1,330. The Inspector General, Straits Settlements Police, and the Commissioner of the Federated Malay States Police receive £1,680 each.

The duties of a Police or Customs Officer in a Tropical Dependency are extremely varied and should appeal particularly to the young man with a taste for an out of door life who would appreciate doing far more responsible work than would normally fall to a man of similar age in this country.

#### OTHER COMMISSIONED POLICE APPOINTMENTS.

Vacancies in other Colonial Police Forces are so seldom filled by the selection of candidates from this country and the qualifications required are so diverse that no general statement can be given, but in almost all cases unmarried candidates with considerable experience in Civil Police duties are required.

#### TREASURY APPOINTMENTS IN EAST AND WEST AFRICA.

Vacancies in these departments are not frequent and the Secretary of State has seldom been asked to fill more than three or four annually in recent years, mainly in West Africa.

They are filled as and when they occur.

Candidates must be between the ages of 21½ and 35, but there is a definite preference for candidates of under 30, and in certain cases for candidates of not more than about 24.

Candidates must have attained a high standard of education. A University degree is not regarded as an essential qualification for these appointments but would weigh heavily in a candidate's favour. Candidates must have a natural inclination for figures and accounts and in the absence of a University degree, a candidate would normally be expected to have qualifications or experience in accountancy.

In East Africa the commencing salary is usually £360 per annum, rising to £720, and in West Africa £400 rising to £840, with higher posts above these scales.

#### CUSTOMS APPOINTMENTS IN EAST AND WEST AFRICA.

Vacancies in these departments are very infrequent. They are filled as and when they occur.

Candidates must be between the ages of 21½ and 35, but there is a definite preference for candidates of under 30, and in certain cases for candidates of not more than about 24.

A Candidate must show satisfactory evidence of a high standard of general education and should also have a natural inclination for figures and accounts, though definite experience of accounts is not always essential. Previous experience of Customs work is not normally required for Supervisorships of Customs in West Africa. Where candidates with such experience are required, as for certain East African Customs appointments, or for a particular vacancy, the Home Customs Service is usually asked to recommend suitable candidates.

In East Africa the commencing salary is usually £360 per annum rising to £720, and in West Africa £400 rising to £840, with higher posts above these scales.

#### APPOINTMENTS IN THE COLONIAL AUDIT DEPARTMENT.

Normally, four or five vacancies may be expected annually and they are filled as they occur.

Candidates must be over 21½ years of age and under 28.

The essential qualifications for these appointments are : a good general education, preferably at a University, a natural inclination for figures and accounts ; character and ability such as would qualify a candidate in due course for the higher branches of the Service.

Selected candidates undergo a short period of training in the Home Establishment of the Colonial Audit Department, during which an allowance at the rate of £20 a month is paid.

Usual commencing salaries are between £360 and £450 per annum, rising to between £600 and £920, with higher posts above these scales.

#### LEGAL.

Before 1931 the average number of vacancies filled annually was 11-12, but considerably fewer appointments have been made during the last three years. The majority of vacancies are open only to Barristers, but vacancies occasionally occur for which Solicitors can be considered.

Vacancies are filled as and when they occur. Candidates should normally be under 40 years of age and should have had at least four years practical experience in their profession. A vacancy occasionally occurs, however, for which recently qualified Solicitors can be considered.

The appointments which are most frequently filled from outside the Service are those for Magistrates and Crown Counsel, for which as a rule Barristers only are eligible. It is for the vacancies which occasionally occur in the Departments of Administrators General and in Land Departments that Solicitors can usually be considered.

Initial salaries vary from £400 and do not usually exceed £700 or £750.

#### MEDICAL.

The Colonial Medical Service was constituted as a "unified" service with effect from the 1st of January, 1934. Officers are appointed to the Service by the Secretary of State and are liable to be posted at his discretion. The wishes of individual officers are, however, consulted as far as possible, both as regards posting on first appointment and as regards subsequent transfer.

The average annual number of appointments for Medical Officers made during the period 1926-1930 was 97. In 1931, as a result of the general financial depression, the actual number of appointments made was 35 and this figure fell to 12 and 22 in the years 1932 and 1933 respectively. It is not possible to forecast actual requirements in the immediate future.

Vacancies may occur at any time of the year and are dealt with as circumstances require. Candidates should be under 35 years of age, must be fully qualified and must be on the Medical Register. Preference is given to candidates who have held hospital or public health appointments or who have special knowledge of anaesthetics, radiology, surgery, medicine, ophthalmology, gynaecology and midwifery, diseases of the ear, nose and throat, venereal diseases, etc. In the case of Lady Medical Officers, for whom there are occasional vacancies, experience in child welfare work is almost invariably essential.

Selected candidates are normally required to undergo a course of instruction in Tropical Medicine and Hygiene before proceeding overseas.

The majority of vacancies for Medical Officers occur in West Africa, East Africa and Malaya. The vacancies for Lady Medical Officers are usually confined to West Africa and Malaya.

Commencing salaries in West Africa, East Africa and Malaya are normally £660, £800, and £700 per annum respectively.

Vacancies occasionally occur for Medical Entomologists.

#### DENTAL SURGEONS.

It is very rarely that a vacancy for a Dental Surgeon occurs. The conditions of these posts vary too much for general information to be given.

#### AGRICULTURE.

For several years prior to 1931 the average number of vacancies occurring in the Colonial Agricultural Departments for officers for general investigational, advisory and similar duties, was about 24; whilst vacancies for agricultural specialists, such as botanists, mycologists, entomologists and agricultural chemists, averaged about 9. For the present, almost all such appointments are likely to be filled by the selection of Colonial Agricultural Scholars on completion of their training (see below). For any further vacancies candidates with University degrees in agriculture or natural science who had opportunities for post-graduate study or research similar to those of Colonial Agricultural Scholars would be most likely to be selected. Until the year 1932, a certain number of vacancies were usually available, in addition to the above, in connection with the inspection of crops and of produce for export. For these appointments candidates are usually required to be in possession of a degree or diploma in agriculture or horticulture. The Secretary of State is also occasionally asked to fill vacancies of a definitely horticultural nature in connection with the care of botanic gardens or fruit cultivation. For these a horticultural qualification such as that obtainable at the Royal Botanic Gardens, Kew, or the horticultural diploma of an Agricultural College, is required.

The majority of appointments are filled in July and August, but vacancies may be filled at other times. Candidates should usually be over 21½ and under 30 years of age. Commencing salaries usually vary from £400 to £500.

The Secretary of State offers annually in the summer a certain number of Colonial Agricultural Scholarships. These are post-graduate scholarships, tenable in most cases for two years, one of which is spent in this country and the other at the Imperial College of Tropical Agriculture in Trinidad or some other institution abroad. The scholarships are intended to provide a pool of men trained in agriculture and agricultural science from which vacancies in the Colonial Agricultural Service can be filled. Candidates should possess, or be about to qualify for, a degree in agriculture or natural science. The value of a scholarship is:—

- (i) Whilst a scholar is in this country; £200 per annum with payment of fees for tuition and, if necessary, of matriculation or examination fees;
- (ii) Whilst a scholar is abroad: £225 per annum with payment of passages and of cost of travelling, if required, among the West Indian Islands or elsewhere; and also of tuition fees up to a maximum of £75;
- (iii) Each scholar will also receive an allowance not exceeding £5 for the purchase of approved books.

#### VETERINARY.

A few vacancies for veterinary officers and for veterinary research officers may normally be expected to occur annually in Colonial Veterinary Departments. The majority, if not all, of these vacancies will in future be filled by the selection of Colonial Veterinary Scholars on completion of their training (see below), though urgent vacancies may be filled, as and when they occur, by the appointment of candidates possessing the Diploma of Membership of the Royal College of Veterinary Surgeons or a veterinary qualification obtained in one of the self-governing Dominions. Candidates should be over 21½ and under 30 years of age on assuming their duties overseas. The commencing salary in the larger Veterinary departments is normally £600 per annum.

The Secretary of State offers annually in the summer a limited number of Colonial Veterinary Scholarships. These post-graduate scholarships, which are tenable for from one to four years, are intended to provide a pool of qualified candidates from which vacancies in Colonial Veterinary Departments can be filled. Candidates should possess, or be about to qualify for, either (a) the Diploma of Membership of the Royal College of Veterinary Surgeons or a veterinary qualification obtained in one of the self-governing Dominions or (b) a science degree of a British University or some equivalent qualification. The value of a scholarship is £200 per annum, with payment of fees for tuition, and if necessary of matriculation or examination fees. Each scholar will also receive an allowance not exceeding £10 for the purchase of approved books.

## FORESTRY.

A limited number of vacancies for Assistant Conservators of Forests may be expected to occur in each year. The number varied from 12 to 16 for some years prior to 1931, but in that year fell to 7, and only 4 vacancies were filled in 1932. In 1933 six candidates were selected to take a post-graduate course at the Imperial Forestry Institute. For the present candidates must possess a Degree or Diploma in Forestry involving not less than three years' study at a University, including two years at Forestry subjects. They are also required to pass a test in regard to their technical knowledge which is applied by a Board of forest experts. This Board usually meets in London early in July, so that candidates should apply in May or early in June. Selected candidates usually undergo a year's post-graduate training at the Imperial Forestry Institute at Oxford, during which they receive an allowance of £75 a term and approved expenses up to £50 in respect of practical forestry work. The commencing salaries of Assistant Conservators vary between £400 and £500.

## ZOOLOGICAL.

There are usually one or two vacancies a year, in connection with mosquito, tsetse-fly, and similar investigations, which are open to graduates in zoology or natural science who have specialised in medical Entomology. Vacancies for entomologists occur, however, rather more frequently in the Agricultural Departments. (See above). There are also occasional openings for trained Zoologists in Colonial Fisheries, Game Preservation and Museum Departments.

## CHEMICAL.

Some three or four vacancies are usually available in each year for officers for general analytical work (i.e. as Government Analysts or Assistant Government Analysts). A candidate should usually be under 35 years of age, should be an associate of the Institute of Chemistry, and should possess a good University Degree in Chemistry. The certificate of the Institute of Chemistry in Branch E. (Foods, Drugs, etc.) is a valuable additional qualification. The duties usually include any analytical work required by Government, which falls outside the scope of the Agricultural Chemist (e.g. the examination of stores, foods, drugs, water, ores, etc., and bacteriological and medico-legal work). There are also occasional vacancies for specialists in biochemistry for medical and other Departments as well as for geological chemists. Initial salaries vary between £400 and £600.

## GEOLOGICAL.

Vacancies are not of very frequent occurrence, and are filled when they occur.

Candidates should be between the ages of 21½ and 35. They should possess a University Degree, preferably with Honours, ensuring a good general knowledge of geology, and also have carried out independent field investigations.

Commencing salaries vary from £480 to £600.

## MINING.

Vacancies are not of very frequent occurrence, and are filled when they occur.

The age limits are 21½ to 35.

Candidates should usually hold a Diploma of a British School of Mines or a degree in Mining of a British University. Practical experience of metalliferous mining may be required, though candidates are sometimes appointed immediately after graduation.

Commencing salaries vary from £480 to £560.

## SURVEY.

The annual number of vacancies for Survey Probationers before 1931 varied considerably but about 12 were expected annually. In 1931 only three were filled, and none in 1932 and 1933.

Selections are usually made during May and June.

Candidates must normally be not less than 21 and under 28. They should either be in possession of an Honours Degree in mathematics, physical sciences, or engineering, or certain other equivalent qualifications, or may in certain cases, qualify at a special examination which is normally held annually in March.

Completed application forms must be submitted before January 1st by candidates who would be required to take this examination and before April 1st by other candidates.

Selected candidates usually undergo a 6 to 8 months' course of training under the Ordnance Survey Office, Southampton, followed in some cases by a year's training at Cambridge. During these courses allowances are paid at the rate of £50 a quarter at Southampton and £75 a term at Cambridge. Commencing salaries vary from £400 to £480.

## METEOROLOGICAL.

Vacancies occasionally arise in Colonial Meteorological Services and Observatories. Candidates should usually be under 30 years of age and hold a good Honours degree in Mathematics or Physics. Before taking up their duties selected candidates may be required to undergo a course of training in meteorological work of about six months duration in this country during which an allowance is paid to them.

## ARCHAEOLOGICAL AND ETHNOGRAPHICAL.

Vacancies of this nature are rare, but the Secretary of State may occasionally be asked to select a trained Archaeologist or Anthropologist for Museum appointment.

### ECCLESIASTICAL.

The Secretary of State is rarely called upon to fill an Ecclesiastical appointment. If a post falls vacant a candidate is selected in some special manner with particular reference to the requirements and circumstances of the Office.

No list of candidates is kept at the Colonial Office.

### HARBOURMASTERSHIPS.

Vacancies occur very infrequently for Port Officers or Harbourmasters.

Candidates for such appointments must either—(1) have held a commission in the Royal Navy, or (2) have held a Master's or extra Master's certificate, and be an officer of the Royal Naval Reserve.

The conditions of these posts vary too much for general information to be given. The better paid posts are, however, usually filled by promotion from within the Colonial Service.

### IMMIGRATION.

Very rarely a vacancy may occur in the Immigration Department of a Colony which provides facilities for the immigration of natives of India.

Persons possessing a competent knowledge of one or more Indian languages are at liberty to apply to the Director of Recruitment, if they wish their names to be noted for consideration in case such a vacancy should occur.

### AVIATION.

The openings in connection with aviation in the Colonial Service are at present limited. Should any vacancy occur the Air Ministry would probably be asked to advise as to the selection of a suitable candidate. No list of candidates is kept in the Colonial Office.

### PERSONAL STAFF.

Appointments, such as those of Private Secretary and Aide-de-Camp, on the personal staff of the Governor of a Colony are made by the Governor concerned. It occasionally happens, however, that a Governor asks the Secretary of State to recommend a suitable officer to act in such a capacity. A candidate who wishes his name to be noted for consideration, in the event of such a request being made, should apply in writing to the Director of Recruitment (Colonial Service). As a rule only unmarried candidates are selected for such appointments. Previous experience in a similar position is valuable, but not as a rule essential. For appointment as Aide-de-Camp an officer, or sometimes an ex-officer, of H.M. Forces is usually selected.

### OTHER APPOINTMENTS.

Vacancies in Departments, other than those already mentioned, may occasionally occur. Owing to their diversity, however, it is not possible to give any general account of the qualifications which might be required.

## (II) APPOINTMENTS IN THE COLONIAL SERVICE WHICH ARE FILLED BY THE CROWN AGENTS FOR THE COLONIES.

The appointments mentioned in the paragraphs which follow are filled, as and when vacancies occur, by the *Crown Agents for the Colonies*, 4, *Millbank*, S.W.1., from whom further details may be obtained on request. Owing to the prevailing economic situation the number of vacancies to be filled in 1933 was considerably reduced, and it is feared that this reduction in the number of vacancies must be expected to continue or the present.

Officers selected to fill the following appointments are engaged under agreement for temporary service.

### CIVIL, MECHANICAL AND ELECTRICAL ENGINEERING.

The majority of vacancies occur in West Africa, East Africa and Malaya.

The commencing salaries vary from approximately £480 to £800 per annum.

Candidates should be between 23 and 35 years of age except for Probationary Assistant Telegraph Engineers, who are required to be between 22 and 28.

The qualifications required are as follows:—

Chest measurement must be in proportion to height, with good expansion.

Candidates for all the above police appointments must be of good education.

## (III) APPOINTMENTS WHICH ARE FILLED BY OPEN COMPETITIVE EXAMINATION.

## CEYLON CADETSHIPS.

Administrative officers for Ceylon have hitherto been recruited annually on the results of the open competitive examination held annually by the Civil Service Commissioners for appointments in the Home, Northern Ireland and Indian Civil Services and for Eastern Cadetships (including Cadetships in Malaya and Hong Kong prior to 1932 (see page 582 above). The future method of recruitment for the Civil Service of Ceylon is under consideration, and the recruitment of European officers for that Service is at present suspended.

European candidates for Ceylon were required to be natural-born British subjects of pure European descent. The age limits are from 22-24. The examination is held in July and August and full information about it can be obtained from the *Civil Service Commissioners, 2, Burlington Gardens, W.1*. An examination is held simultaneously in Ceylon for the convenience of Ceylonese candidates for the Ceylon Civil Service, who may also, however, sit for the examination in the United Kingdom.

At the present time Cadets receive a salary of £400 a year, increasing to £450 on passing the prescribed examination locally. Thereafter the salary scheme is:—Class IV, £500-£40-£700; Class III, £760-£40-£1,000; Class II, £1,050-£50-£1,300; Class I, the salaries of officers range between £1,400 and £1,700 a year; above that there are special appointments (not necessarily reserved for Cadets) with salaries ranging between £1,800 and £2,400.

Information about the method of appointment hitherto in force and the terms of service and conditions of life in Ceylon are contained in the memorandum Eastern No. 68—Ceylon Cadetships which can be obtained on written request to the *Director of Recruitment (Colonial Service), Colonial Office, 2, Richmond Terrace, Whitehall, S.W.1*, but applications for Ceylon Cadetships should not be addressed to the Director of Recruitment, but to the *Civil Service Commissioners*.

## PART IV.

**RECORD of the Public Services of Officers of the several Dominion or Colonial Governments and other persons connected with the Dominions or Colonies.**

The titles of "His Excellency," "His Honour," are to save space, not inserted in the following records of services.

A Governor General is styled "His Excellency" and his wife "Her Excellency." A Governor is styled "His Excellency" while actually administering a Government and an Officer Administering a Government in the absence of a Governor General or Governor is entitled to be similarly styled.

The designation of a Lieutenant Governor in a Canadian Province is "His Honour," and this is the customary designation of a Lieutenant Governor or Administrator. But the Administrators of the several Provinces of the Union of South Africa are styled "The Honourable."

Judges of Supreme Courts in His Majesty's Self-Governing Dominions are styled "The Honourable." In Colonies, etc., they usually bear the local designation of "His Honour."

The title of "Honourable" is given for life to all Members of the King's Privy Council for Canada.

In His Majesty's Self-Governing Dominions the title of "Honourable" is borne during tenure of office by all members of Executive Councils, by all members of Legislative Councils (other than Legislative Councils of Provinces of Canada) and by the Speaker of the Lower House of the Legislatures; also by Senators of the Dominion of Canada and the Union of South Africa. It is also used locally by Members of the Executive and Legislative Councils of all Crown Colonies, etc., but not by Members of the Legislative Councils of the Presidencies of the Leeward Islands.

The following in His Majesty's Self-Governing Dominions are eligible to be recommended to retain the title of "Honourable":—Retiring Executive Councillors who have served for at least three years as Minister or one year as Prime Minister. Presidents of the Senates and Legislative Councils and Speakers of the Legislative Assemblies on quitting office after having served three years in their respective offices. Senators and Members of the Legislative Councils on retirement or resignation after a continuous service therein for not less than 10 years. Judges of Supreme Courts on retirement.

Owing to the increasing pressure on their space, the Editors have been compelled to abbreviate the records of service as much as possible, and for the same reason it is impossible to continue to publish the record of an officer's services after his retirement unless he has received the honour of Knighthood.

Officers are requested to furnish prompt information of any errors or deficiencies in the record.

Insertion or correction of records in next year's list cannot be guaranteed unless particulars are forwarded in time to reach the Editors not later than 31st December.

\* Records of officers of whose death the Editors have been informed while the sheets have been going through the Press are marked with an asterisk.
